School—2 story and base, brick, \$50,000. Los Angeles, Cal. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owners, City of Los Angeles. The building will contain ten class rooms and an auditorium seating 400. There will be a central heating plant. The exterior of the building will be faced with cement plaster. The plans are complete and figures will be opened by the Board of Education on March 14th.

School—2 story and base, concrete. Cost not stated. Riverside, Riverside Co., Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Roman Catholic Church. The building will be 64x76 and will contain six class rooms and a large auditorium. There will be steam heat. The exterior will be faced with cement plaster. The building is the first of a group of four buildings which are to be erected at this site. The plans are now being prepared.

School—2 story and base, frame. Cost not stated. Anaheim, Orange Co., Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Roman Catholic Church. The building will be 104x55 feet and will be designed for a convent. There will be six class rooms, music rooms and dormitories. There will be steam heat. The exterior of the building will be covered with cement plaster. The architect is preparing the plans.

Stores and Apartments—2 story and base, brick, \$25,000. Long Beach, Los Angeles Co., Cal. Architects, Austin & Sedgwick, Is Locust Ave., Long Beach. Owner, W. L. Campbell. The building will be 75x90 feet. The first floor will be arranged for three retail stores. The upper floors will contain ten living apartments. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Brewery—3 story and base, brick and steel. Cost not stated. San Diego,

Cal. Architect, Richard Griesser, Chicago. Owners, Bay City Brewing Co., San Diego. The owners announce that the plans for this improvement have been completed and that figures are now being taken. The exterior will be faced with pressed brick. The plans for a large bottling plant are also being drawn.

Stores and Rooms—2 story and base, brick. Cost not stated. San Fernando, Los Angeles Co., Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, Henry Flynn. The building will be 56x92 feet. There will be stores on the first floor and 15 rooms and 6 baths on the upper floor. There will be a freight elevator and steam heat. The exterior of the building will be faced with pressed brick. Bids are now being taken.

Contracts Awarded.

Apartment House—3 story and base, brick, \$50,000. Los Angeles, Cal. Architect's name not given. Owner, E. R. Potter, Contractors, C. F. Borton & Co., Union Trust Bldg., L. A. Contract price, \$50,000.

Bank Head—Stone and concrete. Long Beach, Los Angeles Co., Cal. City Engineer, Long Beach. Owners, City of Long Beach. Contractor, Charles Stansbury, H. W. Hellman Bldg., L. A. Contract price, \$73,000.

Factory—1 story and base, brick and steel, \$30,000. Huntington Beach, Los Angeles Co., Cal. Architect's name not given. Owners, Holly Sugar Factory. Contractor, Carl Leonardt, H. W. Hellman Bldg., L. A. Contract price, \$30,000.

Garage—1 story and base, brick, \$15,000. Santa Monica, Los Angeles Co., Cal. Architect, none. Owner, C. W. Valiant. Contractor, James T. Peasgood, 2651 Hill St., Santa Monica. Contract price, \$15,000.

Garage—2 story and base, concrete and frame, \$12,000. Beverly Hills, Los Angeles Co., Cal. Architect, Elmer Grey, Wright and Callender Bldg., L. A. Owners, Rodeo Land and Water Co., Contractor, Charles A. Poulson, 1739 Magnolia Ave., L. A. Contract price, \$12,000.

Hotel—8 story and base, reinforced concrete, \$100,000. Los Angeles, Cal. Architect, W. J. Saunders. Wright and Callender Bldg., L. A. Owner, F. W. Braun. Contractors, Barber-Bradley Construction Co., 1824 East 15th St., L. A. Contract price, \$100,000.

Hotel—3 story and base, brick, \$16,000. Los Angeles, Cal. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owner, Mrs. H. W. Little. Contractor, James A. Watt, 1265 West 22nd St., L. A. Contract price, \$15,757.

Hotel—11 story and base, reinforced concrete, \$700,000. Los Angeles, Cal. Architect, Harrison Albright, Laughlin Bldg., L. A. Owner, E. P. Clark. Contractors, F. O. Engstrom Co., Fifth and Seaton Sts., L. A. Contract price, \$645,197. Note: The contract does not include elevators and electric fixtures.

School—1 story and base, frame, \$12,000. San Gabriel, Los Angeles Co., Cal. Architect, Paul V. Tuttle, L. A. Owners, San Gabriel School District. Contractors, Anderson & Murdock, Glendale, general construction. Contract price, \$16,710. Machinery and Electric Co., L. A., heating and ventilating, \$823.

Business College—2 story and base, brick, \$15,000. Los Angeles, Cal. Architects, Milwaukee Building Co.,

Wright and Callender Bldg., L. A. Owners, Holman Business College. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price, \$15,000.

SEATTLE AND WASHINGTON.

Temple of Justice—2 story and base. Class A construction, \$550,000. Olympia, Wash. Architects, Wilder & White, New York City. Owners, State of Washington. Contractor, Hans Pederson, Madison Bldg., Seattle. Contract price, \$219,650. For a complete list of the figures submitted on this work see under Court Houses in this issue.

Bridges—Concrete and steel. Cost not stated. Chehalis, Wash. Engineer, County Surveyor, Montesano. Owners, Chehalis County. All bids for the construction of two bridges have been rejected. The work will be done under the direction of A. L. Preston, County Superintendent of Bridges.

School—2 story and base, brick and concrete, \$25,000. Ione, Wash. Architect, R. C. Swett, Spokane. Owners, City of Ione. The architect has just been selected to prepare plans for this work and other than the fact that the building will be of the brick type no details can be given. Working drawings are now being prepared and bids will be called for shortly.

School—3 story and base, brick and steel, \$60,000. Newport, Wash. Architects, C. Lewis Wilson & Co., Northern Bank Bldg., Seattle. Owners, City of Newport. The building has been designed for a high school. There will be in the neighborhood of eight class rooms and a large auditorium. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans will be out for figures about March 15th.

Water System—\$200,000. Centralia, Wash. Engineer, Frank C. Kelsey, Centralia. Owners, City of Centralia. The report of the engineer has been approved by the Trustees and the matter is to be brought up before the voters for approval. The plans provide for fourteen miles of 16-inch and 18-inch pipe. There is a strong element in favor of a municipal water plant and the work will undoubtedly be started at once.

Contracts Awarded.

Factory Additions—2 story addition, brick and steel, \$50,000. Seattle, Wash. Architects, Blackwell & Baker, Northern Bank and Trust Bldg., Seattle. Owners, Washington Shoe Manufacturing Co. Contractors, Manhattan Construction Co., Central Bldg., Seattle. Contract price, \$50,000.

Post Office—2 story attic and base, brick and steel, \$150,000. Walla Walla, Wash. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. Contractors, Dieter-Wenzel Construction Co., Wichita, Kan. Contract price, \$150,000.

School—2 story and base, brick, \$40,000 each. Salem, Ore. Architect, Fred Legg, Salem. Owners, City of Salem. Contractor, W. D. Pugh, Salem. Contract price, \$38,534 each. This contract does not include the heating.

Stores—3 story and base brick and frame, \$30,000. Seattle, Wash. Architects, Saunders & Lawton, Alaska Bldg., Seattle. Owners, Bonney-Watson Co. Contractors, Megarth Construction Co., Northern Bank Bldg., Seattle. Contract price, \$27,760.

PORTLAND AND OREGON.

Post Office—2 story and base, brick and stone. Cost not stated. Pendleton, Ore. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. This building was out for figures last September, but all bids were rejected. Revised plans have been completed and new figures will be called for at once.

Hospital—3 story and base, stone. Cost not stated. Baker City, Ore. Architect, M. P. White, Baker City. Owners, St. Elizabeth's Hospital. The plans for this building, which has been mentioned here before, are complete and can be secured from the architect or from the Portland Builders' Exchange. There will be steam heat and elevator service. The exterior of the building will be faced with Pleasant Valley stone, a local product. Bids were opened on March 4th.

School Dormitory—2 story and base, brick, \$50,000. Monmouth, Ore. Architects, Doyle, Patterson & Beach, Portland. Owners, Oregon State Normal School. The architects have just been commissioned to prepare plans for a building to accommodate 70 students. There will be steam heat. The exterior of the building will probably be faced with pressed brick. The complete details of the building will be published later. The architects have only started the preliminary drawings.

School—2 story and base, brick. Cost not stated. Athena, Ore. Architect, E. E. McClarnan, Portland. Owners, City of Athena. The building will be 75x130 feet. There will be 16 class rooms and an auditorium. The building will have steam heat and a modern system of ventilation. There will be special rooms in the basement for manual training and domestic science. The exterior of the building will be faced with pressed brick. The plans will be completed in the course of the next few weeks and figures will be called.

Contract Awarded.

Hotel—1 story and base, brick and steel, \$100,000. Portland, Ore. Architects, Bonnes & Hendricks, Portland. Owner, B. Hagedorn. Contractors, J. S. Winters & Co., Portland. Contract price, \$40,000.

Library—1 story and base, concrete and brick, \$20,000. Forest Grove, Ore. Architects, Whidden & Lewis, Portland. Owners, Pacific University. Contractors, J. F. Wineland Engineering Co., Portland. Contract price, \$20,000.

MR. ARCHITECT:

You are keen for every improvement in the building line. You want to save money for your client and give him the best.

You want to protect him from damage suits. In window construction you can save him money by specifying the Simplex, because it is cheaper than the common double hung.

No damage suits from window cleaners, because the Simplex is reversible.

The common double hung is out of date. The Simplex is manufactured in 49 different varieties.

Send for details. Simplex Window Co., 62 Post St.

Editorial Comment.

What complications may still impede the work of the Directors of the Exposition are not known to the general public. So far there has been no active work done and just the state of affairs as they stand can not be ascertained. It is said that everything is all right and affairs are now ahead of schedule time as compared with other expositions. But the time is ripe for action and the people generally would like to see something doing.

In some respects the Fair Directors would do well to take the people into their confidence in matters in which all are so vitally interested.

Public criticism was made of the banquets that were tendered celebrities who happened to come along, the people who made the criticism supposing the funds of the exposition were being used for that purpose. The officials stated that these expenses were borne by them personally and presumed that everybody knew it. The fact is that everybody knew nothing about it and all kinds of rumors naturally got afloat which nobody could confirm or deny. When the preliminaries are all settled we hope to see publicity attend the general work of the Fair construction.

The situation in the British coal strike is becoming serious, according to reports. The present state of things can not last long and before long no doubt the government will have to take a hand.

It is indeed a significant index of the changed order of things that the Prime Minister of England should advocate a minimum wage scale. If Bryan or any other popular leader had advocated such a thing in this country fifteen or twenty years ago he would have been called an anarchist and demagogue of the deepest dye. Now in conservative England, the birthplace of the common law and the steadfast adherent to precedent, we find more radical measures advocated than have yet been promulgated in this country.

The world generally is coming to recognize that human rights are as sacred as property rights. That the basis upon which the economic structure rests can as well allow a living to the humblest citizen as otherwise, provided all industries stand on an equal footing. If the coal miner and the textile worker can not be paid enough wage upon which to live then the price of the commodity must be raised to the rest of society. The trouble has been that the profit from these great industrial enterprises has been gobbled by the rich and powerful, dividends have been paid on watered stock and fictitious capital

that never went into the enterprise, and the financial pirates have reaped the product of the toil of the poor and defenseless.

Industrial wars are almost as bad as any other kind of war. But only after such struggles are readjustments made and more just conditions established. To remedy these evils conditions must be known and the actual state of facts can be ascertained only after impartial investigation.

Perhaps no feature of industrial activity and development has been more active or is now more active than the development of hydro-electric power. Nearly every week for the past two years news concerning the formation of some new company or the consolidation of existing companies here in California has been published till one begins to wonder if all available water power of the country has been appropriated. Soon the force of gravity will be harnessed in the shape of falling water to such an extent that the wheels of industry and transportation generally will be turned by the cascades in the far distant mountains. Here in the west where the highlands tower into the region of perpetual snow we are peculiarly fortunate in having a practically constant water supply for power purposes and all the fall to turn the wheels of power plants for hundreds of miles. In the east and the great valley of the Mississippi the situation is different. There the level leagues stretch for thousands of miles with scarce enough fall to the streams to turn a millwheel. But there are some exceptions and the success of the great power plants that have been constructed have prompted the construction of plants larger than any now in existence. At Keokuk Iowa, a great power plant is now in course of construction where a great dam is now being thrown entirely across the Mississippi river. It will be the largest hydro-electric plant known.

Recent dispatches from Montreal, Lower Canada state that a company has been formed for the construction of a one million-horsepower plant, by damming the water which now flows through the Coteau Cascade, Split Rock and Cedar Rapids, from Lake St. Francis to Lake St. Louis and the St. Lawrence River. The Rapids will be obliterated and the flow of the waterway will be diverted about half a mile from its present course into the Ottawa. The water will be impounded by means of a system of earthen embankments and concrete dams.

Heretofore fuel has been the source of energy employed for man's uses. Now the universal force of gravity is being transformed into light and heat and power to accommodate the purposes of mankind in the varied and complex relations of life.

Recent Developments In Paint Technology As Applied To Building Construction.

From a Paper on Paint, Read Before the Forty-Fifth Annual Convention of the American Institute of Architects by Henry A. Gardner, Assistant Director of the Institute of Industrial Research. Reprinted from "Construction."

(Continued from last week.)

Paints for Interior of Dwellings and Buildings.—The proper decoration of the interior of dwellings and public buildings has become of even greater importance than the protection and decoration of exteriors. There is, moreover, an increased demand for harmonious effects and the production of more sanitary conditions than have prevailed in the past. Up until a few years ago, a great variety of wall papers of more or less pleasing appearance were almost exclusively used for the decoration of walls in the interior of buildings, and their application was commonly considered the most effective means of wall decoration. There seems to be no question, however, that the use of wall paper is steadily decreasing, and that the art of interior decoration is undergoing a transition to the almost universal use of paint.

Modern process demands the maintenance of sanitary conditions for the benefit of the public welfare, and there is no doubt that from the standpoint of sanitation and hygiene, properly painted wall surfaces are far superior to papered walls. There is an abundance of evidence which shows that dust germs may easily be harbored, and thus germs transmitted from wall paper. In the tenement houses which are common to the larger cities, and to a lesser extent in the dwellings found in smaller communities, where tenants are more or less transient, the continued maintenance of sanitary conditions presents a difficult problem. Infections and epidemic illnesses generally leave behind bacteria of different types, which may find a culture medium in the fibrous and porous surfaces presented by wall paper, backed up as they invariably must be by starch, casein or other organic pastes. Occasionally the restriction of local boards of health provide in such events for proper fumigation, but too often no precautions are taken to destroy the disease germs which are caught in the dust which collects on wall paper. As a rule, both tenant and landlord are oblivious to all conditions which cannot be readily seen or detected. Burning sulphur, one of the most effective means of fumigation, will generally cause bleaching and consequent fading of the delicate colors used in printing the designs upon wall paper. Washing of the paper with antiseptic solutions will destroy its adhesiveness to the plaster and often cause bulging and general destruction.

HOSPITAL INTERIORS.—In hospitals, where it is necessary to maintain sanitary conditions, the walls are invariably painted, and requirements should demand the use of paints which can be washed frequently, so that there will be no possibility of uncleanness. Inquiry made of a prominent surgeon connected with one of the large metropolitan hospitals substantiated the writer's findings regarding the greater sanitary value of wall paints, and brought forth the information that in hospitals under construction provision had been made for the finishing of walls

so that a hard, non-absorbent and washable surface might be obtained. The same authority stated that the common practice in apartments and tenements, of covering the old wall paper over with a layer of new, each time a tenant moved in, should be condemned, and that from a hygienic standpoint the use of sanitary wall paints should be advocated in all dwellings as well as public buildings.

If such conditions are maintained in hospitals, where special attention is paid to sanitation, it would appear that similar precautions should be equally as necessary in public buildings and in dwellings—wherever, in fact, people congregate to live.

Sanitary Wall Paints.—Cold water paints or Kalsomines should not be used, as they often contain glue, casein, acetone and other binders which are easily destroyed. Oil paints which are thinned with turpentine and other volatile spirits, are the only real sanitary paints to use. There have recently appeared in trade a number of wall paints composed of non-poisonous pigments ground in paint vehicles having valuable water-proofing and binding properties, and of a nature to produce the flat or semi-flat finish that has become so popular. Such paints produce a sanitary, waterproof surface, which permits of frequent washing. By their use it is possible to secure a more permanent and wider range of tints than can be obtained with wall paper, as they are produced in a myriad of shades, tints and solid colors, from which any desired combination can be decorated with such paints, attractive stencil designs, which bring out in relief the color combinations may be applied.

For the decoration of chambers and living rooms, delicate French grays, light buffs, cream tints and ivory whites may be used, while in the library and other rooms richer and more solid colors, such as greens, reds and blues, may be harmoniously combined.

Defects of Wall Paper.—It recently occurred to the writer to investigate the conditions which obtain in many apartment houses in the larger cities. Inspection of a number of such places, in which wall paper had been exclusively used on the walls, showed generally bad conditions; bulging of the surfaces, caused by dampness in the walls, which had loosened up the binder, as well as peeling and dropping of the paper from the ceiling, were frequently observed. In many cases a shabby appearance was shown, accompanied by an odor which suggested decomposition of the paste binder used the paper. The writer was impressed with the fact that such conditions could easily be avoided by the very simple expedient of using properly manufactured wall paints, which are so easily made dustproof and waterproof.

Samples of wall paper, which had been applied to plastered walls for a year or more, were obtained and examination under the microscope showed a most uncleanly surface. Cultures were

made of these samples, and bacteria of different types were developed in the culture medium in a short time.

Experimental Evidence.—That the above conditions could not have existed, had proper wall paints been used, seemed doubtless, and suggested a carefully conducted experiment to prove the relative sanitary values of wall paper and wall paints. A large sheet of shure board, such as is occasionally used to replace plastered walls, was painted on one side with a high-grade wall paint, three-coat work. A similar sheet was papered on one side with a clean, new wall paper. These test panels were placed where unsanitary conditions, such as dampness, foul odors, and a scarcity of air were present. After a short period of exposure, the panels were taken to the bacteriological laboratory, and a small section of the painted surface, about two inches square, as well as a small section of the papered surface of similar size, were removed and used for making cultures. In each case the surface of the section under test was washed with 100 c.c. of distilled, sterilized water. The washings, which dripped from the surface, were collected in a graduated flask. One c.c. of the washings was used in each case, admixed with bullion and again with agar agar. The enormous development of bacteria in the bullion, treated with the washings from the wall papered surface, was sufficient evidence to convince one of the greater sanitary value of the wall paint, the washings from which gave a culture practically free from bacteria. The colonies of bacteria shown in the petri dish made of the washings from wall paper further supports these findings. It will be noticed that the tests made from the washings of the wall paint show a practical absence of bacteria, and was clear, as was the bullion-solution test of paint. The washings from the wall paper showed active development of bacteria, both in the bullion and agar tests.

From the Conservation Standpoint.—It would be of interest to sum up in figures the acreage and cordage of wood that annually is transformed into pulp for the manufacture of wall paper. Unfortunately there are no available statistics on this subject. It is clear, however, that from the standpoint of conservation the use of wall paints should take precedence over the use of wall paper.

Paints for the Prevention of Corrosion of Iron.—The protection of structural steel is a subject that most painters have in the past considered of minor importance; any paint that would properly hide the surface of the metal being accepted without much question. The demand, however, for structural steel for office buildings, factories, steel cars, railroad equipment, etc., has doubled the output of structural paints, and created a demand for painters having a knowledge of the proper materials to use in the painting of steel, so that its life may be preserved, and its strength maintained. Such knowledge is as im-

portant to the painter as a knowledge of how to properly select materials for the painting of wood, and how to temper these materials to suit the various conditions met with.

Everyone is familiar with the appearance of rust, but few actually understand what causes rust. No attempt will be made here to present even an outline of the many theories advanced to explain the phenomenon of the rusting of iron, for the subject is as diverse as it is interesting. A brief resume, however, will be given of the now generally accepted theory that explains the subject. This theory is called the electrolytic theory.

"Auto-electrolysis" is the term used to define the peculiar tendency of iron to be transformed from a metal possessing a hard lustrous surface, high tensile strength, and other useful properties, to a crumbling oxide that falls to the ground and again becomes part of the earth from which it was originally taken by man.

This "going back to nature" is more readily accomplished by most of the steel produced today than by the old hand-made irons produced many years ago. It seems to be a curious fact that the more quickly a product or an article is fashioned by man, the more quickly it tends to return again to its original oxidized condition. Some manufacturers of steel, however, through an understanding of the causes of rust, have progressed in the manufacture of slow-rusting materials, either by the elimination or by the proper distribution of impurities.

When iron is brought into contact with moisture, currents of electricity flow over the surface of the iron between the points that are relatively pure and points that contain impurities. These currents stimulate the natural tendency of the iron to go into solution, and the solution proceeds with vigor at the positive points. The air which the water contains oxidizes the iron which has gone into solution, and precipitates the brown iron rust with which you are all familiar. Thus water, which acts as an acid, and air, which acts as an oxidizer, have combined together to accomplish the downfall of the metal. It is obvious that if means could be devised to stop the solution pressure of iron, and make it resistant to the flow of surface electric currents, rust could be prevented. Materials which prevent the rusting of iron have been called by Dr. Cushman, who first advanced these explanations, rust inhibitors, or materials which inhibit rust. The paint maker, realizing the importance of these rust inhibitors is incorporating them into paints designed for the protection of iron and steel, and the success which paints of this type have met with from a practical standpoint, is a justification of what was first called the electrolytic theory which suggested their use. The laws of electrolytic corrosion would be a better way of stating what have become facts, and these laws are adirect result of the early pioneer researches of Dr. Cushman, who was formerly for many years in the Government service, but who is now the director of the Institute of Industrial Research in Washington. By placing small, brightly-polished steel plates into a mush of paint pigment and water, a determination may be made of the pigment's effect upon the metal. Some pigments

under such conditions cause rapid corrosion of the steel plates. Such pigments are stimulators of corrosion on account of acid impurities which they contain, or because of their effect in stimulating galvanic currents. Many carbonaceous pigments are of this type. Other pigments have the effect of keeping bright the steel plates and preventing rust. Such pigments are of the inhibitive type, and their action is to check or retard the solution pressure of the iron.

Results obtained in many laboratory tests suggested a practical exposure test, and a series of 30 large steel plates were exposed by the writer, acting under the American Society for Testing Materials, at Atlantic City where the action of the salt air is severe on both paint and metal. In these tests separate plates were painted with nearly all the useful paint pigments, ground in a vehicle of raw and boiled linseed oil. Later in the test it was found that many pigments of the carbonaceous type, as well as those which contained acid impurities, were showing bad results. It was also found that pigments of the inhibitive type, such as chromates of lead, zinc barium, etc., acted in an almost miraculous way, transforming the surface of the metal upon which they were applied into a practically uncorroded condition.

The excessive chalking which took place on the corroded white lead coatings began to disappear at the end of a year, being washed away by the rains and carried away by the winds, so that there was left upon the surface thin coatings of pigments, in sufficient to give good protection. Had this white lead been reinforced with sufficient zinc oxide to prevent chalking, much better results would no doubt have been obtained.

The deep cracking of the zinc oxide indicated that such a pigment required a large quantity of oil in order to satisfy its brittle nature, and prevent such effects. White paints containing zinc oxide and zinc oxide products were in excellent condition, and they confirm preliminary tests which showed zinc oxide to be one of the most valuable pigments for protecting iron.

Although sublimed white and blue leads chalked very heavily, the chalked pigment seemed to be tenacious, and adhered to the plate, presenting a good surface with absence of rust. Both these pigments gave very good protection to steel. When admixed in the right proportion with certain other pigments, they still give better results.

Lithophone was early destroyed as is usual with the pigment when used alone on exterior surfaces. It became rough and discolored, presenting a very blotchy appearance. Red lead and orange mineral both afforded excellent protection to the plates upon which they were applied. They became, conversely, however, after exposure, with a white coating of carbonate of lead, which was due to the action of the carbonic acid of the atmosphere on the red lead, which is an oxide of lead, and susceptible to chemical action.

The iron oxide gave fair service indeed. In one case, however, there were several eruptions, indicating slight corrosion beneath the surface of the paint. One iron oxide which did wonderfully well was the black oxide of iron which not only possesses great tinting value, but up to the present time has had a

high protective value. The graphite was very deeply pitted at certain spots, indicating that galvanic currents had been set up, causing stimulating effects. Barites and blanc fixe, when used alone, gave very poor service, showing scaling, chalking, disintegration, and rust soon after the test was started. Barites, combined with some other pigments, however, presented a very good surface. Under the paint film of gypsum rust soon appeared, and although the film itself remained fairly intact, rusting progressed throughout the test, indicating that gypsum films were very poor excluders of moisture. Coal tar paints failed in the test, and this was due, no doubt, to the strong action of the sun, which early destroys such products. China clay and asphaltum gave excellent service for eighteen months. After that time, however, indications of corrosion were shown, and the apparent break down of the film was predicted. These pigments, however, combined with other pigments, have given excellent service.

American vermillion, zinc chromate, zinc-and-barium chromate, chrome green, Prussian blue, and zinc-and-lead chromate gave most wonderful service, presenting an appearance within two years that was almost identical with their appearance at the start of the test. These pigments, with red lead, zinc oxide, litharge, sublimed leads, and combinations of lead and zinc, without charcoal, neutral oxides of iron and the inert pigments, will allow the design of paints of nearly any color. From their admixture properly adapted with a good paint vehicle, and tested by the expert, will come the final solution of the problem that has bothered painters and engineers for so many years. The vehicle for such paints should be made of linseed oil with or without the addition of treated linseed oils, linseed oil, fossil gums, until some time as a modern research has found a vehicle more suitable.—Reprinted from Construction.

According to the newspaper reports Carnegie financed the Roosevelt expedition to Africa. That it has been reluctantly admitted by Carnegie's agent. From now on we may expect to see so many things reluctantly admitted that there will be little left of reluctance among the class that usually give up their money with a whole lot of this same reluctance. If the Colonel was to answer all these allegations he would need three or four private secretaries.

Roosevelt's reply to Stimson is certainly clear cut and definite. He rightly says that Stimson owes him no gratitude for what he did nor does he owe Stimson any. That public services are for the public good and the political obligation resting upon him for another man's support have nothing to do with the merits of the case.

So far the "splendid record" of President Taft has produced no epigrams from the chief executive, no act of the chief executive that will live in history, showing him to be the champion of anything that is distinctly American. On the contrary the whole administration has been one of compromise and apologies for this or that officer of his appointment till he has finally lined up with the class where his sympathies have always been.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco—Apartment house, 1 story and base, brick and steel, \$50,000. Architect none. Owner, O. M. Curbish, 519 Hayes St., S. F. The building will be 100x40 feet. The plans provide for stores on the first floor and in the neighborhood of 80 rooms on the upper three floors. There will be private baths, wall beds, steam heat and elevator service. The interior will be finished in pine with some hardwood floors. The exterior of the building will be faced with pressed brick. The plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Apartment house, 3 story and base, frame, \$10,000. Architect, J. F. Dunn, Monadnock Bldg., S. F. Owner, Phillip Yager. The building will be 25x80 feet and will contain 6 apartments of three rooms and bath each. There will be pine interior finish, wall beds and open fire places. The exterior of the building will be covered with brick veneer and shiplap. The plans are complete and the work will be done by Day Labor.

San Francisco—Apartment house, 3 story and base, frame, \$10,000. Architect none. Owner, W. W. Yager, 1429 Hyde St., S. F. The building will cover an area of 25x75 feet and will contain 6 three-room apartments with connecting baths. There will be steam heat and wall beds. The interior finish will be of pine with some hardwood floors. The exterior of the building will be covered with brick veneer and shiplap. The plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Apartment house, 3 story and base, frame, \$8,000. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, H. S. Perley. The building will contain 6 apartments of two and three rooms each with connecting baths. The interior finish will be of pine throughout. There will be some oak floors. The exterior of the building will be covered with shiplap and rustic. The plans are complete and the work will be done by Day Labor.

San Francisco—Apartment house, 3 story and base, frame, \$12,000. Architect, E. E. Young, 251 Kearny St., S. F. Owner, D. Herman, D. Hogue. The building will be 40x41 feet and has been designed to contain 9 apartments of three rooms and bath each. There will be steam heat and wall beds. The interior finish will be of pine and hardwood with oak floors throughout. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

San Angeles, Cal.—Apartment house, 2 3-story and base, brick and frame, \$10,000 and \$37,000 each. Architects, California Real Estate and Building Co., 112 South Spring St., L. A. Owners, W. H. Allen and E. R. Hollenbeck. The brick structure will be 17x128 feet and will contain 80 rooms arranged in

suites of two and three rooms each and bath. The frame building will contain 25 suites of 2 and 3 rooms each and baths. Both will be equipped with steam heat and wall beds. The exteriors will be covered with pressed brick and cement plaster. The plans are nearly complete and the work will be done by Day Labor.

Contracts Awarded.

Los Angeles, Cal.—Apartment house, 6 story and base. Class A construction, \$300,000. Architects, Noonan and Kysor, Wright and Callender Bldg., L. A. Owner, Hugh W. Bryson. Contractors, F. O. Engstrom Co., L. A. Contract price, \$300,000. The architects have not completed the working drawings as yet. The building will be 120x138 feet and will contain in the neighborhood of 250 rooms.

Los Angeles, Cal.—Apartment house, 3 story and base, brick, \$35,000. Architect, Robert M. Taylor, Douglas Bldg., Owner, Marcus Landsberg. Contractor, J. M. Thomas, 1070 West 35th St., L. A. Contract price, \$32,250.

Los Angeles, Cal.—Apartment house, 3 story and base, brick, \$25,000. Architect Scott Quintin, Story Bldg., L. A. Owner John N. Thrill. Contractor, Huron E. Reeve, R. P. D. No. 1, Box 83, D. L. A. Contract has been taken on the percentage basis.

Seattle, Wash.—Apartment house, 2 story and base, brick, \$35,000. Architects, Quindt and Creutzer, Haight Bldg., Seattle. Owner, John L. Lang. Contractor, Philip Viehman, 1221 4th Ave., Seattle. Contract price, \$35,000.

BANKS.

Corning, Tehama Co., Cal.—Bank, 2 story and base, brick. Cost not stated. Architect, W. H. Weeks, 251 Kearney St., S. F. Owners, Bank of Corning. The building will cover an area of 30x100 feet. The first floor will contain several stores besides the banking quarters. The second floor has been arranged for offices. The banking rooms will be finished in hardwoods. There will be coin and safety deposit vaults. The exterior of the building will be faced with terra cotta and cement plaster. The plans are now out for figures.

Santa Barbara, Santa Barbara Co., Cal.—Bank, 2 story and base, brick and steel. Cost not stated. Architects, Parkinson and Bergetrom, Security Bldg., L. A. Owners, First National Bank of Santa Barbara. The building will be devoted entirely to the use of the bank. The banking rooms and vaults will occupy the entire first floor. Private offices will be located on the second floor. The interior will be finished in hardwood marble and ornamental iron. Bids are now being taken on the fireproof vaults. Bids will be asked for shortly for the general construction of the building.

BRIDGES AND DAMS.

Contracts Awarded.

East Portland, Ore.—Bridge reinforced concrete, \$85,000. City Engineer, Portland. Owners, City of Portland. Contractors, International Contracting Co., Central Bldg., Seattle. Contract price, \$65,300.

CHURCHES.

San Jacinto, Riverside Co., Cal.—Church, 1 story and base, concrete. Cost not stated. Architects, Walker and Vawter, Wright and Callender Bldg., L. A. Owners, First Methodist Church of San Jacinto. The building will be designed in the Mission style. There will be a main auditorium seating 500, Sunday School with 9 class rooms and a study room. The exterior of the building will be faced with cement plaster. There will be a red tile roof. The architects are ready to receive figures on the work.

Contracts Awarded.

Coffax, Wash.—Church, 1 story and base, brick, \$12,000. Architect, Alpheus Dudley, Cray Bldg., Seattle. Owners, Plymouth Congregational Church of Coffax. Contractor, W. W. Hunter, 502, 29th Ave., North Seattle. Contract price, \$10,000.

FACTORIES & WAREHOUSES.

San Francisco—Factory, 2 story and base, frame, \$10,000. Architects none. Owner, Pacific Tank and Pipe Co., 231 Berry St., S. F. The building will be 50x150 feet. The exterior of the building will be covered with corrugated iron. There will be no interior finish. The plans are complete and figures are being taken.

Los Angeles, Cal.—Warehouse, 2 story and base, brick. Cost not stated. Architect, J. B. Nicholson, Wright and Callender Bldg., L. A. Owner, Mr. Phillips. The building will be 40x120 feet. There will be a steel frame and steel roof trusses. The roof will be of corrugated iron. The exterior walls will be of concrete. There will be fireproof window sash. The plans are complete and figures are being taken.

Contracts Awarded.

Los Angeles, Cal.—Warehouse, 2 story and base, brick, \$15,000. Architect none. Owner, J. Ross Clark. Contractors, Western Building Co., Lankershim Bldg., L. A. Contract price, \$13,000.

FLATS.

San Francisco—Flats and store additions, 3 story frame, addition to one story building. Cost not stated. Architect, William Mosser, Nevada Bank Bldg., S. F. Owner's name withheld. The work will include the construction of a large frame addition to the present building. The first floor will contain stores and the upper floors a number of small flats. The exterior of the building will be covered with brick veneer and shiplap. The plans are complete and figures are being taken.

San Francisco—Flats, 2 story and base, frame, \$2,000. Architect none. Owner, William Miller, 19 West Park St., S. F. The building will contain four flats of four and five rooms each and bath. The structure will cover an area of 25x65 feet. The interior

trim will be of pine. There will be gas grates. The exterior of the building will be covered with brick veneer and shiplap. The plans are complete and the work will be done by Day Labor.

San Francisco.—Flats, 2 story and base, brick, \$6,000. Architects, Wilb and Schaefer, Albany Bldg., Oakland. Owner, Alexander Politzer. The building will be 25x18 feet and have been designed to contain six small flats with baths. The interior finish will be of pine with some hardwood floors. There will be gas grates. The exterior of the building will be faced with white Medina cement plaster. The plans are complete and figures are being taken by the architects.

San Francisco.—Flats, 2 story and base, frame, \$3,000. Architect none. Owner, G. W. Alexander, 125 Silver St., S. F. The building has been arranged for two flats of five and six rooms and bath. The interior trim will be of pine and redwood. There will be modern plumbing throughout. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Flats 2 story and base, frame, \$7,500. Architect, J. H. Russell, Y. M. C. A. Bldg., Berkeley. Owners, Barber and Dooley. The building will contain 10 flats of five and six rooms each with baths. The interior finish will be of pine and redwood. There will be open fire places. The mantels will be of brick and tile. The exterior of the building will be covered with cement plaster on metal lath. There will be a warm air system of heating. The plans are complete and figures are being taken.

Modesto, Stanislaus Co., Cal.—Flats, 2 story and base, frame, \$4,000. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner's name withheld. The building will contain a number of five and six room flats. The interior finish will be of pine. There will be hardwood plaster. The exterior of the building will be covered with rustic. The plans are complete and the architect is taking figures.

GARAGES.

San Jose, Santa Clara Co., Cal.—Garage, 1 story and base, reinforced concrete, \$25,000. Architect, Charles S. McKenzie, Bank of San Jose Bldg., San Jose. Owners, Olsen and McFarland. The building will be 25x33 feet and when complete will be one of the most modern and up-to-date garages in the state. There will be sales rooms, storage and office space and a machine shop. The floors will be of reinforced concrete. The exterior of the building will be faced with cement plaster. The plans are being prepared.

GOVERNMENT WORK AND SUPPLIES.

A bascule or balanced lift span will be placed in the steel girder bridge on which the relocated line of the Panama Railroad crosses the Gatun River, one-half mile north of Monte Lirio, Panama. This will give access to the upper arm of Gatun Lake, which otherwise would be closed to vessels from the canal. Bids have been requested

for the lifting trusses, mechanism, electrical equipment, signals, and other parts for the complete construction and operation under trial of this single-track, single-leaf bascule, which will be erected by the commission under direction of the contractor upon the 1034-foot steel girders now on hand at the crossing of the river. This bridge will be about 318 feet long, composed of three half-through plate girder spans supported upon reinforced concrete piers. The channel piers, which the bascule will span, are 106.23 feet apart, center to center, and between them the channel is excavated to provide for 15 foot depth of water. The bascule will be operated by electricity.

The contract for constructing a shell house at the navy yard, Mare Island, Cal., bids for which were opened on February 17 by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., has been awarded to Tringle, Dunn & Co., San Francisco, Cal., at \$10,775.

Bids will be opened on April 3d for one of the largest orders of building materials ever placed by the government. The supplies and materials are to be used in the construction of the new military post at Honolulu and include the following: Structural steel, reinforcing rods, expanded metal, woven wire fabric, pipe coumors, wrought iron pipe, plumbing fixtures, Portland cement & steel sheets for manufacture of water pipe, Ridding blanks and full information may be obtained from Constructing Quartermaster, Fort Mason, San Francisco.

—Bridges, Dams and Harbor Work.

San Francisco.—Sea Wall rock construction. Cost not stated. Engineering Dept. Panama Pacific International Exposition Co., Exposition Bldg., S. F. Owners, Panama-Pacific International Exposition Co., Contractors, Caldwell and Co., S. F. Contract price not stated.

HALLS & SOCIETY BLDGS.

Palo Alto, Santa Clara Co., Cal.—Fraternity house, 2 story, attic and base, frame, \$11,000. Architect, William Bluder, Bea Bldg., San Jose. Owners, Alpha Omicron Psi. This work has been mentioned here before when the architect was first commissioned to prepare the plans. The working drawings are now complete and figures are being taken. The house will be in the form of a large residence. There will be a central heating plant.

Pasco, Wash.—Lodge hall, 2 story and base, brick, \$25,000. Architects, Van Dusen and Doughty, Pasco. Owners, Knights of Pythias Hall Association. The building will contain stores on the first floor and a large lodge hall and offices on the second floor. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans are complete and bids are being taken by the Secretary of the Hall Association.

Seattle, Wash.—Art Association building, 9 story and base. Class A construction, \$100,000. Architects, Kingsley and Eastman, Empire Bldg., Seattle. Owners, Washington State Art Association. The building will occupy a site 210x129 feet on 4th Ave. The first four floors will be devoted to the Art Association's uses and will include

an auditorium with a seating capacity of 1,500 people. The upper floors will contain about 250 offices. The construction will be absolutely fireproof, with a complete steel frame and exterior walls of brick and reinforced concrete. The exterior will be faced with pressed brick and terra cotta, other details of this big structure will be given in the detail drawings now being given. The architects are working on the detail drawings now. G. L. Berg is the secretary of the Washington State Art Association.

HOSPITALS.

Phoenix, Ariz.—Hospital, 2 story and base, reinforced concrete, \$20,000. Architect, Royal W. Lescher, Phoenix. Owners, Methodist Deaconess Association of Phoenix. The architect has just been commissioned to prepare the plans for this work and no details of the construction can be given at this time. Working drawings will be complete in the course of the next few weeks.

Los Angeles, Cal.—Hospital, 1 story and base, concrete and frame. Cost not stated. County Supt. of Construction, George Low, L. A. Owners, Los Angeles County. This work has been mentioned here before when the plans were first ordered. The drawings have been completed and figures are being taken. Bids will be opened by the Board of Supervisors on March 25th.

HOTELS.

San Francisco.—Hotel additions, 3 story and base, brick. Cost not stated. Architects, George L. Streshley and Co., Ballou Bldg., S. F. Owner's name withheld. The work will include the construction of three additional floors to the present one story and basement brick store building. The addition will contain in the neighborhood of 99 rooms. There will be steam heat and elevator service. The exterior will be faced with pressed brick and cement plaster. Plans are nearly ready for figures.

San Francisco.—Hotel and stores, 3 story and base, brick, \$20,000. Architect, P. J. Patcher, Phelan Bldg., S. F. Owner, Jane Terry. The building will be erected in Sacramento street near Kearny. There will be several stores on the first floor and rooms above. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken. Bids will be opened on March 26th.

San Francisco.—Hotel, 7 story and base, brick and steel, \$200,000. Architect, Frederick H. Meyer, Humboldt Bank Bldg., S. F. Owner, M. Fleischacker. This work has been mentioned here several times before. The plans are now out for figures and a general contract will shortly be awarded. There are five local contractors figuring the work.

Winnemucca, Nev.—Hotel, 2 story and base, brick, \$65,000. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, Mr. Blume, Reno. The building has been designed for a high class commercial hotel. There will be the main office, lobby and dining room on the first floor and a large number of single rooms and baths on the upper floors. There will be hot water heat, two elevators and all other modern conveniences. The exterior of the building will be faced

with pressed brick and terra cotta. The plans are complete and figures are now being taken.

San Bernardino, San Bernardino Co., Cal.—Hotel and stores, 3 story and base, brick and steel. Cost not stated. Architect, F. T. Harris, National Bank Bldg., Redlands. Owner, Joseph Bucher. The building will be 150x100 feet. There will be six stories and the hotel lobby on the first floor. The upper floors will contain 60 rooms and 25 baths. There will be steam heat, elevator service and a vacuum cleaning plant. The exterior of the building will be faced with pressed brick. The plans are ready for figures.

Portland, Ore.—Hotel and stores, 3 story and base, brick. Cost not stated. Architects, Bennes and Hendricks, Portland. Owner, Dr. J. D. Sternberg. The building will be 50x100 feet. The first floor will be arranged for stores and hotel entrance. The upper floors will contain 40 rooms and a number of public and private baths. There will be steam heat. The exterior will be faced with pressed brick. The plans are out for figures.

Contracts Awarded.

Los Angeles, Cal.—Hotel and stores, 3 story and base, brick, \$32,000. Architect, J. B. Nicholson, Wright and Callender Bldg., L. A. Owner, Victor Ponet. Contractor, Charles G. Ross, grosse Bldg., L. A. Contract price, \$32,000.

Los Angeles, Cal.—Hotel and stores, 3 story and base, brick, \$22,000. Architects, Traub and Williams, Exchange Bldg., L. A. Owner, Mrs. Jennie White, Contractors, Alta Planning Mill Co., 830 McGarry St., L. A. Contract price, \$22,000.

Pomona, Los Angeles Co., Cal.—Hotel, 3 story and base, brick, \$50,000. Architect's name not given. Owner, J. A. Fender. Contractors, Noble and Son, 855 North Garey St., Pomona. Contract price, \$49,000.

POST OFFICES.

Santa Barbara, Santa Barbara Co., Cal.—Postoffice, 2 story and base, brick and steel, \$110,000. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. Since the refusal of Contractor A. W. Anson to sign a contract for the construction of this building the Supervising Architect has decided to readvertise for bids. The official advertisement will appear in these columns shortly.

Olympia, Wash.—Postoffice, 2 story story and base, brick and concrete, \$110,000. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. The following bids were received for this work:

Falmer & Matson, Astoria, Ore., \$7,227; J. H. Wiese, Omaha, \$106,000; West Bros., Salem, Ore., \$107,247; Campbell Building Co., Salt Lake City, \$107,807; A. B. Stannard, St. James Bldg., New York City, \$108,000; Sound Construction Co., Lowman Bldg., Seattle, \$111,582; Pearson Construction Co., New York Bldg., Seattle, \$115,539; McLellan-Hickey Co., Globe Bldg., Seattle, \$113,300; George C. Dietrich & Co., Globe Bldg., Seattle, \$115,000; Dieter & Wenzel Construction Co., Wichita, Kans., \$107,247; Smith & Rountree, Bailey Bldg., Seattle, \$116,500; Willin & Watter, Tacoma, \$124,980; Puget Sound B. & D. Co., Central Bldg., Seattle, \$131,595.

RESIDENCES.

San Francisco—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, K. Yuge, 135 Alameda St., S. F. The dwelling has been designed for a six-room house with bath. The interior finish will be of pine. There will be an open fire place with an attractive tile mantel. The exterior of the dwelling will be covered with cement plaster on metal lath and brick veneer. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$3,000. Architect, L. M. Weisman & Son, Pacific Bldg., S. F. Owner, H. J. Weisman. The dwelling will contain seven rooms and bath. The interior finish will be of pine throughout. There will be some oak floors. There will be open fire places and tile mantels. The tile will also be used in the bath and kitchen. The exterior of the house will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence additions and alterations \$3,000. Architects, McNally & McCaw, Mechanics' Institute Bldg., S. F. Owner, Charles Hecker, 516 Castro St., S. F. The work will include the construction of a garage in the basement, new plumbing and electric work throughout and considerable interior plastering and interior finish. There will be a large mantel. The plans are complete and the work will be done by Day Labor.

San Francisco—Bungalow, 1½ story and base, frame, \$2,000. Architect, none. Owners, MacArthur Bros., 1500 Fell St., S. F. The dwelling will contain six rooms and bath. The interior finish will be of pine with hardwood floors in the principal rooms. There will be open fire places. The mantel will be of brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with shiplap and shingles. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$12,000. Architects, McNally & McCaw, Mechanics' Institute Bldg., S. F. Owners, S. A. Born Bldg. Co. The dwelling has been designed for a ten-room house with four baths. The interior finish will be of redwood, white cedar, southern blue gum and jensenso. There will be hardwood floors throughout. There will be furnace heat and open fire places. The mantels will be of brick and tile. There will be telephones in all rooms. There will be furnace heat and hot water heater. A garage will be built in the basement. The exterior of the building will be covered with pressed brick and cement plaster. The roof will be of red clay tile. This is one of ten similar dwellings which are to be erected by Mr. Born from plans by the same architects. The working drawings for this dwelling are complete and the work will be started at once. The plans are on the boards for the second house which will cost about \$10,000.

Oakland, Cal.—Bungalow, 1½ story and base, frame, \$2,000. Architect, R. A. Hutchison, 470 13th St., Oakland. Owner's name withheld. The dwelling will contain six rooms and bath. The interior finish will be of pine. There will be oak floors in the principal

rooms. The dwelling will have furnace heat and open fire places. The mantels will be of tile or brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with shakes. The plans are complete and figures are being taken.

Oakland, Cal.—Bungalow, 1½ story and base, \$2,000. Architects Welsh & Carey, Metropolitan Bank Bldg., S. F. Owner, W. E. Bell. The dwelling has been designed for an eight-room house with bath. The interior finish will be largely of pine and redwood. There will be some hardwood floors. There will be open fire places with attractive mantels. The exterior of the bungalow will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

Alameda, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect none. Owner, Fred I. Hammond, 439 Taylor St., Alameda. The dwelling will contain six rooms and bath. The interior trim will be entirely of pine and redwood. There will be open fire places and brick or tile mantels. The exterior of the building will be covered with rustic. The plans are in the hands of the owner and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner John A. Rischoff, 349 62nd St., Oakland. The dwelling has been designed for a seven-room house with bath. The interior trim will be of pine with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$2,000. Architect, John Carson, Bacon Bldg., Oakland. Owner, E. J. Lloyd. The dwelling has been designed for a seven-room house with bath. There will be furnace heat and open fire places. The interior finish will be of pine with some oak floors. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, P. Diggins 2444 Bowditch St., Oakland. The dwelling has been designed for a seven-room house. There will be one bath room finished in tile. The interior finish will be of pine and redwood with hardwood floors in the first story. There will be open fire places and brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$6,000. Architect, Charles E. J. Rogers 24 California St., S. F. Owner, B. R. Jones. The dwelling has been designed for an eight-room house with all modern conveniences. The interior finish will be of pine and hardwood with hardwood floors throughout the first story. There will be two baths finished in tile. There will be furnace heat and open fire places. The mantels will be of brick and tile. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plas-

ter on metal lath. The plans are complete and figures are being taken.

Alameda, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect W. W. Landgrebe. 1505 Fernside Boulevard, Alameda. Owner, R. C. Hillen. The dwelling has been designed for a six-room house. The interior finish will be of pine and redwood. There will be open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1½ story and base, frame, \$2,000. Architect Harry M. Frothingham, 6457 Duncan St., Berkeley. Owner, Mr. Britton. SCHOOLS.

San Francisco—Schools, 2, 2 story and base, frame. Cost not stated. City Architect, Alfred I. Coffey, David Hewes Bldg., S. F. Owners, City and County of San Francisco. Architect A. Lacey Worswick, head of the School Department of the City Architect's office, informs the Building and Industrial News that working drawings for the Starr King School, to be erected at 25th and Utah streets, and for the Le Conte School, to be located at Norwick, Alabama and Harrison streets, will be completed within a month. Both of these buildings are to be of frame construction and will contain 7 or 8 class rooms. Each building is estimated to cost \$55,000. The amount of \$6,000 has been set aside for the preparation of the plans for the Daniel Webster School, which is to be erected at 20th and Connecticut streets. These plans will not be ready for figures for at least two months and perhaps longer.

Livermore, Alameda Co., Cal.—School 2 story and base, reinforced concrete, \$20,000. Architects, Welsh and Carey, Metropolitan Bldg., S. F. Owners, Roman Catholic Church. The building has been designed for a Convent School. There will be large dormitories, class rooms and special study rooms. There will be steam heat. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Campus, reinforced concrete and granite, \$200,000. Architect, John Galen Howard, 601 Mission St., S. F. Owners, Regents of the University of California. The working drawings for a granite campanile are being made, and will shortly be ready for figures. The fund

for the construction was a donation to the institution.

Richmond, Contra Costa Co., Cal.—School, 2 story and base, brick and concrete, \$45,000. Architect, P. D. Voorhees, Central Bank Bldg., Oakland. Owners, City of Richmond. The building is the second school to be erected from the proceeds of the recent bond election. There will be steam heat and a modern system of ventilation. The exterior of the building will be faced with pressed brick. The plans are being prepared.

San Anys, Los Angeles Co., Cal.—School, 2 story and base, brick, \$40,000. Architect, A. C. Smith, 207 South Broadway, L. A. Owners, San Anys School District. The building will be 127x55 feet. There will be class rooms, library, trustee's room, principal's office, teachers' room and a large auditorium with stage. The corridor floors and stairways will be of reinforced concrete. Terra cotta partitions will be used. There will be steam heat and a modern system of ventilation. The exterior of the building will be faced with enameled brick. The plans are complete and figures are being taken. The bids will be opened on March 26th.

Los Angeles, Cal.—School, 3 story and base, frame. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Sacred Heart Convent. The building will be 45x60 feet and will contain four class rooms, dormitories and playground. The exterior will be covered with rustic. The architect is completing the plans.

Redondo Beach, Los Angeles Co., Cal.—School, 2 story and base, brick, \$40,000. Architect, L. E. Pemberton, Auditorium Bldg., L. A. Owners, Redondo School District. The building will be 160x70 feet. There will be 14 class rooms, auditorium seating 650 people, teachers' room, library and principal's office. The exterior will be faced with cement plaster. The basement will be finished and will contain class rooms and the mechanical apparatus. The plans are being prepared.

Contracts Awarded.

Los Angeles, Cal.—School, 1 story and base, frame, \$15,000. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owners, City of Los Angeles. Contractor, Martin Madden, 1450 Bellevue Ave., L. A. General construction, \$14,929.

Los Angeles, Cal.—School, 2 story and base, frame, \$25,000. Architects, Train & Williams, Exchange Bldg., L. A. Owners, City of Los Angeles. Contractor, G. Hanson, 1411 Vermont Ave., L. A. General construction, \$21,777.

San Diego, Cal.—School, 2 story and base, reinforced concrete and granite, \$200,000. Architects, Quayle Bros., San Diego. Owners, City of San Diego. Contractors, Mowlan and Ansell, San Diego, general construction, \$145,908 for reinforced concrete and \$158,335 for granite. Plumbing, H. D. Hubbs, San Diego, \$768.4, electric work, Ayers and Sternson, San Diego, \$397.0, heating and ventilating, W. M. Yundt, San Diego, \$28,072. Contracts have not been signed but all bidders above named are low and it is generally accepted that they will sign contracts.

Wilmington, Los Angeles Co., Cal.—School, 2 story and base, reinforced concrete, \$50,000. Architects, Allison and Allison, Wilcox Bldg., L. A. Owner, Wilmington School District. The following were the low bids which were taken under consideration for

two weeks, general construction, J. D. Kneen, Construction Co., \$17,800. For the general construction of the annex and auditorium from plans by Architect, W. J. Ellisner, Willard-Slater Co., \$14,200.

University Park, Ore.—School, 2-story and base, brick, \$15,000. Architects, Jacobberger and Smith, Portland. Owners, Holy Cross Catholic Parish. Contractor, John Almetter, Portland. Contract price, \$15,000.

Salem, Ore.—School, two 2-story and base, brick, \$40,000 each. Architect, Fred Legg, Salem. Owners, City of Salem. Contractors, Welch and Wright, Salem. Contract price, not stated. Note—It was stated in the last issue of the Building and Industrial News that this contract was given to W. D. Fugh, who was the lowest bidder. Since it has been announced that the contract was signed with the above named firm who were second low.

El Centro, Imperial Co., Cal.—School, one 2-story and two 1-story and base, reinforced concrete, \$100,000. Architect, F. T. Harris, Redlands. Owners, El Centro High School District. Contractors, Olsen and Graf, Phoenix, Ariz. General construction \$65,800.

Fullerton, Orange Co., Cal.—School, nine 1-story and base, reinforced concrete buildings, \$350,000. Architect, Norman F. Marsh, Broadway. Central Bldg., L. A. Owners, Fullerton High School District. The citizens have selected a new site for the buildings and it is understood that the contractors who were low at the opening of the bids last December will be awarded the work. Frank H. Peters, Auditorium Bldg., L. A., will act as superintendent. The following were the lowest bidders: General contract to George C. Condon, Hene building, at \$98,135; plumbing to H. J. Crawford, 550 Center Place, at \$8,446.37; painting to A. Schmutzler, 509 East 35th street, at \$4,740; electric wiring to Newberry-Bendheim Electric Co., 127½ West 3rd street, at \$6,585; heating and ventilating to the Machinery and Electrical Co., 351 North Main street, at \$13,975; and program clocks to Eugene Winslip, 1227 West 4th street, at \$292.

SEWERS, STREET WORK AND WATER SYSTEMS.

Oakland, Cal.—Deep well pumps. Cost not stated. City Engineer, Oakland. Owners, City of Oakland. The Park Trustees, City Hall Annex, are advertising for figures for the installation of two deep well pumps and for the repairs and alterations to the mechanical equipment of two other pumps now in use in the various Oakland Parks. Bids will be opened on March 14th. Plans and specifications at the Secretary's office, City Hall Annex.

Contracts Awarded.

San Bernardino, San Bernardino Co., Cal.—Power plant equipment, \$15,000. Engineer, C. A. Poole, San Bernardino. Owners, Southern Sierras Power Co. Contractors, C. C. Moore Co., S. F. Contract price, \$15,000.

STORES & OFFICE BUILDINGS.

San Francisco.—Office building, 2 story and base, Class A construction, \$150,000. Architects, Bliss and Faville, Balboa Bldg., S. F. Owners, London, Liverpool and Globe Insurance Co.

This work has been mentioned here before when the architects were first selected. The plans have been approved and certain changes made and are now ready for figures. The building will be of the monumental type, and will be occupied entirely by the owners. The plans are now out for figures.

Berkeley, Alameda Co., Cal.—Stores, 1 story and base, frame, \$10,000. Architect, W. F. Griffin, 512, 20th St., Oakland. Owner, Mrs. H. P. Lee. The building will cover a considerable area and will contain several retail stores. There will be a cement floor. The show windows will be of plate glass with metal fronts. The exterior of the building will be covered with shiplap. The plans are complete and figures are being taken.

Tehama, Tehama Co., Cal.—Stores, 1 story and base, reinforced concrete, \$20,000. Architects, Ward and Blohne, Alaska Commercial Bldg., S. F. Owners, Richfield Land Co. The building will cover a large area in the heart of the business district. There will be several large stores and a number of smaller offices. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Los Angeles, Cal.—Stores and offices, 1 story and base, Class A construction, \$350,000. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owners, A. C. Billeke and R. A. Rowan. The building will be 100x120 feet. The first and second floors will be occupied by the Title Guarantee and Trust Co. The upper floors will be divided into modern offices. There will be a complete steel frame, brick exterior walls, faced with pressed brick and terra cotta. There will be steam heat and elevator service and a vacuum cleaning system. The plans are being prepared and construction will be started within 90 days.

Redondo Beach, Los Angeles Co., Cal.—Stores, 2 story and base, brick. Cost not stated. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owner, P. C. Biggley. The building will be 25x120. The first floor will be arranged for stores. There will be storage space and living apartments on the second floor. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Los Angeles, Cal.—Stores and offices, 11 story and base, Class A construction, \$600,000. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, M. L. Hollingsworth. The building will be 80x135 feet. The first floor will be arranged for stores. There will be in the neighborhood of 250 offices on the upper floors. There will be a complete steel frame and exterior walls of brick. The architects have just been commissioned to prepare the plans for this building and details of the construction are not obtainable at this time.

Los Angeles, Cal.—Department store and office building, 6 story and base, reinforced concrete. Cost not stated. Architect, Harrison Albright, Laughlin Bldg., L. A. Owner, John Brockman. There will be two buildings, both of which have been mentioned here before. The plans for both have been completed and the architect is taking bids for the construction of the buildings.

Los Angeles, Cal.—Stores, 2 story and

base, brick. Cost not stated. Architects, Mott Montgomery and Ross Montgomery, associated, Trust and Savings Bldg., L. A. Owner, R. F. Vogel. The building will be 45x150 feet. There will be several stores on the first floor. The upper floor will be arranged for lofts. The exterior will be faced with tapestry brick. The architects are preparing the plans.

Los Angeles, Cal.—Stores and offices, 11 story and base, Class A construction, \$1,000,000. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, syndicate headed by J. P. Sartori, B. A. Rowan, James H. Adams & Co. and others. This company has been organized to purchase the site at the northwest corner of 5th and Spring streets. Only preliminary plans have been prepared. Several of the leases on the present building run until 1916, but possession may be obtained before that date and construction started.

Aberdeen, Wash.—Stores and offices, 2 story and base, reinforced concrete, \$70,000. Architect, C. E. Troutman, Aberdeen. Owner, J. D. Cray. The building will cover a large area and has been designed for several large stores on the first floor and modern offices on the upper floor. There will be steam heat. The exterior of the building will be faced with cement plaster. The plans are complete and the architect is calling for bids.

Seattle, Wash.—Stores and offices, 9 story and base, brick and steel, \$100,000. Architects, Parr, McKenzie & Day, 570 Grandview St., Seattle. Owner's name withheld. The building will be 25x120 feet. The plans are being prepared for the construction of three stories at the present time, but the foundations will be heavy enough to carry the additional stories. There will be one large store on the first floor and offices on the upper floors. There will be steam heat and elevators. The exterior will be faced with pressed brick and terra cotta. The architects will be ready to receive figures for the work shortly.

Contracts Awarded.

Pasadena, Los Angeles Co., Cal.—Stores and offices, 3 story and base, brick, \$75,000. Architects, C. W. Buchanan and C. H. Brockway, 65 North Raymond Ave., Pasadena. Owner, W. C. Mason. Contractors, Crowell & Steward. Pasadena, general construction. Cost not stated. Other contracts have been let on the building as follows: Structural steel, Baker Iron Works, Los Angeles; plumbing, Nay & Co., 180 East Union street; electric wiring, W. E. Langstaff; painting, C. A. Roberts, 550 Worcester avenue. The contract for the elevators has not been let.

Whittier, Los Angeles Co., Cal.—Stores and offices, 2 story and base, brick, \$25,000. Architects, Eisen & Son, Wilcox Bldg., L. A. Owner, Mrs. Clara R. St. John. Contractor, E. M. Wheatland, Whittier. Contract price, \$25,000.

THEATRES.

San Francisco.—Theatre, 9 story and base, Class A construction, \$250,000. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owners, Tivoli Theatre Co. This work has been mentioned here a number of times before. The arrival from New York of Manager Leahy will hasten the construction,

and the architects state that the plans are complete and now at the blue-printers. Bids will be called for by the first of next week.

Los Angeles, Cal.—Theatre, 1 story and base, brick and steel. Cost not stated. Architect, A. Lawrence. Valk, Story Bldg., L. A. Owner, John Warner. The building will cover an area of 59x150 feet and will have a seating capacity of 1,000 people. This is the first of seven buildings of the kind which will be erected in Los Angeles. The building has been leased to the Globe Amusement Co., Title Insurance Bldg., L. A.

Portland, Ore.—Theatre and stores, 3 story and base, brick and steel, \$75,000. Architect, Grace, Portland. Owners, L. and George Gerlinger. The building will cover an area of 65x129 feet. The theatre proper will be in the rear of the building and will extend the full three stories high. Several stores are planned for the street frontage. The construction will be of brick and steel. The exterior of the building will be faced with pressed brick and terra cotta. There will be steam heat and a system of ventilation. The plans are complete and figures are being taken.

Contracts Awarded.

Santa Monica, Los Angeles Co., Cal.—Casino, 2 story and base, reinforced concrete, \$32,000. Architects, Krenpel & Erkes, Henne Bldg., L. A. Owners, Busch Casino Co. Contractor, George D. Snyder, 2821 Lake St., Santa Monica. Contract price, \$32,000.

SEALED PROPOSALS.

Bungalow—1½ story and base, frame, \$2,000. San Francisco. Architect, none. Owners, MacArthur Bros., 1560 Fell St., S. F. The dwelling will contain six rooms and bath. The interior finish will be of pine with hardwood floors in the principal rooms. There will be an open fire place. The mantel will be of brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with shiplap and shingles. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$12,000. San Francisco. Architects, McNally & McCaw, Mechanics' Institute Bldg., S. F. Owners, S. A. Born Bldg. Co. The dwelling has been designed for a ten-room house with four baths. The interior finish will be of redwood, white cedar, southern blue gum and jessera. There will be hardwood floors throughout. There will be furnace heat and open fire places. The mantels will be of brick and tile. There will be telephones in all rooms. There will be furnace heat and hot water heater. A garage will be built in the basement. The exterior of the building will be covered with pressed brick and cement plaster. The roof will be of red clay tile. This is one of ten similar dwellings which are to be erected by Mr. Born from plans by the same architects. The working drawings for this building are complete and work will be started at once. The plans are on the boards for the second house which will cost about \$10,000.

Factory—2 story and base, frame, \$10,000. San Francisco. Architect, none. Owner, Pacific Tank and Pipe Co., 321 Berry St., S. F. The building will be 80x150 feet. The exterior of the building will be covered with corrugated iron. There will be no interior finish. The plans are complete and figures are being taken.

Flats and Store Additions—3 story addition to one-story building. Cost

not stated. San Francisco. Architect, William Mosser, Nevada Bank Bldg., S. F. Owner's name withheld. The work will include the construction of a large frame addition to the present building. The first floor contains a number of small flats. The exterior of the building will be covered with brick veneer and shiplap. The plans are complete and figures are being taken.

Flats—2 story and base, frame, \$3,600. San Francisco. Architect, none. Owner, W. H. Miller, 49 West Park St., S. F. The building will contain four flats of four and five rooms each and bath. The structure will cover an area of 25x65 feet. The interior trim will be of pine. There will be gas grates. The exterior of the building will be covered with brick veneer and shiplap. The plans are complete and the work will be done by Day Labor.

Flats—3 story and base, brick, \$6,600. San Francisco. Architects, Wilde & Schaefer, Albany Block, Oakland. Owner, Alexander Politzer. The building will be 25x48 feet and has been designed to contain six small flats with baths. The interior finish will be of pine with some hardwood floors. There will be gas grates. The exterior of the building will be faced with white Medusa cement plaster. The plans are complete and figures are being taken by the architects.

Flats—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, G. W. Alexander, 122 Silver St., S. F. The building has been arranged for two flats of five and six rooms and bath. The interior trim will be of pine and redwood. There will be modern plumbing throughout. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Hotel Additions—3 story and base, brick. Cost not stated. San Francisco. Architects, George L. Streshley & Co., Balboa Bldg., S. F. Owner's name withheld. The work will include the construction of three additional floors to the present one-story and basement brick store building. The addition will contain in the neighborhood of ninety rooms. There will be steam heat and elevator service. The exterior will be faced with pressed brick and cement plaster. Plans are nearly ready for figures.

Hotel and Stores—3 story and base, brick, \$20,000. San Francisco. Architect, R. J. Fletcher, Euclid Bldg., S. F. Owner, Jane Terry. The building will be erected in Sacramento street near Kearny. There will be several stores on the first floor and rooms above. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken. Bids will be opened on March 26th.

Hotel—7 story and base, brick and steel, \$200,000. San Francisco. Architect, Frederick H. Meyer, Humboldt Bank Bldg., S. F. Owner, M. Fleishacker. This work has been mentioned here several times before. The plans are now out for figures and a general contract will shortly be awarded. There are five local contractors figuring the work.

Schools—2, 2 story and base, frame. Cost not stated. San Francisco. City Architect, Alfred L. Coffey, David Hewes Bldg., S. F. Owners, City and County of San Francisco. Architect A.

Lacey Worswick, head of the School Department of the City Architect's office, informs the Building and Industrial News that working drawings for the Starr King School, to be erected at 25th and Utah streets, and for the Le Conte School, to be located at Norwick, Alabama and Harrison streets, will be completed within a month. Both of these buildings are to be of frame construction and will contain 7 or 8 class rooms. Each building is estimated to cost \$55,000. The amount of \$6,000 has been set aside for the preparation of the plans for the Daniel Webster School, which is to be erected at 20th and Connecticut streets. These plans will not be ready for figures for at least two months and perhaps longer.

Office Building—2 story and base. Class A construction, \$150,000. San Francisco. Architects, Bliss & Paville, Balboa Bldg., S. F. Owners, London, Liverpool and Globe Insurance Co. This work has been mentioned here before when the architects were first selected. The plans have been approved and certain changes made are now ready for figures. The building will be of the monumental type and will be occupied entirely by the owners. The plans are now out for figures.

Theatre—5 story and base. Class A construction, \$250,000. San Francisco. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owners, Tivoli Theatre Co. This work has been mentioned here a number of times before. The arrival from New York of Manager Leahy will hasten the construction, and the architects state that plans are complete and now at the blue-printers. Bids will be called for by the first of next week.

Hotel—3 story and base, brick, \$65,000. Winnemucca, Nev. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, Mr. Blume, Reno. The building has been designed for a high class commercial hotel. There will be the main office, lobby and dining room on the first floor and a large number of single rooms and baths on the upper floors. There will be hot water heat, two elevators and all other modern conveniences. The exterior of the building will be faced with pressed brick and terra cotta. The plans are complete and figures are now being taken.

Contracts Awarded.

San Wall Rock Construction—Cost not stated. San Francisco. Engineering Dept. Panama Pacific International Exposition Co., Exposition Bldg., S. F. Owners, Panama-Pacific International Exposition Co., Contractors, Caldwell & Co., S. F. Contract price not stated.

OAKLAND AND ALAMEDA COUNTY.

Bungtown—1 1/2 story and base, frame, \$2,000. Architect, R. A. Hutchinson, 470 12th St., Oakland. Owner's name withheld. The dwelling will contain six rooms and bath. The interior finish will be of pine. There will be oak floors in the principal rooms. The dwelling will have furnace heat and open fire places. The mantels will be of the or brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with shakes. The plans are complete and figures are being taken.

Bungtown—1 1/2 story and base, \$2,000. Oakland, Cal. Architects, Welsh & Carey, Metropolitan Bank Bldg., S F. Owner, W. E. Bell. The dwelling has been designed for an eight-room house with bath. The interior finish will be largely of pine and redwood. There will be some hardwood floors. There will be open fire places with attractive mantels. The exterior of the bungtown will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

Bungtown—1 story and base, frame, \$2,000. Alameda, Alameda Co., Cal. Architect, none. Owner, Fred I. Hammond, 430 Taylor St., Alameda. The dwelling will contain six rooms and bath. The interior trim will be entirely of pine and redwood. There will be open fire places and brick or tile mantels. The exterior of the building will be covered with rustic. The plans are in the hands of the owner and the work will be done by Day Labor.

Residence—2 story and base, frame, \$3,500. Oakland, Cal. Architect, none. Owner, John A. Rischoff, 349 62nd St., Oakland. The dwelling has been designed for a seven-room house with bath. The interior trim will be of pine with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal bath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$3,000. Oakland, Cal. Architect, John Carson, Bacon Bldg., Oakland. Owner, E. J. Lloyd. The dwelling has been

designed for a seven-room house with bath. There will be furnace heat and open fire places. The interior finish will be of pine with some oak floors. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$3,000. Oakland, Cal. Architect, home. Owner, I. P. Dugan, 2411 Bowditch St., Oakland. The dwelling has been designed for a seven-room house. There will be one bath room finished in tile. The interior finish will be of pine and redwood with hardwood floors in the first story. There will be open fire places and brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$6,000. Oakland, Cal. Architect, Charles E. J. Rogers, 24 California St., S. F. Owner, B. R. Jones. The dwelling has been designed for an eight-room house with all modern conveniences. The interior finish will be of pine and hardwood with hardwood floors throughout the first story. There will be two baths finished in tile. There will be furnace heat and open fire places. The mantels will be of brick and tile. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$5,000. Oakland, Cal. Architect, L. M. Newsom, 904 Broadway, Oakland. Mr. Horner. The dwelling will contain seven rooms and bath. The interior finish will be of pine and redwood. There will be some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick or tile. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Bungalow—1 story and base, frame, \$2,000. Alameda, Alameda Co., Cal. Architect, W. W. Landgrebe, 1505 Fernside Boulevard, Alameda. Owner, R. C. Hillen. The dwelling has been designed for a six-room house. The interior finish will be of pine and redwood. There will be open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Bungalow—1½ story and base, frame, \$2,000. Berkeley, Alameda Co., Cal. Architect, Harry M. Frothingham, 6457 Duncan St., Berkeley. Owner, Mr. Britton. The dwelling has been designed for a six-room house with bath. The interior trim will be of pine throughout. There will be open fire places with tile or brick mantels. The exterior of the dwelling will be covered with shingles. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$6,500. Berkeley, Alameda Co., Cal. Architect, Barker W. Estey, 1815 Hearst Ave., Berkeley. Owner, Mrs. Charles Fiskel. The dwelling has been designed for an eight-room house with all modern conveniences. There will be furnace heat and open fire places. The mantels will be of brick

and tile. There will be one bath room finished in tile and tile will be used in the kitchen. The interior finish will be of pine and redwood. The floors will be of hardwood throughout. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Plans—2 story and base, frame, \$7,500. Berkeley, Alameda Co., Cal. Architect, A. J. Hassel, V. M. C. A. Bldg., Berkeley. Owners, Barber and Bosley. The building will contain four flats of five and six rooms each with baths. The interior finish will be of pine and redwood. There will be open fire places. The mantels will be of brick and tile. The exterior of the building will be covered with cement plaster on metal lath. There will be a warm air system of heating. The plans are complete and figures are being taken.

Campsite—Reinforced concrete and granite, \$200,000. Berkeley, Alameda Co., Cal. Architect, John Galen Howard, 601 Mission St., S. F. Owners, Regents of the University of California. The working drawings for a granite campsite are being made and will shortly be ready for figures. The fund for the construction was a donation to the institution.

School—2 story and base, reinforced concrete, \$200,000. Livermore, Alameda Co., Cal. Architects, Welsh & Carey, Metropolitan Bank Bldg., S. F. Owners, Roman Catholic Church. The building has been designed for a convent school. There will be large dormitories, class rooms and special study rooms. There will be steam heat. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Deep Well Pumps—Cost not stated. Oakland, Cal. City Engineer Oakland. Owners, City of Oakland. The Park Trusts, City Hall Annex, are advertising for figures for the installation of two deep well pumps and for the repairs and alterations to the mechanical equipment of two other pumps now in use in the various Oakland parks. Bids will be opened on March 14th. Plans and specifications at the Secretary's office, City Hall Annex.

Stores—1 story and base, frame, \$10,000. Berkeley, Alameda Co., Cal. Architect, W. F. Griffin, 542 29th St., Oakland. Owner Mrs. H. P. Lee. Recorded Accepted
Mar. 7, 1912—Lots 1 to 6 Bk 81, Fresno. H. Graff & Co to H. A. Hansen.....Feb. 10, 1912

LOS ANGELES AND SOUTHERN CALIFORNIA.

Apartment Houses—2, 3 story and base, brick and frame, \$40,000 and \$37,000 each. Los Angeles, Cal. Architects, California Real Estate and Building Co., 142 South Spring St., L. A. Owners, W. H. Allen and E. B. Hollenbeck. The brick structure will be 7x12x8 feet and will contain 96 rooms arranged in suites of two and three rooms each and bath. The frame building will contain 35 suites of two and three rooms each and bath. Both will be equipped with steam heat and wall beds. The exteriors will be covered with pressed brick and cement plaster. The plans are nearly complete and the work will be done by Day Labor.

Bank—2 story and base, brick and steel. Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, First National Bank of Santa Barbara. The building will be devoted entirely to the use of the bank. The banking rooms and vaults will occupy the entire first floor. Private offices will be located on the second floor. The interior will be finished in hardwood, marble and ornamental iron. Bids are now being taken on the fire proof vaults. Bids will be asked for shortly for the general construction of the building.

Church—1 story and base, Concrete. Cost not stated. San Jacinto, Riverside Co., Cal. Architects, Walker & Vawter, Wright and Callender Bldg., L. A. Owners, First Methodist Church of San Jacinto. The building will be designed in the Mission style. There will be a main auditorium seating 500, Sunday school with nine class rooms and a study room. The exterior of the building will be faced with cement plaster. There will be a red tile roof. The architects are ready to receive figures on the work.

Warehouse—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, J. B. Nicholson, Wright and Callender Bldg., L. A. Owner, Mr. Phillips. The building will be 4x129 feet. There will be a steel frame and steel roof trusses. The roof will be of corrugated iron. There will be fire proof window sash. The plans are

complete and figures are being taken.

Hotel and Stores—3 story and base, brick and steel. Cost not stated. San Bernardino, San Bernardino Co., Cal. Architect, P. T. Harris, National Bank Bldg., Redlands. Owner, Joseph Bucher. The building will be 160x80 feet. There will be six stores and the hotel lobby on the first floor. The upper floors will contain 60 rooms and 25 baths. There will be steam heat, elevator service and a vacuum cleaning plant. The exterior of the building will be faced with pressed brick. The plans are ready for figures.

Hospital—2 story and base, reinforced concrete, \$20,000. Phoenix, Ariz. Architect, Royal W. Lescher, Phoenix. Owners, Methodist Deaconess Association of Phoenix. The architect has just been commissioned to prepare the plans for this work and no details of the construction can be given at this time. Working drawings will be completed in the course of the next few weeks.

Hospital—1 story and base, concrete and frame. Cost not stated. Los Angeles, Cal. County Superintendent of Construction, George Low, L. A. Owners Los Angeles County. This work has been mentioned here before when the plans were first ordered. The drawings have been completed and figures are being taken. Bids will be opened by the Board of Supervisors on March 25th.

Postoffice—2 story and base, brick and steel, \$110,000. Santa Barbara, Santa Barbara Co., Cal. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. Since the refusal of Contractor A. W. Anson to sign a contract for the construction of this building the Supervising Architect has decided to readvertise for bids. The official advertisement will appear in these columns shortly.

School—2 story and base, brick, \$10,000. Van Nuys, Los Angeles Co., Cal. Architect, A. C. Smith, 307 South Broadway, L. A. Owners, Van Nuys School District. The building will be 127x88 feet. There will be eight class rooms, library, trustees' room, principals' office, teachers' room and a large auditorium with stage. The corridor floors and stairways will be of reinforced concrete. Terra cotta partitions will be used. There will be steam heat and a modern system of ventilation. The exterior of the building will be faced with enameled brick. The plans are complete and figures are being taken. The bids will be opened on March 26th.

School—3 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, A. C. Martin Higgins Bldg., L. A. Owners, Sacred Heart Convent. The building will be 45x60 feet and will contain four class rooms, dormitories and playroom. The exterior will be covered with rustic. The architect is completing the plans.

Schools—2 story and base, brick, \$10,000. Redondo Beach, Los Angeles Co., Cal. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owners, Redondo School District. The building will be 160x70 feet. There will be 11 class rooms, auditorium seating 650 pupils, teachers' room, library and principals' office. The exterior will be faced with cement plaster. The basement will be finished and will contain class rooms and the mechanical apparatus. The plans are being prepared.

Stores and Offices—7 story and base, Class A construction, \$350,000. Los An-

geles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owners, A. C. Blicke and R. A. Rowan. The building will be 100x120 feet. The first and second floors will be occupied by the Title Guarantee and Trust Co. The upper floors will be divided into modern offices. There will be a complete steel frame, brick exterior walls, terra cotta. There will be steam heat and elevator service and a vacuum cleaning system. The plans are being prepared and construction will be started within 30 days.

Stores—2 story and base, brick. Cost not stated. Redondo Beach, Los Angeles Co., Cal. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owner, P. C. Ridgely. The building will be 55x120 feet. The first floor will be arranged for stores. There will be storage space and living apartments on the second floor. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Department Store and Office Building—6 story and base reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, Harrison Albright, Laughlin Bldg., L. A. Owner, John Brockman. There will be two buildings, both of which have been mentioned here before. The plans for both have been completed and the architect is taking bids for the construction of the buildings.

Stores—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Matt Montgomery and Ross Montgomery, associated, Trust and Savings Bldg., L. A. Owner, R. P. Vogel. The building will be 45x150 feet. There will be several stores on the first floor. The upper floor will be arranged for lofts. The exterior will be faced with tapestry brick. The architects are preparing the plans.

Stores and Offices—11 story and base, Class A construction, \$1,000,000. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, syndicate headed by J. F. Sartori, R. A. Rowan, James H. Adams & Co. and others. This company has been organized to purchase the site at the northwest corner of 5th and Spring streets. Only preliminary plans have been prepared. Several of the leases on the present building run until 1916, but possession may be obtained before that date and construction started.

Stores and Offices—11 story and base, Class A construction, \$600,000. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, I. H. Hollingsworth. The building will be 80x135 feet. The first floor will be arranged for stores. There will be in the neighborhood of 250 offices on the upper floors. There will be a complete steel frame and exterior walls of brick. The architects have just been commissioned to prepare the plans for the building and details of the construction are not obtainable at this time.

Theatre—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, L. A. Owner, John Wagner. The building will cover an area of 50x150 feet and will have a seating capacity of 1,000 people. This is the first of seven buildings of the kind which will be erected in Los Angeles. The building has been leased to the Globe Amusement Co., Title Insurance Bldg., L. A.

Contracts Awarded.

Casino—2 story and base, reinforced concrete, \$32,000. Santa Monica, Los Angeles Co., Cal. Architects, Krompel & Erkes, Henne Bldg., L. A. Owners, Busch Casino Co. Contractor, George D. Snider, 2821 Lake St., Santa Monica. Contract price, \$32,000.

Apartment House—6 story and base, Class A construction, \$300,000. Los Angeles, Cal. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owner, Hugh W. Bryson. Contractors, F. O. Engstrom Co., L. A. Contract price, \$300,000. The architects have not completed the working drawings as yet. The building will be 120x138 feet and will contain in the neighborhood of 250 rooms.

Apartment House—3 story and base, brick, \$35,000. Los Angeles, Cal. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owner, Marcos Landsberg. Contractor, J. M. Thomas, 1670 West 35th St., L. A. Contract price, \$32,250.

Apartment House—2 story and base, brick, \$25,000. Los Angeles, Cal. Architect, Scott Quintin, Story Bldg., L. A. Owner John X. Thill. Contractor, Harum E. Reyer, P. F. D. No. 1, Box 83D, L. A. Contract has been taken on the percentage basis.

Warehouse—2 story and base, brick, \$15,000. Los Angeles, Cal. Architect, none. Owner, J. Ross Clark. Contractors, Weston Building Co., Lankershim Bldg., L. A. Contract price, \$15,000.

Hotel and Stores—2 story and base, brick, \$32,000. Los Angeles, Cal. Architect, J. B. Nicholson, Wright and Callender Bldg., L. A. Owner, Victor Ponet. Contractor, Charles G. Ross, Grosse Bldg., L. A. Contract price, \$32,000.

Hotel and Stores—3 story and base, brick, \$23,000. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owner, Mrs. Jennie White. Contractors, Alta Flaming Mill Co., 820 McGarry St., L. A. Contract price, \$23,000.

Hotel—3 story and base, brick, \$50,000. Pomona, Los Angeles Co., Cal. Architect's name not given. Owner, J. A. Fender. Contractors, Noble & Son, 939, North Garey St., Pomona. Contract price, \$10,000.

Schools—1 story and base, frame, \$15,000. Los Angeles, Cal. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owners, City of Los Angeles. Contractor, Martin Madden, 1450 Bellevue Ave., L. A. General construction \$14,925.

School—2 story and base, frame, \$25,000. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, City of Los Angeles. Contractor, G. Hanson, 1414 Vermont Ave., L. A. General construction, \$21,777.

Schools—2 story and base, reinforced concrete and granite, \$200,000. San Diego, Cal. Architects, Quayle Bros., San Diego. Owners, City of San Diego. Contractors, Howland and Ansell, San Diego, general construction, \$145,908 for reinforced concrete and \$154,925 for granite. Plumber, H. D. Hulbs, San Diego, \$7684, electric work, Ayers and Stevenson, San Diego, \$3979, heating and ventilating, W. M. Yundt, San Diego, \$28,072. Contracts have not been signed but all bidders above named are low and it is generally accepted that they will sign contracts.

Schools—One 3-story and two 1-story and base, reinforced concrete, \$100,000.

El Centro, Imperial Co., Cal. Architect, P. T. Harris, Redlands. Owners, El Centro High School District. Contractors, Olsen and Graf, Phoenix, Ariz. General construction, \$46,800.

Power plant equipment—\$15,000. San Bernardino, San Bernardino Co., Cal. Engineer, C. A. Poole, San Bernardino. Owners, Southern Sierras Power Co., Contractors, C. C. Moore Co., S. F. Contract price, \$15,000.

Schools—2 story and base, reinforced concrete. \$50,000. Wilmington, Los Angeles Co., Cal. Architects, Allison and Allison, Wilcox Bldg., L. A. Owner, Wilmington School District. The following were the low bids which were taken under consideration for two weeks, general construction J. D. Kneen, Construction Co., \$47,800. For the general construction of the annex and auditorium from plans by Architect W. J. Eliester, Willard-Slater Co., \$14,200.

Schools—Nine 1-story and base, reinforced concrete buildings, \$170,000. Fullerton, Orange Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Fullerton High School District. The citizens have selected a new site for the buildings and it is understood that the contractors who were low at the opening of the bids last December will be awarded the work. Frank H. Peters, Auditorium Bldg., L. A., will act as superintendent. The following were the lowest bidders: General contract to George C. Condon, Henne building, at \$98,129; plumbing to H. J. Crawford, 550 Center Place, at \$8,446.37; painting to A. Schmutz, 500 East 35th street, at \$4,749; electric wiring to Newberry-Bendheim Electric Co., 125 1/2 West 2nd street, at \$6,505; heating and ventilating to the Machinery and Electrical Co., 351 North Main street, at \$12,979; and program clocks to Eugene Winslip, 1327 West 4th street, at \$992.

Stores and Offices—3 story and base, brick, \$75,000. Pasadena, Los Angeles Co., Cal. Architects, C. W. Buchanan and C. H. Brackway, 65 North Raymond Ave., Pasadena. Owner, W. C. Mason. Contractors, Crowell & Seward, Pasadena, general construction. Cost not stated. Other contracts have been let on the building as follows: Structural steel, Baker Iron Works, Los Angeles; plumbing, Noy & Co., 180 East Union street; electric wiring, W. E. Langstaff, painting, C. A. Roberts, 570 Worcester avenue. The contract for the elevators has not been let.

Stores and Offices—2 story and base, brick, \$25,000. Whittier, Los Angeles Co., Cal. Architects, Elsen & Son, Wilcox Bldg., L. A. Owner, Mrs. Clara R. St. John. Contractor, E. M. Wheatland, Whittier. Contract price, \$25,000.

SEATTLE AND WASHINGTON.

Lodge Hall—2 story and base, brick, \$25,000. Pasco, Wash. Architects, Van Dusen & Doughty, Pasco. Owners, Knights of Pythias Hall Association. The building will contain stores on the first floor and a large lodge hall and offices on the second floor. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans are complete and bids are being taken by the Secretary of the Hall Association.

Art Association Building—3 story and base. Class A construction, \$100,000. Seattle, Wash. Architects Kingsley & Eastman, Empire Bldg., Seattle. Owners, Washington State Art Association. The building will occupy a site 240x120 feet on 4th Ave. The first four floors will be devoted to the Art Association's uses and will include an auditorium with a seating capacity of 4,500 people. The upper floors will contain about 250 offices. The construction will be absolutely fire proof, with a complete steel frame and exterior walls of brick and reinforced concrete. The exterior will be faced with pressed brick and terra cotta. Other details of this big structure will be given later. The architects are working on the detail drawings now. G. L. Berg is the Secretary of the Washington State Art Association.

Postoffice—2 story and base, brick and concrete, \$110,000. Olympia, Wash. Architect, James Knox Taylor, Washington. D. C. Owners, U. S. Government. The following bids were received for this work.

Palmberg & Matson, Astoria, Ore., \$87,227; J. H. Wiese, Omaha, \$106,000; West Bros., Salem, Ore., \$107,247; Campbell Building Co., Salt Lake City, \$107,907; A. B. Stannard, St. James Bldg., New York City, \$108,000; Sound Construction Co., Lewman Bldg., Seattle, \$111,382; Pearson Construction Co., New York Bldg., Seattle, \$111,559; McLeann-Hickey Co., Globe Bldg., Seattle, \$112,300; George C. Dietrick & Co., Globe Bldg., Seattle, \$115,000; Dieter & Wenzel Construction Co., Wichita, Kans., Kieburz, Smith & Rountree, Bailey Bldg., Seattle, \$116,500; Willin & Warter, Tacoma, \$124,980; Puget Sound B. & D. Co., Central Bldg., Seattle, \$131,595.

Stores and Offices—2 story and base, reinforced concrete, \$70,000. Aberdeen, Wash. Architect, C. E. Troutman, Aberdeen. Owner, J. D. Cray. The building will cover a large area and has been designed for several large stores on the first floor and modern offices on the upper floor. There will be steam heat. The exterior of the building will be faced with cement plaster. The plans are complete and the architect is calling for bids.

Stores and Offices—3 story and base, brick and steel, \$100,000. Seattle, Wash. Architects, Parr, McKenzie & Day, 570 Granville St. Seattle. Owner's name withheld. The building will be 25x120 feet. The plans are being prepared for the construction of three stories at the present time, but the foundations will be heavy enough to carry the additional stories. There will be one large store on the first floor and offices on the upper floors. There will be steam heat and elevators. The exterior will be faced with pressed brick and terra cotta. The architects will be ready to receive figures for the work shortly.

Contracts Awarded.

Apartment House—3 story and base, brick, \$35,000. Seattle, Wash. Architects, Quandt & Creutzler, Haight Bldg., Seattle. Owner, John L. Lang. Contractor, Philip Viehman, 1321 14th Ave., Seattle. Contract price, \$35,000.

Church—4 story and base, brick, \$12,000. Colfax, Wash. Architect, Alpheus Dudley, Cray Bldg., Seattle. Owners, Plymouth Congregational Church of Colfax. Contractor, W. W. Hunter, 503 20th Ave., North Seattle. Contract price, \$10,000.

PORTLAND AND OREGON.

Hotel and Stores—3 story and base, brick. Cost not stated. Portland, Ore. Architect, Bennes & Hendricks, Portland. Owner, Dr. J. D. Sternberg. The building will be 50x100 feet. The first floor will be arranged for stores and hotel entrance. The upper floors will contain 40 rooms and a number of public and private baths. There will be steam heat. The exterior will be faced with pressed brick. The plans are out for figures.

Theatre and Stores—3 story and base, brick and steel, \$75,000. Portland, Ore. Architect, Grace, Portland. Owners, L. and George Gerlinger. The building will cover an area of 51x120 feet. The theatre proper will be in the rear of the building and will extend the full three stories high. Several stores are planned for the street frontage. The construction will be of brick and steel. The exterior of the building will be faced with pressed brick and terra cotta. There will be steam heat and a system of ventilation. The plans are complete and figures are being taken.

Contract Awarded.

Bridge—Reinforced concrete, \$65,000. East Portland, Ore. City Engineer, Portland. Owners, City of Portland. Contractors, International Contracting Co., Central Bldg., Seattle. Contract price, \$63,300.

Schools—Two 2 story and base, brick \$10,000 each. Salem, Ore. Architect Fred Legg, Salem. Owners, City of Salem. Contractors, Welch and Wright, Salem. Contract price not stated. Note—It was stated in the last issue of the Building and Industrial News that this contract was given to W. D. Pugh, who was the lowest bidder. Since it has been announced that the contract was signed with the above named firm they were second low.

Schools—2 story and base, brick \$15,000. University Park, Ore. Architects, Jacobberger and Smith, Portland. Owners, Holy Cross Catholic Parish. Contractor, John Almetier, Portland. Contract price, \$15,000.

CONSTRUCTION WORK IN FOREIGN COUNTRIES.

(From the London Times.)

CANADA.

(From Consul General David F. Wilber, Vancouver.)

List of New Buildings to Be Erected.

The Daily Building Record, of Vancouver, in its issue for February 12 gives a list of 88 buildings, etc., which are to be constructed, the cost of each varying from \$15,000 to \$2,100,000. There are included hotels, office buildings, churches, theatres, schools, factories, and bridges. The list also gives the location, owner, architect, and statement as to when plans are ready. The same issue of the Record also gives a table showing 49 buildings to cost \$14,000 to \$1,169,000, "on which construction is under way, or on which contracts have been let but not yet started." (A copy of the list referred to is filed for public inspection in the Bureau of Manufactures.)

Harbor Improvements at St. John, New Brunswick.

(From Consul General John G. Foster, Ottawa.)

The Dominion Government on February 13 awarded a \$7,500,000 contract for harbor improvements at St. John, New Brunswick, to the English contracting company, Norton Griffiths and associates. The work includes dredging Courtenay Bay and other parts of the harbor, constructing wharves, and also a first-class dry dock, the latter being constructed under the Federal subsidy act, the Government guaranteeing 3½ per cent for 35 years of the total cost of the dock at a maximum of \$3,000,000.

Contract for Lighting City of Quebec.

(From Consul Gebhard Wirthlich, Quebec.)

The contract for electric lighting at Quebec has been awarded by the city to the Dorchester Light Co., 112 Dalhousie street. The contract, which was signed on January 28, 1912, obligates the company to supply the city with electric light from and after August 1, 1912.

The company also binds itself to show, on or before March 15 next, that it has entered into contracts for the construction of its works, and for the installation and purchase of its machinery on or before August 1. The company has already made a deposit of \$35,000 to guarantee the faithful performance of the several conditions of its contract. The contract for furnishing the ornamental light poles has been let.

Amusement Park Prospects.

The Quebec Railway, Light and Power Company operates an amusement park at the Falls of Montmorency, nine miles from Quebec. The devices are mainly a merry-go-round in summer and slides in winter, but the company has decided not to enlarge the amusement features there, on account of its distance from the city. The company, however, may later on undertake to create an amusement resort at some more convenient location. A company was organized here last year to start an amusement park along American lines, but the manager says they have not gone beyond its organization and are not

likely to go further for a year or so. The two chief amusement resorts at Montreal are operated by the Dominion Park and Luna Park companies.

New Bank Building.

(From the Montreal Gazette.)

A new six-story structure will be erected in Montreal by the Bank of British North America, architects, Cox & Amos, Montreal.

PANAMA.

(From Consul General Albert G. Snyder, Panama City.)

Street Railway for Panama City.

It is stated on good authority that work on the street railway is at last to be started and pushed to a speedy conclusion. Mr. Heberd, the engineer in charge, is on the ground and money has been deposited for initial expenses. It is supposed that Mr. Minor Keith is backing the present company.

ARGENTINA.

(From the London Times.)

Plans for the New Deep-Water Port.

The Government of Argentina has conferred a concession upon the Port Argentine Great Central Railways Co., which gives the necessary powers for 99 years, the Government subscribing \$775,800 toward the cost of the works, to enable the company to construct and operate a port in the Bay of Samborombon. This is the man-overboard ground of the fleet, which is free from the repeated deposition of silt, the bed and consequent depth of the sea in this neighborhood being the same as they appear on charts 100 years old. It is intended in the first instance to dredge a channel about 3 miles long, 100 meters wide, and giving a draft at low water of 30 feet from the deep water of the ocean to the port. Designs are being prepared for graving docks 1,100 feet in length, with an entrance of 100 feet, to accommodate the largest vessels afloat and also the naval Drydocks.

The actual port will be constructed on the hard ground of the foreshore, where the depth of water is at present only a few inches, and consequently no heavy protective works against the sea are required. The rise and fall of tide is 7 feet 5 inches at ordinary spring tides.

The portion of the port first to be constructed will have a quay length of 2,000 meters, with ample sidings, accommodation and warehouses equipped for both import and export traffic. The port will be equipped with electric cranes of the latest type, and also with a floating derrick to deal with heavy weights. The entrance channel will be well lighted, and its course will be marked by gas buoys. Vessels coming to Argentina will be able to steam direct into harbor from the open sea, thus saving the delays, risks, and insurance expenses due to the estuary and to the Buenos Aires Docks, and it is expected that the port will become an important coaling station for vessels coming from or proceeding to the west coast, New Zealand, etc.

The site is about 6 miles south of River Salado, where the bar is now being removed by the contractors, so that the necessary wharf for unloading material can be constructed, together with the houses and other requirements of the staff of officials and work

men engaged on the work. A comprehensive plan for the future city will be adopted, which will combine the advantages of a garden city with the utilitarianism of a large commercial and naval port.

New System of Railways.

A further development in connection with this port will be a comprehensive system of railways so laid out as to form convenient junctions with the various lines of the Buenos Aires Great Southern Railway at Guerrero, Las Flores, Azul and Rivadavia, with the Buenos Aires and Western Railway at Trenque Lauquen, and with the Buenos Aires and Pacific Railway at Bragado and Junin. The new lines, which will amount to a total of about 640 miles will traverse in places the rich lands recently drained by the great canals constructed by the provincial government of the Province of Buenos Aires, and also the great wheat-growing and cattle-rearing camps along their entire distance.

By this means the congestion of population and traffic in and about Buenos Aires, which is rapidly becoming serious, will be relieved, while another outlet will be afforded for districts calculated to contain a population of about 1,000,000 within the zone of country served by them, for at present there is a stretch of coast some 700 miles south of Buenos Aires and La Plata without a deep-water port.

It is expected that the first portion of the works will be open in four years, and that the entire project will be completed in seven or eight years.

CANADA.

The programs of the different railroads for extensions in western Canada have been completed, and as soon as weather conditions permit there will be carried out vital promises to be the greatest railroad development in any country during a given time. It is estimated that the Canadian Pacific Railroad, Grand Trunk Pacific Railroad, and Canadian Northern Railroad will spend \$100,000,000. Their engineers have gone carefully over the new areas of development and many new districts will be given railroad outlets. Even with this vast extension the ability of the railroads to handle this season's prospective enormous grain crop is doubted. Through a peculiar combination of conditions, an unheard-of grain blockade in western Canada exists today, and the railroads even urged the deflection of grain shipments to eastern Canadian points through the United States.

The Canadian Pacific Railway.

One of the first great works to be attempted will be a modern coal-handling plant at Fort William. When the present plant was constructed it was designed to meet the demand for 25 years to come; but coal traffic at the Canadian head of the Lakes has since doubled. The company will also erect there a new 25,000-ton freight shed, and a new dock for lake shipments.

The double-track system now completed from Fort William to Brandon will be fitted with a block system, the first section being that between Fort William and Winnipeg. The bridge crossing the Red River will be enlarged and a double track laid. The most important construction, how-

ever, will be a new Winnipeg terminal as announced in Daily Consular and Trade Reports for February 8). The double track will be continued from Brandon west; to take care of traffic where heaviest; double tracks will be laid between Regina and Chaplin, Saskatchewan; between Marham and Sunalta, Alberta; and from Vancouver to Hammond, British Columbia (a point 30 miles east.)

A new terminal, to cost many thousands of dollars, will be built at Coquitlam, British Columbia. Plans are being prepared contemplating a new station, overhead bridge, and additional wharves at Vancouver. At Winnipeg the company's hotel and station will be largely augmented.

The Northern branch line from Winnipeg to Edmonton, Alberta, will be entirely relaid with 85-pound steel rails.

Every terminal of the Canadian Pacific western lines has been enlarged within the past eight years, and this year further improvements will be made. Many new stations will be built, Edmonton being the most important.

The company is preparing to start work on a number of branch lines for tapping recently settled sections. The line from Weyburn, Saskatchewan, will be extended west 100 miles; to a line building northwest from Swift Current, Saskatchewan, 85 miles will be added; the Lethbridge line extended 25 miles, and probably 20 to 50 miles completed of the branch southwest from Medicine Hat.

To the elevator at Fort William will be added a new 1,500,000-bushel section, making the total elevator capacity there 9,000,000 bushels.

The Grand Trunk Pacific.

It is estimated that \$20,000,000 will be spent by this company during the year for construction, including over 600 miles of branch lines already graded and awaiting the steel, as well as over 300 miles of main line to Prince Rupert, part already graded. This will leave about 200 miles of main line to be completed in 1913. It is estimated that steel will be laid through from Winnipeg to Prince Rupert, and traffic will pass over that line by the end of 1913. The branch lines to be linked up this summer will bring the main line of the Grand Trunk Pacific into touch with a number of enterprising western cities, including Moose Jaw, Saskatchewan, Brandon, Manitoba, Calgary, and Lethbridge, in Alberta Province, and Battleford and Prince Albert in Saskatchewan Province. Regina was linked up last fall, and a regular passenger service will be given in the coming summer, from Winnipeg to the Saskatchewan capital.

With the opening of the great viaduct across Winnipeg, now rapidly approaching completion, a passenger service will be inaugurated to Fort William, and the company will operate trains in connection with its lake-steamer service, to the Great Lakes. East of Winnipeg construction is under the Dominion Government; it is expected to take two years for completion from Quebec to Winnipeg.

Many of the branch lines in the west are already graded and will be laid with steel as soon as weather conditions permit and supplies are obtainable. A new 150-mile line will be

started from Calgary to Lethbridge. Another line, into Calgary, graded almost up to the city, will be completed the coming summer.

Other lines to be rushed to completion this year are as follows: On the Regina south line, 143 miles; 57 miles from Regina to Moose Jaw; 53 miles from Moose Jaw northwest; 51 miles to Prince Albert; 57 miles to Battleford; 60 miles from Biggar, Saskatchewan, to Calgary, Alberta; 94 miles of the Toleda to Calgary line, which will complete this branch; 20 miles from Harte, Manitoba, to Brandon, Manitoba; 50 miles on the Cut Knife line west to Battleford; and 33 miles of the Alberta coal line to Brazeau, 32 miles of which are already laid with steel.

The Canadian Northern Railway.

This company expects to spend \$25,000,000 in western Canada during 1912 for betterments all over the line, new steel, better stations, and new terminals; also a number of additional lines into new territory, including: A line from Alasca, Saskatchewan, to Munson, Alberta; a 130-mile line from Munson to Calgary; extending the main line 210 miles to the summit of the Rockies; a 92-mile line to Athabasca Landing, opening up new territory; a 170-mile line into the Brazeau coal fields. There will also be much building on the west side of the lakes, and from the summit of the mountains to Vancouver work will be pushed with energy.

In eastern Canada the road will be extended 500 miles from Port Arthur to Sudbury, adding another link to the transcontinental system which is the hope of the company within the near future. This will not be the first construction work of the Canadian Northern east of the Great Lakes, as it already operates lines from Ottawa to Montreal and from Toronto to Sudbury.

One important Canadian Northern extension which it is expected will materially help in handling future grain shipments is the line being constructed southward from Port Frances, Ontario, to Duluth.

At Regina there will be much construction, including modern railroad shops, while the entire road will receive attention in maintenance and improved transportation methods.

COLOMBIA.

Proposal to Electrify Street Car Lines.

A syndicate headed by Enrique Correa, Eduardo Martinez A., and Arturo Arcadi having secured control of the horse car lines of Barranquilla, Colombia, they purpose changing the system to electric, which will call for new rails on all lines and full new equipment. There are about five miles of the present system, but without doubt this will be greatly increased when the new system is established. While all the capital is not yet ready, it would seem that American manufacturers should get in touch with the people backing this scheme in time to assure the use of American-made equipment. They can be addressed at Barranquilla.

VENEZUELA.

Construction of Railways and Roads.

There will be some railway building

to connect some iron mines with the port established at Imataca, now officially called Nueva Angostura, on the south passage of the delta of the Orinoco River. At present all trade for this region passes through Trinidad, British West Indies.

The Government of Venezuela is paying special attention now to the construction of macadamized roads crossing the country at several points. This work is under the general direction to the Ministro de Fomento, at Caracas.

INJUNCTION AGAINST SEATTLE PHONE MERGER DISSOLVED.

SEATTLE, March 9.—The temporary order obtained by the City of Seattle, restraining the Pacific, or "Sunset" Telephone Company, which has absorbed the Independent Telephone Company, from making physical connection of the two telephone systems, was dissolved by Judge King Dykeman in the Superior Court yesterday. The effect of the order is that the work of the linemen in connecting the wires of the two companies, can be carried on without molestation by the city and without a permit from the city. The city alleges that it has a \$200,000 interest in the poles, wires and conduits of the Independent Company under the terms of the independent franchise.

MAY ISSUE BONDS FOR HIGH SCHOOL.

CHICO (Butte Co.), March 6.—Chico probably will have a new High School Building. The Board of Education Monday night considered tentative plans for the erection of a structure to provide at least twenty-two additional class rooms. The plan is to vote bonds for \$50,000 to cover the cost of construction and installation of equipment.

Principal W. M. Mackay urged the Board to take immediate action to relieve the present congestion in the school. The school now in use is eight years old. It was originally built to accommodate 200 students. One hundred enrolled when it was first opened and the present enrollment is 317.

BILL FOR BIG TREES REPORTED.

WASHINGTON, March 7.—Representative Raker's bill to create the Calaveras Big Tree National Forest was reported unanimously out of the Public Lands Committee Wednesday. The bill would provide for an exchange of timber land owned by the Government for the Calaveras Big Tree Grove, owned by R. B. Whiteside of Duluth, Minn. It carries an appropriation for the forest service to carry out the preliminary steps.

RAISE MONEY FOR NEW LINE.

PETALUMA, March 7.—Twenty-five thousand dollars, which is half of the bonus needed for the construction of the new electric railway north of this city through the Two Rock and Bloomfield valleys, was subscribed at a meeting held here yesterday. The property owners are enthusiastic over the proposed new road and there will be very little trouble in raising the \$50,000 needed. The new line will probably go to the coast.

The "S. G. V." A Real Automobile

FIRST—THE S.G.V. CAR being made of Chrome-Nickel Steel and aluminum, its weight is 1000 lbs. less than the average high-grade car, which sells at \$3000 to \$6000. This item alone decreases the operating expense fully 25%.

SECOND—THE LOW CENTER of gravity of the S.G.V. prevents the car from skidding, which wears and cuts tires.

THIRD—THE 42 MULTIPLE disk clutch, giving the car opportunity to start without jerk or skidding, saves wear and tear.

FOURTH—THE S.G.V. CO. OWNS its special patented starvation type carburetor, which is heated by water jacket, and its perfect action is not subject to change of altitude or climate, and requires no adjustment. This carburetor, also, being made on the most approved scientific principles, makes full use of the gasoline passing through it. It has no coiled springs to adjust.

FIFTH—THE MOTOR TO WHICH this carburetor is attached is of European type and has 50% less parts than the average motor requiring at least one-third less energy to operate it, and being connected with a Bosch high tension magneto, comprises an equipment that far surpasses any

car heretofore put on the American market.

SIXTH—THE CAR HAS FOUR speeds forward, giving full use of the motor under all conditions, whether running on a level or climbing hills; the motor is kept working to meet requirements without any undue strain.

THE MOTOR IS CAPABLE OF being turned over 2500 revolutions per minute, and for power displayed has astonished the best mechanics of America, developing 28 H.P. on block test.

THE OIL BEING UNDER compensation control at all speeds by use of independent pump system, is consumed only in proportion to the speed of the motor, whereas under the old-fashioned

system more oil is used at a speed of 5 to 10 miles per hour than at 50 miles per hour; hence the smoke nuisance from most cars traveling the streets. No smoke is perceptible from the S.G.V. until it reaches a speed of 25 miles per hour, showing that the oil is not used for fuel, but for lubrication only; hence the motor does not become carbonized after a few thousand miles run, it being well known that carbonizing robs the motor of its power and increases consumption of gasoline through premature explosions.

WE ARE IN A POSITION TO demonstrate and to prove, as we have already done, that the S.G.V. car is in everyday practical use, on the basis outlined above. Then it does not require any great mathematician to figure out that the S.G.V. car is cheaper at the expiration of three years than any \$1500 car on the market. The price is lower by \$1000 to \$1500 on the first cost, and more economical than any other car on the American market, rated as a high-grade car. If you will take the trouble to investigate the S.G.V. car you will find that no American product on the market approaches it in operation, the S.G.V. being an exact duplicate of the Lancia motor, which has made for itself a great history in the European countries, the only change of the original type being an improved carburetor. The cylinders of the S.G.V. motor are cast in Belgium, where the highest grade of castings are made; the body springs are made by Lemoine, the renowned spring manufacturer of France.

FROM THESE BRIEF SPECIFICATIONS it can be readily appreciated that the owner can afford to discard his expensive operating car in order to get the S.G.V., an economical automobile.

Editorial Comment.

W. R. Wheeler, manager of the
traffic bureau of the San Francisco
Chamber of Commerce, is now in
Washington trying to secure the pas-
sage of an act to prohibit railroad
owned steamship companies from
using the canal. This idea is to even
up the matter of competition of ship-
ping, so that an independent line will
have the same advantage as one owned
by a company which at the same
time operates a trans-continental rail-
road. So also is it necessary to secure
free tolls for American shipping,
otherwise the canal will have little
effect in developing our merchant
marine which already languishes when
forced to compete with foreign sub-
sidized shipping.

San Francisco has long been at the
mercy of the railroads. They have
not only controlled land transporta-
tion but water transportation as well.
They have been able to stifle competi-
tion and thus have the entire field to
themselves.

To secure the commercial advantage
which of right belongs to this port it
will be necessary to see that condi-
tions are free. That there is no re-
striction on traffic of any kind; and
that the ocean will be free to whom-
soever may have a ship to engage in
transportation and have the same ad-
vantages that everyone else enjoys.
Competition is the life of trade and
trade is the life of San Francisco.

Particularly hazardous occupations
will no doubt receive more attention
in the future than they have in the
past. Not from the workman's side
so much as from the employer's
side so much as from the employer's
liability acts that have been passed
have brought public attention to this
phase of the industrial question and
the duty that society owes to its in-
jured workmen.

The accident that befell the window
washer in the Phelan Building, who
fell from the second story, is one of
comparatively common occurrence.
Too many chances are taken every
day by these men. How often does
one see them standing at a dizzy
height, holding on with one hand and
one foot, washing the window of some
office building a hundred or more feet
above the pavement. The risk is
always there and it is absolutely need-
less. Besides the safety devices that
are in use for the purpose of cleaning
common windows, there are a number
of windows on the market that admit
of cleaning from the inside. Casement
windows or windows that are hinged
and open from the inside are available
for all high structures and should be
used. The building regulations should
safeguard life as well as property and

where fireproofing and fire protection
are required so also should such con-
struction be required that will not
needlessly endanger the lives of work-
men.

The Fine Arts Commission of the
Federal government has been in ex-
istence a little over a year and has
made its report to the President. Ac-
cording to the report during the first
year, which ended with July 1, 1911,
forty-one questions were acted upon,
the money expenditure involved in
the cases amounting to 16 million
dollars. The most important ques-
tions considered were the site of the
proposed Lincoln Memorial, the de-
sign for the new buildings for the De-
partments of Justice, State and Com-
merce and Labor, the Bureau of En-
graving and the design for the new
Washington City Post Office. These
were decided by the commission as a
whole but usually after committee in-
vestigation and report and numerous
conferences with government officials.
It therefore appears that the Commis-
sion has been active and considering
the fact that they report part of the
fund of \$10,000 appropriated for the
first year's work still untouched they
have not been extravagant in their
expenditures.

Following the same line a number
of cities have established Art Com-
missions among them being Phila-
delphia, Pittsburg and Milwaukee.
The movement to establish civic cen-
ters in cities throughout the country
and to secure fidelity to standards of
art in public buildings is encouraging
and shows some definite and determi-
ned action to realize the City Beautiful.

The tragedy in the courtroom of the
mountains of Virginia shows how
little civilization has advanced in the
oldest commonwealth of the continent.
In fact if one should seek provincialism
in its purity and ignorance in its
densest form he would need to go to
the oldest states in the Union. For
the pioneer and man who has sought
adventure in the west has necessarily
brushed against the world, he has
some knowledge of his limitations and
his horizon is materially widened. In
the blue ridge mountain districts the
same conditions obtain that existed
at the time of the Revolution. A cat-
fish aristocracy, as Senator Ingalls
termed it, exists there, and the country
is parceled out into feuds like the
society of the middle ages. The Judge,
public prosecutor, clerk of the court
and a number of jurors all fell vic-
tims to assassins in the regular dis-
charge of their duties. There is little
in the mountain districts to attract
settlers. As a consequence genera-
tions of outlaws have carried on their
truds in these secluded places and this
latest outbreak serves to remind the
public that such places and such
people still exist within an hour's ride
of the nation's capital.

The Artistic Architectural Possibilities Of Concrete As Displayed In Surface Finish.

From The Concrete Review

The principle of reinforcement by means of steel rods, wire mesh, or light bars in truss form has given to concrete a leading place among structural materials. It marks a departure in many essentials from traditional construction, and therefore must exert a like influence upon design. For this reason it has become a subject of absorbing interest in the architectural world, as it presents new problems not only of structure, but also of ornamental and, possibly, even of stylistic expression. The many practical advantages of concrete and the increasing scarcity of lumber assure it a prominent place in the architecture of the future.

Quite a little work which has already been produced is suggestive of appropriate treatment of form and surface. Still, the bulk of concrete building so far has been on purely commercial or engineering lines. We are as yet feeling our way on the outskirts of a new field of design.

Concrete furnishes opportunities at surface treatment, as the incrustation of tile, contrast of plain surface with color ornament and wrought metal motives of delightful promise, in which some successful work has already been accomplished.

Concrete is by no means a new building material, but not until recently did it occupy any but a secondary position. The Romans were the most notable users of this material, though entirely as a useful substitute for more costly masonry or as a material for rough walls which would be faced with stone or brick. The articulations natural to the latter materials would therefore be expressed; the concrete was merely a backing.

Stucco was sometimes used as a finish for walls. This had been quite a frequent method in still earlier times, and was again later, in the Italian Renaissance, when architectural masonry details was much limited in this medium. The same thing is done very frequently today.

The stucco building, when it breaks away from being a replica of stonework executed in a cheaper material, tends to develop a plasticity of treatment, a monolithic breadth and surface texture of its own. There is little distinction, as a matter of design, between plastering mortar on walls of brick, clay blocks, or concrete, if the latter is not a part of a reinforced monolith. A solid concrete wall is scarcely more than a form of rubble masonry, but one which the fineness of the aggregate makes it easier to render with a presentable surface. But the development of concrete construction has advanced considerably beyond this.

Several methods are now in vogue in which concrete is used, with greater or less completeness, as the structural material. First, there is the above-described stucco on brick or on metal lath over frame. This cannot be classed as concrete architecture, except in so far as it implies some of the same mo-

tives to a limited degree, having superficially the plasticity of cement. It is often attractive, but is contradictory, and therefore must borrow and imitate whenever the simple value of surface seems insufficient and form is indulged in.

Then we have concrete block construction, but this method possesses even less of the real characteristics of concrete. It is, in fact, purely a work of artificial stone. Very few attempts have been made to treat concrete blocks with any artistic sense; when it has been done, however, using large blocks finished to reproduce stone and designing all features just as for one stone, it has been shown to be not without scope. However, it is unproductive of new thought in design, beyond the matter of finish to reproduce something else.

The first of the characteristics of concrete as an architectural material is its plasticity. Technical language adopts the term "pouring into the forms," which concisely implies the impressionable nature of the medium, while it describes the actual method of emplacement. Such material calls naturally for molded, flowing forms growing out of the body material, in contrast to the principle of detachment of forms and the putting together of them in small units, which ideas govern architectural construction and ornament in stone.

Concrete structure is not merely plastic but lends itself to treatment in large masses; it is monolithic. This is the second characteristic of general import, carrying with it the distinction we have just noted. The indication of joints is of course illogical, because such would be merely a pretense of what does not actually exist.

It will be seen from these tendencies that logical form, as it may be expressed architecturally in concrete, makes for severity and simplicity. In all former styles the emphasis of joint lines has been a favorite mode of expression. In this new material plain surface must be mostly depended upon. Conventional form, as it has been handed down to us, is permeated with the feeling of the cutter's tools. One sees this in the straight lines and sharpness of moldings and in clear-cut curving. Concrete ornament should show evidence of molding rather than sculptural quality. Line has diminished in importance, surface and color have gained. Mechanically, as well as esthetically, the elaborate forms of stone architecture, heavily projected and accurately finished, are contrary to the nature of concrete and the methods used in its erection.

Since so much that has seemed positively essential to design, at least for all large problems where formal elaboration is called for, is denied the concrete designer, he must evidently either sever the structure with other materials in the same unrelated manner as is done with steel frame, or must seek other sources of inspiration. A

motive prolific in opportunities is offered in the use of talence and tile. Pattern is the natural form of enrichment for flat surface, and nothing is more consistently in harmony with the unmechanical and plastic, though durable, surface of concrete than ceramic tile and talence. The tile may be modeled in low relief, or, again, may be mosaic inlays of colored marbles or terra cotta in geometric patterns. The quality of the concrete surface permits an expression of the hand-made rather than of the mechanical finish.

Color, of course, may be indulged in without stint. To be sure, it is rather fearful to think what may be in store for us in the way of chromatic outbursts should the speculative suburban builder turn his attention to this subject. In any event, polychromy and incrustation of veneering with thin slabs or tiles in appropriate motives are destined to be leading characteristics of concrete design. Recognized laws of ornament and style will determine the relative value of location and distribution of concentration; capitals, pilaster panels, spandrels, tympana of arches, are natural points of accent. As a general rule, such enrichment is more effective when highly concentrated upon certain central motives of a design and allowed to contrast with expanses of plain surface. One of the limitations of decoration of this type is that it inclines to smallness of scale; thus suggesting its better adaptability to the refinements of a small edifice than to the monumental proportions of a building in the grand manner of the Italian or French tradition. In other words, it is more properly decoration than architecture in a monumental sense.

Penetration assumes an important place in concrete design. In many compositions there will be an obvious opportunity to strike a contrasting note to plain wall surface by the introduction of richly ornamental metal frames and mullions or sinuous tracery, if the latter would be in harmony with other motives or style used. Wrought-iron balconies, gateways, and lanterns will be valuable accessories. We believe, too, that hammered copper for certain purposes, such as copings and cornices, may be used not irrationally and certainly with beauty of effect. Of course, where metal is so applied it should be acknowledged and its characteristics emphasized, not disguised.

The finish and texture and tone of concrete may be varied according to what seems best to harmonize with the character of particular buildings and designs, as will be referred to more at length presently.

Such are some of the motives, full of imaginative promise, that are open to concrete and that should prove, in the problem of the small building, at any rate, an adequate compensation for the forced abstinence from the architectural formalities we have become accustomed to, but which are phased so entirely in the language of stone.

The treatment of surface is one of the most important matters concerned with the architectural possibilities of concrete. As laid up with care, but purely for utility—a rather wet mixture, well tamped in forms of average regularity, being used—a fairly smooth but regular surface results, a film of mortar settling against the sides of the mold. However, every irregularity and almost every joint of the boarding leaves an imprint. Patches of exposed aggregates show here and there, variations of color in streaks and layers. In short such a surface is not merely dull and uninteresting; its in consequent irregularities are objectionable. Several methods are in vogue aiming at the production of an even texture and one agreeable to the eye. Two quite opposite effects may be had. One consists in brushing and washing away the cement skin, thus exposing particles of aggregate; in the other method a surface mixture of selected material is applied to the surface of the molds, just ahead of the pouring of the concrete, and, on removal of the forms, the surface may be further finished by washing or tooling.

The first of these methods frankly admits and displays the material as concrete. Some very delightful and varied effects may be obtained by using aggregate of graded sizes and mixing in a certain proportion of pebbles, marble screenings, burnt clay, or broken brick, flecks of color thus giving an animated texture to the otherwise leaden and lifeless material. Brushing may be done to a greater or less depth, giving a more or less roughened surface, as desired. It is necessary to brush and wash the surface while the concrete is still green, as otherwise the process would be tedious and laborious and could be precluded. Therefore the forms must be removed at about twenty-four hours after placing the concrete. The necessity of removing the form work before the concrete has thoroughly hardened considerably limits the practicability of this process. Load-sustaining sections must be hard before the supporting mold is removed from underneath. Where this effect, rather than a smoother finish, is wanted, it should be quite possible to attain it in a measure, even when the concrete is quite hard, by the use of acid or the stone brush hammer. Sufficient of the mortar skin could be removed to obliterate the impression of board veining and layer marks and at the same time expose some of the aggregates. After this tool dressing the wall should be brushed down with dilute acid, followed by water played on by a hose to prevent any stains left by the acid.

Exposed aggregates produce decidedly the most legitimate surface, the only proper finish, it might even be said, where consistent concrete design and ornament is carried out. As a matter of fact, the method best suited, for practical reasons, to buildings of small dimensions, and, artistically, to those of simple wall composition.

In the present transitional period, and quite possibly beyond it, a smoother texture, more nearly that of cut stone, will be considered more desirable for many purposes. Such a finish is arrived at by the method known as mortar facing, though it is by no means limited to the mortar of the ordinary variety. The most primitive

fashion of applying is to trowel on a mortar against the face of the form about an inch thick and for the height of the layer about to be laid and to fill in behind and at once with the ordinary concrete, which, of course, firmly unites with it, as the mortar is still soft. An improvement insuring greater accuracy is to form a slot by means of a sheet-iron plate specially devised for the purpose, with angles to hold it vertically at a desired distance from the face of the forms. The prepared concrete for the facing is first filled into the slot and immediately afterward the backing is poured and tamped down. Then the plate is raised allowing the two to be firmly bonded together by ramming. When the forms are removed, the facing will require dressing and cleaning down, as, even though the boards have been covered with oil or soap, the soft material will take the impression of grain and joints, and a difference may break out in spots. A great variety of texture and of color as well, may, of course, be achieved according to the aggregates selected, including marble, gray trap rock, yellow sand, and brick dust.

A cheaper method, but one not to be recommended since more permanent finish is possible, consists in applying a skin coat of mortar to the surface after the building is erected and forms have been removed.

The two principal methods above described, respectively that of out-spoken concrete, aggregates showing in relief, and the surfaced-finish, displaying an even, fine texture closely resembling that of cut stone, though it may be coarser, are destined, we think, to characterize two schools of design. Each in its way legitimate, because harmonious with its own set of ideas and adaptable to widely separated classes of buildings.

We must come to the conclusion, therefore, that in the treatment of concrete surfaces one thing is to be borne in mind—that concrete should be treated as concrete and not as a cheap imitation of any other building material. Concrete construction lends itself with great facility to almost any class of surface treatment.

In giving descriptions of a few methods, which have been successfully employed, they can be considered under two general heads. First, by the insertion into the concrete of various colored clays or tiles, second, by placing a selected aggregate in the nature of granolithic finish, on the surface and afterward scrubbing or otherwise treating the concrete surface itself. Both insertions are made at the time the concrete is placed.

We do not consider in this bulletin the method of treating concrete surfaces by means of placing a veneer of plaster on the outside of the concrete after the forms have been removed.

CONSTRUCTION WORK ABROAD. CANADA.

New Record for Structural Work in City.

The process of making a city is still in progress in Victoria. The building permits for January totaled \$18,553, against \$13,153 in January, 1911. More than \$200,000 is listed for dwellings; the balance for business struc-

ture. Building permits for the first 15 days of February aggregated \$211,000, as against \$133,000 for the whole of February, 1911.

An \$85,000 contract has been awarded by the Westholme Lumber Co. for a modern fireproof brick and concrete structure with marble facings in corridors, etc. The ground floor will be occupied as a book and stationery store by Messrs. Hubben, upper stories for offices, and basement for billiard room and haberdashery, all equipped with modern conveniences and heating apparatus.

A modern 10-room apartment house, with stores on ground floor, has been contracted for on corner of Niagara and Menzies streets.

Plans have been completed by Jesse M. Warren, architect for a \$25,000 factory for the Canada Mosaic Tile Co., which will employ 150 men. The architect is calling for tenders.

Plans are being prepared by H. S. Griffiths, architect, for an 8-story \$80,000 office building for the Dominion Trust Co. Tenders will shortly be asked for the building and for the latest modern finishings.

Plans for a 1-story concrete building, 60x80 feet are being prepared for the British Columbia Permanent Loan Co. Tenders will be asked for in March.

A contract at \$62,000 has been given to the Victoria Home Construction Co. for Grant & Linclum's new 3-story building of pressed brick and terra cotta.

New tenders are asked for the large new high-school building, the contract for which was let to a local company in January for \$280,000. The next lowest tender was \$225,000. The successful bidder was unable to secure guaranty from any satisfactory bonding company that the contract would be fulfilled, consequently new tenders are sought.

The Norton Griffiths Construction Co., a large English engineering and contracting firm, which is to build the Government docks at St. John, New Brunswick, is erecting two large structures in Victoria. That for the Union Bank of Toronto is 56x120 feet, 6 stories high, with framework entirely of steel made in Toronto by an American concern. The other, the Belmont building, facing on three streets near the harbor, is over double that size, to be 8 stories high, and will be the largest in the city.

Government Grain Elevator.

House of Commons bill No. 32, "An act respecting grain" has been introduced in Parliament as a Government measure. The Minister of Trade and Commerce stated that it is the intention of the Canadian Government to ask for a grant of money during the present session for acquiring a terminal elevator at Fort William (under sec. 13 of the act), but that for the present no plans have been formulated for constructing or operating terminal elevators at any other place in Canada. (A copy of the act is filed for public reference at the Bureau of Manufactures.)

Normal School Building at Regina.

Work will be started this year on a \$200,000 normal school at Regina, Saskatchewan. There will be voted by the Government of the Province of Saskatchewan \$200,000 for the work this year.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

—APARTMENT HOUSES—

San Francisco—Apartment house, 3 story and base, frame, \$20,000. Architects, Welsh & Carey, Metropolitan Bldg. S. F. Owners, Joseph Abrams et al. This building has been mentioned here before when the plans were first started. The structure will contain 36 rooms arranged in suites of two and three rooms each with bath. There will be a central heating system and elevator service. There will be wall beds. The interior trim will be of pine. The exterior of the building will be covered with brick veneer and shiplap. Plans are complete and figures are being taken.

San Francisco—Apartment house, 6 story and base, steel and brick, \$100,000. Architect, Grace Jewett, 601 Montgomery St., S. F. Owner, E. L. Hueter. The building will be erected on Bush street near Jones, and will contain in the neighborhood of 120 rooms arranged in two and three room apartments with connecting baths. There will be steam heat, elevator service, wall beds and a vacuum cleaning system. The exterior of the building will be faced with pressed brick and terra cotta. The plans are complete and figures are being taken.

San Francisco—Apartment house, 3 story and base, frame, \$18,000. Architect, J. F. Dunn, Monadnock Bldg., S. F. Owner, Philip Yager, 129 Carl St., S. F. The building will contain nine apartments of the two and three room variety. The chambers will be equipped with wall beds. There will be steam heat. The interior finish will be of pine with some hardwood floors. The exterior of the building will be covered with brick veneer and shiplap. The plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Apartment house, 3 story and base, frame, \$17,000. Architect, Frederick H. Meyer, Humboldt Park Bldg., S. F. Owner, A. F. Peterson. The building will be erected on upper Market street and will contain 24 rooms and baths. The suites will be of two rooms each. There will be steam heat and wall beds. The interior finish will be of pine throughout. The exterior of the building will be covered with cement plaster on metal bath. The plans are being prepared.

San Francisco—Apartment additions, 2 story frame, \$15,000. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Goldberg-Bowen Co. This work will consist of a two story frame addition to the present one story and basement building. The upper floors will be divided into modern apartments. The first floor will be occupied by the owners. The exterior of the building will be covered with shiplap. The plans are now complete and figures are being taken.

San Francisco—Apartment house, 5 story and base, brick and steel, \$100,000. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owners, Clay M. Frances, M. William Green, and Ursula

Green Sawyer. This work has been mentioned here several times before. The plans were recently revised and are again out for figures. The architect will award a general contract within the course of the next few days. The building will be one of the most modern apartment houses in the city.

Los Angeles, Cal.—Apartment house, 2 story and base, brick. Cost not stated. Architect, Clyde Cheney, Story Bldg., L. A. Owner, R. Ruby. The building will be 45x100 feet. The first floor will contain two stores. The upper floor will be divided into twenty-three rooms arranged in suites of two rooms and bath each. There will be wall beds. The exterior of the building will be faced with pressed brick trimmed with artificial stone. The architect is completing the working drawings.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, Joseph P. Rhodes, Central Bldg., L. A. Owners, Joseph H. Rhodes and associates. The building will contain 84 rooms arranged in two and three room suites with baths. There will be wall beds, steam heat and vacuum cleaning system. Considerable tile will be used. The exterior of the building will be faced with pressed brick. The plans are now being prepared.

Los Angeles, Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, Carl Escherich, 753 West 48th St., L. A. Owner, John H. Foley. The building will be 41x135 feet. There will be 60 rooms arranged in 24 apartments with private baths and dressing rooms. The interior finish will be of pine and hardwood. There will be wall beds and steam heat. The exterior of the building will be covered with rustic. The plans are nearing completion.

Los Angeles, Cal.—Apartment house, 1 story and base, brick and steel. Cost not stated. Architect, F. X. Lourou, Merchants' Trust Bldg., L. A. Owner, C. A. Vanderburg. The building will contain 120 rooms arranged in 48 apartments of two and three rooms each. There will be private baths, steam heat, vacuum cleaning system, wall beds and elevator service. The interior trim will be of pine and mahogany. The exterior of the building will be faced with pressed brick trimmed with artificial stone. The plans are complete and figures are being taken.

San Francisco—Apartment house, 3 story and base, frame, \$22,000. Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owner, A. Newman. The building will cover an area of 30x91 feet and will contain nine three-room apartments and two two-room apartments. There will be private baths, steam heat and Murphy wall beds. The interior trim will be of pine and mahogany veneer. The exterior of the building will be covered with brick veneer and shiplap. The plans are complete and figures are being taken.

San Francisco—Apartment house, 3 story and base, frame, \$12,000. Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owner, Albert Boetcher. The

building will cover an area of 30x54 feet and will contain six four-room apartments with connecting baths. There will be steam heat and wall beds. The interior finish will be of pine, redwood and mahogany with the entry halls finished in old ivory. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owner, Miss C. L. Engelson. The building will contain 54 rooms arranged in two and three room suites with connecting baths and private dressing rooms. The interior trim will be of pine. There will be steam heat and wall beds. The exterior will be faced with pressed brick. Segregated figures are now being taken.

Contracts Awarded.

San Francisco—Apartment house, 8 story and base, reinforced concrete, \$65,000. Architect, Edward T. Foulkes, Crocker Bldg., S. E. Owner, Harry Rosenberg. Contractors, MacDonald & Kahn, 251 Kearny St., S. F. Note: This contract was awarded several months ago but has never been put on record. The architect states that the work will proceed at once.

Los Angeles, Cal.—Apartment house addition, 3 story frame. Cost not stated. Architects, Garrett and Bixby, Currier Bldg., L. A. Owner, J. B. Solomon. This work will consist of the addition of one story and the complete rearrangement of the building. There will be 27 two room apartments with baths. There will be steam heat, wall beds and private baths. The exterior of the building will be covered with Arizona sandstone and shiplap. Plans are ready for figures.

Long Beach, Los Angeles Co., Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architects, Scholes and Lochridge, First National Bank Bldg., Long Beach. Owners, Messrs. Chure, Starr and Thompson. The building will be 53x185 feet and will contain 60 rooms and 25 bath rooms. There will be steam heat. The exterior of the building will be covered with shiplap. The plans are now being figured.

Venice, Los Angeles Co., Cal.—Apartment house, 4 story and base, frame, \$35,000. Architect none. Owners, Sargent Realty Co., Venice. The building will be 80x100 feet. There will be 90 rooms arranged in two and three suites with connecting baths. There will be steam heat, wall beds and built in connection. The exterior of the building will be covered with cement plaster on metal lath. The plans are in the hands of the owners and they are taking figures on the work.

Portland, Ore.—Apartment house 5 and 6 story and base, reinforced concrete. Cost not stated. Architect, W. D. Sherman, Portland. Owner's name withheld. The building will cover a ground area of 100x100 feet. The interior will be arranged for 60 apartments of from two to four rooms each. There will be steam heat, elevator service, wall beds and vacuum cleaning system. The exterior will be faced with

pressed brick. The architect is completing the working drawings.

Portland, Ore.—Apartments and stores 2 story and base, brick, \$35,000. Architects, Bridges and Webster, Portland. Owners, Fred H. and George M. Strong. The building will cover an area of 1238 130 feet. There will be five stores and a moving picture theatre on the first floor and 17 apartments of two rooms and bath each on the upper floor. The exterior of the building will be faced with pressed brick. The plans are in the hands of the owners and the work will be done by Day Labor.

Contracts Awarded.

Los Angeles, Cal.—Apartment house, 2 story and base, brick, \$12,000. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owner Marcos Landberg, Contractor, J. M. Thomas, 1970 West 34th St., L. A. Contract price, \$10,000. Note: This contract does not include wall safes and other specialties.

BANKS.

Calegrove, Los Angeles Co., Cal.—Bank, 2 story and base, brick. Cost not stated. Architects, Hudson & Munsell, Stinson Bldg., L. A. Owner, Schuyler Cole. The building will contain two stories and the banking quarters on the first floor. There will be lodge rooms and seven rooms on the second floor. The exterior will be faced with pressed brick. There will be a coin and safety vault in the basement. The plans are complete and figures have been taken.

Salem, Ore.—Bank alterations, \$30,000. Architect, D. C. Lewis, Portland. Owners, Ladd and Bush Bank, Salem. The work will consist of the complete interior alteration of the banking quarters, the installation of new bank fixtures and of a large manganese steel vault. The plans are complete and figures are being taken.

BRIDGES, DAMS AND HARBOR WORK.

San Bernardino, San Bernardino Co., Cal.—Bridges, 4, reinforced concrete. Cost not stated. Engineer, County Engineer San Bernardino County. Owners, San Bernardino County. Plans are complete and figures will be opened on April 1st for the construction of four reinforced concrete bridges over the West Twin Creek on the Waterman Canyon Road. Charles Post is the Clerk of the Board of Supervisors and can furnish all desired information.

San Francisco—Bridge, reinforced concrete and wood. Cost not stated. City Engineer Marsden Manson, 1104 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Funds have become available for the construction of the bridge over Harrison street. The Board of Public Works have been notified to advertise for figures.

San Francisco—Harbor work and ferry slips, reinforced concrete. Cost not stated. Engineer Saph, Ferry Bldg., S. F. Owners, State of California. Plans are nearly complete for the new ferry slips which are to be constructed at the present Mission street wharf, in addition to the ferry slips there will be a large amount of other harbor work ready for figures within the next few weeks. The official proposals will be published in these columns as soon as bids are called.

Seattle, Wash.—Harbor improvements, \$2,500,000. Engineers, Commission not yet appointed. Owners, City of Seattle and State of Washington. The several bond issues which were voted on recently in Seattle for the improvement of the Harbor Island project and other big harbor work carries with it the following construction enterprises, which are to be undertaken at once. These projects are distinctly separate and independent of the work projected by the Bush Terminal Co., which will be found listed under the head of warehouses. Bonds were voted for the following: Smith Cove over-sea dock, which will be of fire proof construction and costing with modern machinery \$1,000,000; over-sea docks on block 372, Seattle Tide Lands, or on the east side of the East Waterway Harbor Island, costing \$850,000; deep sea dock for the handling of lumber in Salmon Bay, costing \$350,000; mosquito fleet dock on the waterfront between Lenora and Vine streets, costing \$750,000; for Lake Washington ferry, \$150,000; the Harbor Island propositions both of which carried, one for the expenditure of \$500,000 at once in two 500 feet long reinforced concrete docks, and a later expenditure of \$3,000,000 for additional docks to be erected by the Seattle Port Commission.

Contracts Awarded.

Anacortes, Wash.—Bulkheading and piling, \$25,000. City Engineer of Anacortes. Owners, City of Anacortes. Contractors, George C. Dietrick & Co., Globe Bldg., Seattle. Contract price, \$25,000.

FACTORIES & WAREHOUSES.

San Francisco—Warehouse, 2 story and base, brick, \$3,000. Architect, none. Owners, Ponsero Bros., 10 Adler St., S. F. The building will be of stock brick. Considerable structural steel will be used. The plans are in the hands of the owners and the work will be done by Day Labor.

San Francisco—Warehouse, 2 story and base, brick and steel. Cost not stated. Architect, Herman Barth, 12 Geary St., S. F. Owner, George D. Stone. The building will be erected in the wholesale district. A contract for the foundation work has been let to Healy-Tibbitts Co. The exterior walls of the building will be faced with pressed brick. There will be no interior finish. A freight elevator will be installed. The architect is taking figures on the balance of the work.

San Francisco—Factory, 1 story and base, reinforced concrete, \$35,000. Architect, Frank Van Trees, Lick Bldg., S. F. Owners, Lange-Jergenson Co. The building has been designed for a modern factory plant. There will be concrete floors. The exterior walls will be faced with cement plaster. The roof will be of tar and gravel. Plans for the work have been completed and figures are being taken.

San Jose, Santa Clara Co., Cal.—Factory and warehouse, 2 1/2 story and base, reinforced concrete. Cost not stated. Engineering Dept., American Can Co., Mills Bldg., S. F. Owners, American Can Co. The owners have informed the Building and Industrial News that plans will shortly be completed for two buildings. One will be a factory covering a site 128x150 feet and the other a large warehouse 128x225 feet. The

construction will be of reinforced concrete throughout. The exteriors will be faced with cement plaster. The owners will take figures on the work and plans are specifications may be secured from their offices.

Harbor Island, Wash.—Warehouses, etc., reinforced concrete and steel construction, \$2,575,000. Architects and engineers not selected. Owners, Pacific Terminal Co. The Pacific Terminal Co., which is composed of W. A. Starrett of the Thompson-Starrett Construction Co. of New York, Paul Starrett, vice-president and general manager of the Puller Construction Co. of New York; R. F. Ayres, formerly with the Bush Terminal Co. of Brooklyn, N. Y., now of Seattle; Chas. Fenn, Leary Bldg., Seattle, and Palmer Woodbury, of New York, will construct at once the following at a total cost of \$2,575,000: Six-story warehouse, \$180,000; 30 1-story warehouses, 75x100 feet, \$30,000; 30 1-story warehouses, 100x100 feet, \$120,000; 10 miles of railroad, \$100,000; harbor harbor equipment, cranes, lighters, etc., \$115,000; rail equipment, engines and flat cars, \$170,000; 4 industrial buildings, \$120,000, bulkheads, \$200,000. Two piers 1400 feet long will be built by the company at once at a cost of \$1,000,000.

Seattle, Wash.—Factory, 6 story and base, reinforced concrete, \$500,000. Engineering Dept., Ford Motor Car Co., Detroit, Mich. Owners, Ford Motor Car Co. The President of this company has recently visited Seattle and selected a site for one of the large assembly plants which are to be erected on this coast. He announced that plans for the building would be sent west by the middle of April and that a Seattle architect would be selected to supervise the work. Construction will be started this summer and will be under the direction of the Ford Co.'s Seattle manager, Mr. R. P. Rice, 532, 15th Ave., North.

Portland, Ore.—Warehouse, 1 story and base, reinforced concrete. Cost not stated. Architect, D. C. Lewis, Portland. Owners, Portland Gas and Coke Co. The building will cover a quarter block and will be of fire-proof construction throughout. There will be metal trim, doors and window sash. The exterior will be faced with cement plaster. The plans have been out for figures and a general contract will be awarded at once.

FLATS.

San Francisco—Flats, 2 story and base, frame, \$7,000. Architect, none. Owner, Mrs. E. Soid, 510 14th St., S. F. The building has been designed to contain four modern flats of four and five rooms each with baths. The interior trim will be of pine and redwood. There will be gas grates. The exterior of the building will be covered with shiplap and rustic. The plans are in the hands of the owner and she is taking figures. Bids will be opened on March 23rd.

San Francisco—Flats, 2 story and base, frame, \$7,500. Architect, none. Owner, Frank Thumberg, 1664 Fulton St., S. F. The building will contain three flats of five and six rooms each. The interior finish will be of pine and redwood with some hardwood floors. There will be gas grates. The mantels will be of brick. Tile will be used in the baths and kitchens. The exterior of the building will be covered with brick

vener and cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

San Francisco—Plats, 2 story and base, frame, \$5,000. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner's name withheld. The building has been arranged for three flats of five and six rooms each with baths. The interior finish will be of pine. Hardwood floors will be used in the principal rooms. There will be gas grates. The exterior of the building will be covered with shiplap. The plans are complete and the architects are taking figures on the work.

San Francisco—Plats and stores, 2 story and base, frame, \$5,000. Architects, L. M. Wiesman & Son, Pacific Bldg., S. F. Owner, M. Alt. The building will contain one store on the first floor and two flats of four and five rooms each on the upper floor. The interior finish will be of pine and redwood. There will be gas grates. The exterior of the building will be covered with shiplap. The plans are complete and the architects are taking figures.

San Francisco—Plats, 2 story and base, brick, \$6,000. Architects, Wilde & Schaefer, Albany Bldg., Oakland. Owner, Alexander Politzer. The building has been mentioned here before when the architects were preparing the plans. The working drawings have been completed and figures are now being taken. The exterior of the building will be faced with cement plaster. There will be four flats of four or five rooms.

San Francisco—Plats, 3 story and base, frame, \$3,500. Architect, none. Owner, E. A. Knoop, 1375 Stevenson St., S. F. The building will contain three small flats with baths. The interior trim will be of pine throughout. There will be gas grates. The exterior of the building will be covered with rustic. The plans are complete and the work will be done by Day Labor.

GARAGES.

Los Angeles, Cal.—Garage, 1 story and base, brick, \$15,000. Architect none. Owner, R. F. Bennett, 955 Crocker St., L. A. The building will have a frontage of 120 feet and a depth of 120 feet. There will be sales room, storage space, repair shops and gasoline tanks. The floor will be of cement. The exterior of the building will be faced with pressed brick. The plans are in the hands of the owner and he is taking figures.

Los Angeles, Cal.—Garages, two 1-story and base, brick. Cost not stated. Architects, California Realty and Building Co., 112 South Spring St., L. A. Owner, F. Thum, Pasadena. The buildings will be 40x145 and 50x125 respectively. There will be concrete floors. The exterior of the buildings will be faced with pressed brick. The work will probably be done by Day Labor. The plans are being prepared.

Contracts Awarded.

Los Angeles, Cal.—Garage, 2 story and base, brick. Cost not stated. Architects, R. B. Young and Son, Landershim Bldg., L. A. Owners, Geo.-Robbins Co. Contractor, D. W. Aaron, L. A. foundations. The balance of the work has not been awarded but will probably be done by Day Labor. The building will be 55x80 feet.

Santa Ana, Orange Co., Cal.—Garage,

2 story and base, brick, \$12,000. Architects name not given. Owner, S. J. Jackman. Contractor, A. C. Black, 709 West Fourth St., Santa Ana. Contract price, \$12,000.

Santa Monica, Los Angeles Co., Cal.—Garage, 1 story and base, brick and concrete, \$15,000. Architect, James T. Peasgood, Santa Monica. Owner, C. W. Valiant. Contractor, George D. Snyder, 2521 Lake St., Santa Monica. Contract price \$15,000.

GOVERNMENT WORK AND SUPPLIES.

Port Mason, Cal.—Converting shed into office. Engineers, Constructing Q. M. Dept., Port Mason. Owners, U. S. Government. Contractors, Kaufman & Edwards, S. F. Contract price, \$7,387.

Port Milby, Cal.—Constructing wire fence, \$1,572. Engineers, Constructing Q. M. Dept., Port Milby. Owners, U. S. Government. Contractor, James Stanley, Sr., 8215 19th St., Oakland. Contract price, \$1,572.

Presidio of San Francisco, Cal.—Hydrolytic tank, \$600. Engineers, Constructing Q. M. Dept., Port Mason. Owners, U. S. Government. The following bids for this work were received. No contract has been awarded.

Francis Szoke, 402 Kearny St., S. F., \$519.

Willis A. Clark, 657 Monadnock Bldg., S. F., \$989.

Pringle, Dunn & Co., 338 Pine St., S. F., \$575.

HALLS & SOCIETY BLDGS.

San Jose, Santa Clara Co., Cal.—Association building, 4 story and base, brick and steel, \$100,000. Architect, William Blinder, Rea Bldg., San Jose. Owner, Young Men's Christian Association. This building has been mentioned here before when figures were first called for. The time for opening the bids has now been extended for two weeks. The plans can be had from either the architect or from the Secretary of the Association.

Sacramento, Cal.—Armory, 2 story and base. Class A construction, \$56,000. State Architect Digges, Sacramento. Owners, State of California. This work has been mentioned here several times before. Figures were to have been opened on March 15th, but notice has been received here to the effect that the opening of the bids has been indefinitely postponed.

Seattle, Wash.—Park buildings, brick and concrete construction, \$250,000. Architects, Bebb & Mendel, Denny Bldg., Seattle. Owners, City of Seattle. The funds recently voted by the citizens for park improvements will be expended in the following manner: For the construction of a 2 story brick and concrete field house at 14th avenue, South and Washington street, to cost \$35,000. Bids soon to be called for; for the construction of a 2 story field house in South Park, a duplication of the Hiawatha field house, to cost \$15,000. Plans will be prepared at once for construction of a steel and glass conservatory at Volunteer Park, to cost \$50,000. Material for this has been contracted for; for gymnasium apparatus for Mercer and Walla Walla playgrounds, \$20,000. It is

also possible that the construction of an administration building for which Architect Louis Baecker, White Bldg., Seattle, prepared sketches, will be considered this year. It is to be an eight-story steel and concrete building and to cost \$250,000.

HOSPITALS.

Los Angeles, Cal.—Hospital, 2 story and base, brick and concrete. Cost not stated. Architect, A. B. Benton, 114 North Spring St., L. A. Owners, University of Southern California. The building will be 40x102 feet. There will be two operating rooms, kitchen, dining room, six single rooms and two twelve-room wards. There will be cement floors, four baths, tile partitions and steam heat. The exterior walls will be faced with pressed brick. The plans are complete and figures are being taken. Bids will be opened on March 15th.

Pomona, Los Angeles Co., Cal.—Hospital, 2 story and base, reinforced concrete, \$25,000. Architects, Davis & Higgins, First National Bank Bldg., Pomona. Owners, Pomona Hospital Association. The building will contain several private rooms, operating room, diet kitchen, sun porches and a large ward. There will be steam heat. The construction will be fire proof throughout. The exterior of the building will be faced with cement plaster. The plans are now being prepared.

San Francisco—Finish work in hospital. Cost not stated. City Architect Alfred J. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Plans have been completed for the interior finish work of the power house and laundry of the San Francisco Hospital. Bids will be opened by the Board of Public Works on March 26th.

Oakland, Ventura Co., Cal.—Hospital, 2 story and base, reinforced concrete, \$75,000. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Sisters of Mercy and an association of Oakland citizens. The architect has just been commissioned to prepare these plans and details of the construction are not as yet obtainable. The building will be fire proof. One wing will be constructed at the present time, and the balance of the work will be taken up in the near future.

HOTELS.

San Francisco—Hotel and stores, 4 story and base, brick and steel, \$35,000. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owners, Clay Investment Co. The building will contain stores on the first floor and a large number of single rooms on the upper floors. There will be ten baths. The interior finish will be of pine throughout. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

San Francisco—Hotel and stores, 3 story and base, frame, \$20,000. Architect, David C. Coleman, Western Metropolis Bank Bldg., S. F. Owner, Charles Katz. The building will be 50x95 feet. There will be two stores on the first floor and 50 rooms and baths on the upper two floors. The interior trim will be of pine. The exte-

rior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Hotel, 5 story and base, reinforced concrete, cost not stated. Architect, Bong. G. McLaughlin, Sheldon Bldg., S. F. Owners, University Hotel Co. The building will be erected on one of the main thoroughfares of the city and will be designed for a modern, commercial hotel. There will be in the neighborhood of 120 rooms, a large percentage of which will have connecting baths. There will be stores, a main office and lobby on the first floor. There will be steam heat and elevator service. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Los Angeles, Cal.—Hotel, 3 story and base, brick and steel. Cost not stated. Architects, W. J. Beverly, Keim Co., Wright & Callender Bldg., L. A. Owners, their name withheld. The building will be 60x80 feet. There will be four stores and the main office and lobby on the first floor and 21 rooms and 6 baths on each of the upper floors. There will be steam heat. The exterior will be faced with pressed brick. The plans are now being prepared.

San Francisco—Hotel, 2 story and base, brick. Cost not stated. Architect, Frederick D. Beebe, 45 Kearney St., S. F. Owner, George A. Clough. There will be two separate buildings each 55x140 feet. The first building will be erected on sixteen five stores on the first floor and 120 rooms above. Leases have already been made on the stores and hotel. There will be steam heat, hot and cold running water in all rooms and a number of public baths on each floor. The exterior of the building will be faced with pressed brick. The plans for the second building will be prepared at once. Plans for the first structure are now nearly complete and figures will be called for shortly.

Los Angeles, Cal.—Hotel, 3 story and base, frame. Cost not stated. Architect, W. J. Saunders, Wright and Callender Bldg., L. A. Owner, F. W. Brann. The building will be 50x68 feet and will contain 22 rooms and 9 baths. There will be steam heat. The exterior will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Laurel Canyon, Los Angeles Co., Cal.—Hotel, 3 story and base, reinforced concrete, \$100,000. Architect, Alfred P. Priest, Fay Bldg., L. A. Owners, Canyon Castle Corporation, Wright and Callender Bldg., L. A. The building will be arranged in the form of a 'U' with extreme dimensions of 200x150 feet. The first floor will contain office, main lobby, ladies' and gentlemen's parlors, dining rooms, kitchen department etc. The upper floors will contain 50 guests rooms with private baths and dressing rooms. There will be steam heat and elevator service. The exterior of the building will be faced with cement plaster. The plans are to be completed as soon as possible and construction will be started this spring.

POST OFFICES.

Klamath Falls, Ore.—Postoffice, 2 story and base, brick and steel, \$112,000. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. The Public Buildings Com-

mittee has reported favorably on a bill appropriating \$112,000 for the construction of this building, and the architect reports the plans are nearly complete.

Alameda, Alameda Co., Cal.—Post office, 2 story and base, brick and steel, \$100,000. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. The Congressman from this district states that plans are complete for the construction of this building, and that bids will be called for in the course of the next thirty days.

RAILROAD CONST. STATIONS AND EQUIPMENT.

Petaluma to Tomales Bay, Cal.—Railroad construction. Cost not stated. Engineer, Matthews, Petaluma. Owners, Petaluma Electric R. R. Co. A branch line from the Petaluma Electric line at Petaluma is to be built through Roundfield to Tomales Bay and Dillon's Beach. The residents of the country to be traversed have subscribed \$50,000 towards the completion of the line. Chief Engineer Matthews, Petaluma, is in charge of the work.

San Francisco—Railroad construction. Cost not stated. City Engineer Marsden Manson, 1104 David Hewes Bldg., S. F. Owners, City and County of San Francisco. The Board of Public Works are advertising for figures for the construction of the Geary Street Municipal railroad from Kearny and Market to Fifth avenue. Bids will be opened on March 27th.

Lakeview, Ore.—Passenger station, 1 story and base, brick, \$17,000. Architect, F. J. De Longchamps, Monarch Bldg., S. F. Owners, Nevada-California and Oregon R. R. Co., Reno, Nev. The building will contain one waiting room, station agent's office and baggage room. The interior of the building will be finished in redwood. The exterior will be faced with pressed brick. The plans are complete and figures will be opened by the owners on March 21st at Reno, Nev.

Seattle, Wash.—Railroad construction. Cost not stated. Engineer Dimock, Seattle. Owners, City of Seattle. The plans and specifications have been completed for the municipal logging road which is to connect Monton and Camp No. 2. The specifications include the following: 160 tons of rail, 600 pairs of angle splice bars, 12 100-pound keels of track bolts, 7,500 ties, clearing, grading, grubbing etc. Bids will be called for at once.

RESIDENCES.

San Francisco—Residence, 3 story and base, brick, \$10,000. Architect, A. Whittelsey, 1137 Hyde St., S. F. Owner, Mary E. Seeley. The building will contain eight rooms and will cover a ground area of 29x53 feet. The interior finish will be of pine and redwood with some oak floors. There will be open fire places with tile or brick mantels. The exterior of the dwelling will be faced with pressed brick. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$2,500. Architect, Joseph A. Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwelling will contain six rooms and bath. The interior finish will be of pine and redwood. There will be open fire

places with brick or tile mantels. The floors will be of hardwood. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with shingles. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 3 story and base, frame, \$25,000. Architects, Ward & Bohne, Alaska Commercial Bldg., S. F. Owner, Mrs. F. S. Knight. The dwelling will contain in the neighborhood of twelve rooms and several baths. The interior trim will be of pine, mahogany and white enamel. There will be furnace heat and open fire places. The floors will be of hardwood throughout. The mantels will be of brick and tile. The tile will be used in the bath and kitchen. The exterior of the dwelling will be faced with brick veneer and cement plaster on metal lath. The plans are complete and bids are being taken.

San Francisco—Residence, 2 story and base, frame, \$5,000. Architect, Joseph A. Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwelling has been designed for an eight-room house with all modern conveniences. The interior finish will be of pine with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick or tile. The tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, A. Y. Skeew. The dwelling will contain five rooms and bath. The interior trim will be of pine throughout. There will be open fire places with attractive tile mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$1,500. Architect, O. W. Dicke, Central Bank Bldg., Oakland. Owner, T. W. Holson. The dwelling has been designed for a nine-room house with two baths. The interior trim will be of redwood. There will be some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with rustic. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame. Cost not stated. Architect, none. Owner, George B. Kay, Berkeley. The dwelling will contain seven rooms and bath. The interior finish will be of pine with some hardwood floors. There will be open fire places with attractive brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$4,000. Architect, A. Merrill, Bowers & Co., Broadway, Oakland. Owner, W. J. Mortimer. The dwelling has been designed for an eight-room house with bath. The interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. The mantels will be of

brick. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$2,500. Architect, L. E. Brackett, 626 56th St., Oakland. Owner, A. P. Dull. The dwelling will contain six rooms and bath. The interior finish will be of pine throughout. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

San Francisco—Residence, 2 story and base, frame, \$8,000. Architect, E. E. Young, 251 Kearny St. S. F. Owner, Thomas Seabury, 322 14th Ave. S. F. The dwelling has been designed for an eight-room house with baths. The interior trim will be of pine, oak, redwood and mahogany. There will be hardwood floors. The dwelling will be heated by a warm air furnace and open fire places. The mantels will be of brick. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$5,200. Architect, none. Owner, J. P. Kujawa, 4956 Fairbanks Ave., Melrose. The dwelling has been designed for an eight-room house with baths. The interior finish will be of pine and redwood. There will be hardwood floors, tile or brick mantels and furnace heat. The exterior of the building will be covered with shiplap and brick veneer. The plans are complete and the work will be done by Day Labor.

Alameda, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, W. W. Landgrebe, 1505 Fernside Boulevard, Alameda. Owner, R. C. Hillen. The dwelling will contain six rooms and bath. The interior finish will be of pine with some hardwood floors. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$1,500. Architect, none. Owner, H. P. Nelson, 2226 Grove St., Berkeley. The dwelling will contain eight rooms and baths. There will be furnace heat and open fire places. The interior finish will be of pine and redwood. There will be some hardwood floors. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$5,000. Architect, none. Owners, Ideal Building Co., 5445 Boyd Ave., Oakland. The dwelling has been designed for an 8-room house with baths. The interior finish will be of pine with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with shingles. The plans are in the hands of the owners and the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect, none.

Owner, H. M. Smalley, 5214 Dover St., Oakland. The dwelling will contain five rooms and bath. There will be pine trim with some hardwood floors. There will be open fire places with tile or brick mantels. The exterior of the building will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$4,500. Architect, A. W. Smith 1904 Broadway, Oakland. Owner, N. A. Truebeck. The dwelling has been designed for an eight-room house with baths. There will be furnace heat and open fire places. The interior trim will be largely of pine and redwood. There will be tile or brick mantels. Tile will be used in the bath and kitchen. The floors in the principal rooms will be of oak. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Alameda, Alameda Co., Cal.—Bungalows, 2, 1 story and base, frame, \$2,000 each. Architect, none. Owner, W. G. Le Boyd, 1344 Broadway, Oakland. The dwellings will each contain six rooms and bath. The interior finish will be of pine throughout. There will be open fire places and tile mantels. The exteriors of the dwellings will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Alameda, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, John M. Lundholm, 1717 Wood St., Alameda. The dwelling will contain six rooms and bath. The interior trim will be of pine. There will be some hardwood floors. There will be open fire places with brick mantels. The exterior of the house will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Corinthian Island, Marin Co., Cal.—Residence, 2 story and base, frame, \$1,000. Architect, C. C. Dakin, 3 Montgomery St., S. F. Owner, Capt. E. E. Johns. The dwelling has been designed for a seven-room house with furnace heat, open fire places, hardwood floors and tile or brick mantels. There will be two baths. The exterior will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Fair Oaks, San Mateo Co., Cal.—Residence, gardens, \$2,500. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owner, Louis Stern. The work will consist of the construction of sunken gardens, a concrete swimming tank and an aviary. The plans are now complete and figures are being taken.

SCHOOLS.

San Francisco—School heating. Cost not stated. City Architect Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. New figures are being called for by the Board of Public Works for the installation of the heating in the Girls' High School. Bids will be opened by the Board of Public Works on March 29th.

Corning, Tehama Co., Cal.—School, 2 story and base, brick, \$60,000. Architect, Louis Stone, Macdonough Bldg., Oakland. Owners, Corning School District. This work was mentioned here several months ago when the archi-

tect was commissioned to prepare the plans. Bids for the construction are now being taken and will be opened by the Board of Education on or about April 1st. The exterior will be faced with pressed brick. There will be steam heat and a modern system of ventilation.

Sultan, Wash.—School, 2 story and base, brick, \$18,000. Architect, Harlan Thomas, Ellers Bldg., Seattle. Owners, Sultan School District. The plans for a two-story and basement eight class room building have been completed by the architect and figures are now being taken. There will be steam heat and a modern system of ventilation. The exterior of the building will be faced with pressed brick. Bids will be opened on March 23rd.

San Diego, Cal.—School group of reinforced concrete buildings. Cost not stated. Architects, Quayle Bros. & Cressy, Savoy Theatre Bldg., San Diego. Owners, City of San Diego. All bids for the general construction of these buildings have been rejected. The revised figures will be received about April 1st. The contract for the plumbing has been awarded to R. D. Hubbs, San Diego, and for the electric work to Ayers & Stevenson, of San Diego.

Coronado, San Diego Co., Cal.—Schools, 3, 1 story and base, reinforced concrete buildings, \$85,000. Architects, Quayle Bros. & Cressy, Savoy Theatre Bldg., San Diego. Owners, City of Coronado. There will be three buildings so arranged as to provide for extensive additions in the future. The main building will contain eight class rooms and an auditorium seating 600 people. The construction throughout will be of the reinforced concrete type. There will be steam heat and a modern system of ventilation. The exterior of the buildings will be faced with cement plaster. Plans are now being prepared and further details of the construction will be given at a later date.

Van Nuys, Los Angeles Co., Cal.—School, 2 story and base, reinforced concrete. Cost not stated. Architect, A. C. Smith, 307 South Broadway, Los Angeles. Owners, Van Nuys School District. The announcement has been made that the time for opening the bids for this work, which was set for March 26th, has been extended to April 2nd. The first announcement was published in these columns last week.

Florence, Ariz.—School, 2 story and base, reinforced concrete, \$25,000. Architect, Royal W. Lester, Phoenix. Owners, Florence School District. The building will contain eight class rooms and a large auditorium. There will be a plenum system of heating. The exterior of the building will be faced with cement plaster. The plans are now being prepared and figures will be called for shortly.

Ontario, San Bernardino Co., Cal.—School, 2 story and base, reinforced concrete, administration building, \$50,000. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. general construction, \$47,344. Electric work, Woodill & Hulst, Ontario, \$1,051. Plumbing to W. B. McKinley, Long Beach, \$6,200. All other figures for the construction of the other buildings were rejected and new bids will be called for shortly.

Los Angeles, Cal.—School, 2 story and base brick, \$50,000. Architects, Hunt & Burns, Laughlin Bldg., L. A.

Owners, City of Los Angeles. Contractors, Alper, Hall & Alper, Ferguson Bldg., L. A. Contract price, \$16,975.

Contracts Awarded.

Nevada City, Nevada Co., Cal.—School, 1 story and base, reinforced concrete, \$25,000. Architects, Parker & Kenyon, 244 Kearny St., S. F. Owners, Nevada City School District. Contractors, Roberts Bros., San Francisco. Contract price, \$23,474.

SEWERS, STREET WORK AND WATER SYSTEMS.

Modesto, Stanislaus Co., Cal.—Water system, mains, reservoirs and pumping stations, \$82,500. Engineer, City Engineer, Modesto. Owners, City of Modesto. The city has recently voted bonds to the amount above mentioned for the construction of new pumping plants, the laying of water mains and the construction of reservoirs. Bids will be called for as soon as the plans can be perfected.

Maricopa, Kern Co., Cal.—Sewer system, \$16,000. Engineer, City Engineer of Maricopa. Owners, City of Maricopa. A bond election is to be held on April 16th at which time bonds to the extent of \$16,000 will be voted on for the construction of a sewer system.

Hollywood, Los Angeles Co., Cal.—Sanitary Sewers, \$347,000. Engineer, City Engineer, Hollywood. Owners, City of Hollywood. The lowest bid received for the construction of this work was from P. A. and C. H. Howard, Frost Bldg., L. A., and was for \$347,000. The highest bid was \$450,000. No action has been taken by the Board of Public Works, but it is probable that the work will be readjusted. The Board is awaiting the action of the City Engineer.

San Francisco—Water supply system materials. Cost not stated. City Engineer Marsden Manson, 1494 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Bids will be opened on March 20th for a quantity of creosoted wooden duct and covered pipes for the Auxiliary Water Supply System. Board of Public Works will open bids.

North Sausalito, Marin Co., Cal.—Sewers. Cost not stated. Engineer Cadwell, Sausalito. Owners, City of Sausalito. City Engineer Cadwell of Sausalito, Marin Co., has prepared the preliminary plans and estimates for a complete sewer system to be constructed in North Sausalito. The engineer's estimate places the cost at \$50,000. The district is to be bonded at once. April 15th is the date set for hearing protests.

San Rafael, Marin Co., Cal.—Sewers, street work, etc. Cost not stated. City Engineer San Rafael. Owners, City of San Rafael. The City Trustees of San Rafael, Marin County will draw up a new bond resolution. The resolution will provide for the following work: Storm sewers, \$7,000; sanitary sewers, \$6,000; culverts, \$25,000; granite curbs, \$1,750; concrete curbs, \$1,600; regading streets, \$7,500; paving streets, \$7,500. Three other propositions will be included under separate heading as follows: Water park, \$25,000; street lighting, \$15,000; paving plant, \$15,000.

STORES & OFFICE BUILDINGS.

La Grange, Ore.—Stores and offices, 5 story and base, brick and steel. Cost

not stated. Architect, Delos D. Neer, Portland. Owner, J. E. Foley. The building will be 30x100 feet. There will be one large store on the first floor. Each of the upper floors will contain nine offices. There will be steam heat and elevator service. The exterior will be faced with pressed brick and artificial stone. The plans are complete and figures will be called for at once.

San Francisco—Department store, 5 or 6 story and base. Class A construction. \$500,000. Architects Reid Bros., Call Bldg., S. F. Owners, Hale Bros. This work has been mentioned here several times before. The plans for a modern building covering a large area at the corner of Fifth and Market streets are now in the market for figures. The architects are taking figures on both a general contract and for the construction of the various parts of the work separately. There will be a complete steel frame, concrete and brick exterior walls, facade with terra cotta, steam heat, vacuum cleaning system and elevators. The interior will be finished in metal trim and hardwoods. Bids will be opened about the middle of April.

San Francisco—Store addition, 3 story, steel and brick. Cost not stated. Architect, Sylvain Schmittacher, First National Bank Bldg., S. F. Owners, Paraffine Paint Co. The building will be an addition 40x50 feet. There will be a steel frame with the exterior faced with pressed brick. The present building is two stories high. There will be elevator service. The interior will be finished for offices and lofts and will be occupied entirely by the owners. The plans are complete and figures are being taken.

San Francisco—Stores and lofts, 3 story and base, reinforced concrete. Cost not stated. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owner, M. Swortzinger. This work has been mentioned here before. The revised plans call for a building arranged for stores on the first floor and lofts above. There will be one elevator. The exterior will be faced with cement plaster. The plans are now out for figures.

San Francisco—Stores and lofts, 2 story and base, brick, \$25,000. Architect, Alfred Henry Jacobs, French Bank Bldg., S. F. Owner, Lipman Sachs. The building will be erected on upper Market street and will cover an area of 25x120 feet. There will be one store on the first floor and lofts above. The exterior will be faced with pressed brick. The plans are complete and figures are being taken for all work except the excavation which has been let.

Oakland, Cal.—Store alteration \$4,000. Architects, Milwain Bros., Dolger Bldg., Oakland. Owners, Friedman Bros. The work will consist of the entire alteration of the store fronts and the interior of the building. There will be new electric work, window finish and plumbing. The plans are complete and figures are being taken.

Pittsburg, Contra Costa Co., Cal.—Stores, 2 story and base, brick. Cost not stated. Architect, A. C. Cornelius, Western Metropolis Bank Bldg., S. F. Owner, C. Lepori. The building will contain two stores on the first floor and offices and living rooms above. The exterior of the building will be faced with pressed brick. The plans are complete and the architect is taking figures on the work.

Pomona, Los Angeles Co., Cal.—Store and office addition, 2 story and base, brick. Cost not stated. Architects, Davis & Higgs, First National Bank Bldg., Pomona. Owner, Capt. Thomas Brady. The addition will be made to a building 100x150 feet. The new floors will be subdivided into offices. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Los Angeles, Cal.—Stores, 2 story and base, brick. Cost not stated. Architects, Matt Montgomery and Ross Montgomery, Trust and Savings Bldg., L. A. Owner, R. P. Vogel. The building will be 15x150 feet. There will be several stores on the first floor and lofts above. The exterior will be faced with pressed brick. The plans are complete and figures are being taken.

Maricopa, Kern Co., Cal.—Stores and offices, 2 story and base, brick, \$20,000. Architect's name not given. Owners, P. J. Readon and George Daniels, Maricopa. The building will be 50x86 feet. The first floor will be arranged for a large pool and billiard room and the second floor for offices. The exterior will be faced with pressed brick. The plans are complete and in the hands of the owners. Bids are now being taken for the work.

Seattle, Wash.—Stores and offices, 3 story and base, brick and steel, \$100,000. Architects, Bobb & Mendel, Penny Bldg., Seattle. Owner, George W. Fisher. The building will be 60x120 and will be similar in design to the building which the same owner is to erect at the corner of 3rd and Pike streets, which was mentioned here several months ago. The plans for the new building are being prepared and bids will be taken at once.

Spokane, Wash.—Department store, 3 story and base. Class A construction. \$100,000. Architects, Zittle & Riggs, Spokane. Owners, Carr Department Store, Spokane. The building has been mentioned here before when the architects were first commissioned to prepare plans. The working drawings are now complete and figures are being taken. The plans for the store features, the estimated cost of which is \$120,000, are being prepared by Architect H. B. Pearce, Arcade Annex, Seattle. Bids will be called for on this work shortly.

Seattle, Wash.—Stores and offices, 6 story and base, reinforced concrete, \$300,000. Architect, John Graham, Lyon Bldg., Seattle. Owner, Capt. Joshua Green. The building, details for which have not been worked out, will contain a number of stores on the first floor and about 150 offices on the upper floors. The construction will be fire proof throughout. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick and terra cotta. The architect is now preparing the working drawings.

THEATRES.

San Francisco—Theatre. Class A construction, \$150,000. Architects, Cunningham & Peckham, First National Bank Bldg., S. F. Owners, Boston and San Francisco Amusement Co. This work has been mentioned here before when the plans were first started. The archi-

itects have completed the working drawings. The contract for the excavating has already been let. Segregated figures are now being taken for the balance of the construction. The owners of the building are represented by Sidney Graumann, of the Empress Theatre, Market St., S. F.

Pomona, Los Angeles Co., Cal.—Theatre, brick and steel construction, 340,000. Architects, Davis & Hughes, First National Bank Bldg., Pomona. Owners, Pomona Opera House Company. The funds for the construction of this building have been raised and actual construction will be started at once. The main auditorium will have a seating capacity of 1200. There will be steam heat and a modern system of ventilation. The exterior of the building will be faced with cement plaster.

SEALED PROPOSALS.

PROPOSALS FOR FINISH WORK.

(Bids close March 20.)

These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—3 story and base, frame, \$20,000. San Francisco. Architects, Welsh & Carey, Metropolis Bldg., S. F. Owners, Joseph Abrams et al. This building has been mentioned here before when the plans were first started. The structure will contain 24 rooms arranged in suites of two and three rooms each with baths. There will be a central heating system and elevator service. There will be wall beds. The interior trim will be of pine. The exterior of the building will be covered with brick veneer and shiplap. Plans are complete and figures are being taken.

Apartment House—6 story and base, steel and brick, \$100,000. San Francisco. Architect, Grace Jewett, 604 Montgomery St., S. F. Owner, E. L. Huetter. The building will be erected on Bush street near Jones, and will contain in the neighborhood of 120 rooms arranged in two and three room apartments with connecting baths. There will be steam heat, elevator service, wall beds and a vacuum cleaning system. The exterior of the building will be faced with pressed brick and terra cotta. The plans are complete and figures are being taken.

Apartment House—3 story and base, frame, \$18,000. San Francisco. Architect, J. F. Dunn, Monadnock Bldg., S. F. Owner, Philip Yager, 129 Carl St., S. F. The building will contain nine apartments of the two and three room variety. The chambers will be equipped with wall beds. There will be steam heat. The interior finish will be of pine with some hardwood floors. The exterior of the building will be covered with brick veneer and shiplap. The plans are in the hands of the owner and the work will be done by Day Labor.

Apartment House—2 story and base, frame, \$17,000. San Francisco. Architect, Frederick H. Meyer, Humboldt Bank Bldg., S. F. Owner, A. F. Peterson. The building will be erected on upper Market street and will contain 24 rooms and baths. The suites will be of two rooms each. There will be steam heat and wall beds. The interior finish will be of pine throughout. The exterior of the building will be covered with cement plaster on metal lath. The plans are being prepared.

Apartment Addition—2 story frame, \$15,000. San Francisco. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, GoldBerg-Bowen Co. This work was mentioned here when the architect first started the drawings. The work will consist of a two-story frame addition to the present one story and basement building. The

upper floors will be divided into modern apartments. The first floor will be occupied by the owners. The exterior of the building will be covered with shiplap. The plans are now complete and figures are being taken.

Apartment House—5 story and base, brick and steel, \$100,000. San Francisco. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owners, Clay M. Frances, M. William Green and Paula Green Sawyer. This work has been mentioned here several times before. The plans were recently revised and are again out for figures. The architect will award a general contract within the course of the next few days. The building will be one of the most modern apartment houses in the city.

Warehouse—2 story and base, brick, \$3,000. San Francisco. Architect, none. Owners, Ponsero Bros., 10 Adler St., S. F. The building will be 20x50 feet. There will be no interior finish. The exterior walls will be of stock brick. Considerable structural steel will be used. The plans are in the hands of the owners and the work will be done by Day Labor.

Warehouse—2 story and base, brick and steel. Cost not stated. San Francisco. Architect, Herman Barth, 12 Geary St., S. F. Owner, George D. Stone. The building will be erected in the wholesale district. A contract for the foundation work has been let to Healy-Tiddits Co. The exterior walls of the building will be faced with pressed brick. There will be no interior finish. A freight elevator will be installed. The architect is taking figures on the balance of the work.

Factory—1 story and base, reinforced concrete, \$35,000. San Francisco. Architect, Frank Van Trees, Lick Bldg., S. F. Owners, Lange-Jergenson Co. The building has been designed for a modern factory plant. There will be concrete floors. The exterior walls will be faced with cement plaster. The roof will be of tar and gravel. Plans for the work have been completed and figures are being taken.

Flats—2 story and base, frame, \$7,000. San Francisco. Architect, none. Owner, Mrs. E. Soid, 510 14th St., S. F. The building has been designed to contain four modern flats of four and five rooms each with baths. The interior trim will be of pine and redwood. There will be gas grates. The exterior of the building will be covered with shiplap and rustic. The plans are in the hands of the owner and she is taking figures. Bids will be opened on March 21st.

Flats—3 story and base, frame, \$7,500. San Francisco. Architect, none. Owner, Frank Thumberg, 1664 Fulton St., S. F. The building will contain

three flats of five and six rooms each. The interior finish will be of pine and redwood with some hardwood floors. There will be gas grates. The mantels will be of brick. Tile will be used in the baths and kitchens. The exterior of the building will be covered with brick veneer and cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Flats—3 story and base, frame, \$5,000. San Francisco. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner's name withheld. The building has been arranged for three flats of five and six rooms each with baths. The interior finish will be of pine. Hardwood floors will be used in the principal rooms. There will be gas grates. The exterior of the building will be covered with shiplap. The plans are complete and the architects are taking figures on the work.

Flats and Stores—2 story and base, frame, \$5,000. San Francisco. Architects, L. M. Wiesman & Son, Pacific Bldg., S. F. Owner, M. Abt. The building will contain one store on the first floor and two flats of four and five rooms each on the upper floor. The interior finish will be of pine and redwood. There will be gas grates. The exterior of the building will be covered with shiplap. The plans are complete and the architects are taking figures.

Flats—2 story and base, brick, \$6,000. San Francisco. Architects, Wilde & Schaefer, Albany Bldg., Oakland. Owner, Alexander Politzer. The building has been mentioned here before when the architects were preparing the plans. The working drawings have been completed and figures are being taken. The exterior of the building will be faced with cement plaster. There will be four flats of four and five rooms each.

Flats—3 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, E. A. Knoop, 1375 Stevenson St., S. F. The building will contain three small flats with baths. The interior trim will be of pine throughout. There will be gas grates. The exterior of the building will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Residence—3 story and base, brick, \$10,000. San Francisco. Architect, A. Whittier, 1437 Hyde St., S. F. Owner, Mary E. Seeley. The building will contain eight rooms and will cover a ground area of 20x25 feet. The interior finish will be of pine and redwood with some oak floors. There will be open fire places with tile or brick mantels. The exterior of the dwelling will be faced with pressed brick. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$3,500. San Francisco. Architect, Joseph A. Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwelling will contain six rooms and bath. The interior finish will be of pine and redwood. There will be open fire places with brick or tile mantels. The floors will be of hardwood. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Residence—3 story and base, frame, \$25,000. San Francisco. Architects, Ward & Blohm, Alaska Commercial Bldg., S. F. Owner, Mrs. F. S. Knight.

The dwelling will contain in the neighborhood of twelve rooms and several baths. The interior trim will be of pine, mahogany and white enamel. There will be furnace heat and open fire places. The floors will be of hardwood throughout. The mantels will be of brick and tile. Tile will be used in the baths and kitchen. The exterior of the dwelling will be faced with brick veneer and cement plaster on metal lath. The plans are complete and bids are being taken.

Residence—2 story and base, frame, \$5,000, San Francisco, Architect, Joseph A. Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwelling has been designed for an eight-room house with all modern conveniences. The interior finish will be of pine with some hardwood floors. The walls will be furnace heat and open fire places. The mantels will be of brick or tile. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$8,000, San Francisco, Architect, E. E. Young, 231 Kearny St., S. F. Owner, Thomas Seabie, 363 14th Ave., S. F. The dwelling has been designed for an eight-room house with baths. The interior trim will be of pine, oak, redwood and mahogany. There will be hardwood floors. The dwelling will be heated by a warm air furnace and open fire places. The mantels will be of brick. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Apartment House—3 story and base, frame, \$23,000, San Francisco, Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owner, A. Newman. The building will cover an area of 20x34 feet and will contain nine three room apartments and two two-room apartments. There will be private baths, steam heat and Murphy wall beds. The interior trim will be of pine and mahogany veneer. The exterior of the building will be covered with brick veneer and shiplap. The plans are complete and figures are being taken.

Apartment House—3 story and base, frame, \$12,000, San Francisco, Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owner, Albert Boetche. The building will cover an area of 20x34 feet and will contain six four-room apartments with connecting baths. There will be steam heat and wall beds. The interior finish will be of pine, redwood and mahogany with the entry halls finished in old ivory. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Hotel and Stores—1 story and base, brick and steel, \$35,000, San Francisco, Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owners, Clay Investment Co. The building will contain stores on the first floor and a large number of single rooms on the upper floors. There will be ten baths. The interior finish will be of pine throughout. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Hotel and Stores—3 story and base,

frame, \$20,000, San Francisco, Architect, David C. Coleman, Western Metropolitan Bank Bldg., S. F. Owner, Charles Katz. The building will be 40x97 feet. There will be two stories on the first floor and fifty rooms and baths on the upper two floors. The interior trim will be of pine. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Finish Work in Hospital—Cost not stated, San Francisco, City Architect Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Plans have been completed for the interior finish work of the power house and laundry of the San Francisco Hospital. Bids will be opened by the Board of Public Works on March 20th.

Theatre—Class A construction, \$150,000, San Francisco, Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, Boston and San Francisco Amusement Co. This work has been mentioned here before when the plans were first started. The architects have completed the working drawings. The contract for the excavating has already been let. Segregated figures are now being taken for the balance of the construction. The owners of the building are represented by Sidney Grauman, of the Empress Theatre, Market street, S. F.

Railroad Construction—Cost not stated, San Francisco, Engineer, City Engineer Marsden Manson, 1404 David Hewes Bldg., S. F. Owners, City and County of San Francisco. The Board of Public Works are advertising for the construction of the Geary Street Municipal Railroad from Kearny and Market streets to Fifth avenue. Bids will be opened on March 25th.

Water Supply System Materials—Cost not stated, San Francisco, City Engineer Marsden Manson, 1404 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Bids will be opened on March 20th for a quantity of cross-cut wooden duct and covered plank for the Auxiliary Water Supply System. The Board of Public Works will open bids.

Bridge—Reinforced concrete and wood. Cost not stated, San Francisco, City Engineer Marsden Manson, 1404 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Funds have been made available for the construction of the bridge over Harrison street. The Board of Public Works have been notified to advertise for figures.

Harbor Work and Ferry Slips—Reinforced concrete. Cost not stated, San Francisco, Engineer Saph, Ferry Bldg., S. F. Owners, State of California. Plans are nearly complete for the new ferry slips which are to be constructed at the present Mission street wharf. In addition to the ferry slips there will be a large amount of other harbor work ready for figures within the next few weeks. The official proposals will be published in these columns as soon as bids are called.

School Renting—Cost not stated, San Francisco, City Architect Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. New figures are being called for by the Board of Public Works for the installation of the heat-

ing in the Girls' High School. Bids will be opened by the Board of Public Works on March 20th.

Department Store—5 or 6 story and base, Class A construction, \$500,000, San Francisco, Architects, Reid Bros., Call Bldg., S. F. Owners, Hale Bros. This work has been mentioned here several times before. The plans for a modern building covering a large area at the corner of Fifth and Market streets are now in the market for figures. The architects are taking figures on both a general contract and for the construction of the various parts of the work separately. There will be a complete steel frame, concrete and brick exterior walls, faced with terra cotta, steam heat, vacuum cleaning system and elevators. The interior will be finished in metal trim and hardwoods. Bids will be opened about the middle of April.

Store Addition—3 story steel and brick. Cost not stated, San Francisco, Architect, Sylvain S. Maillacher, First National Bank Bldg., S. F. Owners, Paraffine Paint Co. The building with addition will be 40x90 feet. There will be a steel frame with the exterior faced with Roman pressed brick. The present building is two stories high. There will be elevator service. The interior will be finished for offices and lofts and will be occupied entirely by the owners. The plans are complete and figures are being taken.

Stores and Lofts—3 story and base, reinforced concrete. Cost not stated, San Francisco, Architects, O'Brien and Werner, Foxcroft Bldg., S. F. Owner, M. Skortgring. The work has been mentioned here before. The revised plans call for a building arranged for store on the first floor and lofts above. There will be one elevator. The exterior will be faced with cement plaster. The plans are now out for figures.

Stores and Lofts—2 story and base, brick, \$25,000, San Francisco, Architect, Alfred Henry Jacobs, French Bank Bldg., S. F. Owner, Linman Sacks. The building will be erected on upper Market street and will cover an area of 25x130 feet. There will be one store on the first floor and lofts above. The exterior will be faced with pressed brick. The plans are complete and figures are being taken for all work except the excavation which has been let.

Hotel—Two 3-story and base, brick. Cost not stated, San Francisco, Architect, Frederick D. Boese, 45 Kearny St., S. F. Owner, George A. Clough. There will be two separate buildings each 85x140 feet. The first building to be erected will contain five stores on the first floor and 120 rooms above. Leases have already been made on the stores and hotel. There will be steam heat, hot and cold running water in all rooms and a number of public baths on each floor. The exterior of the building will be faced with pressed brick. The plans for the second building will be prepared at once. Plans for the first structure are now nearly complete and figures will be called for shortly.

Contracts Awarded.

Apartment House—8 story and base, reinforced concrete, \$65,000, San Francisco, Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, Harry Rosenbergs, Contractors, MacDonald & Kahn, 251 Kearny St., S. F. Note: This contract was awarded several months

OAKLAND AND ALAMEDA COUNTY.

Residence—2 story and base, frame, \$2,400. Berkeley, Alameda Co., Cal. Architect, none. Owner, A. Y. Skeer. The dwelling will contain five rooms and bath. The interior trim will be of pine throughout. There will be open fire places with attractive tile mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$1,500. Berkeley, Alameda Co., Cal. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owner, T. W. Holston. The dwelling has been designed for a nine-room house with two baths. The interior trim will be of redwood. There will be some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. The tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with rustic. The plans are complete and figures are being taken.

Residence—2 story and base, frame, Cost not stated. Berkeley, Alameda Co., Cal. Architect, none. Owner, George De May, Berkeley. The dwelling will contain seven rooms and baths. The interior finish will be of pine with some hardwood floors. There will be open fire places with attractive brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$1,000. Berkeley, Alameda Co., Cal. Architect, A. Merrill Bowser, 1007 Broadway, Oakland. Owner, W. J. Mortimer. The dwelling has been designed for an eight-room house with baths. The interior finish will be of pine and redwood. Hardwood floors will be used

in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$2,500. Berkeley, Alameda Co., Cal. Architect, L. E. Brackett, 626, 56th St., Oakland. Owner, A. P. Dull. The dwelling will contain six rooms and bath. The interior finish will be of pine throughout. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$3,200. Oakland, Cal. Architect, none. Owner, J. P. Kujawa, 4956 Fairbanks Ave., Melrose. The dwelling has been designed for an eight-room house with baths. The interior finish will be of pine and redwood. There will be hardwood floors, tile or brick mantels and furnace heat. The exterior of the building will be covered with shiplap and brick veneer. The plans are complete and the work will be done by Day Labor.

Hangar—1 story and base, frame, \$2,000. Alameda, Alameda Co., Cal. Architect, W. W. Landrebe, 1505 Fernside Boulevard, Alameda. Owner, B. C. Hillen. The dwelling will contain six rooms and bath. The interior finish will be of pine with some hardwood floors and tile mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$4,500. Berkeley, Alameda Co., Cal. Architect, none. Owner, H. P. Nelson, 2236 Grove St., Berkeley. The dwelling will contain eight rooms and baths. There will be furnace heat and open fire places. The interior finish will be of pine and redwood. There will be some hardwood floors. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, Ideal Building Co., 5428 Boyd Ave., Oakland. The dwelling has been designed for an 8-room house with baths. The interior finish will be of pine with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. The tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with shingles. The plans are in the hands of the owners and the work will be done by Day Labor.

Hangar—1 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, H. M. Smalley, 5214 Dover St., Oakland. The dwelling will contain 5 rooms and bath. There will be pine trim with some hardwood floors. There will be open fire places with tile or brick mantels. The exterior of the building will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$1,500. Oakland, Cal. Architect, A. W. Smith, 1610 Broadway, Oakland. Owner, N. A. Truebeck. The dwelling has been designed for an eight-room house

with baths. There will be furnace heat and open fire places. The interior trim will be largely of pine and redwood. There will be tile or brick mantels. The floors in the principal rooms will be of oak. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Hangar—2, 1 story and base, frame, \$2,000 each. Alameda, Alameda Co., Cal. Architect, none. Owner, W. G. Le Boyd, 1314 Broadway, Oakland. The dwellings will each contain six rooms and bath. The interior finish will be of pine throughout. There will be open fire places and tile mantels. The exteriors of the dwellings will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Hangar—1 story and base, frame, \$2,000. Alameda, Alameda Co., Cal. Architect, none. Owner, John M. Lundholm, 1717 Wood St., Alameda. The dwelling will contain six rooms and bath. The interior trim will be of pine. There will be some hardwood floors. There will be open fire places with brick mantels. The exterior of the house will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Hotel—3 story and base, reinforced concrete. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owners, University Hotel Co. The building will be erected on one of the main thoroughfares of the city, and will be designed for a modern commercial hotel. There will be in the neighborhood of 120 rooms, a large percentage of which will have connecting baths. There will be stores, a main office and lobby on the first floor. There will be steam heat and elevator service. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Postoffice—2 story and base, brick and steel, \$19,000. Alameda, Alameda Co., Cal. Architect, James Knox, Taylor, Washington, D. C. Owners, U. S. Government. The Congressman from this district states that plans are complete for the construction of this building and that bids will be called for in the course of the next thirty days.

Store alteration—\$4,000. Oakland, Cal. Architects, Milwan Bros., Delger Bldg., Oakland. Owners, Friedman Bros. The work will consist of the entire alteration of the store fronts and the interior of the building. There will be new electric work, window finish and plumbing. The plans are complete and figures are being taken.

SAN JOSE & SANTA CLARA VALLEY

Factory and Warehouse—2, 1 story and base, reinforced concrete. Cost not stated. San Jose, Santa Clara Co., Cal. Engineering Dept. American Can Co., Mills Bldg., S. F. Owners, American Can Co. The owners have informed the Building and Industrial News that plans will shortly be completed for two buildings. One will be a factory covering a site 128x150 feet and the other a large warehouse 128x325 feet. The construction will be of reinforced concrete throughout. The exteriors will be faced with cement plaster. The owners will take figures on the work, and plans and specifications may be secured from their offices.

Residence Gardens—\$2,500. Fair Oaks, San Mateo Co., Cal. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owner, Louis Stern. The work will consist of the construction of sunken gardens, a concrete swimming tank and aviary. The plans are now complete and figures are being taken.

Association Building—4 story and base, brick and steel, \$100,000. San Jose, Santa Clara Co., Cal. Architect, William Binder, Rea Bldg., San Jose. Owners, Young Men's Christian Assoc-

iation. This building has been mentioned here before when figures were first called for. The time for opening the bids has now been extended for two weeks. The plans can be had from either the architect or from the Secretary of the Association.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

Residence—2 story and base, frame \$4,000. Corinthian Island, Marin Co., Cal. Architect, C. C. Lukin, 20 Montgomery St., S. F. Owner, Capt. E. Johnson. The dwelling has been designed for a seven-room house with furnace heat, open fire places, hardwood floors and tile or brick mantels. There will be two baths. The exterior will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Railroad Construction—Cost not stated. Petaluma to Tomales Bay, Cal. Engineer Matthews, Petaluma. Owners, Petaluma Electric R. Co. A branch line at Petaluma is to be built through Bloomfield to Tomales Bay and Dillon's Beach. The residents of the country to be traversed have subscribed \$50,000 towards the completion of the line. Chief Engineer Matthews, Petaluma, is in charge of the work.

Sewers—Cost not stated. North Sausalito, Marin Co., Cal. Engineer Cadwell, Sausalito. Owners, City of Sausalito. City Engineer Cadwell of Sausalito, Marin Co., has prepared the preliminary plans for a complete sewer system to be constructed in North Sausalito. The engineer's estimate places the cost at \$50,000. The district is to be bonded at once. April 15th is the date set for hearing protests.

Sewers, Street Work, Etc.—Cost not stated. San Rafael, Marin Co., Cal. City Engineer San Rafael. Owners, City of San Rafael. The City Trustees of San Rafael, Marin County will draw up a new bond resolution. The resolution will provide for the following work: Storm sewers, \$7,000; sanitary sewers, \$6,000; culverts, \$2,500; granite curbs, \$1,750; concrete curbs, \$4,600; regading streets, \$7,500; paving streets \$7,500. Three other proposals will be included under separate headings as follows: Water park, \$25,000; street lighting, \$15,000; paving plant, \$15,000.

Stores—2 story and base, brick. Cost not stated. Pittsburg, Contra Costa Co., Cal. Architect, A. C. Cornelius, Western Metropolitan Bank Bldg., S. F. Owner, C. Lepori. The building will contain two stores on the first floor and offices and living rooms above. The exterior of the building will be faced with pressed brick. The plans are complete and the architect is taking figures on the work.

FRESNO, MODESTO, STANISLAUS AND CENTRAL EERN CALIFORNIA.

Stores and Offices—2 story and base, brick, \$20,000, Maricopa, Kern Co., Cal. Architect's name not given. Owners, P. J. Readon and George Daniels, Maricopa. The building will be 50x86 feet. The first floor will be arranged for a large pool and billiard room and the second floor for offices. The exterior will be faced with pressed brick. The plans are complete and in the hands of the owners. Bids are now being taken for the work.

Water System—Mains, reservoirs and pumping stations, \$82,500, Modesto, Stanislaus Co., Cal. City Engineer Modesto. Owners, City of Modesto. The city has recently voted bonds to the amount above mentioned for the construction of new pumping plants, the laying of water mains and the construction of reservoirs. Bids will be called for at as soon as the plans can be perfected.

Sewer System—\$16,000, Maricopa, Kern Co., Cal. Engineer, City Engineer of Maricopa. Owners, City of Maricopa. A bond election is to be called on April 16th at which time bonds to the extent of \$16,000 will be voted on for the construction of a sewer system.

LOS ANGELES AND SOUTH EERN CALIFORNIA.

Apartment House—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Clyde Cheney, Story Bldg., L. A. Owner, R. Ruby. The building will be 45x160 feet. The first floor will contain two stores. The upper floor will be divided into twenty-three rooms arranged in suites of two rooms and bath each. There will be wall beds. The exterior of the building will be faced with pressed brick trimmed with artificial stone. The architect is completing the working drawings.

Apartment House—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Joseph F. Rhodes, Central Bldg., L. A. Owners, Joseph H. Rhodes and associates. The building will contain 84 rooms arranged in two and three room suites with baths. There will be wall beds, steam heat and vacuum cleaning system. Considerable tile and marble will be used. The exterior of the building will be faced

with pressed brick. The plans are now being prepared.

Apartment House—3 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Carl Escherich, 733 West 18th St., L. A. Owner, John H. Foley. The building will be 41x135 feet. There will be 60 rooms arranged in 24 apartments with private baths and dressing rooms. The interior finish will be of pine and hardwood. There will be wall beds and steam heat. The exterior of the building will be covered with rustic. The plans are nearing completion.

Apartment House—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, F. X. Lourdon, Merchants' Trust Bldg., L. A. Owner, C. A. Vanderburg. The building will contain 120 rooms arranged in 48 apartments of two and three rooms each. There will be private baths, steam heat, vacuum cleaning system, wall beds and elevator service. The interior trim will be of pine and mahogany. The exterior of the building will be faced with pressed brick trimmed with artificial stone. The plans are complete and figures are being taken.

Apartment House—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owner, Miss C. L. Eagleson. The building will contain 54 rooms arranged in two and three room suites with connecting baths and private dressing rooms. The interior trim will be of pine. There will be steam heat and wall beds. The exterior will be faced with pressed brick. Segregated figures are now being taken.

Hotel—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, T. Beverly Keim Co., Wright and Callender Bldg., L. A. Owner's name withheld. The building will be 60x80 feet. There will be four stores and the main office and lobby on the first floor and 24 rooms and 6 baths on each of the upper floors. There will be steam heat. The exterior will be faced with pressed brick. The plans are now being prepared.

Hospital—2 story and base, brick and concrete. Cost not stated. Los Angeles, Cal. Architect, A. B. Benton, 114 North Spring St., L. A. Owners, University of Southern California. The building will be 40x162 feet. There will be two operating rooms, kitchen, dining room, six single rooms and two twelve-room wards. There will be cement floors, four baths, the partitions and steam heat. The exterior walls will be faced with pressed brick. The plans are complete and figures are being taken. Bids will be opened on March 18th.

Hospital—2 story and base, reinforced concrete, \$25,000, Pomona, Los Angeles Co., Cal. Architects, Davis & Higgs, First National Bank Bldg., Pomona. Owners, Pomona Hospital Association. The building will contain several private rooms, operating room, diet kitchens, sun porches and a large ward. There will be steam heat. The construction will be fire proof throughout, be faced with cement plaster. The plans are now being prepared.

Theatre—Brick and steel construction, \$10,000, Pomona, Los Angeles Co., Cal. Architects, Davis & Higgs, First National Bank Bldg., Pomona. Owners, Pomona Opera House Company.

The funds for the construction of this building have been raised and actual construction will be started at once. The main auditorium will have a seating capacity of 1200. There will be steam heat and a modern system of ventilation. The exterior of the building will be faced with cement plaster.

Bridges—1, reinforced concrete. Cost not stated. San Bernardino, San Bernardino Co., Cal. Engineer, County Engineer San Bernardino County. Owners, San Bernardino County. Plans are complete and figures will be opened on April 1st for the construction of four reinforced concrete bridges over the West Twin Creek on the Waterman Canyon Road. Charles Post is the Clerk of the Board of Supervisors and can furnish all desired information.

Apartment House Addition—3 story, frame. Cost not stated. Los Angeles, Cal. Architects, Garrett & Bixby, Currier Bldg., L. A. Owner, J. B. Solomon. This work will consist of the addition of one story and the complete rearrangement of the building. There will be 27 two-room apartments with baths. There will be steam heat, wall beds and private baths. The exterior of the building will be covered with Arizona sandstone and shiplap. Plans are ready for figures.

Apartment House—3 story and base, frame. Cost not stated. Long Beach, Los Angeles Co., Cal. Architects, Scholes & Leobridge, First National Bank Bldg., Long Beach. Owners, M. C. Cure, Starr and Thompson. The building will be 52x108 feet and will contain 60 rooms and 25 bath rooms. There will be steam heat. The exterior of the building will be covered with shiplap. The plans are now being figured.

Apartment House—4 story and base, frame, \$25,000, Venice, Los Angeles Co., Cal. Architect, none. Owners, Sargeant Realty Co., Venice. The building will be 80x100 feet. There will be 90 rooms arranged in two and three room suites with connecting baths. There will be steam heat, wall beds and built-in conveniences. The exterior of the building will be covered with cement plaster on metal lath. The plans are in the hands of the owners and they are taking figures on the work.

Bank—2 story and base, brick. Cost not stated. Colgrove, Los Angeles Co., Cal. Architects, Hudson & Munsell, Stimson Bldg., L. A. Owner, Schuyler Cole. The building will contain two stores and the banking quarters on the first floor. There will be lodge rooms and seven rooms on the second floor. The exterior will be faced with pressed brick. There will be coin and safety vaults in the basement. The plans are complete and figures have been taken.

Store and office addition—2 story and base, brick. Cost not stated. Pomona, Los Angeles Co., Cal. Architects, Davis & Higgs, First National Bank Bldg., Pomona. Owner, Capt. Thomas Brady. The addition will be made to a building 100x164 feet. The new floors will be subdivided into offices. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Garage—1 story and base, brick, \$15,000, Los Angeles, Cal. Architect,

home. Owner, R. F. Bennett, 955 Crocker St., L. A. The building will have a frontage of 200 feet and a depth of 120 feet. There will be sales rooms, storage space, repair shops and gasoline tanks. The floor will be of cement. The exterior of the building will be faced with pressed brick. The plans are in the hands of the owner and he is taking figures.

Garages—2, 1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, California Realty and Building Co., 142 South Spring St., L. A. Owner, F. Thum, Pasadena. The buildings will be 50x145 and 50x135, respectively. There will be concrete floors. The exterior of the buildings will be faced with pressed brick. The work will probably be done by Day Labor. The plans are being prepared.

Hotel—3 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, W. J. Saunders, Wright and Callender Bldg., L. A. Owner, F. W. Braun. The building will be 50x68 feet and will contain 22 rooms and nine bath rooms. There will be steam heat. The exterior will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Hotel—3 story and base, reinforced concrete, \$160,000. Laurel Canyon, Los Angeles Co., Cal. Architect, Alfred F. Priest, Fay Bldg., L. A. Owners, Canyon Castle Corporation, Wright and Callender Bldg., L. A. The building will be arranged in the form of a U with the extreme dimensions of 200x150 feet. The first floor will contain office, main lobby, ladies' and gentlemen's parlors, dining rooms, kitchen department, etc. The upper floors will contain 70 guest rooms with private baths and dressing rooms. There will be steam heat and elevator service. The exterior of the building will be faced with cement plaster. The plans are to be completed as soon as possible and construction will be started this spring.

School—Group of reinforced concrete buildings. Cost not stated. San Diego, Cal. Architects, Quayle Bros. and Cressy, Savoy Theatre Bldg., San Diego. Owners, City of San Diego. All bids for the general construction of these buildings have been rejected. The revised figures will be received about April 1st. The contract for plumbing has been awarded to R. D. Hubbs, San Diego, and for the electric work to Ayers & Stevenson, of San Diego.

Hospital—2 story and base, reinforced concrete, \$75,000. Oxnard, Ventura Co., Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Sisters of Mercy and an association of Oxnard citizens. The architect has just been commissioned to prepare these plans and details of the construction are not as yet obtainable. The building will be fire proof. One wing will be constructed at the present time and the balance of the work will be taken up in the future.

Schools—3, 1 story and base, reinforced concrete buildings, \$85,000. Coronado, San Diego Co., Cal. Architects, Quayle Bros. & Cressy, Savoy Theatre Bldg., San Diego. Owners, City of Coronado. There will be three buildings so arranged as to provide for extensive additions in the future. The main building will contain eight class rooms and an auditorium seating 600 people.

The construction throughout will be of the reinforced concrete type. There will be steam heat and a modern system of ventilation. The exterior of the buildings will be faced with cement plaster. Plans are now being prepared and further details of the construction will be given at a later date.

School—2 story and base, reinforced concrete. Cost not stated. Van Nuys, Los Angeles Co., Cal. Architect, A. C. Smith, 397 South Broadway, Los Angeles. Owners, Van Nuys School District. The announcement has been made that the time for opening the bids for this work, which was set for March 28th, has been extended to April 2nd. The first announcement was published in these columns last week.

School—2 story and base, reinforced concrete, \$25,000. Florence, Ariz. Architect, Royal W. Lester, Phoenix. Owners, Florence School District. The building will contain eight class rooms and a large auditorium. There will be a pleenum system of heating. The exterior of the building will be faced with cement plaster. The plans are now being prepared and figures will be called for shortly.

Stores—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Matt Montgomery & Ross Montgomery, Trust and Savings Bldg., L. A. Owner, E. F. Vogel. The building will be 15x170 feet. There will be several stores on the first floor and lofts above. The exterior will be faced with pressed brick. The plans are complete and figures are being taken.

Sanitary Sewers—\$347,000. Hollywood, Los Angeles Co., Cal. Engineer, City Engineer, Hollywood. Owners, City of Hollywood. The lowest bid received for the construction of this work was from P. A. and C. H. Howard, Frost Bldg., L. A., and was for \$347,000. The highest bid was \$450,000. No action has been taken by the Board of Public Works, but it is probable that the work will be readvertised. The Board is awaiting the action of the City Engineer.

Contracts Awarded.

Apartment House—3 story and base, brick, \$12,000. Los Angeles, Cal. Architect, Robert M. Taylor, Douglas Bldg., L. A. Owner, Marcos Landsberg, Contractor, J. M. Thomas 1070 West 35th St., L. A. Contract price, \$40,000. Note: This contract does not include wall safes and other specialties.

Garage—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owners, Gree-Robins Co. Contractor, D. W. Aaron, L. A. foundations. The balance of the work has not been awarded but will probably be done by Day Labor. The building will be 55x80 feet.

Garage—2 story and base, brick, \$12,000. Santa Ana, Orange Co., Cal. Architect's name not given. Owner, S. J. Jackman. Contractor, A. C. Black, 709 West 4th St., Santa Ana. Contract price, \$12,000.

Garage—1 story and base, brick and concrete, \$15,000. Architect, James T. Peasgood, Santa Monica. Owner, C. W. Valiant. Contractor, George D. Sawyer, 2821 Lake St., Santa Monica. Contract price, \$15,000.

School—2 story and base, brick, \$70,000. Los Angeles, Cal. Architects,

Hunt & Burns, Laughlin Bldg., L. A. Owners, City of Los Angeles. Contractors, Albert E. Hall & Abner, Pershing Bldg., L. A. Contract price, \$16,975.

School—2 story and base, reinforced concrete, administration building, \$50,000. Ontario, San Bernardino Co., Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Chaffey School District. Contractor, Southwestern Construction Co., L. A., general construction, \$47,341. Electric work, Woodill & Holse, Ontario, \$1,051. Plumbing to W. B. McKinley, Long Beach, \$6,200. All the other figures for the construction of the other buildings were rejected and new bids will be called for shortly.

SEATTLE AND WASHINGTON.

Harbor Improvements — \$3,500,000.

Seattle, Wash. Engineers, Commission not yet appointed. Owners, City of Seattle and State of Washington. The several bond issues which were voted on recently in Seattle for the improvement of the Harbor Island project and other big harbor work carries with it the following construction enterprises which are to be undertaken at once. These projects are distinctly separate and independent of the work projected by the Bush Terminal Co., which will be found listed under the head of Warehouses. Bonds were voted for the following. Smiths Cove over-sea dock, which will be of fire proof construction and costing with modern machinery \$1,000,000; over-sea docks on block 372, Seattle Tide Lands, or on the east side of the East Waterway Harbor Island, costing \$550,000; deep sea dock for the handling of lumber in Salmon Bay, costing \$250,000; mosquito fleet dock on the waterfront between Lenora and Vine streets, costing \$750,000; for Lake Washington ferry, \$150,000; the Harbor Island propositions both of which were carried, one for the expenditure of \$500,000 at once in two 500 feet long reinforced concrete docks, and a later expenditure of \$2,000,000 for additional docks to be erected by the Seattle Port Commission.

Warehouses, Etc.—Reinforced concrete and steel construction, \$2,575,000. Harbor Island, Wash. Architects and engineers not selected. Owners, Pacific Terminal Co. The Pacific Terminal Co., which is composed of W. A. Strrett, of the Thompson-Starrett Construction Co., of New York; Paul Starrett, vice-president and general manager of the Fuller Construction Co., of New York; R. F. Ayres, formerly with the Bush Terminal Co., of Brooklyn, N. Y., now of Seattle; Chas. Fenn, Leary Bldg., Seattle, and Palmer Woodbury, of New York, will construct at once the following at a total cost of \$2,575,000: A six-story warehouse, \$150,000; 30 1-story warehouses, 75x100 feet, \$90,000; 30 1-story warehouses, 100x100 feet, \$120,000; 10 miles of railroad, \$100,000; harbor equipment, tugs, lighters, etc., \$115,000; rail equipment, engines and flat cars, \$170,000; 4 industrial buildings, \$1,200,000; bulkheads, \$300,000. Two piers 1400 feet long will be built by the company at once at a cost of \$1,600,000.

Factory—6 story and base, reinforced concrete, \$800,000. Seattle, Wash. Engineering Ford Motor Car

Co., Detroit, Mich. Owners, Ford Motor Car Co. The President of this company has recently visited Seattle and selected a site for one of the assembly plants which are to be erected on this coast. He announced that plans for the building would be sent west by the middle of April and that a Seattle architect would be selected to supervise the work. Construction will be started this summer and will be under the direction of the Ford Co.'s Seattle manager, Mr. R. P. Rice, 532 19th Ave. North.

Park Buildings—Brick and concrete construction, \$250,000. Seattle, Wash. Architects, Behl & Mendel, Denny Bldg., Seattle. Owners, City of Seattle. The funds recently voted by the citizens for Park Improvements will be expended in the following manner: For the construction of a 2-story brick and concrete field house at 14th avenue, South, and Washington street, \$35,000. Bids soon to be called for the construction of a 2-story field house to cost \$15,000 in South Park, a duplication of the Hiawatha field house, to cost \$15,000. Plans will be prepared at once for construction of a steel and glass conservatory at Volunteer Park to cost \$50,000. Material for this has been contracted for; for gymnasium apparatus for Mercer and Walla Walla playgrounds, \$20,000. It is also possible that the construction of an administration building, for which Architect Louis Baeder, White Bldg., Seattle, prepared sketches, will be considered this year. It is to be an 8-story steel and concrete building and to cost \$250,000.

Railroad Construction—Cost not stated. Seattle, Wash. Engineer Dimock, Seattle. Owners, City of Seattle. The plans and specifications have been completed for the municipal logging road, which is to connect Moncton and Camp No. 2. The specifications include the following: 160 tons of rails; 600 pairs of angle splice bars; 7,500 ties; 200-pound kegs of track bolts; 7,500 ties; clearing, grading, grubbing, etc. Bids will be called for at once.

School—2 story and base, brick, \$18,000. Sultan, Wash. Architect, Harlan Thomas, Elders Bldg., Seattle. Owners, Sultan School District. The plans for a two story and basement eight-class-room building have been completed by the architect and figures are now being taken. There will be steam heat and a modern system of ventilation. The exterior of the building will be faced with pressed brick. Bids will be opened on March 23rd.

Stores and Offices—3 story and base, brick and steel, \$100,000. Seattle, Wash. Architects, Behl & Mendel, Denny Bldg., Seattle. Owner, George W. Fisher. The building will be 60x120 and will be similar in design to the building which the same owner is to erect at the corner of 3rd and Pike streets, which was mentioned here several months ago. The plans for the new building are being prepared and bids will be taken at once.

Department Store—3 story and base, Class A construction, \$100,000. Spokane, Wash. Architects, Zittle & Riggs, Spokane. Owners, Carr Department Store, Spokane. The building has been mentioned here before when the architects were first commissioned to prepare plans. The working drawings are now complete and figures are being taken. The plans for the store fixtures, the estimated cost of which

is \$12,000, are being prepared by Architect H. B. Beaver, Arcade Annex, Seattle. Bids will be called for on this work shortly.

Stores and Offices—6 story and base, reinforced concrete, \$300,000. Seattle, Wash. Architect, John Graham, Lyon Bldg., Seattle. Owner, Capt. Joshua Green. The building, details for which have not been worked out, will contain a number of stores on the first floor and about 150 offices on the upper floors. The construction will be fire proof throughout. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick and terra cotta. The architect is now preparing the working drawings.

Contracts Awarded.

Building and Milling—\$25,000. Anacortes, Wash. City Engineer of Anacortes. Owners, City of Anacortes. Contractors, George C. Dietrich & Co., Globe Bldg., Seattle. Contract price, \$25,000.

PORTLAND AND OREGON.

Postoffice—2 story and base, brick and steel, \$12,000. Klamath Falls, Ore. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. The Public Buildings Committee has reported favorably on a bill appropriating \$12,000 for the construction of this building and the architect reports the plans are nearly complete.

Apartment and Stores—2 story and base, brick, \$31,000. Portland, Ore. Architects, Bridges & Webber, Portland. Owners, Fred H. and George M. Strong. The building will cover an area of 132x100 feet. There will be five stores and a moving picture theatre on the first floor and 17 apartments of two rooms and bath each on the upper floor. The exterior of the building will be faced with pressed brick. The plans are in the hands of the owners and the work will be done by Day Labor.

Apartment House—5 and 6 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architect, W. D. Sherman, Portland. Owner's name withheld. The building will cover a ground area of 100x100 feet. The interior will be arranged for 60 apartments of from two to four rooms each. There will be steam heat, elevator service, wall beds and vacuum cleaning system. The exterior will be faced with pressed brick. The architect is completing the working drawings.

Passenger Station—1 story and base, brick, \$17,000. Lakeview, Ore. Architect, F. J. De Longchamps, Monadnock Bldg., S. F. Owners, Nevada-California and Oregon R. R. Co., Reno, Nev. The building will contain one waiting room, station agents' offices and baggage room. The interior of the building will be finished in redwood. The exterior will be faced with pressed brick. The plans are complete and figures will be opened by the owners on March 21st at Reno, Nev.

Warehouse—2 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architect, D. C. Lewis, Portland. Owners, Portland Gas and Coke Co. The building will cover a quarter block and will be of fire proof construction throughout. There will be metal trim, doors and window

sash. The exterior will be faced with cement plaster. The plans have been out for figures and a general contract will be awarded at once.

Bank Alterations—\$30,000. Salem, Ore. Architect, D. C. Lewis, Portland. Owners, Ladd and Bush Bank, Salem. The work will consist of the complete interior alteration of the banking quarters, the installation of new bank fixtures and a large manganese steel vault. The plans are complete and figures are being taken.

Stores and Offices—5 story and base, brick and steel. Cost not stated. La Grande, Ore. Architect, Delos D. Neer, Portland. Owner, J. E. Foley. The building will be 30x100 feet. There will be one large store and two smaller stores on the first floor. Each of the upper floors will contain nine offices. There will be steam heat and elevator service. The exterior will be faced with pressed brick and artificial stone. The plans are complete and figures will be called for at once.

WHERE THE MONEY GOES.

Since the battle of Manila has been the total of military expenses has been of a serious character to the taxpayers of the United States. Most Americans know that it costs much more to run the affairs of the Nation now than it did before the Spanish War; but few taxpayers even realize the cause of the great increase in taxation. Beginning with the close of the Spanish War and continuing through a period of uninterrupted peace, a comparison of the ordinary expenses of running the civil government and the cost of the War Department shows a most astounding contrast.

	Military	Civil
1899	\$201,514,673	\$17,371,779
1900	110,175,389	20,767,625
1901	124,070,824	21,069,985
1902	93,974,727	16,097,725
1903	91,591,533	25,890,167
1904	83,019,639	24,752,916
1905	91,119,347	25,317,532

1911	126,741,705	34,558,960

In round numbers since the Spanish War the War Department has spent more than \$1,500,000,000, while the operation of the civil government has cost only about \$250,000,000.

It is about time to ask where the craze for military expenditure will stop. The fact that the Government has to spend five times as much on the War Department alone, not counting the heavy cost of the Navy or of the pension list, shows what an assured prospect there is for the country with all foreign nations would mean to this country. It would mean to the present generation the sum of at least \$5,000,000,000 that could be spent on humanitarian projects, instead of being wasted on junk.—Boston Advertiser.

The Oregon and Nevada delegations that have visited the City and selected sites with much felicitation and expression of good will. Well and good. But some of the papers of the interior part of the state are beginning to remark that San Francisco is doing everything on earth except roll up her sleeves and go to work. Wind and hot air are good for promotion purposes but are not excellent indications that any work is going to be done.

Editorial Comment.

The question of the telephone franchise, and the proposition to transfer the property of the Home Telephone Company, which is to come before the Board of Supervisors this month, has been a subject of much discussion in the city. The Home Telephone Company, which is a private corporation, has been operating the telephone system of the city for many years. The Board of Supervisors, which is the governing body of the city, has been asked to consider the proposition to transfer the property of the Home Telephone Company to the City of San Francisco. The Board of Supervisors has been asked to consider the proposition to transfer the property of the Home Telephone Company to the City of San Francisco. The Board of Supervisors has been asked to consider the proposition to transfer the property of the Home Telephone Company to the City of San Francisco.

HOME TELEPHONE FRANCHISE

San Francisco, March 26, 1912. The Board of Supervisors of the City of San Francisco has been asked to consider the proposition to transfer the property of the Home Telephone Company to the City of San Francisco. The Board of Supervisors has been asked to consider the proposition to transfer the property of the Home Telephone Company to the City of San Francisco. The Board of Supervisors has been asked to consider the proposition to transfer the property of the Home Telephone Company to the City of San Francisco.

property to the Pacific States Telephone Company. The Board of Supervisors has been asked to consider the proposition to transfer the property of the Home Telephone Company to the City of San Francisco. The Board of Supervisors has been asked to consider the proposition to transfer the property of the Home Telephone Company to the City of San Francisco.

While the Board of Supervisors has been asked to consider the proposition to transfer the property of the Home Telephone Company to the City of San Francisco, the Board of Supervisors has been asked to consider the proposition to transfer the property of the Home Telephone Company to the City of San Francisco. The Board of Supervisors has been asked to consider the proposition to transfer the property of the Home Telephone Company to the City of San Francisco.

If the present case is decided in an expeditious manner the Board of Supervisors are not likely to take any action before the election.

The transfer of the properties of the five times Home Telephone Company to the Home Long Distance Telephone Company is so palpably a subterfuge that no one outside of a technical lawyer would consider it. The transfer was made while the Supervisors were considering their petition in accordance with their agreement and in the face of an election.

Even if it is the best thing for the people to have these telephones inured and the Pacific States Telephone Company own and operate the system it is up to the City Attorney to compel, if possible, the setting aside of this transaction and make these companies live up to their agreement. They have clearly violated their contract and the Board of Supervisors should see that this transaction should be void.

It seems that this transaction has long been in contemplation. It is stated on good authority that the Home Telephone Company for some time past has not endeavored to increase its business. So abundant was it in the beginning that it installed phones and allowed their use for an extended time free of charge, knowing well the superiority of the automatic instrument. It has proved its worth. Experts have figured out that the difference in the tolling numbers by the Bell phone and the Home instrument amounts to more than 74 years in this city every day. And yet this instrument is to be abandoned, the telephone system is to become a private monopoly, owned by the Bell system and the Western Union Telegraph Company and nothing is said about it.

It may be that this is the best thing for the city. If so there is good argument for the proposition. It should not be done by the devious methods which have just been perpetrated for the history of these companies is replete of bribes and trickery and the people should know just what is being done and who are the men that are responsible.

The Effect Of Comparison Upon Design.

Paper Read by J. Milton Dyer, F. A. I. A. of Cleveland, Ohio, Before the Fifty-fourth Annual Convention of the American Institute of Architects.

In attempting to deal with this subject it has been extremely difficult to confine myself to the actual effect of competition upon design, rather than to revert to a discussion as to the propriety of competition in itself, and more or less to a discussion of the ethics governing competitions.

For the purposes of the paper I shall assume that by the term "competition" is meant—competition under the most ideal conditions, guided by rules laid down and approved, in so far as they have been approved, by the American Institute of Architects, that is, 1st, Competition limited to a certain number of architects, 2nd, open to all architects, 3rd, Mixed, certain architects being invited, but other architects being at liberty to take part.

The Institute, by recommending that except in cases in which competition is unavoidable, an architect be employed upon the sole basis of his fitness for the work, tacitly, at least, takes the stand that the effect of competition upon the practice of architecture and upon architecture itself, is not for the best.

The New York Chapter, however, admits that for public and semi-public buildings, competitions may be desirable; other chapters name the minimum amount a building should cost in order to warrant a competition.

Now, as a matter of fact, notwithstanding the view of the Institute as a whole and the individual views of the several chapters, possibly every man in this body has participated, to a greater or less extent, in competitions, and each has been guilty very closely in the ratio to his prominence in the profession, in spite of the great economic loss to the profession, and of its being a "game of chance."

To properly describe the effect of competition upon architecture would require an analytical comparison of the works of representative architects, won in competition, with other of their works executed after direct selection, and taking all the attendant conditions into account.

Much has been said upon the ethics of the competition, but very little upon the actual influence of competition upon architecture and I have to admit that it is a very broad subject and that, perhaps, in the future, an adequate paper on this subject may be written.

Upon receiving an invitation to enter a competition, and upon receipt of the program and requirements, one realizes that he is taking up a new and strange problem, and is dealing with an unknown owner or committee; the personnel of the jury may or may not be known to him.

In either case, the economical idea of the plan may often be worked out independently, that is, the disposition of space and relation of departments the one with the other, circulation, etc., may be determined irrespective of any supposed idiosyncrasy

on the part of the jury, but even in the case of the plan this independence is only too often influenced by a vague mistrust as to the personal likes or dislikes of the jury, concerning some particular arrangement, thus preventing an individual and heartfelt expression of the solution.

After the plan has been developed to an advanced stage, one may surround it with four walls punctured with holes, or attempt to give these walls architectural expression, and a character which denotes the intended uses of the building. Here again one's thoughts turn to the approval of the owner and his expert advisers, rather than to a courageous, independent, impulsive study of the problem. One is afraid to be impulsive to play with the motives, to do the thing you, yourself, feel, you may not win, you may not have the favored "parti."

While it is true that the most important element which is lacking in a competition and which must therefore affect the final result, is the inability to get in touch with one's client, and thus develop a solution, nevertheless the viewpoint of the expert adviser and jury itself, affecting design, is greatly responsible for the prevailing desire to sell one's soul to win; and it is possible that we should have a code for the conduct of juries, as well as for the conduct of competitions and competitors. Must we, in competitions, be eternally condemned to the use of an order? Is there no value in wall space?

The late John M. Carrere has said that one argument advanced in favor of competition has been the desire to discover new talent, and added, "If a man has talent, his day will come, and it should not come until he is prepared to make use of it."

"A man who has genius to express original ideas on paper is, nevertheless, not to be entrusted with the execution of the work until he has acquired the requisite experience, for when it comes to the serious work of actual building, he requires not only the experience of the practical side of things, but the practical artistic experience that knows that a thing looks well on paper represents a thing that is going to look well in execution, and that refers to every detail of the work, the very texture of the material. It requires experience which cannot be acquired by any man, no matter what his genius may be, without practice."

Now I believe that the safe, dignified, substantial way in which to obtain recognition in the profession is to gain your clientele through the excellence of your executed work, the importance and volume of which will grow as rapidly as it deserves; nevertheless it has been my experience that the presence of a serious competition in the office does develop the men, from the head to the office boy, improving draftsmanship, knowledge of the principles of design, and the fac-

ulty of quickly expressing one's thoughts on paper. An esprit de corps is created in the office, for here is a real competition, something more than a school problem, and naturally all take a keener interest in the result. Great good is accomplished in the ateliers of our larger cities and the competitions instituted by the magazines, but the efforts of all in collaboration, working in an office upon a serious competition, develop not only draftsmanship, but a real conception of architecture in its higher meaning, such as many months of routine work may not accomplish.

A great number of competitions, even in some of our best offices, have been won by clever young designers, developed under these conditions of training.

While this should not necessarily warrant these men being selected as architects, it nevertheless demonstrates that the system of conducting competitions does stand for training in design. It is equally true that a number of these young men have, through the medium of competitions, developed into some of the prominent architects of the country, and have shown, by their subsequent work, that they were prepared to make use of their talents.

The Tarnsey Act, approved February 29th, 1893, authorizing the Secretary of Treasury to obtain plans and specifications for public buildings, paved the way for a better architecture in our federal buildings, and, in turn, has, since its adoption, reacted upon the work of this Department of the Secretary of the Treasury, until as Mr. Glenn Brown, in his review of 196, states:

"Under the Tarnsey Act it must be conceded that the work is immeasurably superior to any building done by the Government from 1860 to 1896, and it, together with the merit system which now rules in the office, has been a very material factor in uplifting the character of work done by the corps in the supervising architect's office during the past six years."

Since 1897, under the direction and with the advice and assistance of the officers of the Institute, programs have been drawn by the supervising architect for scores of important Government buildings throughout the country, and the result has been public buildings of an excellence of design and execution heretofore unknown in the United States.

These competitions, however, have affected design to an enormous extent. The type of architecture in our Government buildings, as well as other municipal and semi-public buildings, has for the most part become circumscribed. Before the drawings are sent in, it is almost possible to foretell within small limitations, the general character of design of the contestants. It is always the base story with a superimposed order, enclosing two or more stories, with per-

haps an attic, or the order will extend from the ground through all the stories, in any case it is almost sure to be an order, and, as before stated, the value of plain wall space in design seems to have been overlooked.

This use of the order as the main feature of a building, with several stories enclosed in its height, is seldom successful, and probably never when more than two stories are included.

Why does competition insist upon a Government type requiring our architects to crowd these many stories within the order thus making corridors of the rooms within, by reason of the usual depths, or rooms too large for an economical arrangement of space, when the logical expression of an economical plan demands that the window openings be made subservient to this plan? In other words, while the character of architecture should proclaim the dignity and purpose of the building why should the arrangement and lighting of the interior be sacrificed to the everlasting order?

Is the fact of the order in competitive design spring from the belief that from this form of architecture is really the established form for public buildings in the United States, or is it to be laid at the door of our system of conducting competitions?

If the latter be true, I again affirm that the cause lies in that inborn desire to win, and the competitor, in order to do so, gives the jury that official type he believes the jury wants, to the absolute prostitution of personal expression, and the results of practically all competition judgments prove that he is correct. The jury does demand the recognized official type.

It therefore appears to me that, in competitions, the jury and expert advisers exert fully as much influence upon design as the competitor himself.

The official type of public buildings, whether for the Government or a municipality, is the offspring of the competition as at present conducted, and, in turn, influences and very often determines the type for many buildings forming part of a grouping plan, such as is being developed in many of our larger cities, thus condemning the whole group to a type which most surely will not be the last word in the architectural expressing of public buildings.

Much that has been herein stated may also be said concerning competitions for buildings of a commercial character.

With a possible exception as in the case of those problems of great monuments which are purely artistic in their character, and which may require the collaboration of the sculptor or decorator, taking into consideration the present status of the competition, I believe the best method of securing an artistic as well as a practical result is by the direct selection of an architect. But the fact that in competitions have been conducted in Europe, and especially in France, for many years with undoubted success, exerting a marked and beneficial influence upon architecture; also the willingness on the part of most of our ablest architects to enter competitions with, as a result, hundreds of successful monuments attesting their skill, and the fact that perhaps more

time of the Institute conventions is devoted to the consideration of the problems pertaining to competition than to any other subject indicate that while the perfect code for the conduct of competitions, competitors, errors and clients has not yet been developed, nevertheless, we may be through a slow but progressive process of education, evolving a system which may eventually enable competition to exert a beneficial effect upon design in architecture.

NATIONAL LIABILITY BILL

President Taft has submitted to Congress the report of the Employers' Liability Commission and its proposed employers' liability and workmen's compensation bill. These were accompanied by a special message in which the President strongly urged the enactment of the proposed measure, which is a decidedly advance piece of liability legislation. In the view of President Taft the enactment of the law would greatly benefit railway employees, insuring them quick adjustment of their claims for damages. He also makes the point an important one in view of the ever-increasing litigation, that the operation of the measure would tend to decidedly relieve the courts of work and cause justice to be administered with greater dispatch. Whether the operation of the proposed law would be limited to railway companies doing an interstate business is, perhaps, uncertain, since the courts have a way of broadening the effect of laws. In his message President Taft sketches the chief provisions of the proposed measure, and discusses and disposes of three objections urged by the opponents.

"In the first place," he says, "the question arises whether, under the provisions of the commerce clause, the bill could be considered a regulation of interstate and foreign commerce. That seems to be settled by the decisions of the Supreme Court in the employers' liability case.

"The second question is whether the making of these remedies exclusive and the compelling of the railroad companies to meet obligations arising from injuries, for which the railroad would not be liable under the common law, is a denial of the due process of law which is enjoined upon Congress by the fifth amendment to the Constitution in dealing with the property rights.

"This question the report takes up and in an exhaustive review of the authorities makes clear, as it seems to me, the validity of the act. It is sufficient to say that the argument of the commission is most convincing to show that the police power of the government exercised in the regulation of interstate commerce is quite sufficient to justify the imposition upon the interstate railroad companies of liability for injuries to their employees on an insurance basis.

"The third objection is that the right of trial by jury, guaranteed by the seventh amendment, is denied. As a matter of fact, the right is preserved in this act by permitting a jury to pass on the issue when duly demanded in accordance with the limitation of the act."

President Taft then refers to the alleged inquiries attending personal injury litigations. He declares that per-

jured testimony, emotional pleas and badly constructed laws limiting liability have tended to hamper the administration of exact justice, while the heavy expense of litigation has rendered it almost impossible for the poor man to command his rights. In referring to the condition of the courts because of this form of litigation, the President says:

"The administration of justice today is clogged in every court by the great number of suits for personal injury. The settlement of such cases by this system will serve to reduce the burden of our courts one-half by taking the cases out of court and disposing of them by this short cut."

Mr. Taft's message closes with the reiterated hope that the bill may be passed before the adjournment of the present session of Congress.

The employers' liability and workmen's compensation report is accompanied by the draft of a bill in which the commission eliminates the common law doctrine of negligence with what it characterizes as the unjust defense of assumption of risk, fellow servants, fault and contributory negligence. Compensation with a general basis of an equivalent of one-half wages to be paid in every instance except where injury or death is caused by the willful intention of the employee to injure himself or another or in case of intoxication on duty. Headed by Senator Sutherland of Utah, the commission's personnel also consists of Senator Chamberlain of Oregon; Representative Brantley, of Georgia, and D. L. Crase, editor of a railroad men's magazine.

Railroad companies of the country are paying out to their employees for accidents in settlements and judgments approximately \$10,055,000 and the proposed law, as nearly as the commission can estimate it, will raise this to 25 per cent.

Planning on the periodical payments extending over a term of years and capitalized at 5 per cent the commission points out that the total received by the beneficiaries would reach an aggregate of \$15,000,000 annually. It points out that for every dollar the railroad companies are compelled to pay under existing law, they will, under the proposed law, pay approximately \$1.25, and that for every dollar the employees and their dependents now receive, they would receive a sum much in excess of \$1.25.

It says that during 1908, 1909 and 1910, the railroads paid \$14,500,000 in settlements and judgments alone, on account of the deaths of nearly 12,000 workers and \$21,333,000 approximately for permanent or temporary disabling injuries, as well as sustaining an economic loss of \$16,654,000 days.

The bill declares that it is the policy of Congress to consider the burden of payments for personal injuries as an element of the cost of transportation, and directs the Interstate Commerce Commission to recognize and give effect to this policy.

It is providing that every common carrier engaged in interstate or foreign commerce by railroad shall pay compensation to any employee who sustains personal injury in line of duty, or to his dependents in case of his death. It makes the remedy exclusive by reason of the compensation being complete satisfaction. It abolishes all

existing common law and statutory remedies, and applies to all railroads in the District of Columbia as well.

After a fourteen-day period following the injury employer and employee are to agree in writing on a settlement; arbitration committees may be organized by them to settle disputes and award compensation, subject to review within two years by an "adjuster of accident insurance," to be appointed by each United States District court for four-year terms at \$1,500 to \$3,000 annually.

Jury trial rights are preserved, but are to be deemed waived except on demand. The adjuster, or the court, will fix the compensation for counsel for the employee. Provision is made for appeals to the Circuit Court of Appeals and to the Supreme Court, and for guardians to act in behalf of infants under 18, or the mentally incompetent.

No contract or device of any kind is to operate to relieve the employer from any liability under the act. The monthly wages are to be considered as not more than \$100, nor less than \$50 a month, with certain exceptions.

Monthly payments of death benefits are to be made for eight years thus: A widow alone, 40 per cent of the monthly wages; widow and child under 16 or otherwise dependent, 50 per cent; any child under 16 or dependent, 25 per cent; and 10 per cent for each additional child; payments, if the widow dies or remarries within eight years, to be continued to the children, if any, for the unexpired period.

If no widow or children, 15 per cent to those partly dependent, and 20 per cent to one wholly dependent parent and 40 per cent if both parents are dependent. In the absence of these dependents, provisions are made for brother, sister, grandparents or grandchild as dependents.

Personal injury compensation is made on the basis of 50 per cent of monthly wages for life for permanent total disability and 50 per cent during temporary total disability. For loss of an arm payments are to continue 72 months, a leg 66 months, an eye 20 months, a thumb 13 months. No payments are to be made while the employee is at work at wages 90 per cent of those he received at the time of his injury.—American Contractor.

HAITI.

Electric Railway Construction.

An American corporation, which was the principal stockholder in the Compagnie d'Eclairage Electrique des Villes de Port au Prince et du Cap-Haitien, has arranged for the sale of its holdings to local capitalists of Port au Prince. The company intends to consolidate certain railroads in Haiti and contemplates extensive improvements, such as the electrification of the street railway of Port au Prince, the construction of an electric road to Petionville about 5 miles from Port au Prince, and the construction of the Force Motrice concession, i. e., the construction of an electric power house, which will be operated by hydroelectric force. It is expected that this will produce sufficient electric energy for Port au Prince and vicinity.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco.—Apartment house, 6 story and base, brick and steel, \$50,000. Architects, Salfeld and Kohlberg. Clunie Bldg., S. F. Owner, Emily V. Flood. The building will be erected on a corner lot and will cover a large area. There will be in the neighborhood of 120 suites of two and three rooms each with connecting baths. There will be steam heat and elevator service. There will be wall beds in all departments. The exterior will be faced with pressed brick. The plans are complete and the architects are taking figures on the work.

San Francisco.—Apartment house addition, 3 story and base, frame, \$1,000. Architect, Earl B. Scott. Humboldt Bank Bldg., S. F. Owner's name withheld. The work will consist of the complete interior rearrangement, new plumbing, electric work and plastering. There will also be considerable exterior alteration. The plans are complete and the architect is taking figures on the work.

San Francisco.—Apartment house, 3 story and base, frame, \$8,000. Architect, none. Owner, H. W. Lurmann, 2500 22nd St., S. F. The building has been designed for six apartments of three rooms and bath each. The interior finish will be of pine throughout. There will be wall beds. The exterior of the building will be covered with shiplap. The plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco.—Apartment house, 4 story and base, brick and steel, \$50,000. Architect, Smith O'Brien. Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be arranged for 100 rooms divided into two and three room apartments. There will be connecting baths, wall beds, steam heat and elevator service. The exterior of the building will be faced with pressed brick. The architect is preparing the plans.

San Francisco.—Apartment house, 6 story and base reinforced concrete, \$100,000. Architects, MacDonald and Applebaugh, Call Bldg., S. F. Owners, E. J. and Mae E. McKenzie. The building will cover a large corner lot at the intersection of Van Ness Ave. and Bush street. There will be in the neighborhood of 140 rooms arranged in suites of two, three and four rooms each with baths. The construction will be fireproof throughout. There will be wall beds, steam heat, elevator service and a vacuum cleaning plant. The exterior of the building will be faced with cement plaster. The architects are now preparing the working drawings.

Berkeley, Alameda Co., Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, none. Owner, Dr. J. J. Benton, 316 Achness St., Berkeley. The building will contain several three and four room apartments. The interior trim will be of pine throughout. The exterior of the building will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Redondo, Los Angeles Co., Cal.—Apartment house, 2 story and base, brick. Cost not stated. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owner, C. Haak. The building will be 25870 feet. There will be stores on the upper floor. The interior trim will be of pine. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

San Francisco.—Apartment house, 2 story and base, frame, \$35,000. Architect, J. Cather Newsum, Monadnock Bldg. Owner, Mr. Butterfield. The building will contain 28 apartments arranged in suites of two and three rooms each with bath. There will be steam heat and wall beds. The interior of the building will be covered with cement plaster on metal lath. The architect is preparing the plans.

Fresno, Fresno Co., Cal.—Apartment house, 3 story and base, brick, \$60,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, Herman Brix. The interior finish will be of redwood, oak and white enamel. There will be furnace heat and open fire places. The mantels will be of tile or brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

San Francisco—Residence, 2 story and base, frame, \$2,000. Architect none. Owner, James Capella, 3311 21st St., S. F. The dwelling will contain 6 rooms and bath. The interior trim will be of pine throughout. There will be open fire places with tile mantels. The exterior of the house will be faced with rustic. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,000. Architect, J. Carson, Ba-on Bldg., Oakland. Owner, E. J. Lloyd. The dwelling has been designed for a 7-room house with bath. There will be pine and redwood interior trim, open fire places and furnace heat. The mantels will be of brick. There will be some hardwood floors. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 1 story and base, frame, \$2,000. Architect, C. K. Morrison, 113 52d St., Oakland. Owner, Harry Roberts. The dwelling will contain 5 rooms and bath. The interior trim will be of pine. There will be open fire places and brick mantels. The exterior of the bungalow will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Los Gatos, Santa Clara Co., Cal.—Residence, 2 story and base, frame, \$15,000. Architect, Charles S. McKenzie, Bank of San Jose Bldg., San Jose. Owner, Mr. Burnham. The residence will contain in the neighborhood of twelve rooms and several baths. The interior will be finished in redwood, pine and hardwoods. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the baths and kitchen. A garage will be built in connection. The plans are ready for figures.

Los Angeles, Cal.—Residence, 2 story and base, brick. Cost not stated. Architects, Hudson and Munsell, Stinson Bldg., L. A. Owner, Mrs. Mary A. Friggs. The dwelling will be 7x26 and will contain 10 rooms and bath. The interior will be finished in white cedar, oak and pine. There will be furnace heat and open fire places. The exterior will be faced with pressed and cement plaster. A garage will be built in connection. The plans are now being prepared.

SCHOOLS.

San Francisco—School heating and ventilating. Cost not stated. City Architect, Alfred I. Coffey, 1201 David Hewes Bldg., S. F. Owners, City and County of San Francisco. The C. E. Thomas Co. were low bidders for this work at \$20,600. For a complete list of the last City Bids opened see under San Francisco.

San Francisco—School, 2 story and base, frame, \$25,000. Architect, J. J. Foley. Owners, St. Teresa's School. Bids for this work have been opened by the architect and a contract will be awarded in a few days.

Richmond, Contra Costa Co., Cal.—School, two 2-story and base, brick and concrete, \$65,000 and 45,000. Architect, Louis S. Stone, Macdonough Bldg., Oakland and F. D. Voorhees, Central Bank Bldg., Oakland. Owners, City of Richmond. Both of these buildings have been mentioned here before. The plans are complete and figures for the general construction will be opened on April 5th. Bids will also be opened on the same date for the heating, plans for which have been prepared by Engineer William E. Leland, Merchants Exchange Bldg., S. F.

Tombles, Marin Co., Cal.—School, 1½ story and base, reinforced concrete, \$25,000. Architect, J. D. Ogborn, Richmond. Owners, Tombles School District. The architect has just been commissioned to prepare the plans for this work. There will be a number of standard sized class rooms, assembly hall, principal's office and teachers' rooms. The exterior will be faced with cement plaster. Plans will be completed as rapidly as possible.

College Park, Santa Clara Co., Cal.—School, 1 story and base, frame, \$5,000. Architect, F. D. Wolfe, Smout Bldg., San Jose. Owners, College Park School District. The building has been designed for a one room school. The exterior will be faced with cement plaster on metal lath. The architect is completing the working drawings.

Oroville, Butte Co., Cal.—School, 2 story and base, reinforced concrete, \$15,000. Architects, Parker and Kenyon, 241 Kearny St., S. F. Owners, Oroville Grammar School District. The building will contain 18 modern class

rooms, assembly hall, principal's office and teachers' rooms. There will be a modern system of heating and ventilating. The exterior of the building will be faced with cement plaster. The plans are being prepared.

Tulalip, Wash.—Administration building and barn, 2 story frame. Cost not stated. Architectural Dept. Office of Indian Affairs, Washington D. C. Owners, U. S. Government. The plans for a office building and large dairy barn for the Tulalip Indian School are on file at the Indian Supply Depot 312, 8th St., San Francisco. Bids for the construction will be opened by the Commissioner of Indian Affairs on April 25th.

Pasco, Wash.—School, 2 story and base, brick, \$25,000. Architects, Van Dusen and Doughty, Pasco. Owners, City of Pasco. The plans for this building, which has been mentioned here before, will be complete by the 1st of April and bids will be called for at once. There will be 8 class rooms. There will be steam heat and a modern system of ventilation. The exterior of the building will be faced with pressed brick.

SEWERS, STREET WORK AND WATER SYSTEMS.

Oakland, Cal.—Street work, sewers and culverts. Cost not stated. City Engineer, City Hall Annex, Oakland. Owners, City of Oakland. Bids for April 1st. For additional information see under Sealed Proposals in this issue or address the City Engineer.

Contracts Awarded.

Seattle, Wash.—Power station, 4 story and base, reinforced concrete, \$30,000. Engineers, Stone-Webster Co., Henry Bldg., Seattle. Owners, Seattle Electric Co. Contractors, Stone-Webster Co., Henry Bldg., Seattle Contract price \$30,000.

STORES & OFFICE BUILDINGS.

San Francisco—Stores and offices, 5 story and base, class A construction, \$100,000. Architect, Charles Paff associated with Architects MacDonald and Applegarth, S. F. Owner, A. B. McCreery. This work has been mentioned here before. The contract for the pile foundation has been awarded to the Portland Concrete Pile Co. and the structural steel to Ralston Iron Works. The balance of the work is now on the market for figures.

San Francisco—Store additions, 2 story brick and steel. Cost not stated. Architects, Welsh and Carey, Western Metropolitan Bank Bldg., S. F. Owner, A. Paldini. The architects are preparing plans for additions which will bring the several one story and basement brick buildings on Clay and Commercial streets up to the height of the owners new building at the corner of Leidesdorff and Sacramento streets. The plans will be complete in the course of the next few days and figures will be taken.

San Francisco—Stores, 1 story and base, brick, \$15,000. Architect, Nathaniel Bhisdel, 255 California St., S. F. Owners, Boyd Investment Co. The building will be erected on East street between Market and Mission streets. There will be several modern stores with patent store fronts. The exterior of the building will be faced with pressed brick. The plans are complete

and figures are being taken by the architect.

Richmond, Contra Costa Co., Cal.—Stores, 1 story and base, brick and steel. Cost not stated. Architect, M. L. Newsom, 906 Broadway, Oakland. Owner's name withheld. The building will contain three stories. Provision has been made in the plans for carrying the building several stories higher. The exterior will be faced with pressed brick. The plans are being prepared.

Los Angeles, Cal.—Stores and lofts, 1 story and base, reinforced concrete. Cost not stated. Architects, Edelman and Burnett, Blanchard Bldg., L. A. Owners, Isaac Bros. The plans for this building, which has been mentioned here before, are being revised. The contract for the underpinning has been awarded to Richards-Neustadt Co. In order not to delay the excavating and the same firm may be arranged to general contract.

Oakland, Cal.—Store alterations, 1 story and base, brick, \$10,000. Architect, Walter Matthews, 969 Broadway, Oakland. Owners, M. K. Blake Estate. The work will consist of the complete rearrangement of the interior of the building as well as extensive outside alterations. There will be new electric work, plumbing, plastering and pressed brick facing. The plans are complete and the work will be done by Day Labor.

Seattle, Wash.—Stores and lofts, two 3-story and base, brick and steel, \$150,000. Architects, Bobb and Mendel, Denny Bldg., Seattle. Owner, George W. Fisher. The buildings will be identical in design and will each contain several stories on the first floor and lofts above. There will be freight elevator and steam heat. The exteriors will be faced with pressed brick. The plans will be out for figures next week.

Spokane, Wash.—Offices etc., 5 Reinforced concrete buildings, \$100,000. Engineer, C. A. Watson, Sheldon Bldg., S. F. Owners, Standard Oil Co. The plans for a main office building, cooper shop, storage buildings and several tanks have been placed in the hands of J. C. Black of Spokane for figures. Bids will be opened at an early date.

Seattle, Wash.—Stores and office, 6 story and base, Class A construction, \$300,000. Architect, John Graham, Lyon Bldg., Seattle. Owner, Joshua Green. This work was mentioned here several times before. The plans have been filed with the building inspector and bids will be called for at once. The construction will be Class A throughout. The exterior will be faced with pressed brick and terra cotta. There will be steam heat, elevators and metal trim.

Seattle, Wash.—Stores and lofts, 8 story and base, reinforced concrete, \$200,000. Architects, Howells and Stokes, Henry Bldg., Seattle. Owners, Judson Bldg. Co. The building will be 70x120 feet. There will be several stories on the first floor and the upper floors will be arranged for light manufacturing. There will be steam heat, elevators and metal trim. The architects have not decided whether to take figures for the general construction or let the work on a percentage basis.

Seattle, Wash.—Stores and offices, 10 story and base, reinforced concrete, \$500,000. Architects, Frank C. Allen Co., Seattle (Now Director of Works for the Panama-Pacific Exposition Co., San Diego). Owners, Washington Se-

curities Co., Carey Bldg., Seattle. The announcement has just been made public that this company will commence the work on the first unit of what is to be a million dollar office building this spring. The first section to be started will be 10 stories in height and cover a ground area of 10x120 feet. J. W. Chase, Globe Bldg., Seattle, is the active head of the Washington Securities Co.

Contract Awarded.

Oakland, Cal.—Stores, 1 story and base, Class A construction, \$50,000. Architect, W. W. Dwyer, Oakland Bank of Savings Bldg., Oakland. Owners, Kahn Co. Contractors, Indson Mfg. Co., Oakland, structural steel. Contract price not stated.

Los Angeles, Cal.—Department store, 10 story and base, Class A construction. Cost not stated. Architects, Morgan, Wallis and Morgan, associated with Parkinson and Beiström, L. A. Owner, Hollenbeck. Contractors, Lowellyn Iron Works, L. A. structural steel. Contract price \$125,000.

THEATRES.

Contracts Awarded.

Glendale, Los Angeles Co., Cal.—Greek Theatre, reinforced concrete, \$20,000. Architect, Myron Hunt, Hibernian Bldg., L. A. Owners, Pomona College. Contractors, Richards-Neustadt Co., Wright and Chandler Bldg., L. A. Contract price, \$20,000.

SEALED PROPOSALS.

PROPOSALS FOR CONSTRUCTING BUILDING.

(Bids close April 17.)

SEALED proposals will be received at the office of the Supervising Architect, Washington, D. C., until 3 o'clock p. m. on the 17th day of April, 1912, and then opened for the mechanical equipment (except gas piping and lighting fixtures) of the United States post office at McKinney, Tex., in accordance with drawings and specifications, copies of which may be obtained at the office of the superintendent of construction, at McKinney, Tex., or at this office, at the discretion of the Supervising Architect, JAMES KNOX TAYLOR, Supervising Architect.

PROPOSALS FOR CONSTRUCTING BUILDING.

SEALED proposals will be received at the office of the Supervising Architect, Washington, D. C., until 3 o'clock p. m. on the 22nd day of April, 1912, and then opened for the construction (including plumbing, gas piping, heating apparatus, electric conduits and wiring and interior lighting fixtures) of the United States post office at Riverside, Cal. The building is to be two stories and basement, of approximately 6,200 square feet ground area, stucco faced, with tile roof, and of fireproof construction throughout. Drawings and specifications may be obtained from the custodian of the site at Riverside, Cal., or at this office at the discretion of the Supervising Architect, JAMES KNOX TAYLOR, Supervising Architect.

CONSTRUCTING BUILDING.

(Bids close April 25.)

SEALED proposals will be received at the office of the Commissioner of

Indian Affairs, Washington, D. C., on the 25th day of April, and then publicly opened for the construction of the frame office building No. 7, which is to be erected at the Puyallup Indian School, Tulalip, Washington, in accordance with the plans and specifications. Plans and specifications may be obtained from the office of the Commissioner at Washington, from the Superintendent of the school or from the office of the Indian Supply Depot, 312 8th St., San Francisco.

CONSTRUCTING BUILDING.

(Bids close April 25.)

SEALED proposals will be received at the office of the Commissioner of Indian Affairs, Washington, D. C., on the 25th day of April, and then publicly opened for the construction of the frame bath No. 21 at the Tulalip Indian School, Puyallup, Washington, in accordance with the plans and specifications. Plans and specifications may be obtained from the Commissioner at Washington, from the Superintendent of the school or from the office of the Indian Supply Depot, 312 8th St., San Francisco.

PROPOSALS FOR CONSTRUCTING BUILDING.

(Bids close April 22.)

SEALED proposals will be received at the office of the Commissioner of Indian Affairs, Washington, D. C., on the 22nd day of April and then publicly opened for the construction of the brick (two-story) building No. 34 at the Moqui Indian School, Moqui, Arizona, in accordance with the plans and specifications. Plans and specifications may be obtained from the office of the Commissioner at Washington, from the Superintendent of the school or from the office of the Indian Supply Depot, 312 8th St., San Francisco. For complete information relative to freight charges, labor, etc., address the Superintendent of Moqui Indian School, Kermas Canyon, Ariz.

PROPOSALS FOR CONSTRUCTING BUILDING.

(Bids close April 5.)

NOTICE is hereby given that sealed bids will be received by the Board of Education of the City of Richmond, Contra Costa County, California, at their office in the City of Richmond on April 5th 1912, for the complete construction, except the heating and ventilating, of the two-story brick school building in accordance with the plans and specifications for the same as prepared by Architect Fred B. Voorhees, Central Bank Bldg., Oakland. Plans and specifications can be had from the Secretary of the Board or from the architect's office.

The Board of Education reserves the right to reject any or all bids.

PROPOSALS FOR HEATING.

(Bids close April 5.)

NOTICE is hereby given that sealed proposals will be received on the 5th day of April, 1912, by the Board of Education of the City of Richmond, Contra Costa County, California, for the installation of a heating and ventilating system in two school buildings to be erected in Richmond. Plans for these systems have been prepared by Engineer William E. Leland, and copies of the plans and specifications may be obtained from the engineer's office in the Merchants' Exchange Bldg., San Francisco.

The Board of Education reserves the right to reject any or all bids.

PROPOSALS FOR CONSTRUCTING BUILDING.

(Bids close April 5.)

NOTICE is hereby given that sealed bids will be received by the Board of Education of the City of Richmond, Contra Costa County, California, at their office in the City of Richmond on April 5th, 1912, for the complete construction, except the heating and ventilating, of the two-story brick and concrete school building in accordance with the plans and specifications for the same as prepared by Architect Louis R. Stone, Macdonough Bldg., Oakland. Plans and specifications can be had from the Secretary of the Board of Education or from the architect's office.

The Board of Education reserves the right to reject any or all bids.

PROPOSALS FOR ELECTRICAL APPARATUS.

(Bids close April 8.)

ELECTRICAL APPARATUS — Department of the Interior, United States Reclamation Service, Washington, D. C. — Sealed proposals will be received at the office of the United States Reclamation Service, Los Angeles, Cal., until 2 o'clock p. m. April 8, 1912, for furnishing electrical apparatus for Truckee-Carson project, Nevada. For particulars address the U. S. Reclamation Service, 605 Federal Building, Los Angeles, Cal., or Washington, D. C. F. H. NEWELL, director.

PROPOSALS FOR DREDGING.

(Bids close April 11.)

DREDGING — U. S. Engineer Office, 401 Custom House, San Francisco, Cal. — Sealed proposals for dredging a channel across the flats in San Pablo Bay to the mouth of Petaluma Creek. Until 11 o'clock a. m. April 11, 1912, and then publicly opened, information on application. THOMAS H. RESS, lieutenant colonel, engineers.

PROPOSALS FOR CULVERTS AND PAVING.

(Bids close April 1.)

PURSUANT to Statute and to Resolution No. 1835 N. S. of the Council of the City of Oakland, passed March 18th, 1912, directing this notice, said council invites proposals or bids for the following street work to be done according to the plans and specifications for said work posted and on file.

That a concrete culvert, having internal diameters of two (2) feet three and one-half (3½) inches in height and six (6) feet in width, be constructed between the northwestern and southeastern lines of Fifty-second Avenue, the center line of said culvert to be along a straight line drawn from a point on the southeastern line of Fifty-second Avenue distant thereon three hundred and fifty-five and five-tenths (355.5) feet northeasterly from the northeastern line of East Fourteenth Street to a point on the northwestern line of Fifty-second Avenue distant thereon three hundred and fifty-five and five-tenths (355.5) feet northeasterly from the northeastern line of East Fourteenth Street.

Also that Fifty-second Avenue from the northeastern line of East Fourteenth Street to a line drawn parallel thereto and distant eight hundred

twenty-four feet (824) feet northeasterly therefrom be graded, curbed with redwood, paved with an oil-macadam pavement, and guttered with a broken rock gutter three (3) feet in width.

Also that two (2) storm water inlets, having tops of cast iron, be constructed at points distant eight (8) feet northeasterly from the center line of the aforesaid proposed culvert; one such storm water inlet on each curb line of said Fifty-second Avenue.

Also that two (2) conduits, having internal diameters of ten (10) inches be constructed, one such conduit leading from each of the aforesaid proposed storm water inlets to the said proposed culvert.

Said sealed proposals or bids are to be delivered to the undersigned City Clerk of said City, and Clerk of said City Council, at a meeting of said Council to be held in Council Chamber, City Hall, in the said City of Oakland on April 1st, 1912, between the hours of 11 o'clock a. m. and 12 o'clock m.

FRANK R. THOMPSON, City Clerk.

PROPOSALS FOR SEWERS.

(Bids close April 1.)

PURSUANT to Statute and to Resolutions No. 1638 N. S. and No. 1841 N. S. of the Council of the City of Oakland, passed February 15, 1912 and March 18, 1912, directing this notice, said Council invites sealed proposals or bids for the following street work to be done according to the plans and specifications for said work posted and on file.

That a sewer be constructed along the center line of Thirteenth street in said City from the center line of Webster street to the center line of Oak street; also that a sewer be constructed along the center line of Harrison street from the center line of Thirteenth street to a point distant two hundred thirty-five (235) feet southerly therefrom; and also that a sewer be constructed along the center line of Alice street from the center line of Thirteenth street to a point distant two hundred thirty-five (235) feet southerly therefrom.

Also that "Y" branches, each having a six (6) inch opening, be constructed on the aforesaid-described proposed sewers so as to provide one such branch for each fifty-foot lot and fractional lot remaining into which the abutting property frontage, taken block by block, is capable of being divided.

Also that five (5) brick manholes, having tops of cast-iron, be constructed on the aforesaid-described proposed sewers at the following points, to wit: one each at the intersections of the center line of Thirteenth street with the center line of Webster street, Alice street and Madison street; one each at the southerly ends of the aforesaid-described proposed sewers in Harrison street and Alice street.

Also that the depth of the existing manhole at the intersection of the center line of Harrison street with the center line of Thirteenth street and the depth of the existing manhole at the intersection of the center line of Jackson street with the center line of Thirteenth street be increased.

All of the aforesaid-described sewers shall have internal diameters of eight (8) inches and be constructed of first quality, standard sewer pipe; and all of the aforesaid-described "Y" branches

shall be constructed of first quality, standard sewer pipe.

Also that the existing sewer along the center line of Thirteenth street from the center line of Harrison street to a point distant one hundred (100) feet easterly therefrom be removed; also that the existing sewer along the center line of Harrison street from the center line of Thirteenth street to a point distant one hundred thirty-five (135) feet southerly therefrom be removed; also that the two (2) existing lampholes on the aforesaid existing sewers be removed.

Said sealed proposals or bids are to be delivered to the undersigned City Clerk of said City, and Clerk of said City Council, at a meeting of said Council to be held in Council Chamber, City Hall, in the said City of Oakland on April 1st, 1912, between the hours of 11 o'clock a. m. and 12 o'clock m. At the expiration of the said hour, the Council will open, examine and publicly declare all bids received.

FRANK R. THOMPSON, City Clerk.

PROPOSALS FOR PAVING, CURBS AND GUTTERS.

(Bids close April 1.)

PURSUANT to Statute and to Resolution No. 1835 N. S. of the Council of the City of Oakland, passed March 18th, 1912, directing this notice, said council invites proposals or bids for the following street work, to be done according to the plans and specifications for said work posted and on file. That the western half of Bruce street in said City, from the northern line of East Thirty-fourth street to the southern line of Hopkins street, be graded, curbed with redwood; paved with an oil-macadam pavement; also that concrete gutters three (3) feet in width be constructed thereon.

Said sealed proposals or bids are to be delivered to the undersigned City Clerk of said City, and Clerk of said City Council, at a meeting of said Council to be held in Council Chamber, City Hall, in the said City of Oakland on April 1st, 1912, between the hours of 11 o'clock a. m. and 12 o'clock m.

FRANK R. THOMPSON, City Clerk.

PROPOSALS FOR PAVING, CURBS AND GUTTERS.

(Bids close April 1.)

PURSUANT to Statute and to Resolutions No. 1697 N. S. and No. 1875 N. S. of the Council of the City of Oakland, passed February 15, 1912, and March 18, 1912, directing this notice, said Council invites sealed proposals or bids for the following street work, to be done according to the plans and specifications for said work posted and on file.

That Ocean View Drive, (formerly known as Bay View Avenue) in said City from the western line of Broadway to a point parallel to, and distant seven hundred seventeen (717) feet easterly from the eastern line of McMillan Avenue, be graded, curbed with redwood, paved with an oil-macadam pavement, and guttered with a broken rock gutter three (3) feet in width.

Also the construction of a culvert of corrugated iron and concrete between the northern and southern gutters of said Ocean View Drive, the center line of said culvert to be along a line drawn at right angles to the southerly line of Ocean View Drive at the inter-

section with the western line of Broadway.

Also the construction of two wooden bridges, four feet long by five feet wide, one over each of the respective gutters of Ocean View Drive at the ends of the afore-described culvert.

Said sealed proposals or bids are to be delivered to the undersigned City Clerk of said City, and Clerk of said City Council, at a meeting of said Council to be held in Council Chamber, City Hall, in the said City of Oakland on April 1st, 1912, between the hours of 11 o'clock a. m. and 12 o'clock m.

FRANK R. THOMPSON, City Clerk.

PROPOSALS FOR COOK FLOORS.

(Bids close March 27.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 27th day of March, 1912 for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The furnishing and laying of cork tile floors in the Nurses' Home and Administration Buildings, San Francisco Hospital, situated on Potrero avenue, between 22d and 23rd streets.

Progressive payments will be made.

PROPOSALS FOR CONSTRUCTING BUILDING.

(Bids close April 3.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 3rd day of April, 1912 for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The construction of Engine House No. 28, situated on Stockton street, between Greenwich and Lombard streets.

PROPOSALS FOR ELEVATORS.

(Bids close March 27.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 27th day of March, 1912 for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The furnishing and installing of elevators in the San Francisco Hospital, situated on Potrero avenue, between Twenty-second and Twenty-third streets.

PROPOSALS FOR CONSTRUCTING BUILDING.

(Bids close April 3.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 3rd day of April, 1912 for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The construction of the North End Police Station, situated on Greenwich street, between Pierce and Scott streets.

PROPOSALS FOR PAVING, CURBS AND GUTTERS.

(Bids close April 1.)

PLASANT to Statute and to Resolution No. 126, S. S. of the Council of the City of Oakland, passed March 15th, 1912, directing this notice, said council invites proposals or bids for the following street work, to be done according to the plans and specifications for said work posted and on file.

That the eastern half of Market Street in said city from the southern line of Seventh Street, produced easterly, (as Seventh Street exists between Market Street and Myrtle Street) to the southern line of Fifth Street, produced westerly, (as Fifth Street exists between Market Street and Brush Street) be graded, curbed with concrete and paved with an asphalt pavement.

Also that West Street in said City from the eastern line of Market Street to a straight line drawn from a point

on the eastern line of West Street distant thereon twenty-three (23) feet southerly from the southern line of Seventh Street to a point on the western line of West Street distant thereon forty-four (44) feet southerly from the southerly line of Seventh Street be graded, curbed with concrete and paved with an asphalt pavement.

Excepting, however, from all of the afore-described work the grading of the sidewalks, also excepting all the curbing north of the north line of Sixth Street produced, and west of the center line of West Street.

Said sealed proposals or bids are to be delivered to the undersigned City Clerk of said City, and Clerk of said City Council, at a meeting of said Council to be held in Council Chamber, City Hall, in the said City of Oakland on April 1st, 1912, between the hours of 11 o'clock a. m. and 12 o'clock m.

FRANK R. THOMPSON, City Clerk.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—6 story and base, brick and steel, \$20,000, San Francisco, Architects, Safford & Kohlberg, Clume Bldg., S. F. Owner, Emily V. Flood. The building will be erected on a corner lot and will cover a large area. There will be in the neighborhood of 120 suites of two and three rooms each with connecting baths. There will be steam heat and elevator service. The exterior will be faced with pressed brick. The plans are complete and the architects are taking figures on the work.

Apartment House Addition—3 story and base, frame, \$4,000, San Francisco, Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. The work will consist of the complete interior rearrangement, new plumbing, electric work and plastering. There will also be considerable exterior alteration. The plans are complete and the architect is taking figures on the work.

Apartment House—2 story and base, frame, \$9,000, San Francisco, Architect, none, Owner, H. W. Larmann, 2700 2nd St., S. F. The building has been designed for six apartments of three rooms and bath each. The interior finish will be of pine throughout. There will be wall beds. The exterior of the building will be covered with shiplap. The plans are in the hands of the owner and the work will be done by Day Labor.

Apartment House—4 story and base, brick and steel, \$50,000, San Francisco, Architect, Smith O'Brien, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be arranged for 100 rooms divided into two and three room apartments. There will be connecting baths, wall beds, steam heat and elevator service. The exterior of the building will be faced with pressed brick. The architect is preparing the plans.

Apartment House—6 story and base, reinforced concrete, \$100,000, San Francisco, Architects, MacDonald & Apple-

garth, Call Bldg., S. F. Owners, R. J. Mac E. McKenzie. The building will cover a large corner lot at the intersection of Van Ness Ave. and Bush street. There will be in the neighborhood of 140 rooms arranged in suites of two three and four rooms each with baths. The construction will be fire proof throughout. There will be wall beds, steam heat, elevator service and a vacuum cleaning plant. The exterior of the building will be faced with cement plaster. The architects are now preparing the working drawings.

Fire House—2 story and base, brick and concrete, cost not stated, San Francisco, City Architect Alfred I. Coffey, David Hewes Bldg., S. F. Owners, City and County of San Francisco. The building will be erected in the northern part of the city. There will be accommodations for one hose company and an engine company. The exterior will be faced with pressed brick. There will be steam heat. The plans are complete and the Board of Public Works will open bids for the construction on April 2nd.

Police Station—2 story and base, brick, cost not stated, San Francisco, City Architect Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. The plans for a modern building to be erected on Greenwich street near Pierce have been completed, and are now in the hands of the Board of Public Works. Bids will be opened for the construction on April 3th. The building will contain the main office, cell block and quarters for the patrolmen. The exterior will be faced with pressed brick.

Flat—2, 3 story and base, frame, \$3,000, San Francisco, Architect, none, Owners, C. J. and W. J. Keenan, 200 Webster St., S. F. The buildings will each contain five and six room flats. The interior trim will be of pine and redwood. There will be some hardwood floors. The exteriors of the buildings will be covered with shiplap and brick veneer. The plans are complete and the work will be done by Day Labor.

Flats—2, 3 story and base, frame, \$6,000 and \$5,000. San Francisco, Architect, C. Fantoni, 4 Columbus Ave., S. F. Owner, O. Trapani. The buildings have been designed to contain three five and six room flats each. There will be modern plumbing, pine interior trim and gas grates. The exterior of each building will be covered with shiplap and brick veneer. The plans are complete and the architect is taking figures on the work.

Flats—3 story and base, brick, \$15,000. San Francisco, Architect, Albert Pissis, Flood Bldg., S. F. Owners, Messrs. Morrill. The building will contain a number of five and six room flats. There will be redwood, pine and hardwood interior trim. The plumbing will be strictly modern. Tile will be used in the baths. There will be a vacuum cleaning plant. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Flats—2, 3 story and base, frame, \$5,000 each. San Francisco, Architect, none. Owners, G. and D. Sangiacomo, 458 9th Ave., S. F. The buildings will each contain three flats of five and six rooms and bath each. The interior finish will be of pine throughout. There will be gas grates. The exteriors of the buildings will be covered with shiplap and rustic. The plans are complete and the work will be done by Day Labor.

Flats—2 story and base, frame, \$7,000. San Francisco, Architect, none. Owner, M. J. Gorman, 1131 20th Ave., S. F. The building will contain two large flats. The interior finish will be of pine and redwood with some hardwood floors. There will be gas grates. The exterior of the building will be covered with brick veneer and shiplap. The plans are complete and the work will be done by Day Labor.

House—1 story and base, frame, \$3,000. San Francisco, Architect, Joseph M. Geary, 23rd and Polson Sts., S. F. Owners, Parkside Home Building Co. The building will contain seven rooms and bath. The interior trim will be of pine and redwood. There will be some hardwood floors. There will be open fire places with brick mantels. The exterior of the building will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,500. San Francisco, Architect, none. Owner, D. Condon, 4188 26th Ave., S. F. The dwelling will contain six rooms and bath. The interior trim will be of pine. There will be open fire places with the mantels. The exterior of the building will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Residence—2 story, attic and base, frame and brick, \$15,000. San Francisco, Architects, Price & Schaefer, Monadnock Bldg., S. F. Owner, R. Liebes. The dwelling will contain 14 rooms and 3 baths. The interior finish will be of pine and hardwoods with white enamel in the chambers. Hardwood floors will be used throughout. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the baths and kitchen. The exterior of the building will be covered with pressed brick and cement plaster. The plans are complete and figures are being taken.

Wharves—2, reinforced concrete, \$500,

000 each. San Francisco, Assistant State Engineer, Supr., Ferry Bldg., S. F. Owners, State of California. This work has been mentioned here several times before. The final plans have been completed and approved. Bids will be called for on the general construction the first of next week.

Ferry Annex—2, 2 story and base, Class A construction, \$350,000. San Francisco, Architects, L. B. Dutton & Co., Chronicle Bldg., S. F. Owners, State of California. The report comes from the State Engineer's office in Sacramento to the effect that the above mentioned firm have been selected to prepare plans for this work. The report cannot be substituted in the architect's office. The new additions will carry out the design of the present building. Complete details will be given in an early issue.

Hotel and Stores—4 story and base, reinforced concrete, \$37,000. San Francisco, Architects, J. E. Kraft & Sons, Phelan Bldg., S. F. Owner, J. Olcovic. The building will be arranged for several stores on the first floor and single rooms above. There will be steam heat and elevator service. The interior trim will be of pine. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Stores—2, 2 story and base, Cost not stated. San Francisco, Architect, Frederick D. Boese, 4 Kearny St., S. F. Owner, George A. Clough. This work was mentioned here last week. The plans for the first of the two buildings have been completed and figures will be taken at once. The excavating has already been let. Plans for the balance of the work will be out this week.

Amvny—4 story and base. Class A construction, \$500,000. San Francisco, State Architect Diggs, Sacramento. Owners, State of California. This work has been mentioned here a number of times before. The plans are complete for the excavation and bids are now being taken. The statement comes from the State Architect's office that all detail drawings will be finished within two weeks and figures will be called for at that time.

Hospital Work—Floors and elevators. Cost not stated. San Francisco, City Architect Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Bids will be opened on March 27th for furnishing and installing elevators and for furnishing and laying cork floors in the San Francisco Hospital buildings. Bids will be opened by the Board of Public Works.

School Heating and Ventilating—Cost not stated. San Francisco, Architect, City Architect Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. The C. E. Thomas Co. were low bidders for this work at \$50,600. For a complete list of the last City Bids opened see under San Francisco.

School—3 story and base, frame, \$25,000. San Francisco, Architect, J. J. Foley, Owners, St. Theresa's School. Bids for this work have been opened by the architect and a contract will be awarded in a few days.

Stores and Office—5 story and base, Class A construction, \$100,000. San Francisco, Architect, Charles J. Paff, associated with Architects MacDonald & Applegate, S. F. Owner, A. B. McCreey. This work has been men-

tioned here before. The contract for the pile foundation has been awarded to the Portland Concrete Pile Co., and the structural steel to the Ralston Iron Works. The balance of the work is now on the market for figures.

Store Additions—2 story, brick and steel. Cost not stated. San Francisco, Architects, Welsh & Carey, Western Metropolitan Bank Bldg., S. F. Owner, A. Paladini. The architects are preparing plans for additions which will bring the several one-story and basement brick buildings on Clay and Commercial streets up to the height of the owner's new building at the corner of Leidsdorff and Sacramento streets. The plans will be complete in the course of the next few days and figures will be taken.

Stores—1 story and base, brick, \$15,000. San Francisco, Architect, Nathaniel Blaisdell, 255 California St., S. F. Owners, Boyd Investment Co. The building will be erected on East street, between Market and Mission streets. There will be several modern stores with patent store fronts. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken by the architect.

Capital Buildings—Class A construction, \$2,000,000. Salt Lake City, Utah, Architect, B. Kitting. Salt Lake City, Owners, State of Utah. The architect has just received the commission to prepare the plans for this work and the details of the construction are not obtainable at this time. As soon as a description of the work can be obtained from the architect it will appear in these columns.

Apartment House—2 story and base, frame, \$35,000. San Francisco, Architect, J. Cather Newsum, Monadnock Bldg., S. F. Owner, Mr. Butterfield. The building will contain 28 apartments arranged in suites of two and three rooms each with baths. There will be steam heat and wall beds. The interior finish will be of pine and hardwood. The exterior of the building will be covered with cement plaster on metal lath. The architect is preparing the plans.

Hotel—5 story and base, brick and steel, \$95,000. San Francisco, Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Sullivan Estate. The building has been changed from a four story structure to a five story. The new plans are complete and figures are being taken. The building will be 80x130 feet. There will be ten stores and the main lobby on the first floor and 187 guest rooms on the upper floors. There will be steam heat, elevators and hot and cold running water. The exterior of the building will be faced with pressed brick.

Residence—2 story and base, frame, \$5,700. San Francisco, Architect, Edward T. Fomkes, Crocker Bldg., S. F. Owner, J. O'Connor. The dwelling has been designed to contain 6 rooms and bath. The interior finish will be of redwood, oak and white enamel. There will be furnace heat and open fire places. The mantels will be of tile or brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$2,000. San Francisco, Architect, none. Owner, James Capella, 3341 21st St., S. F. The dwelling will contain 6 rooms and bath. The interior trim

OAKLAND AND ALAMEDA COUNTY.

Apartment House—3 story and base,
frame. Cost not stated. Berkeley,
Alameda Co., Cal. Architect, none.
Owner, Dr. J. J. Benton. The building will
contain several three and four room apart-
ments. The interior trim will be of
pine throughout. The exterior of the
building will be covered with shingles.
The plans are complete and the work
will be done by Day Labor.

Flat—3 story and base, brick. Cost
not stated. Hayward, Alameda Co.,
Cal. Architects, Haar & Davis. Union
Savings Bank Bldg., Oakland. Owner,
Mrs. Blackwood. The building has
been designed for stores on the first
floor and two flats of four and five
rooms each on the upper floor. The in-
terior finish will be of pine and red-
wood. There will be open fire places.
The exterior of the building will be
faced with pressed brick. The plans
are complete and figures are being
taken.

Bungalow—1 story and base, frame,
\$2,500. Oakland, Cal. Architect, none.
Owner, J. T. Hinch, 1294 Broadway,
Oakland. The dwelling has been de-
signed for a five-room house with
bath. The interior trim will be of
pine throughout. There will be open
fire places and tile mantels. The ex-
terior of the building will be covered
with rustic. The plans are complete
and the work will be done by Day
Labor.

Residence—2 story and base, frame,
\$5,000. Oakland, Cal. Architect, R.
P. Morrell, Yosemite Theatre Bldg.,
Stockton. Owner, P. L. Holt, 530 West
Poplar St., Stockton. The dwelling has
been designed for a 9-room house with
baths. The interior trim will be of
pine with some hardwood floors. There
will be a hot water heating system.
There will be open fire places. The
mantels will be of brick. Tile will be
used in the bath and kitchen. The
exterior of the house will be covered
with cement plaster on metal lath.
The plans are being prepared.

Residence—2 story and base, frame,
\$1,500. Oakland, Cal. Architect, A. W.
Smith, 1004 Broadway, Oakland. Own-
er, N. A. Truebeck. The dwelling has
been designed for an eight-room
house with baths. The interior trim
will be of pine and redwood with some
hardwood floors. There will be open
fire places and furnace heat. The
mantels will be of brick or tile. Tile
will also be used in the bath and
kitchen. The exterior of the house will
be covered with cement plaster on
metal lath. The plans are complete

and the work will be done by Day
Labor.

Residences—1, 2 story and base,
frame, \$3,500 each. Oakland, Cal.
Architect, Theodore Penn, 749 61st St.,
Oakland. Owner's name withheld.
The dwellings will each contain seven
rooms and bath. The interior finish
will be of pine. There will be hard-
wood floors in the principal rooms.
There will be open fire places and tile
or brick mantels. The exteriors will
be covered with cement plaster on
metal lath and shingles. The plans are
complete and the work will be done
by Day Labor.

Bungalow—1 story and base, frame,
\$2,500. San Leandro, Alameda Co.,
Cal. Architect, R. A. Hutchison, 479
13th St., Oakland. Owner's name with-
held. The building will contain six
rooms and bath. The interior trim
will be of pine and there will be some
hardwood floors. There will be open
fire places and the mantels. The ex-
terior of the house will be covered with
shingles. The plans are being
prepared.

Residence—2 story and base, frame,
\$4,000. Haywards, Alameda Co., Cal.
Architect, L. P. Hyde, 2715 26th St.,
Oakland. Owner's name withheld.
The dwelling will contain in the
neighborhood of eight rooms and
bath. The interior finish will be of
pine and redwood with some hard-
wood floors. There will be open fire
places and furnace heat. The man-
tels will be of brick. Tile will be used
in the bath and kitchen. The exterior
of the dwelling will be covered with
shingles. The plans are complete and
figures are being taken.

Street Work—Sewers and culverts.
Cost not stated. Oakland, Cal. City
Engineer, City Hall Annex, Oakland.
Owners, City of Oakland. Bids for
several important jobs of street work
sewers and culverts will be opened on
April 1st. For additional information
see under Sealed Proposals in this
issue or address the City Engineer.

Residence—2 story and base, frame,
\$3,000. Oakland, Cal. Architect, J.
Carson, Bacon Bldg., Oakland. Own-
er, E. J. Lloyd. The dwelling has
been designed for a seven room house
with bath. There will be pine and
redwood interior trim, open fire places
and furnace heat. The mantels will
be of brick. There will be some hard-
wood floors. The exterior of the
house will be covered with cement
plaster on metal lath. The plans are
complete and the work will be done
by Day Labor.

Residence—1 story and base, frame,
\$2,000. Berkeley, Alameda Co., Cal.
Architect, C. K. Morrison, 443 52nd
St., Oakland. Owner, Harry Roberts.
The dwelling will contain five rooms
and bath. The interior trim will be
of pine. There will be open fire
places and brick mantels. The exterior
of the bungalow will be covered
with shingles. The plans are com-
plete and the work will be done by
Day Labor.

Store Alterations—2 story and base,
brick, \$10,000. Oakland, Cal. Archi-
tect, Walter Matthews, 969 Broadway,
Oakland. Owners, M. K. Blake Es-
tate. The work will consist of the
complete rearrangement of the inter-
ior of the building as well as exten-
sive outside alterations. There will be
new electric work, plumbing, plaster-
ing and pressed brick facing. The
plans are complete and the work will
be done by Day Labor.

Residence—2 story and base, frame, \$10,000. Oakland, Cal. Architect, Charles Man, Macedonia Bldg., Oakland. Owner, J. F. Hink. The dwelling has been designed for a 3 room house with baths. The interior finish will be of pine with hardwood floors and some oak panels. There will be furnace heat and open fire places. The mantels will be of tile or brick. The tile will be used in the baths. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$9,000. Oakland, Cal. Architect, J. Cathel Newsom, Monadnock Bldg., S. F. Owner Mrs. Olive M. Gross. The dwelling will contain 9 rooms and bath. The interior finish will be of pine and the exterior with hardwood floors throughout. There will be furnace heat and open fire places. Tile will be used in the baths and kitchen. The exterior will be covered with shakes. The plans are nearly ready for figures.

Lodge Building—4 story and base, brick and steel. Cost not stated. Oakland, Cal. Architect, F. D. Voorhes, Central Bank Bldg., Oakland. Owners, Woodmen of the World. The building will contain several stores on the first floor, offices of the order and lodge rooms above. There will be steam heat and elevator service. The interior will be handsomely finished in pine and hardwood. The exterior of the building will be faced with pressed brick. The plans are complete and figures will be taken in two weeks.

Contracts Awarded.

Apartment House—3 story and base, brick, \$60,000. Fresno, Fresno Co., Cal. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, Herman Erix. The building has been mentioned here before when the plans were first being prepared. The building will contain 68 apartments of two three and four rooms each and bath. There will be steam heat, elevator service and wall beds. The exterior of the building will be faced with pressed brick. The plans provide for two additional stories. The plans are complete and figures are being taken.

LOS ANGELES AND SOUTHERN CALIFORNIA.

Apartment House—2 story and base, brick. Cost not stated. Redondo, Los Angeles Co., Cal. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owner, C. H. Hays. The building will be 25x70 feet. There will be stores on the first floor and a number of apartments on the upper floor. The interior trim will be of pine. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Church—2 story and base, brick, \$30,000. Los Angeles, Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Roman Catholic Church. This work has been mentioned here before. The building will be 41x110 feet. There will be steam heat. The exterior will be faced with pressed brick. The plans are complete and figures are being taken.

Association Building—2 and 3 story and base, brick, \$60,000. San Bernardino, San Bernardino Co., Cal. Architect, Elmore H. Jeffery, Citizens National Bank Bldg., L. A. Owners, Young Men's Christian Association. The architect has completed the working drawings and the same are now in the hands of the Building Committee for approval. As soon as this is given bids will be called. The building will cover an area of 74x125 feet. There will be steam heat. The exterior will be faced with cement plaster and trimmed with pressed brick.

Hospital—2 story and base, brick. Cost not stated. Mogul, Ariz. Engineering Dept., Dept. of Indian Affairs, Washington, D. C. Owners, U. S. Gov. 65x33 feet, and containing a general ward, others, nurses' quarters and private rooms have been forwarded to the Indian Supply Depot in this city for figures. There will be a steam heating system and other modern conveniences. The exterior will be faced with pressed brick. For full information apply to Indian Supply Depot, 312 8th St., S. F. Bids will be opened in Washington, D. C. on April 22nd.

Postoffice—2 story and base, brick and steel. Cost not stated. Riverside, Riverside Co., Cal. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. The building will contain the general public rooms and offices. There will be steam heat. The construction will be practically fire proof. The bids will be opened on April 23rd.

Post Office Lighting Fixtures—Cost not stated. San Diego, Cal. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. The bids for furnishing and installing lighting fixtures in the buildings under construction at San Diego and Phoenix, Ariz. will be opened on April 2nd.

Residence—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Hudson & Munsell, Stimson Bldg., L. A. Owner, Mrs. Mary A. Bruns. The dwelling will be 79x26 feet and will contain 10 rooms and baths. The interior will be finished in white cedar, oak and pine. There will be furnace heat and open fire places. The exterior will be faced with pressed brick and cement plaster. A garage will be built in connection. The plans are now being prepared.

Apartment House—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Fernand Parmentier, Byrne Bldg., L. A. Owner, J. E. Murfoot. The building will be 81x125 feet. There will be 95 rooms divided into suites of two and three rooms with private baths. There will be steam heat, automatic elevator, wall beds and vacuum cleaning system. The exterior of the building will be faced with blue brick. The plans are complete and figures are being taken.

Hotel Additions—5 story, brick and

steel. Cost not stated. Los Angeles, Cal. Architects, Dennis & Farwell. Pay Bldg. L. A. Owner, Dr. S. G. Moore. The addition will be 52x32 feet. There will be 20 rooms and 9 baths. There will be steam heat, elevator and fire escapes. The exterior will be faced with pressed brick. The plans are complete and figures are being taken.

Hotel—3 story and base, brick and steel. Cost not stated. Riverside, Riverside Co., Cal. Architects, Krenpel & Erkes, Henne Bldg., L. A. Owner, Laura T. Reynolds. The building will be 68x100 feet. There will be 30 rooms and 18 baths in the two upper stories. The first floor will be given over to public rooms and the office. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Stores and Lofts—1 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Edelman & Burnett, Blanchard Bldg., L. A. Owners, Isaac Bros. The plans for this building, which has been mentioned here before, are being revised. The contract for the underpinning has been awarded to Richards-Neustadt Co., in order not to delay the excavating and the same firm may be awarded the general contract.

Fire House—2 story and base, brick. \$20,000. Los Angeles, Cal. Architect, J. J. Backus, Chief Building Inspector, City Hall. L. A. Owners, City of Los Angeles. The building will be 40x80 with a one-story annex 24x18. The exterior will be faced with blue pressed brick. The plans have been approved and bids will be called for at once.

Pier—Reinforced concrete. \$300,000. San Diego, Cal. City Engineer Chapp. San Diego, Owners, City of San Diego. Plans for the pier at the foot of D street have been completed and bids will be received up to April 19th for the construction. Bids will be opened on the same date for the construction of a \$50,000 dredger.

Apartment House—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, Mrs. Eliza J. Sanborn. The architects have just been commissioned to prepare plans for this work and no details of the construction have been settled as yet. The building will be modern in every particular. There will be in the neighborhood of 100 rooms with private baths, steam heat, elevator, wall beds and vacuum cleaning system. The exterior will probably be faced with pressed brick. Plans are being prepared.

Hotel and Store—3 story and base, brick. \$10,000. Los Angeles, Cal. Architect none named. Owner, S. C. Dodge, 686 So. Burlington Ave., L. A. The building will be 50x123 feet. There will be several stores on the first floor and 67 rooms and 10 baths above. There will be steam heat and hot and cold running water. The exterior will be faced with pressed brick. The plans are complete and the work will be done by Day Labor.

Hotel and Store—1 story and base, reinforced concrete. \$40,000. Long Beach, Los Angeles Co., Cal. Architect, Scott Alexander, O. T. Johnson Bldg., L. A. Owner, Scott Alexander. The building will be 50x90. There will be stores and a general lobby on the first floor and 45 rooms above. The Kahn

System will be used. The exterior of the building will be faced with cement plaster. The plans are complete and the work will be done by Day Labor.

Warehouse—3 story and base, brick. Cost not stated. San Luis Obispo, San Luis Obispo Co., Cal. Architects, Krenpel & Erkes, Henne Bldg., L. A. Owners, Channel Commercial Co. The building will be 80x100 feet. The construction will be of the heavy mill type with concrete first floor, fire doors, metal sash and wire glass. Conveyors will be installed. The plans are being prepared.

Factor—2 story and base, brick. Cost not stated. Architect, Clyde Cheney, Story Bldg., L. A. Owners, Eureka Dye Works. The building will be 25x50 feet. The plans are being prepared. The contract has been awarded to the Architectural Construction Co., Story Bldg., for two other buildings, one of frame construction and the other of brick for the same owners.

Bank and Offices—2 story and base, brick. Cost not stated. San Pedro, Los Angeles Co., Cal. Architects, Edelman & Burnett, Blanchard Bldg., L. A. Owners, State Bank of San Pedro. The revised plans for this building are now completed. The structure will be 50x75. The first floor will be used exclusively by the bank. There will be twelve modern offices on the upper floor. The exterior of the building will be faced with pressed brick. Plans will be out for figures shortly.

Hospital—2 story and base, brick and concrete. Cost not stated. Los Angeles, Cal. Architect, A. B. Benton, 114 North Spring St., L. A. Owners, University of Southern California. The building will be 102x40 feet. There will be a twelve-bed ward, six private rooms and two operating rooms. The exterior will be faced with pressed brick. The plans are complete and figures are being taken.

Contracts Awarded.

Apartment House—2 story and base, brick. \$20,000. Venice, Los Angeles Co., Cal. Architects, Garrett & Bixby, Carrier Bldg., L. A. Owner, Mrs. Willetta Ames. Contractors, May & Grimwood, Security Bldg., L. A. Contract price, \$20,000.

Bank and Offices—11 story and base, Class A construction. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owners, Van Nuys Building Co. Contracts as follows: Marble and tile to B. V. Collins, 928 So. Main St., L. A., \$22,500; ornamental iron and bronze to Winslow Bros. Co., Central Bldg., \$55,000; power plant to J. F. Conell at \$26,475; boilers to C. C. Moore & Co. at \$6,985; and elevator door control to H. C. Randall at \$6,600.

Department Store—10 story and base, Class A construction. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, associated

with Parkinson & Bergstrom, L. A. Owner, Hollenbeck. Contractors, Jewell Iron Works, L. A. structural steel. Contract price, \$125,000.

Garage—1 story and base, brick. \$12,000. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, Grover T. Garland. Contractor, Fred Brauer, 2025 Willard Ave., L. A. Contract price, \$12,000.

Greek Theatre—Reinforced concrete, \$20,000. Claremont, Los Angeles Co., Cal. Architect, Myron Hunt, Hibernian Bldg., L. A. Owners, Pomona College. Contractors, Richards-Neustadt Co., Wright and Callender Bldg., L. A. Contract price, \$20,000.

SEATTLE AND WASHINGTON.

Administration Building and Barn—2 story frame. Cost not stated. Tulalip, Wash. Architectural Dept. Office of Indian Affairs, Washington, D. C. Owners, U. S. Government. The plans for an office building and large dairy barn for the Tulalip Indian School are on file at the Indian Supply Depot, 312 8th St., S. E. Bids for the construction will be opened by the Commissioner of Indian Affairs on April 25th.

Stores and Lofts—2, 3 story and base, brick and steel. \$150,000. Seattle, Wash. Architects, Ebb & Mendel Denny Bldg., Seattle. Owner, George W. Fisher. The buildings will be identical in design and will each contain several stores on the first floor and lofts above. There will be a freight elevator and steam heat. The exteriors will be faced with pressed brick. The plans will be out for figures next week.

Offices, Etc.—5, reinforced concrete buildings, \$100,000. Spokane, Wash. Engineer, C. A. Watson, Sheldon Bldg., S. F. Owners, Standard Oil Co. The plans for a main office building, cooper shop, storage buildings and several tanks have been placed in the hands of J. C. Black of Spokane for figures. Bids will be opened at an early date.

Stores and Offices—6 story and base, Class A construction, \$300,000. Seattle, Wash. Architect, John Graham, Lyon Bldg., Seattle. Owner, Joshua Green. This work was mentioned here several times before. The plans have been filed with the building inspector and bids will be called for at once. The construction will be class A throughout. The exterior will be faced with pressed brick and terra cotta. There will be steam heat, elevators and metal trim.

Stores and Lofts—5 story and base, reinforced concrete, \$200,000. Seattle, Wash. Architects, Howells & Stokes, Henry Bldg., Seattle. Owners, Judson Building Co. The building will be 70x120 feet. There will be several stores on the first floor and the upper floors will be arranged for light manufacturing. There will be steam heat, elevators and metal trim. The architects have not decided whether to take figures for the general construction or let the work on the percentage basis.

Store and Offices—10 story and base, reinforced concrete, \$500,000. Seattle, Wash. Architects, Frank C. Allen Co., Seattle (Now Director of Works for the Panama-Pacific Exposition Co., San Diego). Owners, Washington Securities Co., Carey Bldg., Seattle. The announcement has just

Index to Advertisers

been made public that this company will commence the work on the first unit of what is to be a million dollar office building this spring. The first section to be started will be 10 stories in height and cover a ground area of 110x120 feet. J. W. Clise, Globe Bldg., Seattle, is the active head of the Washington Securities Co.

City Hall—3 story and base, brick, \$50,000. Newport, Wash. Architects, C. Lewis Wilson & Co., Northern Bank Bldg., Seattle. Owners, City of Newport. The building will be 22,336 feet. There will be steam heat and other modern conveniences. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

School—2 story and base, brick, \$25,000. Pasco, Wash. Architects, Van Dusen & Doughty, Pasco. Owners, City of Pasco. The plans for this building, which has been mentioned here before, will be complete by the 1st of April and bids will be called for at once. There will be eight class rooms. There will be steam heat and a modern system of ventilation. The exterior of the building will be faced with pressed brick.

City Hall Addition—1 story, steel and brick, \$10,000. Seattle, Wash. City Engineering Dept., Seattle. Owners, City of Seattle. The City Council has passed a resolution making the funds for this construction available. The new floor will be used as a dormitory for the nurses. The plans are complete and figures will be called for at once.

Contracts Awarded.

Power Station—4 story and base, reinforced concrete, \$30,000. Seattle, Wash. Engineers, Stone-Webster Co., Henry Bldg., Seattle. Owners, Seattle Electric Co., Contractors, Stone-Webster Co., Henry Bldg., Seattle. Contract price, \$30,000.

PORTLAND AND OREGON.

Job—5 story and base, steel and reinforced concrete. Cost not stated. Portland, Ore. Architects, Emil Schacht & Son, Portland. Owners, City of Portland. The building will be 75x95 feet. The construction will be fire proof throughout. There will be the court rooms, general police quarters, muster room, target range and 60 cells. The exterior will be faced with granite and pressed brick trimmed with terra cotta. There will be steam heat and elevators. The architects are preparing the plans.

Contracts Awarded.

Library—1 story and base, reinforced concrete, \$35,000. Portland, Ore. Architect, Ellis F. Lawrence, Portland. Owners, City of Portland. Contractor, A. W. Kutsche, Portland. Contract price, \$35,000.

MR. MATERIAL MAN:

It is mighty important to know when your goods are specified.

The L. A. Larsen Construction Reports will give you a synopsis of the specifications of all contracts let on the Coast.

They also tell you of new jobs that are being figured.

Send for free samples.

WINDOW SHADES

Cahill & Co., Jas., 408 12th, St., Oakland

MR. ARCHITECT:

You are keen for every improvement in the building line. You want to save money for your client and give him the best.

You want to protect him from damage suits.

In window construction you can save him money by specifying the Simplex, because it is cheaper than the common double hung.

No damage suits from window cleaners, because the Simplex is reversible.

The common double hung is out date.

The Simplex is manufactured in 49 different varieties.

Send for details.

Simplex Window Co., 62 Post St.

REMOVAL NOTICE.

J. W. BURCHAEILL, dealer in Gas and Electrical Fixtures, has removed to 357 Ellis Street, between Taylor and Jones Streets.

REMOVAL NOTICE.

THE LENSING ENGINEERING CO. have moved their offices to 171-173 Minna Street.

Reversible Windows

Without Weights and Cords

Inside View

This window performs all the functions of a double hung window. Perfect ventilation. Each sash works independently. No rattle. Wind and rain proof. Does not interfere with curtains or shades; Reverses perfectly. Send for details and price list.

Here you have a double casement, where each sash is reversible. Can be worked as a single casement just as easily. This is the only single casement with reversible sash.

Editorial Comment.

The new lien law has been declared unconstitutional by Judge Graham. The case is reported in the news columns of today's "Builder." As this is not a decision of a court of last resort it will not bind any other court. Every judge will be at liberty to review the case and decide any case arising under the new law on a similar state of facts or any other state of facts according to his own interpretation.

The trouble with the decisions in the superior courts of San Francisco is that matters are too often decided off hand without mature consideration. The amount of work to be done by the courts necessitates them staying awake every night looking up the law of the several cases before them or being liable to be misled by counsel. The Judge therefore has to rely upon his general knowledge of the law and its application to a particular case and oftentimes decisions are made which would not be made after mature deliberation.

Section 1153 of the Code of Civil Procedure is exceedingly complicated. In it a guarantee to the owner was sought to be inserted by the friends of the old law which is hybrid clause, ambiguous and unsatisfactory to all concerned. It purports to give a bond in not less than 50 per cent of the contract price which shall protect the owner against lien claimants and inure to the benefit of the lien claimants and limit the amount of the recovery to the amount of the bond.

As was expected this bond proposition was brought up and served to complicate the case. The late Mr. Alex. G. Ellis had repeatedly and often advised against the use of this bond but people have become so used to the old method of proceeding that they did not comprehend the new law nor could they see where the owner had any protection outside of the 50 per cent bond.

The facts of the case are these. It is the intent of the new law to make the liens direct liens on the property and the person furnishing labor or material can follow his claim into the building in spite of any agreement whatever between owner and contractor. To protect himself the owner can exact any kind of a bond he chooses. A surety company or any kind of personal sureties that are acceptable can guarantee the performance of the contract according to its terms. A general contractor, or any one else, can secure the same kind of protection. Builders and architects should secure

the simple commercial guarantee or common law bond with sureties to protect the owner. Then the procedure is simple. The owner pays the liens if any attach, and then recovers from the contractor and sureties the amount and costs, just as he would on a promissory note.

The 50 per cent bond is a supplemental security and as Mr. Ellis suggested we believe it will be productive of a good deal of trouble and complication.

The present case will no doubt be carried to the supreme court. Mr. Jacobs, the attorney for the California Building Law Association entertains no doubt of his ability of having the present law sustained in its entirety.

For that matter the present case held that the law allowing a material man to follow his materials into a building where there were no contractual relations between himself and the owner was invalid. The contrary has been directly held in all the sister states of the west where a direct lien law is in operation. Meanwhile builders and material men will proceed just as they have before with the assurance that the law is constitutional.

The primary election in New York seems to have been a poser. Wall Street is certainly against Teddy to a man and it money and Tammany Hall methods can effect it there will be no question but Taft will be the nominee for president. In the meantime the reactionary press is shouting from the house-tops that New York has hopelessly defeated Roosevelt taking no account of the number of votes cast and paying no regard to the facts of the case or the methods of election. In any event whatever be the result of the primary election there will be a reckoning in November and it is altogether probable that the next president will be either a progressive republican or a progressive democrat.

The San Francisco Examiner has started out to beautify the town by offering prizes for the best gardens and yards to be developed in the next year or two. This is a good idea and ought to be productive of a good deal of improvement. For the person who enters the contest can not lose. If he does not get a prize he at least has beautified his home, has a smiling garden to greet him, the bright hues of flowers and the soothing green of the grass that is a thing of beauty and a joy forever.

"Never," says a Kansas man, "put off till tomorrow what you can put over today."

Advantages and Limitations Of Reinforced Concrete.

Principles That Govern Its Relation to the Problems of Architectural Design.

By Peter Gillespie, B. A. Sc.

It is very doubtful if any industry of modern times has shown a growth comparable with that of Portland cement. Twenty years ago the aggregate annual production of this material in the United States was half a million barrels; today the estimated yearly output is seventy-five million barrels. In Canada, twenty years ago, the production of Portland cement began in a small mill owned by the Rathbun interests at Marlbank, Ont. Today the output in this country is between four and five million barrels, and the industry is just beginning.

Reinforced concrete, by which is meant a combination of concrete and steel in suitable proportions, has proved to be the most important engineering development of the present generation. The structures built of it aggregate millions of dollars in value, and include buildings for every possible purpose. The building entirely of reinforced concrete and the reinforced concrete skeleton with walls, partitions, and floors of brick and terra cotta, or with a veneer of the or stone masonry, are types which are now found in almost every American city.

Engineers have not failed to recognize that reinforced concrete has its limitations as well as its advantages. In buildings where ordinarily steel framing might be used, reinforced concrete proves itself an economical material. For residential buildings and structures of one story, its use is generally of doubtful economy. For isolated roof trusses or girders, high above the ground, the cost of erection is prohibitive in competition with steel. Frequently, the brick curtain wall in structures of the factory or warehouse type, where columns, roof, and floor system are of concrete, is preferred. There has been a marked tendency toward this type, and this is due, partly to the desire for a less monotonous appearance, partly to economy, especially where building regulations are exacting in their requirements as to reinforced concrete in addition to which the form work will always be an expensive item, and partly to the comparative ease with which the brick wall can be removed in case lateral extensions at some future time are required. The load of weight in other types of construction will make reinforced concrete an impossibility. A few years ago, the engineering profession and press were much concerned over the boldness of a proposal to construct a 700-foot Hudson Memorial Arch in New York City. No one as yet has had the temerity to suggest reinforced concrete for the new transcontinental bridge over the St. Lawrence River at Quebec.

The question of upkeep should not be lost sight of. It is generally conceded that reinforced concrete improves with age, and does not, like steel or wood, deteriorate through exposure to the elements. It does not require painting, and its fire-resisting properties, like those of its rival, terra cotta, are pretty generally con-

ceded. For certain factory buildings, where heavy machinery has to be placed on upper floors, the rigidity and freedom from vibration possessed by a properly constructed reinforced concrete building are very desirable.

If some inventive investigator were to evolve, at a moderate cost, a constructive material possessing the lightness of timber, the strength and rigidity of steel, the color variety of brick, and the weathering properties of bronze, it would not require a prophet to predict that radical changes in constructive design would sooner or later follow its appearance. Such a substance would possess qualities so different from those of any single material at present known to constructive art, that its applications, and its method of architectural treatment, would be radical departures from the traditional paths. It would find uses never dreamed of as suitable for its predecessors; the elements of structures made of it would be dimensioned according to entirely new rules; and the canons of decoration and embellishment would be very radically revised. It would at first be put by enthusiasts to uses for which it was not adapted, for, although possessing a capacity for service without precedent, it would not follow that it must lend itself satisfactorily to the construction, say, of mirrors or floor coverings. It would also be put to legitimate uses, but in ways out of keeping with its resisting powers, and failure would sometimes follow; and with some, it would be considered a discredited material. Its method of architectural treatment would probably follow at first that of the old materials which it was destined to replace, and illogical designs and offensive imitations would result. But time and experience would eventually eliminate defects, and a logical style would ensue. Such changes, however, are always of slow accomplishment.

The Revolutionists at France in their desire to free themselves from the thralldom of despotic kingship, drafted in a day a constitution which they expected would last a century. Tom Paine, in one of his boastful moments, once said that he could write in a month a better Bible than that which had consumed sixteen centuries in the making. The signal failure of both endeavors affords an exemplification of the truth that those institutions and traditions which are most esteemed, and which are most stable, are the results of slow growth and gradual evolution. So it is with architectural style. For centuries, architects and craftsmen have designed for and built in traditional materials—stone and brick and timber—and, for a shorter time, in steel; systems on construction architecturally and structurally in keeping with these materials, have been evolved, and these have the sanction of age and the approval of custom. Within the present generation, as stated above, reinforced concrete has entered the field. This is

a material which, because of its many undisputed advantages and the increasing cost of the materials which it is gradually replacing, is destined to find a place of growing importance in the architecture of future generations, but the place will not be quickly won. In some respects, too, its position today is analogous to that of our hypothetical material. The methods by which it is made, and its mechanical properties when made, render it in many ways a new material. Its internal cohesion and its ability to resist water percolation, make it desirable for foundations, dams, retaining walls, canal construction, and the sub-structures of hydro-electric developments. Its ability to resist bending stresses, when adequately reinforced, renders it particularly useful for horizontal spanning. These advantages were soon recognized; and the success attending its use in a purely commercial or utilitarian way, has been undoubted. Needless to say, some disturbance of our cherished notions regarding the proportion of parts has ensued; and some of us have been led to suspect that perhaps, in the past, the arbitrary rule has been accorded too much reverence, and that there may not be any one set of proportions which, apart from association and training, is inherently more pleasing or beautiful than another. The Goddess of Beauty, as conceived by the native African, would be, as Sir Joshua Reynolds asserts, a negress with the tribal features augmented and emphasized.

But it is where attempts have been made to treat the form and surface of this material in order to attain a pleasing and enriched exterior, that the results have been particularly disappointing. What are the outstanding qualities of reinforced concrete? What are those things which must guide us in the co-ordination of quality and material and architectural treatment? They are two in number: In the first place, reinforced concrete is a moulded material, and in the second, its masonry is monolithic and continuous, not jointed. Ornament, if of the mass, will be an integral part of it and must grow out of it. It should not, as in the case of brick or stone masonry, consist of added units of the same material. Hence, mouldings and cornices not suggestive of masonry, are quite permissible, but brackets for the support of such cantilevered projections are inconsistent with its mechanical properties. The reinforced concrete arch is as truly an arch as its historic masonry namesake, inasmuch as it exerts upon its supports a horizontal thrust. The fact that it is capable of sustaining bending stresses—is in fact identical with a curved beam—does not invalidate the statement. But it knows no voussoirs with separating radial joints; and these should not be employed as a means to a deceptive effect. If monolithic and jointed masonry be thought of as having changed places in history it might be conceived that

masons, following their introduction to the new material, would be as diligent in concealing mortar joints in ashlar and range work as some of us of recent years have been in announcing them. "The day is coming when everyone will know that that single limitation, adoption of material" is the philosopher's stone for architecture," the builder usually fails to recognize that the thing imitated has been successful because it follows this most important law, one indeed which he transgresses in the copying. The column is primarily for sustaining vertical loads. As such, the widened base and cap suggest, respectively, stability and the capacity for receiving weight; but the individual elements, base and shaft do not exist in the monolithic column. Similarly, the arch and its abutments are one; and it is inadvisable that the design should suggest an individuality in these elements except in so far as is required by considerations of stability when individuality does not exist.

A modern steel office building of twenty stories, clad with its shell of protective masonry and without external embellishment of any kind, would be a public outrage. But the architect with his pilasters and his arches and his cornices, gives to his unpromising parallelepiped a certain attractiveness of form, suggestive possibly of something else, which satisfies the eye although it does not mislead the understanding. The effect is suggestive of what might be attained if the walls were what they pretended to be, and no one essays to condemn a fiction that modern conditions have rendered a necessary means to an end. Similarly, the stucco finish, applied to cement blocks or metal lath, is suggestive of what concrete would look like if the wall were in reality what it appears to be, one of monolithic concrete. In Europe, the almost universal method of securing decorative effect in concrete work, is by this means, and European builders have attained a skill in its use scarcely known on this side of the Atlantic. Where stucco is used, the lintel and the keystone and whatever else is essentially of other materials, should be suppressed. If wood be employed for eaves of cornices, or tiles for roofing or ornamentation of broad expanses of wall, or bricks for pillars, these materials should be acknowledged, not disguised. The stucco method is a treatment of "concrete as concrete."

As stated previously, the architectural treatment of reinforced concrete, if of that material, should be of the moulded type. For this purpose hollow forms are required, and anything in the way of elaborate design in such necessities of labor and expense in the form making, it follows that for commercial reasons, such enrichment will generally be quite simple. Other methods must be sought. The monotony of the blank wall must be relieved; and the use of brick and tile. In geometrical or conventional design, for this purpose, has been attended with must success, and offers an attractive field for the enthusiast to exploit. If stucco is applied to the monolithic concrete wall, it is advisable that the wall be cast in the rough, so that the stucco may adhere the better. To give a touch of "life" to the surface, the use of the brush hammer is quite ef-

fective. This was adopted with gratifying success in the case of the Connecticut Avenue bridge at Washington D. C., and on the Walnut Lane bridge at Philadelphia, Pa. The texture of the moulded wall can be improved in various other ways. If the work is of such a character that forms may be removed in 24 hours, that is, before the final finishing has progressed very far, a surface of uniform texture and color can be obtained by rubbing with wooden floats and water only, no cement being used. This can be done by unskilled labor. Another method of treating the surface is by scrubbing it preferably when still green, with wire brushes. This will remove the outer skin of sand and cement, and will expose the underlying aggregate, the effect being to give a life-like texture to the otherwise smooth surface. This process can be rendered somewhat more expeditious by the use of dilute hydrochloric acid, provided the concrete is green. For vertical surfaces, well hardened, the difficulties attending its application are so serious that some process of mechanical chipping or bush-hammering is more economical and much quicker. The use of a carborundum block or emery stone with water is an effective though somewhat expensive method of exposing the aggregates in cross-section. Needless to say, the finished surface is much smoother than by the other process described. Best results from this method are obtained when the aggregates are of the softer kinds and are selected with a view to securing pleasing variety and color still

another method of improving surface texture is by means of the sand blast. This consists of impinging, by means of compressed air, a sharp silicious sand against the surface to be treated. The outer skin and adhering sand and cement are removed, and the underlying aggregates exposed in a manner similar to that in which the brushing of cold washes are employed. Mr. Richard L. Humphrey, in an address before the Concrete Institute in London some months ago, stated that one discovery made on his recent trip abroad was that concrete could be polished as successfully as marble. This led him to remark that he felt that there was for artificial stone to be used for ornamental purposes, a most encouraging future.

In conclusion let it be said that reinforced concrete like all other materials of construction, has many limitations. While almost ideal for certain situations and types of construction, it is quite impossible for others. Structurally and aesthetically, its best service is secured often when in combination with other materials. While, in the past, efforts to secure results architecturally have not usually been successful, this has generally been traceable to the much-to-be-expected influence of traditional methods of treatment belonging properly to older and different materials. A logical style is undoubtedly on the eve of development, the dominating principle of which must be the harmonization of treatment with the function and characteristics of the material employed.—C. H. Johnston.

Firms dealing news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES

San Francisco—Apartment house, 3 story and base frame, \$17,000. Architect, Frederick H. Meyer, Humboldt Bank Bldg., S. F. Owner, A. F. Peterson. The building has been mentioned here before when the plans were being prepared. The building will be on corner upper Market street and will contain a number of two and three room apartments. There will be a central heating system, wall beds and other improvements. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and bids are being taken.

San Francisco—Apartment house, 4 story and base, frame, \$10,000. Architect, C. O. Clauson, Phelan Bldg., S. F. Owner, Louis B. Stoll. The building will be 25x75 feet and has been designed for six small apartments of two and three rooms each. There will be wall beds. The interior finish will be of pine. The exterior will be covered with brick veneer and shingle. The plans are complete and the work will be done by Day Labor.

San Francisco—Apartment house, 3 story and base, brick and steel, \$100,000. Architects, Frye & Schastey, Monadnock Bldg., S. F. Owner's name withheld. The building will be 90x127 feet. The interior is to be arranged for large suites of seven, eight and nine rooms with two baths. There will be a complete steel frame and exterior walls faced with pressed brick and

terra cotta. There will be steam heat, wall beds, vacuum cleaning plant and elevators. The interior will be handsomely finished in hardwoods. The working drawings are now being prepared and figures will be called for shortly.

San Francisco—Apartment house, 5 story and base, brick and steel, \$70,000. Architect, C. H. Barris, 281 Bush St., S. F. Owners, Mrs. L. and Mr. Loring Fickelton. The building will contain in the neighborhood of 120 rooms arranged in suites of from two to four rooms each with private baths and dressing rooms. There will be steam heat, elevator service and wall beds. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

San Francisco—Apartment house, 2 story and base, frame, \$10,000. Architects, C. M. and A. F. Rouseman, Monadnock Bldg., S. F. Owner's name withheld. The building will contain six apartments of three and four rooms each and bath. The interior will be finished in pine and hardwoods. There will be a central heating system and wall beds. The exterior will be covered with cement plaster on metal lath. The plans are being prepared.

San Francisco—Apartment house, 3 story and base frame, \$25,000. Architects, Welch & Carey, Western Metropolitan Bldg., S. F. Owner, Joseph Abrams. The building has been designed to contain 36 rooms which will

be arranged in suites of two and three rooms each and bath. There will be a central heating system and wall beds. The exterior will be covered with cement plaster and brick veneer. The plans are complete and figures will be taken at once.

Stockton, San Joaquin Co., Cal.—Apartment house, 2 story and base, frame, \$10,000. Architect, A. L. Phillips. Hotel Stockton, Stockton. Owner's name withheld. The building will contain eight apartments. The interior finish will be of pine throughout. There will be gas grates and a vacuum cleaning system. The exterior of the building will be covered with cement plaster on metal lath. The architect is now preparing the plans.

Pasadena, Los Angeles Co., Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, Thomas Preston, American Bank Bldg., Pasadena. Owner, Mrs. Caldwell. The building will be 60x110 feet and will have 15 apartments of two and three rooms each with bath. There will be furnace heat and wall beds. The exterior of the building will be covered with shingles. The plans are complete and figures are being taken.

Santa Monica, Los Angeles Co., Cal.—Apartment house, 4 story and base, frame. Cost not stated. Architect, Frank T. Kewley, Jr., Consolidated Realty Bldg., L. A. Owner, W. R. Porter. The building will contain about 64 rooms arranged in two and three room suites with connecting baths. There will be steam heat and wall beds. The interior will be finished in pine and redwood. The exterior of the building will be covered with shiplap and brick veneer. The plans are being prepared.

Los Angeles, Cal.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architect, Frank M. Tyler, Higgins Bldg., L. A. Owner, Paul Riley. The building will contain a main lobby and amusement room on the first floor and 87 rooms arranged in 38 suites of two and three rooms on the upper floors. There will be private baths, steam heat, wall beds and elevator service. The exterior of the building will be faced with enamel brick trimmed with terra cotta. The plans are being prepared.

Los Angeles, Cal.—Apartment house, 2 story and base, brick, \$10,000. Architect none. Owner, Clinton Campbell, Union Oil Bldg., L. A. The building will be 50x115 feet. There will be 80 rooms arranged in two and three room suites with connecting baths. There will be wall beds and steam heat. The interior will be hand-scrubbed finished in pine and hardwoods. The exterior of the building will be faced with pressed brick. The owner is a well known builder and will do the work by Day Labor.

Contract Awarded.

Fresno, Fresno Co., Cal.—Apartment house and stores, 2 story and base, brick, \$10,000. Architects, Starbuck and Clark, Fresno. Owner, L. C. Cory, Contractor, A. Allen. Fresno. Contract price \$9,000.

BANKS.

Santa Barbara, Santa Barbara Co., Cal.—Bank and offices, 2 story and base, brick and steel, \$75,000. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, First National Bank of

Santa Barbara. The building will be designed in the monumental style. The exterior will be of light colored granite. The upper floor will contain fifteen modern offices. The interior of the banking rooms will be finished in marble, tile and hardwoods with ornamental bronze. There will be a concrete and steel vault. The architects are now preparing the working drawings.

Claremont, Los Angeles Co., Cal.—Bank, 1 story and base, brick. Cost not stated. Architect, Robert H. Orr, State Bank Bldg., Pomona. Owners, American National Bank of Claremont. The building will be 20x28 feet and has been designed for the exclusive use of the banking institution. The interior will be finished in hardwoods and marble. There will be fire proof vaults. The exterior will be faced with pressed brick. The plans are being prepared.

Bend, Ore.—Bank and offices, 2 story and base, brick and stone, \$25,000. Architects, Beezer Brothers, Northern Bank and Trust Bldg., Seattle. Owners, First National Bank of Bend. The building will contain the banking rooms only on the first floor and a number of modern offices on the upper floors. There will be a central heating system. The interior will be finished in hardwoods, marble and tile. The exterior will be faced with stone and pressed brick. The plans are being prepared.

BRIDGES, DAMS AND HARBOR WORK.

San Francisco, Cal.—Harbor work, paving blocks, locomotive, locomotive crane and removing rock. Cost not stated. Assistant State Engineer, S. E. Ferry Bldg., S. F. Owners, State of California. The State Harbor Commissioners will open bids on April 14th for the above mentioned work. There is to be 15,000 basalt paving blocks, steam locomotive of the saddle tank type, 20 ton crane and the rock work will include the drilling and blasting out of submerged rock under Pier No. 26. Plans and specifications can be secured from the Assistant State Engineer's office in the Ferry Bldg., S. F. For official proposals see this issue.

Fresno, Fresno Co., Cal.—Bridge, reinforced concrete type. Cost not stated. Engineer, County Surveyor, Fresno. Owners, Fresno County. Plans have been completed for a reinforced concrete bridge of the I beam type with an overall length of 10 feet and 9 inches. The plans are on file in the office of the County Clerk and bids will be opened by the Board of Supervisors on April 14th. For full information address the County Surveyor.

Portland, Ore.—Bridge steel and concrete, \$1,000,000. Engineer not selected. Owners, Cities of Portland and Vancouver, Wash. A committee has been appointed by the two cities to confer on the selection of an engineer to prepare preliminary plans for this work. The bridge will span the Columbia at this point. Details of the work will be given later.

Bremerton, Wash.—Sea wall and wharf. Rock and concrete construction \$115,000. City Engineer, Bremerton. Owners, City of Bremerton. The City Engineer has been commissioned to prepare plans for a rock sea wall costing \$100,000 for a municipal wharf to cost \$15,000. Working drawings are under way.

Lincoln Co., Ore.—Bridges, 2—steel

and concrete. Cost not stated. Engineers, Lucas-Newcomb Engineering Co., Portland, Owners, Lincoln County. The engineers are completing plans for two bridges, each with a main span of 180 feet. The approaches will be built on pile foundations. The plans will be complete and ready for figures on April 15.

Los Angeles, Cal.—Bridge, reinforced concrete. Cost not stated. Engineer County Surveyor, Ivory P. Noble, L. A. Owners, Los Angeles County. The bridge will consist of five spans of 42 feet each and two spans of 21 feet. There will be concrete abutments and concrete retaining walls. The plans are complete and figures will be called for shortly.

CHURCHES.

San Francisco, Cal.—Church, Class A construction, \$250,000. Architects, Bliss & Faville, Balboa Bldg., S. F. Owners, First Congregational Church. The building has as yet only reached the proposed stage. A fund of \$50,000 has been raised and tentative plans have been submitted by the architects. The tentative plans provide for an edifice absolutely fire proof, and with an auditorium seating 2,000 people. The details of the work have not been gone into and further information will be given as the plans progress.

Los Angeles, Cal.—Church brick and stone. Cost not stated. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Roman Catholic Church. This building has been mentioned here before when the plans were first being prepared. The architect is now taking figures for the stone work and will give the plans for the balance of the work complete and out for figures this week.

Everett, Wash.—Church, 1½ story and base, brick and stone. Cost not stated. Architect, Ellsworth Street, New York Bldg., Seattle. Owners, Trinity Episcopal Church of Everett. The edifice will be 50x120 feet. There will be a parish house built in connection. The building will be heated by steam. The interior will be handsomely finished in redwood. The exterior will be faced with stone. The plans will be complete and ready for figures in the course of the next two weeks.

COURT HOUSES.

Seattle, Wash.—Court house and offices, 20 story and base. Class A construction. Cost not stated. Architects, Josephians and Allen, Hinckley Block, Seattle. Owners, a private corporation. The architects have prepared sketches, at the request of the owners for a proposed building which is to be erected on a whole city block. The plan of the promoters is to furnish the county with free office space on from four to five stories and devote the balance of the building to offices. There has been no action taken in regard to the matter by the county.

FACTORIES & WAREHOUSES.

Stockton, San Joaquin Co., Cal.—Stable, 1 story and base, frame, \$3,000. Architect, R. P. Morell, Yosemite Theater Bldg. Stockton. Owners, Murphy Ice Co. The building will have a concrete foundation and walls covered with corrugated iron. The plans are

complete and figures are being taken.

Stockton, San Joaquin Co., Cal.—Stable, 1 story and base, brick, \$5,000. Architect, R. T. Morrell, Yosemite Theatre Bldg., Stockton. Owners, Stockton Ice Co. The building will be 8x120 feet. There will be accommodations for a large number of horses and storage space for hay and grain. The exterior of the building will be faced with stock brick. The architect is preparing the plans.

Sumner Wash.—Factory, 1 story and base, reinforced concrete, \$100,000. Architect John Graham, Layon Bldg., Seattle. Owners, Fleischman & Co. The announcement has just been made of the selection of Mr. Graham as the supervising architect for this work. Word has been received from the company's New York office that all matters will be in readiness to start the work by the first of the week. Mr. Graham will take all figures and supervise the construction.

Contracts Awarded.

Los Angeles, Cal.—Warehouse, 7 story and base, reinforced concrete, \$50,000. Architect, none. Owners, Marion R. Gray Co. Contractor, Hugo Eckardt, Wilcox Bldg., L. A. Contract price, \$50,000.

Los Angeles, Cal.—Warehouse, 5 story and base, reinforced concrete, \$54,000. Architect A. C. Martin, Higgins Bldg., L. A. Owners C. C. Colyar, Contractor, Carl Leonard, H. W. Hellman Bldg., L. A. Contract price, \$54,000.

FLATS.

San Francisco—Flats, 3 story and base, frame, \$4,000. Architect, none. Owner, G. Rogers, 756 Mission St., S. F. The building will contain three small flats of four and five rooms each with baths. The interior finish will be of pine throughout. There will be gas grates. The exterior of the building will be covered with shiplap and rustic. The plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Flats, 2 story, attic and base, frame, \$5,000. Architect, Henry Sherman, Mills Bldg., S. F. Owner, Charles Mayer. The building has been arranged for one flat of five rooms on the first floor and a large nine room flat on the upper floor and attic. There will be a garage in the basement. The interior will be finished in pine and redwood with some hardwood floors. There will be open fireplaces. The exterior of the building will be covered with shiplap and brick veneer. The plans are complete and figures are being taken.

San Francisco—Flats, 3 story and base, frame, \$4,000. Architect, none. Owner, M. P. Ryan, S. F. The building will be 25x36 feet and will contain three flats of five and six rooms each with baths. The interior finish will be of pine throughout. There will be gas grates. The exterior will be covered with rustic and shiplap. The plans are complete and the work will be done by Day Labor.

San Francisco—Flats, 2 story and base, frame, \$2,500. Architect, none. Owner, Ernest S. Burkhardt, 567 Excelsior St., S. F. The building will contain two flats of five and six rooms each with bath. There will be pine trim throughout. The exterior will be covered with shiplap and rustic. The plans are in the hands of the owner and the

work will be done by Day Labor.

San Francisco—Flats, 2 story, attic and base, frame, \$6,000. Architect, none. Owner, E. B. Hallett, 1259 12th Ave., S. F. The building has been designed for two large flats of six rooms and bath each. The interior trim will be of pine and redwood with some hardwood floors. There will be open fire places and brick mantels. The exterior will be covered with brick veneer and cement plaster on metal lath. The plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Flats, 3 story and base, frame, \$1,500. Architect, none. Owner, Louis Cunco, 650 Capp St., S. F. The building will contain three modern five and six room flats. The interior trim will be of pine. There will be open fire places. The exterior will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

San Francisco—Flats, 3 story and base, frame, \$6,000. Architect, A. J. Barnett, 555 California St., S. F. Owner, Joseph Sullivan. The building will be 20x81 feet. There will be six small flats of four and five rooms each and bath. The interior will be finished in pine. There will be gas grates. The exterior will be covered with shiplap. The plans are complete and in the hands of the owner and the work will be done by Day Labor.

San Francisco—Flats, 2 story and base, frame, \$5,000. Architect, David Seidich, Clunie Bldg., S. F. Owner, Charles Eds. The building will be 41x32 feet. There will be six flats of five rooms each. The interior trim will be of pine and redwood. There will be open fire places. The exterior will be covered with cement plaster on metal lath. The plans are being prepared and working drawings will be ready for figures shortly.

GARAGES.

Whittier, Los Angeles Co., Cal.—Garage, 1 story and base, brick. Cost not stated. Architect, A. L. Volk, Story Bldg., L. A. Owner, Gordon Saunders. The building will be 70x120 feet. There will be a large sales room and repair shop. The floor will be of cement. The exterior of the building will be faced with pressed brick. The architect is preparing the plans.

Seattle, Wash.—Garage, 3 story and base, brick and steel, \$35,000. Architect, Charles Haynes, Melhorn Bldg., Seattle. Owner's name withheld. The building will be 28x78 feet. The structure has been designed for a commercial garage. There will be a 10,000 pound elevator. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Contracts Awarded.

Los Angeles, Cal.—Garage, 1 story and base, brick, \$7,000. Architects, Noonan and Kyser, Wright and Callender Bldg., L. A. Owner, Robert A. Fowler, Contractor, J. D. Thompson, 1629 Fletcher Ave., L. A. Contract price \$7,000.

GOVERNMENT WARE AND SUPPLIES.

Building—The following bids were received by the Commissioner of Indian Affairs, Washington, D. C., on March 19 for the construction of a

brick dormitory at the Albuquerque Indian School, N. Mex.

A. M. Horn, East Las Vegas, N. Mex., \$28,514.55, 180 days.

Alfred W. Hayden, Albuquerque, N. Mex., \$25,000, 150 days.

W. B. Lovell, Minneapolis, Minn., \$27,875, 10 months.

Meeker & Rice, Los Angeles, Cal., \$28,000, 153 days.

J. A. Harlan & Son, Albuquerque, N. Mex., \$24,898, 150 days.

George Humbolt Co., Chicago, Ill., \$27,790, 210 days.

M. N. Sundt, Las Vegas, N. Mex., \$28,275, 180 days.

Building—The following bids were received by the supervising architect Treasury Department, Washington, D. C., on March 20 for the construction, complete, of the executive mansion at Juneau, Alaska.

Christ-Kufler, Seattle, Wash., \$17,681.

King Lumber Co., Charlottesville, Va., \$19,800.

Joseph Mersch, Everett, Wash., \$20,900.

Wm. Bruce, San Francisco, Cal., \$57,775.

Beech & Kent, Tacoma, Wash., \$17,911.

The Secretary of the Interior has authorized the director of the Reclamation Service to execute contract with James J. Burke & Co. of Salt Lake City, Utah, for purchasing and erecting a single-span steel bridge 100 feet long on the Shoshone project, Wyo. The contract price is \$2,221. Including the freight, this brings the cost of the bridge to the Government up to \$2,590. The proposed bridge is to be located across the south fork of the Shoshone River, about 12 miles above Cody.

HALLS & SOCIETY BLDGS.

Fresno, Fresno Co., Cal.—Lodge hall, 3 story and base, brick, \$25,000. Architects, Starlock and Clark. Fresno. Owners, Fresno Lodge of the Woodmen of the World. The building has been designed for stores on the first floor, apartments on the second and lodge halls on the third. There will be elevator service and steam heat. The interior will be handsomely finished. The exterior of the building will be faced with pressed brick. The architects are preparing the working drawings.

Eureka, Humboldt Co., Cal.—Lodge hall, 3 story and base, brick, \$10,000. Architects, Akerman and Reese, Eureka. Owners, Eureka Aerie of Eagles. The building has been mentioned here before. The plans, which are complete, provide for several stores on the first floor, and offices of the order and lodge halls on the second and third floor. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans are ready for figures and the excavating has been let.

Long Beach, Los Angeles Co., Cal.—Lodge hall, 3 story and base, brick and steel, \$10,000. Architects, Austin and Sedgwick, 18 Locust Ave., Long Beach. Owners, Long Beach Elks' Hall Association. The building, which has been mentioned here before, will contain stores on the first floor, lodge halls and living apartments for the members on the upper floors. There will be steam heat and elevator service. The exterior of the building will be faced with

pressed brick. The plans are complete and the architects are taking figures. Bids will be opened on April 15th.

Seattle, Wash.—Lodge hall 8 story and base. Class A construction. Cost not stated. Architects, Saunders and Lawton, Alaska Bldg., Seattle. Owners, Allied Masons. The architects were selected from among 13 competitors at the last meeting of the Building Committee. The working drawings will be started at once and complete details of the work will be published here as soon as they are obtained.

Enterprise, Ore.—City hall, 2 story and base, brick. Cost not stated. Architect, Claire H. Bristow, Portland. Owners, City of Enterprise. The building will be 14x70 feet. The first floor will contain the library, council chamber and police headquarters. The second floor will be given over to a large auditorium. There will be a central heating system. The exterior of the building will probably be faced with pressed brick. The plans will be out for figures on April 1st.

Contracts Awarded.

Santa Monica, Los Angeles Co., Cal.—Lodge hall, 3 story and base, brick. Cost not stated. Architect none. Owners, Santa Monica Elks' Hall Association. Contractor, H. X. Goetz, 126 Oregon Ave., Santa Monica. Contract price for 2 stories, \$29,000, for 3 stories, \$35,000.

HOSPITALS.

San Francisco.—Hospital work, installation of elevators, \$25,000. City Architect, Alfred I. Coffey, 1204 David Hewes Bldg., S. E. Owners, City and County of San Francisco. Bids for this work were opened at the Wednesday meeting of the Board of Public Works. The Otis Elevator Co. submitted the lowest figures on Proposition No. 2, \$26,200. For a complete list of the bids see under City Bids opened, San Francisco.

San Francisco.—Hospital work, cork floors. Cost not stated. City Architect, Alfred I. Coffey, 1204 David Hewes Bldg., S. E. Owners, City and County of San Francisco. The plans and specifications for cork floors to be installed in the Administration building and Nurses' Home at the San Francisco Hospital have been placed in the hands of the Board of Public Works and bids for the same will be opened on April 10th.

HOTELS.

San Francisco.—Hotel, 6 story and base, brick and steel, \$20,000. Architect, Sylvia Schnitzman, First National Bank Bldg., S. E. Owners, Levy Real Estate Co. The building will occupy a large corner in the Union town district. There will be in the neighborhood 150 rooms on the upper floors and several stories on the first floor. There will be steam heat, elevator service and a vacuum cleaner system. The interior of the building will be finished in pine and hardwoods. The exterior will be faced with pressed brick and terra cotta. The plans are now being prepared.

Los Angeles, Cal.—Hotel, 9 story and base, reinforced concrete, \$18,000. Architect, Anton Reif, Higgins Bldg., L. A. Owner, Mrs. Hattie M. Morris. The building will cover an area of 55x175 feet. There will be 188 rooms and 86 bath rooms. There will be two pas-

senger elevators, steam heat, vacuum cleaning system and fire escapes. The interior will be finished in birch throughout. The exterior will be faced with pressed brick and terra cotta. The plans are being prepared.

Los Angeles, Cal.—Hotel, 1 story and base, brick. Cost not stated. Architect, Anton Reif, Higgins Bldg., L. A. Owner's name withheld. The building will cover an area of 50x250 feet. There will be two stories on the street frontage besides the main lobby. The upper floors will be divided into 135 rooms besides a number of bath rooms on each floor. There will be steam heat and running water in all rooms. The exterior will be faced with pressed brick. The architect is completing the working drawings.

Los Angeles, Cal.—Hotel addition, 5 story brick and steel. Cost not stated. Architects, Dennis & Farwell, Fay Bldg., L. A. Owner, Dr. S. G. Moore. The work, which has been mentioned here before, will consist of a Class B addition of five stories to the present Moore-Cliff Hotel. The plans are complete and the architects are taking figures on the work.

Seattle, Wash.—Hotel and stores, 9 story and base, reinforced concrete, \$200,000. Architect, John Graham, Lyon Bldg., Seattle. Owners, Northwest Land and Development Co. The building, which has been mentioned here several times before, will cover an area of 100x120 feet. There will be several stories on the first floor besides the hotel lobby. The second floor will be arranged for offices and the upper six floors for a modern hotel of 150 rooms. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick and terra cotta. The architect is taking figures on the work.

Albany, Ore.—Hotel, 6 story and base, reinforced concrete, \$100,000. Architect, Burgraf, Portland. Owners, Revere Hotel Co., Albany. The building will be 60x102 feet. There will be the main office, lobby and dining room on the first floor and in the neighborhood of 100 guest rooms above. A large proportion of the rooms will have connecting baths. There will be steam heat and elevator service. The exterior of the building will be faced with cement plaster. The plans are to be completed within seven days and figures will be called.

Contracts Awarded.

Portland, Ore.—Hotel and stores, 5 story and base, reinforced concrete, \$120,000. Architect, none. Owner, M. A. Newell. The building will be 100x100 feet. The plans provide for seven stories on the first floor and 150 rooms on the upper four floors. The contract has been awarded to Hurley, Mason & Co., Portland. Contract price not stated.

LIBRARY.

Roseville, Placer Co., Cal.—Library, 1 story and base, brick, \$10,000. Architect's name not given. Owners, City of Roseville. The plans for a one story building have been placed in the hands of the Library Committee, Mrs. W. T. Butler, Chairman, and have been approved. The Board is now advertising for bids which will be opened on April 6th. Plans can be secured by addressing Mrs. Butler, Roseville.

Contracts Awarded.

Centronia, Wash.—Library, 2 story and base, brick, \$15,000. Architect's name not given. Owners, City of Centronia. Contractor, Charles Buz, Centronia. Contract price, \$13,387.83.

POST OFFICES.

Stockton, San Joaquin Co., Cal.—Post office work, oil burning plant. Cost not stated. Architect, James Knox Taylor, Washington D. C. Owners U. S. Government. Plans have been forwarded to the Custodian of the Building at Stockton for the installation of an oil burning system in the post office building. Bids will be opened on May 6th and plans and specifications may be had from the Custodian of the Building at Stockton.

Olympia, Wash.—Postoffice, 2 story and base, brick and stone. Cost not stated. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. This work has been mentioned here before when the plans were first out for figures. All bids have been rejected and the plans have been revised. The new figures will be opened in Washington D. C. on May 7th. Plans and specifications can be secured from either the architect or from the Custodian of the site at Olympia.

RAILROAD CONST., STATIONS AND EQUIPMENT.

San Francisco.—Railroad construction \$225,025. Engineer Madsen Hansen, 1404 David Hewes Bldg., S. E. Owners, City and County of San Francisco. Bids for the construction of the roadbed of the Geary street Municipal road from Market and Geary streets to 15th Ave. were opened by the Board of Public Works. The Bates, Boland and Aver were low and will probably be awarded the contract. The complete list of bids received appears in this issue under the head of San Francisco, City Bids Opened.

Walla Walla, Wash.—Depot, 2 story and base, brick, \$50,000. Architect, Engineering Dept., Northern Pacific R. R. Co., Seattle. Owners, Northern Pacific Railroad Co. The building will contain the two waiting rooms, baggage and express rooms, offices for the station agents and department offices on the second floor. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans will be completed shortly.

RESIDENCES.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect, none. Owner, J. T. Hinch, 1294 Broadway, Oakland. The bungalow has been designed for a five-room house with bath. The interior finish will be of pine throughout. There will be open fire places with tile or brick mantels. The exterior of the house will be covered with cement plaster and shiplap. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalows, 3, 1 story and base, frame, \$2,500. Architect, none. Owners, Morganen Bros., 560 63rd St., Oakland. Each of the dwellings will contain five rooms and bath. The interior finish will be of pine throughout with some oak floors. There

will be open fire places and tile mantels. The exteriors will be covered with cement plaster and ship lap. The plans are in the hands of the owners and the work will be done by Day Labor.

The dwelling will contain a number of large living rooms besides the baths. There will be steam heat and hot water heaters. The mantels will be of brick or tile. There will be open fire places. The interior finish will be of pine with hardwood floors in the principal rooms. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with white Medusa cement on metal lath. The roof will be of metal tile. The plans are being prepared.

Juneau, Alaska.—Residence, 2 story

and base, brick and steel, \$10,000. Architect, James Knox Taylor, Washington, D. C. Owner, U. S. Government. The following bids for the construction of this building were opened in Washington recently: Joseph Mersch, Everett, Wash., \$31,900; Chris. Kipper, Seattle, \$17,681; Black & Kent, Tacoma, \$17,914; King Lumber Co., Virginia, \$19,890; Wm. Bruce San Francisco, \$57,775.

Contracts Awarded.

Fair Oaks, San Mateo Co., Cal.—Saugon garden and swimming pool, \$2,500. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owner, Louis Stern, Contractors, Donnelly and Walter, Redwood City, Cal. Contract price \$28,400.

SCHOOLS.

Hughson, Stanislaus Co., Cal.—School 1 story and base, brick, \$25,000. Architects Henry C. Smith associated with Thomas B. Wisman, Humboldt Bank Bldg., S. F. Owners, Hughson School District. The building has been designed for a grammar school. There will be six class rooms and assembly hall. There will be a central heating plant. The exterior will be faced with pressed brick. The plans are being prepared and bids will be called for shortly.

San Francisco.—School work, vacuum cleaning pipes. Cost not stated. City Architect, Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. The plans for the vacuum piping of the Girls' High School are complete. The Board of Public Works will open figures for the work on April 23.

Los Angeles, Cal.—Schools, brick and concrete. Cost not stated. Architects as follows. Owners, City of Los Angeles. The following action in regard to the new school buildings in the city of Los Angeles was taken at the last meeting of the Board of Education:

A. H. Baum, supervisor of construction of city schools buildings submitted plans for a one-story reinforced concrete school building, 56,632.5 feet, to be built at Lankershim. It will contain four class rooms, auditorium, teachers' rooms and the necessary conveniences. The estimated cost is \$20,000. The secretary of the board was authorized to advertise for bids for its construction.

The secretary was instructed to advertise for bids for the construction of a new school building at Santa Barbara and Western avenue. This building is estimated to cost \$35,000.

A sketch of the proposed Boyle Heights intermediate school building was presented by the architect of the building, A. F. Rosenheim. The building is to be erected at Sixth and Soto streets and is to cost not to exceed \$20,000. The secretary was instructed to advertise for bids.

Alpert, Hall & Alpert were awarded the contract at \$10,975 for the construction of the Virgil avenue building. Hunt & Burns, architects.

G Hansen was awarded the contract at \$21,757 for the construction of an eight-room addition to the Thirty-sixth Street School. Train & Williams, architects.

Martin Madden was awarded the contract at \$14,929 for the construction of a new school building on the Rose Hill site. Frank L. Shiff, architect.

The Wilford-Slater Company was

awarded the contracts at \$5,116 for an addition to the Custer Avenue School, P. A. Faithful, architect, also, at \$14,500 for an annex and auditorium at the Thirtieth Street Intermediate School, W. J. Biesner, architect.

Alex Grant was awarded the contract at \$9,893 for an addition to the Fifty-second Street School building, Julius W. Krause, architect.

Ontario, San Bernardino Co., Cal.—School, 1 story and base, brick, \$50,000. Architects, Austin & Pennell, Wright & Callender Bldg., L. A. Owners, Claffey Union High School District. The revised plans for the administration and mechanics buildings have been completed and approved by the School Board. Bids for the construction will be opened on April 16th. Plans and specifications can be obtained from the architects.

SEWERS, STREET WORK AND WATER SYSTEMS.

Roseville, Placer Co., Cal.—Lighting system and power plant. Cost not stated. Engineer, F. S. Marshall, Roseville. Owners, City of Roseville. Plans for the municipal lighting system, furnishing lamps, transformers and construction a power plant are complete and in the hands of the City Clerk. Bids will be opened on April 20th. Full information may be obtained from the engineer.

Bremerton, Wash.—Sewers, street paving and water system improvements, \$250,000. City Engineer, Bremerton. Owners, City of Bremerton. The recent bond issue voted carried the following sums for the above mentioned work: Paving in business district, \$75,000; other paving, \$20,000; salt water mains, \$5,000 and \$120,000 for improvements to the water system, if purchased from the present owners.

Bakersfield, Kern Co., Cal.—Sewer system, \$210,000. Engineer, City Engineer, Bakersfield. Owners, City of Bakersfield. Bonds will be voted upon in June to the amount of \$147,000. The principal expenditure will be \$210,000 for sewers. An outfall sewer of 42 inches in diameter will be constructed with laterals to all parts of the city. The plans are being worked out by the City Engineer who will furnish all information.

Contracts Awarded.

Los Angeles, Cal.—Tunnel construction, \$125,000. Engineer, City Engineer, Los Angeles. Owners, City of Los Angeles. Bids for the construction of the Hill Street Tunnel were opened as follows: Watson & Spicer, \$129,750; Thompson & Taylor \$127,550.

STORES & OFFICE BUILDINGS.

San Francisco.—Stores and lofts, 3 story and base reinforced concrete, \$80,000. Architect, Norman Coulter, 45 Kearny St., S. E. Owner, Thomas Q. Swartzinger. This building has been mentioned here before under another architect's name. The plans have been completed by Mr. Coulter and the contract for the excavating has been awarded to H. L. Petersen. The balance of the work will be out for figures shortly. The exterior will be faced with cement plaster.

Portland, Ore.—Stores and lofts, 1 story and base, mill construction. Cost not stated. Architects, Eridges & Weber, Portland. Owners, Strong & Co.

The building will cover an area of 88x95 feet. The first floor will be arranged for stores. The upper floors will be designed for large light lofts. There will be elevator service and steam heat. The exterior of the building will be faced with pressed brick. The architects are now preparing the working drawings.

Contracts Awarded.

Los Angeles, Cal.—Stores and lofts, 4 story and base, reinforced concrete, \$65,000. Architects, Edelman & Barnett, Blanchard Bldg., L. A. Owners, Isaacs Bros. Contractors, Richards, Neustadt Construction Co., Wright and Callender Bldg., L. A. Contract price, \$65,000.

THEATRES.

Salt Lake City, Utah.—Theatre, Class A construction, \$200,000. Architect, G. Albert Landsburgh, M. A. Gunst Bldg., S. E. Owners, Walker Bros., Salt Lake City. The architect has been commissioned to prepare plans for a modern Broadway building which is to be erected for the Orpheum Circuit in Salt Lake by the well known bankers, Walker Bros. The details of the building can not be given at this time as the architect has only been commissioned to prepare the plans. The structure will be Class A in every respect. The location of the building will be on South Second street near Main street. Complete details of the work will be given later.

SEALED PROPOSALS.

PROPOSALS FOR STEAM LOCOMOTIVES.

(Bids close April 4.)

OFFICE of the Board of State Harbor Commissioners, Union Depot and Ferry House, San Francisco, Cal., March 21st, 1912.

Sealed proposals or bids will be received at this office at or prior to 11:00 o'clock a. m. on Thursday, April 4th, 1912, for the construction and delivery at the round house of the Belt Railroad on the waterfront of the City and County of San Francisco, of a six-wheeled, saddle tank locomotive engine, having two pair of coupled wheels and a two-wheeled truck at rear, in accordance with the specifications prepared therefor by the Superintendent of the Belt Railroad and approved by the Board March 11, 1912, and on file in this office. To which special reference is hereby made.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check of five (5) per cent of the amount of the bid, such check to be made payable to the order of the Secretary of the Board, as a guarantee on the part of the successful bidder that he will within six (6) days after the acceptance of the bid, enter into a written contract to do said work according to the specifications prepared therefor, and will also execute and file with the Board a bond in such sum as the Board may deem adequate with two (2) or more sureties to be approved by the Board of State Harbor Commissioners and conditioned for the faithful performance of such contract, nor will said bid be considered by the Board unless delivered to the Secretary or to the Assistant Secretary at the office of the Secretary at or prior to

11:00 o'clock a. m. on Thursday, April 4th, 1912, at which time and place the bids will be opened.

The Board reserves the right to reject any or all bids if deemed for the best interest of the State.

Bidders are invited to be present at the opening of the bids.

PROPOSALS FOR PAVING BLOCKS. (Bids close April 4.)

OFFICE of the Board of State Harbor Commissioners, Union Depot and Ferry House, San Francisco, Cal., March 21st, 1912.

Sealed proposals or bids will be received at this office at or prior to 11:00 o'clock a. m. on Thursday, April 4th, 1912, for furnishing and delivering 125,000 basalt paving blocks F. O. B. Belt Railroad, on the waterfront of the City and County of San Francisco, in accordance with the specifications prepared therefor by the Assistant State Engineer of the Board, and adopted by the Board March 14, 1912, and on file in this office, to which special reference is hereby made.

The blocks must be of the best quality of basalt, not less than 3 inches nor more than 4 inches wide; not less than 7 nor more than 10 inches long, not less than 7 nor more than 8 inches deep.

Each bidder must furnish 10 blocks at the time of submitting his bid. The Board reserves the right to make

whatever tests it may deem necessary and to award the contract considering the indications from the tests and the price bid. If at any time during the term of this contract, it is found that the blocks being delivered are not equal to the samples in quality, size and shape submitted, such blocks will be rejected and must be handled away by the contractor at his own expense.

No bid will be received unless it is made out on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the bid (based on a delivery of 125,000 blocks), such check to be made payable to the order of the Secretary of the Board, as a guarantee on the part of the successful bidder that he will, within six (6) days after acceptance of bid, enter into a written contract to furnish and deliver the blocks according to samples submitted and specifications prepared therefor, and will also execute and file with the Board a bond in such sum as the Board may deem adequate with two (2) or more sureties to be approved by the Board of State Harbor Commissioners and conditioned for the faithful performance of said contract, nor will said bid be considered by this Board unless delivered to the Secretary or Assistant Secretary at the office of the Secretary at or prior to 11:00 o'clock a. m. on Thursday, April 4th, 1912, at which time and place the bids will be opened.

The Board reserves the right to reject any or all bids if deemed for the best interest of the State.

Bidders are invited to be present at the opening of the bids.

PROPOSALS FOR VACUUM PIPING. (Bids close April 3.)

OFFICE of the Board of Public Works of the City and County of San Francisco—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 3rd day of April, 1912, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The piping for vacuum cleaning system of the Girls High School, situated on Scott street, between O'Farrell and Geary streets.

PROPOSALS FOR CORK FLOORS. (Bids close April 10.)

OFFICE of the Board of Public Works of the City and County of San Francisco—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 10th day of April, 1912, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The furnishing and laying of cork tile floors in the Nurses' Home and Administration Buildings, San Francisco Hospital, situated on Potrero avenue, between 22nd and 23rd streets.

PROPOSALS FOR SEWERS. (Bids open April 3.)

OFFICE of the Board of Public Works of the City and County of San

Francisco—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 3rd day of April, 1912, for doing the following street work, including the furnishing of the necessary labor and materials therefor, to wit:

First the following vitrified, salt-glazed, iron-stone pipe sewers and appurtenances be constructed:

(1) A 24-inch from a point on the center line of Vincente street 5 feet easterly from the westerly line of Thirty-seventh avenue to the point of intersection of the center line of Thirty-seventh avenue and the northerly line of Vincente street, a 21-inch with 32 Y branches and 2 brick manholes with cast-iron frames and covers and galvanized wrought-iron steps along the center line of Thirty-seventh avenue, between Ulloa and Vincente streets; a 24-inch along the center line of Thirty-seventh avenue from the southerly line of Ulloa street to a point 12 feet northerly therefrom; a 21 inch with 2 brick manholes with cast-iron frames and covers and galvanized wrought-iron steps along the center line of Thirty-seventh avenue from the last described point to the northerly line of Ulloa street; an 18-inch from a point on the center line of Thirty-seventh avenue 12 feet northerly from the southerly line of Ulloa street to the point of intersection of the center line of Ulloa street and the easterly line of Thirty-seventh avenue; a 21-inch with 36 Y branches and 1 brick manhole with cast-iron frame and cover and galvanized wrought-iron steps along the center line of Thirty-seventh avenue, between Ulloa and Taraval streets; a 21-inch with 1 brick manhole with cast-iron frame and cover and galvanized wrought-iron steps along the center line of Thirty-seventh avenue from the southerly line of Taraval street to a point 12 feet northerly therefrom; and a 21-inch from the last described point to the point of intersection of the center line of Taraval street and the easterly line of Thirty-seventh avenue.

(2) That a fifteen (15) inch, vitrified, salt-glazed, iron-stone pipe sewer with one (1) brick manhole with cast-iron frame and cover and galvanized wrought-iron steps be constructed along the center line of Forty-fourth avenue between the center and northerly lines of Balboa street; that a twenty-one (21) inch, vitrified, salt-glazed, iron-stone pipe sewer be constructed along the center line of Balboa street between the center and westerly lines of Forty-fourth avenue; and that an eight (8) inch, vitrified, salt-glazed, iron-stone pipe sewer be constructed along the center line of Balboa street between the center and easterly lines of Forty-fourth avenue.

(3) That a twenty-one (21) inch, vitrified, salt-glazed, iron-stone pipe sewer with eighteen (18) Y branches and one (1) brick manhole with cast-iron frame and cover and galvanized wrought-iron steps be constructed along the center line of Balboa street, between Forty-fourth and Forty-fifth avenues; that a twenty-one (21) inch, vitrified, salt-glazed, iron-stone pipe sewer be constructed along the center line of Balboa street between the center and easterly lines of Forty-fifth avenue; and that a twelve (12) inch, vitrified, salt-glazed, iron-stone pipe sewer be constructed along the center line of Forty-fifth avenue between the

center and northerly lines of Balboa street.

(4) The construction of sewers and appurtenances in Cabrillo street, from Twelfth avenue to Thirteenth avenue, and in Thirteenth avenue from Cabrillo street to Geary street.

PROPOSALS FOR PAVING, CURBS AND GUTTERS.

(Bids close April 3.)

OFFICE of the Board of Public Works of the City and County of San Francisco—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 3rd day of April, 1912, for doing the following street work including the furnishing of the necessary labor and materials therefor, to-wit:

(1) That Andover avenue, from the northerly line of Park street produced to the southerly line of Bluff street produced, be improved by constructing granite curbs, where not already constructed, including the angular corners of the intersecting streets.

(2) That the crossing of Richland avenue and Leese street be improved by constructing granite curbs and artificial stone sidewalk on the angular corners thereof; by paving the roadway thereof with a bituminous rock pavement, consisting of a 6-inch concrete foundation and a 2-inch bituminous rock wearing surface, and by constructing brick cesspools catchbasins with cast-iron frames, gratings and traps and 12-inch, vitrified, salt-glazed iron pipe culverts on the northerly easterly corners thereof.

(3) That Balboa street, between Seventh and Eighth avenues, be improved by constructing granite curbs on both sides of the roadway thereof, and by paving the roadway with an asphalt pavement, consisting of a six (6) inch concrete foundation and a two (2) inch asphaltic wearing surface.

(4) That Eighteenth street between Alabama and Harrison streets be improved by constructing granite curbs, where not already constructed, and by paving the roadway thereof with a bituminous rock pavement, consisting of a 6-inch concrete foundation and a 2-inch bituminous rock wearing surface, where not already constructed.

Note: Separate figures must be submitted on each proposition.

PROPOSALS FOR SEWERS

(Bids open April 10.)

OFFICE of the Board of Public Works of the City and County of San Francisco—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 10th day of April, 1912, for doing the following work:

The construction of sewers and appurtenances in Golden Gate Park and Forty-eighth avenue, from Linwood way to Cabrillo street.

CONSTRUCTING BRIDGE.

(Bids close April 11.)

PURSUANT to an order of the Board of Supervisors of the County of Fresno State of California, duly made and entered on the 19th day of March, 1912, notice is hereby given that sealed proposals will be received by said Board up to and not later than the hour of 2 o'clock p. m. of the 11th day of April, 1912, for the construction of a reinforced concrete "T" beam bridge, 10 feet and 9 inches over all, located on

the Bullard Boulevard at the crossing of the Herndon Canal, Fresno County, California, in accordance with plans and specifications heretofore adopted and now on file in the office of the Clerk of the Board, where the same may be seen and examined by intending bidders.

All bids must be accompanied by a certified check in the sum of ten per cent of the amount bid, made payable to the chairman of the Board, as a guarantee that the successful bidder will within ten days after the acceptance of his bid enter into a contract and give bonds as required by law and the orders of the Board, conditioned upon the faithful performance of said contract.

The Board reserves the right to reject any and all bids.

D. M. BARNWELL,
County Clerk and ex Officio Clerk of the Board of Supervisors of Fresno County, California.

By R. UHLER,
Deputy Clerk.

PROPOSALS FOR STREET WORK.

(Bids close April 11.)

NOTICE is hereby given that the Board of Trustees of the City of Fresno, County of Fresno, State of California, did at a regular meeting of said Board of Trustees, held on the 18th day of March, 1912, pass and adopt a resolution of intention, designated as Resolution of Intention No. 829, declaring the intention of said Board of Trustees to order the following street work to be done in said City, to-wit:

(1) That an artificial stone sidewalk four (4) feet in width, be constructed on and along each side of Jensen avenue from the north line of Nielson avenue to the south line of Sumner avenue in said city (excepting such portions of said Jensen avenue between said points on and along which an artificial stone sidewalk has already been constructed and the said work done to the official grade.

That said sidewalk shall be constructed in accordance with the official grade of said city and the specifications for such work contained in Ordinance No. 415 of the City of Fresno, passed by the Board of Trustees of said city on October 5, 1903, and the amendments thereto, which said specifications are on file in the office of the City Clerk of said city and are hereby referred to and made a part hereof.

For further particulars reference is hereby made to said resolution of Intention No. 829, on file in the office of the City Clerk of the City of Fresno.

THOS. O. THORN,

Superintendent of Streets of the City of Fresno.

PROPOSALS FOR CANAL SUPPLIES.

(Bids close April 18.)

man Canal Commission, Washington, D. C., until 10:30 a. m. April 18, 1912, at which time they will be opened in public, for furnishing the above-mentioned articles. Bids and general information relating to this Circular (No. 693) may be obtained from this office or the office of the assistant purchasing agent, 1056 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash., Los Angeles, Cal., F. C. ROGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR OIL BURNING PLANT

(Bids close May 6.)

OIL-BURNING PLANT—Treasury Department, Office of Supervising Architect, Washington, D. C.—Sealed proposals will be received at this office until 3 o'clock p. m. on the 6th day of May, 1912, and then opened for an oil-burning plant for heating boilers in the U. S. post office at Stockton, Cal., in accordance with specification and drawing, copies of which may be had at this office or at the office of the custodian at Stockton, Cal., at the discretion of the supervising architect, JAMES KNOX TAYLOR, Supervising Architect.

PROPOSALS FOR HEATING AND VENTILATING.

(Bids close April 4.)

NOTICE is hereby given that the Board of Education of the City of Los Angeles will receive bids for furnishing material and labor to install a Heating and Ventilating System in the school building to be erected on the Virgil avenue school site, Virgil avenue and Third street, in accordance with plans and specifications which are on file with the Secretary of the Board, 726 Security building.

Each bid should be made out on a form to be obtained at the Secretary's office, must be accompanied with a certified or cashier's check, or bidder's bond for 5 per cent of the amount of the bid, made payable to the Board of Education of the City of Los Angeles; must be sealed and filed with the Secretary on or before Thursday, April 4, 1912, at 11 o'clock a. m., and will be opened in public during the afternoon of that day.

The Board reserves the right to reject any and all bids.

By order of the Board of Education of the City of Los Angeles.

WM. A. SHELTON, Secretary.

PROPOSALS FOR PLUMBING.

(Bids close April 4.)

NOTICE is hereby given that the Board of Education of the City of Los Angeles will receive bids for furnishing all material and labor to do certain plumbing in the school building to be erected on the Virgil avenue school site, Virgil avenue and Third street, in accordance with plans and specifications which are on file with the Secretary of the Board, 726 Security building.

Each bid should be made out on a form to be obtained at the Secretary's office, must be accompanied with a certified or cashier's check, or bidder's bond for 5 per cent of the amount of the bid, made payable to the Board of Education of the City of Los Angeles; must be sealed and filed with the Secretary on or before Thursday, April 4, 1912, at 11 o'clock a. m., and will be

opened in public during the afternoon of that day.

The Board reserves the right to reject any and all bids.

By order of the Board of Education of the City of Los Angeles.

W. M. A. SHIELDON, Secretary.

PROPOSALS FOR PIPE SYSTEM.

(Bids close April 12.)

PIPE SYSTEM—Fort Logan, Colo.—Sealed proposals, in triplicate, will be received here until 10:30 a. m., April 12, 1912, for the construction of an ir-

rigation pipe system for the parade ground, athletic field, etc., at this depot. Blank forms for bidders, specifications, and full information may be obtained upon application. The United States reserves the right to accept any or all proposals or any part thereof. Envelopes containing proposals should be marked, "Proposals for Irrigation Pipe System," and addressed to the constructing quartermaster, Fort Logan, Colo. T. T. PRISSELL, Capt. and Q. M. U. S. A.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will send all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—3 story and base, frame, \$17,000. San Francisco. Architect, Frederick H. Meyer, Humboldt Bank Bldg., S. F. Owner, A. F. Peterson. The building has been mentioned here before when the plans were first being prepared. The building will be erected on upper Market street and will contain a number of two and three room apartments. There will be a central heating system, wall beds and other improvements. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and bids are being taken.

Apartment House—3 story and base, frame, \$10,000. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Louis D. Stoff. The building will be 25x77 feet and has been designed for six small apartments of two and three rooms each. There will be wall beds. The interior finish will be of pine. The exterior will be covered with brick veneer and shiplap. The plans are complete and the work will be done by Day Labor.

Apartment House—8 story and base, brick and steel, \$100,000. San Francisco. Architects, Frye & Schastey, Monadnock Bldg., S. F. Owner's name withheld. The building will be 90x127 feet. The interior is to be arranged for large suites of seven, eight and nine rooms each with two baths. There will be a complete steel frame and exterior walls faced with pressed brick and terra cotta. There will be steam heat, wall beds, vacuum cleaning plant and elevators. The interior will be handsomely finished in hardwoods. The working drawings are now being prepared and figures will be called for shortly.

Apartment House—5 story and base, brick and steel, \$70,000. San Francisco. Architect, C. H. Barrett, 281 Bush St., S. F. Owners, Mrs. L. and Mr. Loring Pickering. The building will contain in the neighborhood of 120 rooms arranged in suites of from two to four rooms each with private baths and dressing rooms. There will be steam heat, elevator service and wall beds. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Apartment House—3 story and base, frame, \$10,000. San Francisco. Architects, C. M. and A. P. Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will contain six apartments of three and four rooms

each and bath. The interior will be finished in pine and hardwoods. There will be a central heating system and wall beds. The exterior will be covered with cement plaster on metal lath. The plans are being prepared.

Apartment House—3 story and base, frame, \$23,000. San Francisco. Architects, Welsh & Carey, Western Metropolis Bank Bldg., S. F. Owner, Joseph Abrams. The building has been designed to contain 36 rooms which will be arranged in suites of two and three rooms each and bath. There will be a central heating system and wall beds. The exterior will be covered with cement plaster and brick veneer. The plans are complete and figures will be taken at once.

Harbor Work, Paving Blocks, Locomotive, Locomotive Crane and Removing Rock—Cost not stated. San Francisco. Engineer, Assistant State Engineer Saph, Ferry Bldg., S. F. Owners, State of California. The State Harbor Commissioners will open bids on April 4th for the above mentioned work. There are to be 125,000 basalt paving blocks, steam locomotive of the saddle tank type, 26-ton crane and the rock work will include drilling and blasting out of submerged rock under Perry No. 26. Plans and specifications can be secured from the Assistant State Engineer's office in the Ferry Bldg., S. F. For official proposal see this issue.

Church—Class A construction, \$250,000. San Francisco. Architects, Bliss & Paville, Balboa Bldg., S. F. Owners, First Congregational Church. The building has as yet only reached the proposed stage. A fund of \$50,000 has been raised and tentative plans have been submitted by the architects. The tentative plans provide for an edifice, absolutely fire proof, and with an auditorium seating 2,000 people. The details of the work have not been gone into and further information will be given as the plans progress.

Flats—3 story and base, frame, \$4,000. San Francisco. Architect, none. Owner, G. Rogers, 756 Mission St., S. F. The building will contain three small flats of four and five rooms each with baths. The interior finish will be of pine throughout. There will be gas grates. The exterior of the building will be covered with shiplap and rustic. The plans are in the hands of the owner and the work will be done by Day Labor.

Flats—2 story, attic and base, frame, \$5,000. San Francisco. Architect, Henry Shermand, Mills Bldg., S. F. Owner, Charles Mayer. The building has been arranged for one flat of five

rooms on the first floor and a large nine-room flat on the upper floor and attic. There will be a garage in the basement. The interior will be finished in pine and redwood with some hardwood floors. There will be open fire places. The exterior of the building will be covered with shiplap and brick veneer. The plans are complete and figures are being taken.

Flats—3 story and base, frame, \$4,000. San Francisco. Architect, none. Owner, M. P. Ryan, S. F. The building will be 25x54 feet and will contain 3 flats of five and six rooms each with baths. The interior finish will be of pine throughout. There will be gas grates. The exterior will be covered with rustic and shiplap. The plans are complete and the work will be done by Day Labor.

Flats—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, Ernest S. Burkhard, 507 Excelsior St., S. F. The building will contain two flats of five and six rooms each with bath. There will be pine trim throughout. The exterior will be covered with shiplap and rustic. The plans are in the hands of the owner and the work will be done by Day Labor.

Flats—2 story, attic and base, frame, \$5,000. San Francisco. Architect, none. Owner, E. B. Hallett, 12-13 12th Ave., S. F. The building has been designed for two large flats of six rooms and bath each. The interior trim will be of pine and redwood with some hardwood floors. There will be open fire places and brick mantels. The exterior will be covered with brick veneer and cement plaster on metal lath. The plans are in the hands of the owner and the work will be done by Day Labor.

Flats—3 story and base, frame, \$4,500. San Francisco. Architect, none. Owner, Louis Cuneo, 636 Capp St., S. F. The building will contain three modern flats. The interior trim will be of pine. There will be open fire places. The exterior will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Flats—3 story and base, frame, \$6,000. San Francisco. Architect, A. J. Barnett, 585 California St., S. F. Owner, Joseph Sullivan. The building will be 30x61 feet. There will be six small flats of four and five rooms each and baths. The interior will be finished in pine. There will be gas grates. The exterior will be covered with shiplap. The plans are complete and in the hands of the owner and the work will be done by Day Labor.

Flats—2 story and base, frame, \$5,000. San Francisco. Architect, David Salfeld, Clunie Bldg., S. F. Owner, Charles Ellis. The building will be 43x32 feet. There will be six flats of five rooms each. The interior trim will be of pine and redwood. There will be open fire places. The exterior will be covered with cement plaster on metal lath. The plans are being prepared and working drawings will be ready for figures shortly.

Hotel—6 story and base, brick and steel, \$50,000. San Francisco. Architect, Sylvain Schnaitacher, First National Bank Bldg., S. F. Owners, Levy Real Estate Co. The building will occupy a large corner in the downtown district. There will be in the neighborhood of 150 rooms on the upper floors and several stories on the first floor. There will be steam heat, elevator service and a vacuum clean-

ing system. The interior of the building will be finished in pine and hardwoods. The exterior will be faced with pressed brick and terra cotta. The plans are now being prepared.

Hospital Work—Installation of elevators, \$25,000. San Francisco. City Architect, Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Bids for this work were opened at the Wednesday meeting of the Board of Public Works. The Otis Elevator Co. submitted the lowest figure on Proposition No. 2, \$26,500. For a complete list of the bids see under City Bids opened, San Francisco.

Hospital Work—Cork floors. Cost not stated. San Francisco. City Architect, Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. The plans and specifications for cork floors to be installed in the Administration building and Nurses' Home at the San Francisco Hospital have been placed in the hands of the Board of Public Works and bids for the same will be opened on April 10th.

Railroad Construction—\$225,000. San Francisco. City Engineer, Marsden Manson, 1404 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Bids for the construction of the roadbed of the Geary Street Municipal road from Market and Geary streets to 15th avenue, were opened by the Board of Public Works. The Bates, Boland & Ayer Co. were low and will probably be awarded the contract. The complete list of bids received appears in this issue under the head of San Francisco, City Bids Opened.

School Work—Vacuum cleaning pipes. Cost not stated. San Francisco. City Architect, Alfred I. Coffey, 1204 David Hewes Bldg., S. F. Owners, City and County of San Francisco. The plans for the vacuum piping of the Girls' High School are complete. The Board of Public Works will open figures for the work on April 3rd.

Stores and Lofts—3 story and base reinforced concrete, \$70,000. San Francisco. Architect, Norman Coulter, 16 Kearny St., S. F. Owner, Thomas O. Swortzinger. This building has been mentioned here before under another architect's name. The plans have been completed by Mr. Coulter and the contract for the excavating has been awarded to H. L. Petersen. The balance of the work will be out for figures shortly. The exterior will be faced with cement plaster.

Theatre—Class A construction, \$200,000. Salt Lake City, Utah. Architect, G. Albert Landsburgh, M. A., Gunst Bldg., S. F. Owners, Walker Bros., Salt Lake City. The architect has been commissioned to prepare plans for a modern fire proof building, which is to be erected for the Orpheum Circuit in Salt Lake by the well known bankers, Walker Bros. The details of the building cannot be given at this time as the architect has only been commissioned to prepare the plans. The structure will be class A in every respect. The location of the building will be on South Second street near Main street. Complete details of the work will be given later.

Building Contracts Awarded.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

Bank and Offices—2 story and base, brick, \$15,000. Wasco, Kern Co., Cal. Architect, Henry C. Smith, associated with Thomas B. Wiseman, Humboldt Bank Bldg., S. F. Owners, Wasco City Bank. The building will contain the banking rooms on the first floor and a number of offices on the upper floor. The interior of the banking rooms will be finished in hardwood and marble. There will be coin and safety deposit vaults. The exterior of the building will be faced with pressed brick. The architects are preparing the working drawings.

Bridge—Reinforced concrete type. Cost not stated. Fresno, Fresno Co., Cal. Engineer, County Surveyor, Fresno. Owners, Fresno County. Plans have been completed for a reinforced concrete bridge of the I beam type with an overall length of 40 feet and nine inches. The plans are on file in the office of the County Clerk and bids will be opened by the Board of Supervisors on April 11th. For full information address the County Surveyor.

Lodge Hall—3 story and base, brick, \$25,000. Fresno, Fresno Co., Cal. Architects, Starbuck & Clark, Fresno. Owners, Fresno Lodge of the Woodmen of the World. The building has been designed for stores on the first floor, apartments on the second and lodge halls on the third. There will be elevator service and steam heat. The interior will be handsomely finished. The exterior of the building will be faced with pressed brick. The architects are preparing the working drawings.

School—1 story and base, brick, \$25,000. Hughson, Stanislaus Co., Cal. Architects, Henry C. Smith associated with Thomas B. Wiseman, Humboldt Bank Bldg., S. F. Owners, Hughson School District. The building has been designed for a grammar school. There

will be six class rooms and an assembly hall. There will be a central heating plant. The exterior will be faced with pressed brick. The plans are being prepared and bids will be called for shortly.

Sewer System—(\$10,000). Bakersfield, Kern Co., Cal. Engineer, City Engineer, Bakersfield. Owners, City of Bakersfield. Bonds will be voted upon in June to the amount of \$117,000. The principal expenditure will be \$10,000 for sewers. An outfall sewer of 12 inches in diameter will be constructed with laterals to all parts of the city. The plans are being worked out by the City Engineer who will furnish all information.

Contracts Awarded.

LOS ANGELES AND SOUTH-CENTRAL CALIFORNIA.

Bank and Office—1 story and base, brick and steel, \$75,000. Santa Barbara, Santa Barbara Co., Cal. Architects, Parkinson & Bergstrom. Security Bldg., L. A. Owners, First National Bank of Santa Barbara. The building will be designed in the monumental style. The exterior will be of light colored granite. The upper floor will contain fifteen modern offices. The interior of the banking rooms will be finished in marble, tile and hardwoods with ornamental bronze. There will be a concrete and steel vault. The architects are now preparing the working drawings.

Hotel—3 story and base, reinforced concrete, \$180,000. Los Angeles, Cal. Architect, Anton Reif, Higgins Bldg., L. A. Owner, Mrs. Hattie M. Morris. The building will cover an area of 55x155 feet. There will be 188 rooms and 36 bath rooms. There will be passenger elevators, steam heat, vacuum cleaning system and fire escapes. The interior will be finished in birch throughout. The exterior will be faced with pressed brick and terra cotta. The plans are being prepared.

Apartment House—3 story and base, frame. Cost not stated. Pasadena, Los Angeles Co., Cal. Architect, Thomas Preston, American Bank Bldg., Pasadena. Owner, Mrs. Caldwell. The building will be 60x70 feet and will contain 18 apartments of two and three rooms each with baths. There will be furnace heat and wall beds. The exterior of the building will be covered with shingles. The plans are complete and figures are being taken.

Apartment House—1 story and base, frame. Cost not stated. Santa Monica, Los Angeles Co., Cal. Architect, Frank T. Nogley, Jr., Consolidated Realty Bldg., L. A. Owner, W. R. Porter. The building will contain about 64 rooms arranged in two and three room suites with connecting baths. There will be steam heat and wall beds. The interior will be finished in pine and redwood. The exterior of the building will be covered with shiplap and brick veneer. The plans are being prepared.

Apartment House—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Frank M. Tyler, Higgins Bldg., L. A. Owner, Paul Rudley. The building will contain a main lobby and amusement room on the first floor and 85 rooms arranged in 26 suites of two and three rooms

on the upper floors. There will be private baths, steam heat, wall beds and elevator service. The exterior of the building will be faced with enameled brick trimmed with terra cotta. The plans are being prepared.

Apartment House—3 story and base, brick, \$10,000. Los Angeles, Cal. Architect none. Owner, Clinton Campbell, Union Oil Bldg., L. A. The building will be 30x135 feet. There will be 30 rooms arranged in two and three room suites with connecting baths. There will be wall beds and steam heat. The interior will be handsomely finished in pine and hardwoods. The exterior of the building will be faced with pressed brick. The owner is a well known builder and will do the work by Day Labor.

Bank—1 story and base, brick. Cost not stated. Claremont, Los Angeles Co., Cal. Architect, Robert H. Orr, Star Bank Bldg., Pomona. Owners, American National Bank of Claremont. The building will be 30x80 feet and has been designed for the exclusive use of the banking institution. The interior will be finished in hardwoods and marble. There will be a fire proof vault. The exterior will be faced with pressed brick. The plans are being prepared.

Bridge—Reinforced concrete. Cost not stated. Los Angeles, Cal. Engineer, County Surveyor, Ivory B. Noble, L. A. Owners, Los Angeles County. The bridge will consist of five spans of 42 feet each and two spans of 21 feet. There will be concrete abutments and concrete retaining walls. The plans are complete and figures will be called for shortly.

Hotel—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Anton Reif, Higgins Bldg., L. A. Owner's name withheld. The building will cover an area of 50x250 feet. There will be two stores on the street frontage besides the main lobby. The upper floors will be divided into 135 rooms besides a number of bath rooms on each floor. There will be steam heat and running water in all rooms. The exterior will be faced with pressed brick. The architect is completing the working drawings.

Hotel Addition—5 story, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Dennis & Farwell, Fay Bldg., L. A. Owner, Dr. S. G. Moore. The work, which has been mentioned here before, will consist of a Class B addition of five stories to the present Moore-Cliff Hotel. The plans are complete and the architects are taking figures on the work.

Church—Brick and stone. Cost not stated. Los Angeles, Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Roman Catholic Church. This building has been mentioned here before when the plans were first being prepared. The architect is now taking figures for the stone work and will have the plans for the balance of the work complete and out for figures this week.

Lodge Hall—3 story and base, brick and steel, \$10,000. Long Beach, Los Angeles Co., Cal. Architects, Austin & Sedgwick, 18 Locust Ave., Long Beach. Owners, Long Beach Elks' Hall Association. The building, which has been mentioned here before, will contain stores on the first floor, lodge halls and living apartments for the members on the upper floors. There will be steam heat and elevator ser-

vice. The exterior of the building will be faced with pressed brick. The plans are complete and the architects are taking figures. Bids will be opened on April 8th.

Garage—1 story and base, brick. Cost not stated. Whittier, Los Angeles Co., Cal. Architect, A. L. Valk, Story Bldg., L. A. Owner Gordon Saunders, Whittier. The building will be 78x120 feet. There will be a large sales room and repair shop. The floor will be of cement. The exterior of the building will be faced with pressed brick. The architect is preparing the plans.

Schools—Brick and concrete. Cost not stated. Los Angeles. Architects as follows. Owners, City of Los Angeles. The following action in regard to the new school buildings in the city of Los Angeles was taken at the last meeting of the Board of Education:

A. H. Mann, supervisor of construction of city school buildings, submitted plans for a one-story reinforced concrete school building, 96.6x22.6 feet, to be built at Lankershim. It will contain four class rooms, auditorium, teachers' rooms, and the necessary conveniences. The estimated cost is \$20,000. The secretary of the board was authorized to advertise for bids for its construction.

The secretary was instructed to advertise for bids for the construction of a new school building at Santa Barbara and Western avenue. This building is estimated to cost \$35,000.

A sketch of the proposed Bay Heights intermediate school building was presented by the architect of the building, A. F. Rosenheim. The building is to be erected at Sixth and Soto streets and is to cost not to exceed \$250,000. The secretary was instructed to advertise for bids.

Alpert, Hall & Alpert were awarded the contract at \$16,375 for the construction of the Virgil avenue building. Hunt & Burns, architects.

G. Hanson was awarded the contract at \$21,777 for the construction of an eight-room addition to the Thirty-sixth Street School. Train & Williams, architects.

Martin Madden was awarded the contract at \$14,229 for the construction of a new school building on the Rose Hill site. Frank L. Stiff, architect.

The Willard-Slater Company was awarded the contracts at \$5,116 for an addition to the Custer Avenue School. C. A. Faithful, architect; also, at \$11,560 for an annex and auditorium at the Thirtieth Street Intermediate School. W. J. Blesner, architect.

Gray Grant was awarded the contract at \$9,893 for an addition to the Fifty-second Street School building. Julius W. Krause, architect.

School—1 story and base, brick, \$50,000. Ontario, San Bernardino Co., Cal. Architects, Austin & Pinnell, Wright and Callender Bldg., L. A. Owners, Chaffey Union High School District. The revised plans for the administration and mechanics buildings have been completed and approved by the School Board. Bids for the construction will be opened on April 16th. Plans and specifications can be obtained from the architects.

Contracts Awarded.

Garage—1 story and base, brick, \$7,000. Los Angeles, Cal. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owner, Robert A. Foyler, Contractor, J. D. Thompson,

D. C. Fletcher, Ave. L. A. Contract price, \$6,700.

Lodge Hall—3 story and base, brick. Cost not stated. Santa Monica, Los Angeles Co., Cal. Architect, none. Owners, Santa Monica Elks' Hall Association. Contractor, H. N. Goetz, 125 Oregon Ave., Santa Monica. Contract price, for two stories, \$29,000, for three stories, \$35,000.

Warehouse—1 story and base, reinforced concrete, \$50,000. Los Angeles, Cal. Architect, none. Owners, Marlon R. Gray Co., Contractor, Hugo Eckardt, Wilcox Bldg., L. A. Contract price, \$50,000.

Warehouse—3 story and base, reinforced concrete, \$51,000. Los Angeles, Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, C. C. Golyar, Contractor, Carl Leonardt, H. W. Hollman Bldg., L. A. Contract price, \$51,000.

Tunnel Construction—\$125,000. Los Angeles, Cal. Engineer, City Engineer, Los Angeles. Owners, City of Los Angeles. Bids for the construction of the Hill Street Tunnel were opened as follows: Watson & Spicer, \$129,760; Paonessa & Taylor, \$137,850.

Stores and Lodis—1 story and base, reinforced concrete, \$66,000. Los Angeles, Cal. Architects, Edelman & Barnett, Blanchard Bldg., L. A. Owners, Isaac Bros. Contractors, Richards-Neslund Construction Co., Wright and Callender Bldg., L. A. Contract price, \$66,000.

SEATTLE AND WASHINGTON.

Post Office—2 story and base, brick and stone. Cost not stated. Olympia, Wash. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. This work has been mentioned here several times before when the plans were first out for figures. All bids have been rejected and the plans have been revised. The new figures will be opened in Washington, D. C., on May 7th. Plans and specifications can be secured from either the architect or from the Custodian of Site at Olympia.

Sea Wall and Wharf—Rock and concrete construction, \$115,000. Bremerton, Wash. City Engineer Bremerton. Owners, City of Bremerton. The City Engineer has been commissioned to prepare plans for a rock sea wall costing \$100,000, and for a municipal wharf to cost \$15,000. Working drawings are underway.

Hotel and Stores—3 story and base, reinforced concrete \$200,000. Seattle, Wash. Architect, John Graham, Lyon Bldg. Seattle. Owners, Northwest Land and Development Co. The building, which has been mentioned here several times before, will cover an area of 108x120 feet. There will be several stories on the first floor besides the hotel lobby. The second floor will be arranged for offices and the upper six floors for a modern hotel of 150 rooms. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick and terra cotta. The architect is taking figures on the work.

Residence—2 story and base, brick and steel, \$10,000. Juneau, Alaska. Architect, James Knox Taylor, Washington, D. C. Owner, U. S. Government. The following bids for the construction of this building were opened in Washington recently: Joseph

Morse, Everett, Wash. \$39,900; Chris. Kuppel, Seattle \$17,651; Black & Kent, Tacoma \$17,911; King Lumber Co., Victoria \$19,500; Wm. Bruce San Francisco \$57,775.

Church—1½ story and base, brick and stone. Cost not stated. Everett, Wash. Architect, Ellis North, Story, New York Bldg., Seattle. Owners, Trinity Episcopal Church of Everett. The edifice will be 78x120 feet. There will be a parish house built in connection. The building will be heated by steam. The interior will be handsomely finished in redwood. The exterior will be faced with stone. The plans will be complete and ready for figures in the course of the next two weeks.

Court House and Offices—20 stories and base. Class A construction. Cost not stated. Seattle, Wash. Architects, Josephians & Allen, Hinkley Bldg., Seattle. Owners, a private corporation. The architects have prepared sketches, at the request of the owners, for a proposed building which is to be erected on a whole city block. The plan of the promoters is to furnish the county with free office space on from four to five stories and devote the balance of the building to offices. There has been no action taken in regard to the matter by the county.

Garage—2 story and base, brick and steel, \$25,000. Seattle, Wash. Architect, Charles Haynes, McIlhenn Bldg., Seattle. Owner's name withheld. The building will be 28x58 feet. The structure has been designed for a commercial garage. There will be a 10,000-pound elevator. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Lodge Hall—3 story and base, Class A construction. Cost not stated. Seattle, Wash. Architects, Saunders & Lawton, Alaska Bldg., Seattle. Owners, Allied Masons. The architects were selected from among 13 competitors at the last meeting of the Building Committee. The working drawings will be started at once and complete details of the work will be published here as soon as they are obtainable.

Factory—1 story and base, reinforced concrete, \$100,000. Sumner, Wash. Architect, John Graham, Lyon Bldg., Seattle. Owners, Fleischman & Co. The announcement has just been made of the selection of Mr. Graham as the supervising architect for this work. Word has been received from the company's New York office that all matters will be in readiness to start the work by the first of the week. Mr. Graham will take all figures and supervise the construction.

Depot—2 story and base, brick, \$50,000. Walla Walla, Wash. Architect, Engineering Dept. Northern Pacific R. Co., Seattle. Owners, Northern Pacific Railroad Co. The building will contain the two waiting rooms, baggage and express rooms, offices for the station agents and department offices on the second floor. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans will be completed shortly.

Sewers, Street Paving and Water Improvements—\$20,000. Bremerton, Wash. Engineer, City Engineer, Bremerton. Owners, City of Bremerton. The recent bond issue voted carries the following sums for the above mentioned

work: Paving in business district, \$75,000; other paving, \$20,000; salt water mains, \$5,000, and \$150,000 for improvements to the water system if approved by the present owners.

Contracts Awarded.

Library—2 story and base, brick, \$15,000. Centralia, Wash. Architect's name not given. Owners, City of Centralia. Contractor, Charles Ruaz, Centralia. Contract price, \$12,357.50.

PORTLAND AND OREGON.

Bank and Offices—2 story and base, brick and stone \$25,000. Bend, Ore. Architects, Becker Bros., Northern Bank and Trust Bldg., Seattle. Owners, First National Bank of Bend. The building will contain the banking rooms only on the first floor and a number of modern offices on the upper floors. There will be a central heating system. The interior will be finished in hardwoods, marble and tile. The exterior will be faced with stone and pressed brick. The plans are being prepared.

Bridge—Steel and concrete, \$1,000,000. Portland, Ore. Engineer not selected. Owners, Cities of Portland and Vancouver, Wash. A committee has been appointed by the two cities to confer on the selection of an engineer to prepare preliminary plans for this work. The bridge will span the Columbia at this point. Details of the work will be given later.

Bridges—2, steel and concrete. Cost not stated. Lincoln Co., Ore. Engineers, Lucius Newcomb Engineering Co., Portland. Owners, Lincoln County. The engineers are completing plans for two bridges, each with a main span of 100 feet. The approaches will be built on pile foundations. The plans will be complete and ready for figures on April 15th.

Hotel—6 story and base, reinforced concrete, \$100,000. Albany, Ore. Architect Burggraf, Portland. Owners, Revere Hotel Co., Albany. The building will be 67x102 feet. There will be the main offices, lobby and dining room on the first floor and in the neighborhood of 100 guest rooms above. A large proportion of the rooms will have connecting baths. There will be steam heat and elevator service. The exterior of the building will be faced with cement plaster. The plans are to be completed with seven days and figures will be called.

City Hall—2 story and base, brick, cost not stated. Fairview, Ore. Architect, Claire H. Bristow, Portland. Owners, City of Fairview. The building will be 40x70 feet. The first floor will contain the library, council chamber and police headquarters. The second floor will be given over to a large auditorium. There will be a central heating system. The exterior of the building will probably be faced with pressed brick. The plans will be out for figures on April 1st.

Stores and Lofts—1 story and base, mill construction. Cost not stated. Portland, Ore. Architects, Bridges & Webber, Portland. Owners, Strong & Co. The building will cover an area of 88x95 feet. The first floor will be arranged for stores. The upper floors will be designed for large light lofts. There will be elevator service and steam heat. The exterior of the building will be faced with pressed brick. The architects are now preparing the working drawings.

MR. ARCHITECT:

You are keen for every improvement in the building line. You want to save money for your client and give him the best.

You want to protect him from damage suits.

In window construction you can save him money by specifying the Simplex, because it is cheaper than the common double hung.

No damage suits from window cleaners, because the Simplex is reversible.

The common double hung is out date.

The Simplex is manufactured in 49 different varieties. Send for details.

Simplex Window Co., 62 Post St.

Editorial Comment.

According to the machine news-
papers La Follette has about the whole
thing in the matter of the primary
election. If these reports are true
Roosevelt and Taft are not in it and
the next candidate for the republican
party is sure to be the Wisconsin
senator. If such is the case the Pro-
gressives will not be much disappoint-
ed. They are standing by a principle
and that principle is the rule of the
people. It is bigger than any man or
set of men and if they can win with
La Follette there will be little less
satisfaction than if they won with
Roosevelt or any other man.

The reactionaries are trying to in-
ject the personal attribute in the cam-
paign the appeal to prejudice, and be-
hind the issue as old as any device in
any political struggle. But the fact
remains that Roosevelt or La Follette
are secondary considerations and all
that the progressives want is an al-
leader who will be effective in carry-
ing out the needed reforms that are
now under way.

Governor Johnson has come out
with a signed statement stating the
causes which led to the change from
La Follette to Roosevelt in the presi-
dential campaign of the progressive
republicans of this state. By attached
letters and telegrams he shows that
the change was made after the failure
of La Follette's health and the seem-
ing impossibility of continuing an
active campaign such as would be
necessary throughout the East. All of
the progressive leaders and the man-
ager of Mr. La Follette himself is
quoted in the matter so that there can
be no possible room for doubt that
the proposition to take in Roosevelt
as the best man to carry out the
principles of the organization came
from Mr. Houser himself.

Among the numerous leaders that
the governor quotes he also refers to
the Philadelphia North American
edited by E. A. Van Valkenburg, and
the Kansas City Star, owned and
edited by W. R. Nelson. Both these
great newspapers have been the able
and consistent exponents of progres-
sive principles in the East and Middle
West. Both have tested the popular
feeling on the subject of the presi-
dential candidacy and both have come
to the inevitable conclusion that
Coley Roosevelt is the man that has
the public acoustance and the public
confidence. In answer to the Gov-
ernor's inquiry the following reply is
quoted from the editor of the Kansas
City Star:

Kansas City, Mo., Mar. 31, 1912
Governor Diram W. Johnson,
Sacramento, California.

In this section we are neither fol-
lowers of La Follette nor Roosevelt.
We are progressives working in a
great cause and so anxious for suc-
cess that we are prepared to follow
that leader who we believe most likely
to win at the polls, provided always
that he is as earnest and disinterested
as we are. The advancement of any
man is not in our minds. That
Roosevelt is much the strongest candi-
date mentioned goes without saying,
and therefore we are for Roosevelt.

(Signed) W. R. NELSON.

In the month of February the Kan-
sas City Star sent out a return postal
to all its subscribers, numbering over
273,000, with the names of various
candidates for the presidential office
printed thereon, of all political parties,
and asked them to stamp the name of
the candidate they favored. Out of
100,000 or more returns Roosevelt got
more than half of all the votes, a
clear majority over all, showing un-
questionably that he is still the most
popular choice.

Similar tests were made in the East.
So that so far as to say that the pro-
gressives who have gathered to the
banner of the Colonel have abandoned
the man they first espoused is to be
guilty of deliberate falsehood. The
action was demanded by the manager
of the Wisconsin senator himself. If
he has since changed his mind those
who are devoted to the cause of free
government should not be criticised
for following the banner of the man
who did more effective work while
president than a whole generation be-
fore him.

The Governor's statement should
clear the subject entirely and put an
end to the misrepresentations with
which the reactionary press are flood-
ing the country.

If you happen to want to send a four
pound package by mail to such re-
mote points as Sacramento or Stock-
ton, California, it will cost you sixty-
four cents in postage. But if you
want to send the same package to
Wellington in New Zealand or Con-
stantinople in Turkey it will cost you
only forty-eight cents in postage.

In the one case you are using purely
American rates. In the other you are
getting advantage of the parcels post
which all, or nearly all, of the other
civilized nations have introduced.

Surely there must be some good
reason why the parcels post is not in-
troduced into this country. Perhaps
John Wanamaker gave them when he
was Postmaster General. When asked
the objections to establishing a parcels
post he said there were four ob-
jections and he named the four leading
express companies.

Typical Specifications For Stucco.

A Composite of the Best Practice in the United States Incorporated in Specifications for Stucco on Metal Lath. Compiled by the Associated Metal Lath Manufacturers.

The merits of the stucco house are now so well recognized that arguments in its favor seem to be futile. It is assumed that the prospective builder and his architect want a stucco exterior and realize that when built, the house will look as substantial as stone, brick or solid concrete, they want a structure that will age slowly and gracefully through decades—no fall perceptibly from year to year.

This specification is offered with this realization promised, but it must be borne in mind that poor work is dear at any price. A faithful observance of every detail will give results gratifying to the architect and satisfactory to the owner.

Metal lath is recommended because wood lath absorb moisture required by the mortar. Wood lath dries out, and shrinks away from the plaster, following which the alternate shrinkage and swelling resulting from moisture causes unsightly cracks and finally failure. Wood lath, also, increases the fire risk and it will harbor vermin.

Metal lath in combination with cement plaster is "reinforced concrete" and will insure an unbroken surface—to be assured of which is at least an uncertainty when the plaster is applied direct to a wall set up in block form. The air space afforded by metal lath in construction is the most efficient insulation.

A careful following of this specification will absolutely give a construction economical and enduring.

Framing and General Construction.—Flimsy construction in framing is false economy. The best will prove cheapest. The studs spaced at 12 inches between centers wherever possible, should be run entirely from foundation to the rafters without any intervening horizontal grain in the wood. These studs shall be tied together just below the second story joists by a 4 inch board which shall be let into the joists on their inner side, so as to be flush and securely nailed to them. This board will also act as a sill for the second story joists, which in addition will be securely spiked to the sides of the studs. At two points between the foundation and the eaves, brace between the studs with 2x5 inch bridging placed horizontally but with the faces of the bridging inclined in alternate directions in adjacent spaces.

All roof gutters should be fixed and down-spouts put up before the plastering is done, the down-spouts should be temporarily placed about a foot from the wall so there will be no leak in the plastering where they are to be finally fixed.

Wood roofings or rails for tops of porrapets, balustrades, etc., are not so good as cement, for they may curl up, warp, check, crack, and in various ways fail to do what they should—keep water from getting behind the plaster. This also applies to brick chimneys which when plastered should have wide and tight caps of concrete or stone to prevent water running behind the plaster.

If only wood sills are used, they should project well from the face of the plaster and should have a good drip, either by being placed with a downward slant or by a groove rebated in the under side of the sill near enough to its edge that it will not be covered by plaster. The drip is an essential of good stucco construction that cannot be slighted. It must be used to prevent water getting behind the plaster.

Lath and plaster should not be carried all the way down to the ground; this same restriction applies to brick or stone.

Care should be taken that all trim be placed the proper distance from the studding or furring to show its right projection after the plaster is on. It is a common mistake to allow too little for the lath and plaster, with the result that moldings which should project from the face of the wall are back from it or partly buried under the plaster, thus missing the effect desired. About an inch and a half should be allowed for the lath and plaster, making sure that the projection of the moulding to show when finished is not measured as a part of this thickness.

Furring.—If so painted or galvanized steel rods or painted or galvanized crimped furring, one-quarter inch is best and it should not be over one-half inch at the most. This furring is to be applied along the face of the studding with galvanized staples.

Insulation.—After the lath on the outside has been back-plastered the air space may be divided by applying heavy building paper, quilling, felt or some suitable insulating material between the studs, fastening it by nailing wood strips over folded ends of material. This insulation should be so fastened as to clear the 2-inch bridging, leaving the preponderance of the air space on the outside. Care must be taken to keep the insulating material clear of the outside plaster and to make tight joints against the wood framing at the top and bottom of the spaces and against the bridging where the 3 inch face intercepts.

Corner Head.—If corner head is not used, there should be 6-inch strips of metal lath bent around the corners and stapled over the lathing unless the sheets of metal lath as applied are folded around the corners. Even though corner head is used, it is a good precaution to bind the corners in this way and apply the corner head over the strips of lath.

Lathing.—The lath shall be painted to protect it and it can be applied and covered with Portland cement plaster. Care should be taken not to expose the lath to the weather while it is lying about the building.

Use metal lath weighing not less than 2 lbs. per square yard, spaced at 12-inch centers and fastened horizontally over the furring strips with galvanized staples 1 1/2 x No. 11 gauge. The sheets between furring are to be tied with No. 18 galvanized wire.

Plastering.—Portland cement will

protect metal from corrosion also, purely by reason of its moisture-resisting qualities. Calcined gypsum should not be used in combination with Portland cement; the gypsum will destroy the protective quality in the cement and neither should it be used as a substitute for Portland cement. A gypsum plaster may repel moisture for a time, but Portland cement actually thrives on it.

It is not theory only that Portland cement will preserve iron or steel indefinitely; it has been well demonstrated that Portland cement stucco will endure in any habitable climate. The first and second coats and the finishing coat should have with it a mixture of waterproofing. A total thickness of plaster of about 1 1/2 inches is good practice.

It is aimed for the first and second coats to get a Portland cement mortar with as little lime in it as will make it work properly. Clean long winter cattle hair should be used.

For first and second coats and back-plastering, mix in the following proportions:

Lime Mortar.—2 barrels of hydrated lime, 1 yard of clean sharp sand free from loam, 4 bushels cattle hair. Make up at least 3 days before using.

Cement Mortar.—2 parts of clean sharp sand free from loam, 1 part Portland cement. Mix fresh in small batches as used.

The lime mortar and cement mortar should be mixed and tempered separately, measured carefully, equal parts of each, and mixed well together.

In plastering over the face of the stud, the plaster should be forced well through the lath in order to fill entirely the space between the lath and the stud. The back-plastering should be a heavy coat well troweled so that the lath is entirely enveloped. The finish coat may be done in a way to get any one of the many surfaces which give stucco its charm; this coat should contain no lime as it makes the wall more porous and if a lighter color is wanted than can be gotten with ordinary cement, a white Portland cement should be used.

The waterproofing acceptable to the architect should be mixed with the last coat of the exterior according to directions given by the waterproofing manufacturer. The lathing and plastering on the inner side of the wall need not differ from any ordinary practice.

The exterior plaster must not be allowed to set rapidly; if necessary, hang a curtain in front of the wall of briar or other material that can be kept moist for a couple of days. Stucco should never be applied when the temperature is below freezing.

Stucco on Brick.—In applying stucco over brick chimneys a half-inch painted or galvanized steel furring strip not lighter than 22 gauge should be fastened to the brick at 12-inch centers with galvanized staples 2 inches x No. 9 gauge driven into the mortar joints. The lath is fastened to the fur-

ring with No. 18 gauge galvanized wire, run through under the furring, and the same material used for lacing the ends of the sheets together between the furring strips.

The same mixture for plaster is recommended for this work as for the metal lath or standing. Before plastering, the brick should be well wetted to prevent its absorbing the moisture from the plaster, and the first coat should be forced through thoroughly so that the entire space back of the lath is filled with the Portland cement plaster and the lath enveloped.

SPECIFICATIONS FOR ELECTRICAL WIRING.

A universal specification which can be used for all classes of electrical equipments is a subject that has long been before the architects of the United States, but has never yet been solved, says Harvey E. Bloomer, electrical inspector of the Milwaukee Board of Fire Underwriters, in a paper read before a recent meeting of the Milwaukee Architects' Club. The Western Association of Electrical Inspectors appointed a committee to prepare specifications—one which could be adopted for all classes of dwellings, one for store and office buildings, and another for factories—but when submitted to the association it was decided that although great care and considerable thought had evidently been given the matter the specifications did not meet the requirements, and it was finally decided impossible to construct a universal specification. To quote Mr. Bloomer:

Inasmuch as the Western Association, composed of men of ability in electrical engineering have come to the above conclusion, I am inclined to believe that the most advisable method to adopt in making specifications is to state the number and locations of lights; the kind and location of switches; the location of outlets where the meter or meters are to be located; and the kind of wiring, whether knob and tube, rigid or flexible steel conduit or moulding. State that the wiring must be neat and in a workmanlike manner and in conformity with the rules of the Board of Fire Underwriters. It would also be well to add that before the first instalment it paid a letter of approval must be secured by the contractor from the Board of Fire Underwriters.

I have observed in many specifications obsolete and irrelevant terms indicating that a general specification such as those published in book form have been selected and filled in to suit the installation that it was intended to cover. As a consequence the specifications were lengthy, contradictory and misleading. It is this embarrassment, I am informed, that the architects are endeavoring to avoid, and consequently I suggest that the specifications be brief, explicit and free of any statements as to how the equipment should be installed excepting that it must be done in a neat and workmanlike manner, etc. By adding that the material and workmanship must meet the approval of the underwriters and confirm to their rules in every respect and detail it covers everything that you might mention and saves you considerable time and possible errors. As the underwriters' rules only take care of

the capacity of wires and not the drop in voltage it would be advisable in large installation that the maximum percentage of drop be specified.

Specifications are important and necessary in connection with electrical construction. Yet there are many other very vital features which should receive close and careful attention. One is the time when the electrician is permitted to perform his work. Too often near the electrical work has been stalled at the same time as the plumbing and heating and frequently with the result that the electrical installation, which was first class and worthy of praise, has become extremely menacing, occasionally resulting in a fire, owing to having been disturbed and crossed with pipes and other objects. I would advise that the electrician be prevented from working until all other mechanics are through and the house ready for habitation. Then after the equipment has been inspected you will know positively that it has not been disturbed. I would also advise that the lathers be permitted to work until after you are assured that the equipment has been inspected and accepted. The suggestion, however, refers only to concealed knob and tube construction as rigid steel and flexible steel conduits are not subject to the same misuses.

The underwriters' rules permit 660 watts, or twelve candle-power lamps, to a circuit which the electrician takes advantage of. Frequently after the equipment is completed it is decided when fixtures are being purchased that more lights are desired in some of the rooms than originally intended and consequently the circuits become overloaded. To avoid this, it might be well to specify eight lamps to the circuit as is being done in other towns and then there will be ample capacity to add more lamps, fans, curling irons, etc. To facilitate the work of the electrician and avoid errors and disputes it would be well to furnish him a blueprint upon which the location of the fixtures and switches and various details should be designated. This blueprint must favor and most positively be used in designating the kind and location of switches, brackets and fixtures and the number of lights in each are those adopted by the National Contractors' Association, which I believe will be pleased to furnish them on request.

With the advance of electricity for domestic purposes, the architect finds that he has new problems to solve and an ever-increasing responsibility. It is but very recently that a new appliance has been introduced that is destined to become more positively used as the time advances and that is the vacuum cleaner. The installation of this apparatus, also that stoves and all heating appliances should receive special attention and an individual circuit should be installed for each, the size wire depending upon the capacity of device.

DRIDGING OF SUEZ NEAR COMPLETION.

The number of vessels passing through the Suez canal last year was 1963 and the receipts of the canal amounted to 12,000,000 francs (\$26,800,000). The dredging of the canal to a depth of thirty-five feet (four feet deeper than former levels) has been almost finished.

Architects Meet.

Second Annual Convention of the Architectural League of the Pacific Coast Opens in Los Angeles.

The second annual convention of the Architectural League of the Pacific Coast will open in Los Angeles, on Wednesday, April 10th. The convention will close on Thursday evening with a banquet. The Hotel Angelus has been selected as the meeting place.

The Secretary, John P. Krimmel, has been notified of the attendance of a large delegations from San Francisco, Seattle, Portland, and of smaller delegations from Tacoma, Spokane and Salt Lake City. The following program has been prepared:

ORDER OF BUSINESS.

WEDNESDAY, APRIL 10TH, 1912

Morning Session, 10 O'clock.

1. Members of the League will meet on the second floor of the Hotel Angelus at 9:30 o'clock.

(a) Register their names.

(b) Address of welcome by the Hon. George Alexander, Mayor of Los Angeles, or his representative.

(c) Address of the President, Mr. A. F. Rosenbloom.

(d) The President will announce the Committees to whom addresses and reports will be referred.

(e) Convention declared open for business.

2. Reports of Committees:

Treasurer and Auditing, W. R. E. Whitcox.

Executive Council on the Membership, John Bakewell; (d) Finance; (e) Method by which the League proposes to conduct and control affairs; George W. Kellam; (f) Method of holding competitions amongst League students; Myron Hunt; (g) Plan for making drawings and prizes to be offered.

Constitution and By-laws, John Galen Howard.

Nominations.

Time and Place for Next Convention, David J. Myers.

Model, G. Albert Lansburg.

Paper—The Seattle City Plan, Carl F. Gould, Seattle.

Recess for luncheon.

Afternoon Session, 2 O'clock.

The Future of Architecture on the Pacific Coast, John Galen Howard, San Francisco.

Ethics Governing the Professional Practice of Architecture, Edgar M. Lazarus, Portland, Ore.

Discussion: The California State Law Requiring All Public Buildings to be Submitted to Competition. Led by Mr. John C. Austin, President Southern California Chapter, A. I. A.

Addresses By representatives of the several Chapters and Clubs constituting the League.

Reports: Of such Committees, appointed in the forenoon, as may be ready.

Evening, 8 O'clock.

Tenure Party, as guests of the Southern California Chapter and the Los Angeles Architectural Club.

THURSDAY, APRIL 11TH, 1912.

Morning Session, 10 O'clock.

Committee reports on the following:
1. Committee on Credentials of Delegates.

2. Reports of Committees appointed at the first session and their consideration.

- (a) President's Address.
- (b) Report of Executive Council.
- (c) Report of Standing Committees.
- (d) Report of Special Committees.
- (e) Resolutions.
- (f) Constitution and By laws.
- (g) Nominations.
- (h) Time and place for next Convention.

(i) Auditing.

Papers: Historical President in Pacific Coast Architecture, Charles H. Allen, Seattle.

Paper Rationalism of the 20th

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco—Apartment house, 3 story and base, frame, \$12,000. Architects, J. E. Kraft & Sons, Phelan Bldg., S. F. Owner, Mrs. D. May. This work was mentioned in these columns some time ago. The bids are now in the hands of the architects and a contract will be awarded shortly. The building will contain six apartments of three and four rooms each with baths. The interior will be finished in redwood. The exterior will be covered with shingles.

San Francisco—Apartment house, 5 story and base, reinforced concrete, \$35,000. Architects, O'Brien Bros., Clinton Bldg., S. F. Owner, James E. Reiter. The building will be erected on a corner lot. There will be in the neighborhood of 75 rooms and baths. The suites will be arranged in two, three and four room apartments with baths. There will be steam heat and elevator service. The exterior will be faced with cement plaster. The plans are complete and figures have been taken.

San Francisco—Apartment house, 3 story and base, frame, \$12,500. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner, S. Unger. The building will be 25x92 feet and will contain six apartments of four rooms and bath each. There will be steam heat and wall beds. The interior will be finished in redwood. The exterior will be covered with brick veneer and cement plaster on metal lath. The plans are complete and figures are being taken.

San Francisco—Apartment house, 3 story and base, frame, \$10,000. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner, A. Miquieu, 827 Monadnock Bldg. The building will be 22x66 feet and will contain six four-room apartments with baths. The interior will be finished in pine with some hardwood floors. There will be wall beds. The exterior of the building will be covered with brick veneer and cement plaster. The plans are being prepared.

San Francisco—Apartment house, 3 story and base, frame, \$12,000. Archi-

tects, Century Architecture, G. Albert Lansburgh, San Francisco.

Art, Architecture and Art Commissions, John W. Mitchell, Los Angeles.

3. Nomination and Election of Officers for the ensuing year, including the members of the Executive Council.

- 4. Unfinished business.
- 5. New business.
- 6. Miscellaneous business.
- 7. Adjournment.

Afternoon, 2:30 O'clock.

Automobile ride for delegates and visitors over prescribed route through the city and vicinity.

Evening, 7:30 for 8 O'clock.

Ringnet at Hotel Angelus.

JOHN P. KREMPEL, Secretary.

The Building and Industrial News of April 15th will contain a full and complete report of the convention with illustrations.

Stockton, San Joaquin Co., Cal.—Apartment house, 3 story and base, frame, \$10,000. Architect, Walter King, Elks' Bldg., Stockton. Owner, G. V. Risotto. The building will contain a number of small apartments arranged in two and three room suites. There will be private baths and wall beds. The interior will be finished in pine. The exterior of the building will be covered with plaster. The architect is preparing the plans.

Los Angeles, Cal.—Apartment house, 3 story and base, brick and steel. Cost not stated. Architects, Krempe & Erkes, Henne Bldg., L. A. Owner, Richard Matthias. This work has been mentioned here before when the plans were first out for figures. The bids were found to be too high and revisions have been made. The new plans will be complete and out for figures in a few days.

Los Angeles, Cal.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architects, R. E. Young & Son, Lankershim Bldg., L. A. Owner, Mrs. B. A. Yale. The building will be 100x100 feet. There will be forty rooms, lobby, large amusement rooms. There will be blue brick facing, galvanized iron cornice, pine trim, composition floors in bath rooms. There will be standard plumbing fixtures, a vacuum cleaning apparatus, wall and disappearing beds, automatic electric passenger elevator, dumb waiter and steam heating. The plans are complete and figures are being taken.

Los Angeles, Cal.—Apartment house, 4 story and base, brick and steel, \$20,000. Architect, S. Tilden Norton, Title Insurance Bldg., L. A. Owner, S. Tilden Norton. There will be sixty rooms, entrance, lobby, social and storerooms in the structure. The interior trim will be of pine and hardwood with

hardwood floors. There will be an automatic electric passenger elevator, steam heat and a vacuum cleaning system. The exterior of the building will be faced with cold pressed brick, trimmed with artificial stone, galvanized iron cornice, composition roof and fire escapes. The plans are being prepared.

Portland, Ore.—Apartments, 4, 4 story and base, brick and steel, \$80,000. Architect, Ellis F. Lawrence, Portland. Owners, (syndicate headed by the Fred A. Jacobs Co.) The owners have taken a long lease on important property and have instructed their architect to prepare the plans for four similar buildings. The plans for the first of these structures are complete, and segregated figures are being taken. The building will be 80x100 feet, and will contain 28 apartments of three and four rooms each with baths. There will be sleeping porches for each apartment. There will be a hot water heating system, disappearing beds, vacuum cleaning, automatic elevator and hardwood floors. A garbage incinerator will be erected and a central heating plant, both of which will serve all four of the apartment houses. The exterior of the building now being figured will be faced with pressed brick.

Contracts Awarded.

Los Angeles, Cal.—Apartment house, 3 story and base, brick, \$36,000. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owner, F. C. Finkle, Contractors, Pozzo Construction Co., 421 Macy St., L. A. Contract price, \$36,000.

BANKS.

Santa Barbara, Santa Barbara Co., Cal.—Bank and offices, 2 story and base, brick. Cost not stated. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, First National Bank of Santa Barbara. This work has been mentioned here before when the plans were first started. The architects have completed the working drawings and figures for the general contract are being taken. The contract for the vault work has been awarded to the Diebold Safe and Lock Co.

BRIDGES, DAMS AND HARBOR WORK.

San Francisco—Harbor work. Cost not stated. Engineer, Assistant State Engineer, Siph. Ferry Bldg., S. F. Owner, State of California. The plans for the construction of piers Nos. 30 and 32 are now out for figures and bids will be opened by the State Board of Harbor Commissioners on April 25. On the same date bids will be opened for wood block paving, and for steel rolling doors for wharf sheds. On April 15th bids will be opened for furnishing steel track specials for the Belt Line Railroad. For full particulars of this work apply to the Assistant State Engineer, Ferry Bldg.

San Francisco—Harbor work, locomotive and locomotive crane. Cost not stated. Engineer, Assistant State Engineer, Siph. Ferry Bldg., S. F. Owners, State of California. Bids for furnishing the State Harbor Commissioners with a locomotive for the Belt Line R. R. and with a 20-ton locomotive crane have been returned unopened to

the bidders and new figures will be called for shortly. The bids for furnishing 125,000 basalt paving blocks have been laid over until the next meeting.

Seattle, Wash.—Harbor work, \$3,000,000. Engineer, Paul Whitton, Seattle. Owners, City of Seattle. Engineer Paul Whitton has just been appointed to the position of Chief Engineer to the Port of Seattle Commission, and the big construction work mentioned here before will be carried out under his direction.

Contracts Awarded.

San Francisco.—Harbor work, blasting and removing rock, \$10,000. Engineer, Assistant State Engineer Saph. Perry Bldg., S. F. Owners, State of California. Contractors, O'Brien Bros. & Smith, S. F. Contract price, \$9,970.
Twiss Creek, San Bernardino Co., Cal.—Bridges, concrete, \$2,500. Engineer, County Surveyor, San Bernardino. Owners, San Bernardino County. Contractor, C. H. Leffer, Upland. Contract price, \$2,100.

CHURCHES.

Irwin, Merced Co., Cal.—Church, 1 story and base, frame. Cost not stated. Architects, Walker & Yawter, Wright and Callender Bldg., L. A. Owners, First Methodist Church of Irwin. The architects have just been commissioned to prepare plans for this work and details of the construction cannot be given at this time. The building will probably be covered with cement plaster.

Orange, Orange Co., Cal.—Church auditorium, frame and brick, \$15,000. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, Presbyterian Church of Orange. The addition will have a seating capacity of 500 people. There will be furnace heat. The interior finish will be of pine. The exterior of the building will be covered with brick veneer. The plans are complete and separate figures are being taken.

Contracts Awarded.

Santa Barbara, Santa Barbara Co., Cal.—Church, stone and brick construction, \$10,000. Architects, Frohman & Martin, Shavin Bldg., Pasadena. Owners, Trinity Episcopal Church. Contractor, Magnus Johnson, 109 West Mission St., Santa Barbara. Contract price, \$10,000.

FACTORIES & WAREHOUSES.

Los Angeles, Cal.—Warehouse, 2 story and base. Class A construction. Cost not stated. Architects, Train & Williams, Exchange Bldg., L. A. Owner's name withheld. The building will cover a ground area of 12,000 square feet and will be of steel frame construction of sufficient strength to support three additional stories. Steel beams and columns, brick curtain walls, composition roof, reinforced concrete floors, figured for 150 pounds to the square foot, steel sash doors, steel and concrete loading platforms. The architects are completing the working drawings.

Lectnes, Fresno Co., Cal.—Packing plant, 2 story and base, brick. Cost not stated. Architect's name not given. Owners, Bonner Packing Co., Fresno. Plans for a two-story brick addition to the present plant are in the hands of Charles G. Bonner, Fresno. He is

taking figures for the complete construction.

Los Angeles, Cal.—Buckling plant addition, 3 story and base, brick and concrete, \$20,000. Architect, none. Owners, Swift & Co., 322 East First St., L. A. The addition will be 30x95 feet. The interior partitions will be of hollow tile, the floors of concrete and the sash, doors and window frames will be of metal. There will be a large freight elevator. The exterior of the building will be faced with pressed brick. The owners are now taking figures.

El Centro, Imperial Co., Cal.—Grain warehouse, brick and concrete. Cost not stated. Architect, none. Owners, Imperial Grain Warehouse Co., represented by the Newmark Grain Co., L. A. The building will be of proof construction throughout and will cover an area of 60x200 feet. There will be a hollow tile roof, brick paved floors, and metal sash, doors and window frames. The plans are in the hands of the owners and figures are being taken.

Bellevue, Wash.—Warehouse, 3 story, reinforced concrete. Cost not stated. Architects, Blackwell & Baker, Northern Bank Bldg., Seattle. Owners, Inland Navigation Co., Colman Bldg., Seattle. The architects will be ready to receive figures for the general construction of this work within the next few days. The building is one of the largest construction enterprises undertaken in Ellingham in many years. In connection with this work a 200-foot dock will be built. The total expenditure will be close to \$400,000.

FIRE HOUSES.

San Francisco.—Fire house, 2 story and base, brick, \$35,000. City Architect, Alfred L. Coffey, 1291 David H. W. Bldg., S. F. Owners, City and County of San Francisco. Bids for the construction of this building, known as Engine House No. 28, and for the construction of the North End Police Station have been opened by the Board of Public Works. For a complete list of the City Bids, see under San Francisco.

FLATS.

San Francisco.—Flats, 2 story and base, frame, \$6,000. Architect, Herman Barth, 12 Geary St., S. F. Owner, Mr. Schlohn. The building will contain four flats of five and six rooms each with bath. The interior will be finished in pine with some hardwood floors. The exterior will be covered with shiplap. The plans are complete and figures are being taken.

San Francisco.—Flats, 2 story and base, frame, \$6,000. Architect, none. Owner, A. Petry, 336 Pierce St., S. F. The building will cover an area of 30x71 feet and will contain four flats of five and six rooms each with bath. The interior will be finished in pine with elm panels. There will be gas stoves. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

San Francisco.—Flats, 3 story and base, frame. Cost not stated. Architect, none. Owner, Mrs. R. Solari, 8 P. The building will contain six flats

of four and five rooms each with bath. The interior finish will be of pine and redwood with some hardwood floors. The exterior of the building will be covered with shiplap and rustle. The plans are complete and the work will be done by Day Labor.

GARAGES.

San Francisco.—Garage, 1 bay brick, square. Architects, Righetti & Headman, Placian Bldg., S. F. Owner, Mrs. S. Righetti. The building will be erected in the rear of the owner's residence in the rear of the owner's residence. The exterior will be faced with pressed brick. The plans are complete and the work will be done by Day Labor.

Seattle, Wash.—Garage, 2 story and base, brick and concrete, \$2,500. Architect, V. W. Voorhes, 5 Ellet Bldg., Seattle. Owner, E. C. Ross. The building will have a full basement. A concrete floor will be used on the first floor. There will be a machine shop, offices and sales rooms. The upper floor will be divided into offices. The exterior of the building will be faced with pressed brick. The plans are nearly complete and figures will be called for shortly.

Portland, Ore.—Garage additions, 3 story, brick and steel, \$25,000. Architect, Edward T. Root, Portland. Owner, Realty Associates. The work will consist of the addition of three stories, the installation of a 1000-pound elevator and the complete rearrangement of the first floor. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

GOVERNMENT WORK AND SUPPLIES.

The Secretary of the Interior has authorized the director of the Reclamation Service to issue advertisements calling for proposals for 26,000 bids of Portland cement for delivery during the years 1913, 1914, 1915 and 1916 for use in the construction of the Arrowrock dam, Boise irrigation project, Idaho. A contract covering the entire period will obviate considerable work incident upon advertising, awarding, and executing contracts each year. In addition to this the use of one brand of cement in the entire structure would be advantageous, in that a greater uniformity of result could be secured and the men on the work would become so accustomed to the characteristics of the material as to enable them to make a greater rate of progress.

All bids received on December 7 by the supervising architect, Treasury Department, Washington, D. C., for the construction, complete of the U. S. public building at Albany, Ore., have been rejected.

DITCH EXCAVATOR.—Bids were opened March 15 at the Klumbath Falls office of the U. S. Reclamation Service for furnishing a self-propelled ditch excavator as follows:
Stockton Iron Works, Stockton, Cal., \$64,250.
Majors Machine Co., 2014 Central avenue, Chicago, Ill., \$40,000.

HALLS & SOCIETY BLDGS.

Susanville, Lassen Co., Cal.—Lodge hall, 2 story and base, brick, \$15,000. Architects, Smith & Stewart, 241 Kearny St., S. F. Owners, Native Sons, Masonic Orders, etc. The building will be devoted exclusively to the offices of the different orders, lodge halls and banquet room. There will be a central heating system. The interior will be faced with pressed brick trimmed with local stone. The plans are nearly complete and figures will be taken shortly.

Oroville, Butte Co., Cal.—Exhibition building, 1 story and mezzanine floor, frame, \$25,000. Architects, Smith & Stewart, 241 Kearny St., S. F. Owners, Mr. Felkum and Mr. Hammond, Oroville. The building, which is to be erected for the combined purpose of an exhibition building and auditorium, will cover a ground area of 100x200 feet. There will be a gallery around the entire floor space. The floor will be of maple. The exterior of the building will be covered with cement plaster on metal lath. The foundation will be carried partly on piles. The plans are being prepared.

Kelso, Wash.—City hall, 2 story and base, brick, \$15,000. Architect, Clayton D. Wilson, Arcade Annex, Seattle. Owners, City of Kelso. The building will contain the offices of the City Clerk, City Treasurer, Police Department and Fire Chief on the first floor and a large meeting hall for the council on the second floor. There will be a central heating system. The interior finish will be of pine and hardwood. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Contracts Awarded.

Oregon City, Ore.—Lodge hall, 2 story and base, brick. Cost not stated. Architect's name not given. Owners, Oregon City Elks' Hall Association. Contractors, Simmonds & Co., Portland. Contract price, \$24,000.

HOTELS.

San Francisco—Hotel and stores, 4 story and base, brick and steel, \$45,000. Architects, O'Brien Bros., Civic Bldg., S. F. Owner's name withheld. The building will be erected in the Chinese quarter. There will be stores on the first floor and rooms above. The construction will be of a higher class than usually found in buildings in this section. The upper floors will contain a number of single rooms. There will be running water throughout the building. The exterior will be faced with pressed brick. The plans are complete and figures are being taken.

San Francisco—Hotel, 5 story and base, brick and steel, \$50,000. Architects, Cunningham & Pollock, First National Bank Bldg., S. F. Owners, Greeninger Estate. The building will be erected south of Market street. There will be a number of stores in the first floor and single rooms above. There will be steam heat and elevator service. There will be in the neighborhood of 21 bath rooms. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken on all parts of the work.

San Francisco—Hotel and cafe, 3 story and base, Class A construction, \$57,000. Architects, L. B. Dutton & Co., Chronicle Bldg., S. F. Owner, M.

H. De Young. The building will be erected on O'Farrell street near Powell. There will be a large and handsomely finished cafe on the first floor and hotel rooms with connecting baths on the upper floors. There will be a complete steel frame. The exterior will be faced with pressed brick and terra cotta. The plans are being prepared.

Los Angeles, Cal.—Hotel, 4 story and base, brick and steel. Cost not stated. Architects, California Real Estate and Building Co., 112 South Spring St., L. A. Owners, Hill Street Lot Co. The building will be 60x165 feet. The first floor will contain two stores besides the hotel lobby. The upper floors will contain 110 rooms and about 10 baths. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Roseburg, Ore.—Hotel, 5 story and base, brick and steel, \$125,000. Architects, Roberts & Roberts, Portland. Owners, President Trust Co., Portland. The building will be 80x125 feet and of semi-fire proof construction. The main floor will be given over to the office, lobby, dining room, writing rooms and parlors. There will be in the neighborhood of 125 guest rooms, about half of which will have connecting baths, on the upper floors. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The plans are now being prepared.

Bellingham, Wash.—Hotel, 6 story and base, brick and steel. Cost not stated. Architect, C. Alfred Brinkling, Seattle. Owner, Hyman Hotel Co., Bellingham. This work was mentioned here last year when the architect was notified to complete the plans for the addition to the present building. The plans are now in the hands of Leopold Schmidt, who is in Bellingham arranging for the letting of all contracts. Plans may be secured from the architect.

Seattle, Wash.—Hotel, 7 story and base, reinforced concrete, \$125,000. Architect, James H. Snack, Downs Bldg., Seattle. Owner, George W. Dilling. The building has been proposed for the past two years. The project has been revived and the architect notified to complete the working drawings. The structure will contain several stores on the first floor and in the neighborhood of 125 rooms on the upper floors. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick and terra cotta. The plans will be complete and ready for figures in the course of the next few weeks.

Contracts Awarded.

San Francisco—Hotel, 7 story and base, reinforced concrete, \$110,000. Architects, Righetti & Headman, Phelan Bldg., S. F. Owner, George Metcalf. Contractors, Mutual Construction Co., 550 Monadnock Bldg., S. F. Contract price not stated. Note: The contractors are now taking subfigures on all parts of this work.

LIBRARIES.

Lewiston, Idaho.—Library, 1 story and base, brick, \$10,000. Architect, Loring, Lewiston. Owners, City of Lewiston. The building will be in the nature of an addition to the present Carnegie Library. The design is in the classic style and will be carried out

in pressed brick. The interior will be finished in hardwood. The architect is now preparing the working drawings.

RAILROAD CONSTRUCTION—STATIONS AND EQUIPMENT.

Chehalis, Wash.—Depot, 2 story and base, brick, \$60,000. Architects, Engineering Dept., Northern Pacific R. R. Co., St. Paul. Owners, Northern Pacific R. R. Co. The building will be 60x235 feet. The building will contain the passenger depot, offices of the agent and the freight department. There will be steam heat. The exterior of the building will be faced with pressed brick. Plans may be had from the Tacoma office of the road or from the Chehalis office.

RESIDENCES.

San Francisco—Residence, 2 story and base, frame, \$10,000. Architects, McNally & McCaw, Mechanics' Institute Bldg., S. F. Owner, S. A. Born. The dwelling will contain twelve rooms and baths. There will be a finished basement with garage. The interior will be finished in redwood and hardwoods with hardwood floors throughout. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$9,000. Architects, Righetti & Headman, Phelan Bldg., S. F. Owner, T. J. Crowley. The dwelling has been designed for an eight-room house with two baths. The interior will be finished in pine and hardwoods. Hardwood floors will be used throughout. There will be furnace heat and open fire places. The mantels will be of brick and tile. The exterior of the house will be covered with cement plaster on metal lath. The plans are being prepared.

San Francisco—Residences, 2, 2 story and base, frame, \$5,000 each. Architect, none. Owners, McKillop Bros., 540 Cole St., S. F. Each dwelling will contain six rooms and bath. The interior trim will be of pine and redwood. There will be hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster and brick veneer. The plans are in the hands of the owners and the work will be done by Day Labor.

Alameda, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, V. N. Strang, 1116 Santa Clara Ave., Alameda. The bungalow will contain six rooms and bath. The interior will be finished in pine and redwood. There will be hardwood floors. There will be open fire places with attractive brick mantels. The exterior of the bungalow will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, J. E. Coffey, 1625 Bridge Ave., Oakland. The dwelling has been designed for a seven room house with

bath. The interior trim will be of redwood with some oak floors. There will be open fire places and brick mantels. The exterior will be covered with rustic. The plans are complete and in the hands of the owner. The work will be done by Day Labor.

Oakland, Cal.—Residence, 2, 2 story and base, frame, \$3,000 each. Architect, none. Owner, C. J. Pfaff, 5187 Claremont Ave., Oakland. The dwellings will each contain seven rooms and bath. The interior finish will be of pine and elm. There will be oak floors in the principal rooms. There will be open fire places with tile or brick mantels. The tile will be used in the kitchens. The exterior of the houses will be covered with rustic and shingles. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,200. Architect, none. Owner, C. M. McGregor, 160 13th St., Oakland. The dwelling has been designed for a seven-room house with bath. The interior will be finished in pine and redwood with some oak floors. There will be open fire places and brick mantels. The exterior of the house will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, L. O. Bradford, 5502 Market St., Oakland. The bungalow will contain five rooms and bath. The interior will be finished in redwood. There will be open fire places and a tile mantel. The exterior of the bungalow will be finished with rustic. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalows, 2, 2 story and base, frame, \$3,000 each. Architect, none. Owner, C. H. McGregor, 160 13th St., Oakland. The bungalows will each contain five rooms and bath. The interior finish will be of pine with some oak floors. There will be open fire places and brick or tile mantels. The exteriors will be finished in cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, Frank G. Appleby, 2120 Edwards St., Berkeley. The dwelling will contain five rooms and bath. The interior will be finished in pine throughout. There will be open fire places with brick mantels. The exterior of the bungalow will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,300. Architect, none. Owner, C. M. McGregor, 160 13th St., Oakland. The dwelling will contain 7 rooms and bath. The interior finish will be of pine with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Hillsborough, San Mateo Co., Cal.—Residence, 2 story, attic and base, reinforced concrete, \$37,000. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owner, Joseph D. Grant. The dwelling has been designed for a handsome

country residence. The architect is only now working on the preliminary sketches and details of the construction are not yet obtainable. The design will be in the Italian style. Plans will probably be complete and the work undertaken some time this spring.

Stockton, San Joaquin Co., Cal.—Residence, 2 story and base, frame, \$15,000. Architect, Walter King, Bldg. Bldg. Stockton. Owner, Mr. Kirby. The dwelling has been designed for an eight-room house with bath. The interior will be finished in pine with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. The tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with rustic. The plans are being prepared.

Los Angeles, Cal.—Residence, 2 story and base, frame, \$25,000. Architects, Althouse Bros., Stock Bldg., L. A. Owner's name withheld. The building will contain 14 rooms and 4 baths. The interior will be finished in pine, cedar and mahogany. There will be furnace heat and open fire places. The mantels will be of brick. The tile will be used extensively. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Seattle, Wash.—Residence, 2 story and base, brick, \$25,000. Architect, J. L. McHardy, New York Bldg., Seattle. Owner, R. A. Hurlbut. The dwelling has been mentioned here before. The plans have been revised and new figures are being taken. There will be hardwood trim throughout and hot water heating. The exterior of the dwelling will be faced with pressed brick. The plans are complete and figures are being taken.

Contracts Awarded.

Los Angeles, Cal.—Residence, 2 story and base, brick and frame, \$15,000. Architects, Hudson & Munsell, Stinson Bldg., L. A. Owner, Mrs. Mary A. Bridges. Contractors, Alta Planning Mill Co., 800 Madison St., L. A. Contract price, \$142,220. Note: These figures do not include the plumbing, painting and tile work.

Los Angeles, Cal.—Residence, 2 story and base, brick, \$15,000. Architects, Hudson & Munsell, Stinson Bldg., L. A. Owner, Dr. D. Granville, Madison Contractor, John L. Comer, 145 West 71st St., L. A. Contract price, \$38,857. Note: This contract does not include the plumbing, painting or tile work.

SCHOOLS.

Oakland, Cal.—Schools, 11 buildings brick and steel and reinforced concrete construction, \$1,757,500. Architects selected as given below. Owners City of Oakland. City Architect J. J. Donovan of Oakland has announced the selection of the following architects to prepare the plans for the various schools. The supervision of the construction and the letting of all contracts will be done through the office of the City Architect.

Longfellow School, 3940 and Market streets, \$300,000. Architect, C. W. Drucker, Central Bank Bldg., Oakland. Nine room addition, Class A construction.

Thirteenth Ave. School, East 13th Ave., between Cameron and Millbury,

S. E. 1000, Alameda St., Lower 10th St., Alameda Bldg., Oakland. Two-story and base, reinforced concrete, 15 rooms. Note: Only 8 rooms will be erected at this time and 10 added later.

Emerson School, 19th St. and Shafter Ave., \$100,000. Architect, John G. Brown, 100 Mission St., S. F. Two-story and base, Class A construction, 18 rooms.

Durant School, West St. between 25th and 29th streets, \$100,000. Architect, J. C. Mulgrew, Chronicle Bldg., S. F. The building will be 2 stories and basement, Class A construction, 18 rooms.

Washington School, Shattuck, between 54th and 61st streets, \$100,000. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Class A construction, 3 rooms, study hall and kindergarten.

Lockwood School, Damon Ave. and County Road, \$75,000. Architect, Lewis P. Hobart, Crocker Bldg., S. F. The building has been designed for an Intermediate High School. Two-story and base, Class A construction, 18 rooms. Note: Eight rooms will be built at once and 10 rooms added later.

Fifty-fourth Street School, 54th and Broadway streets, \$65,000. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. The building will be one-story and base, Class A construction, 8 rooms.

Park Street School, Park and Division streets, \$75,000. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. The building will be two-story and basement, Class A construction, 18 rooms. Note: Six rooms only will be built at this time, 12 will be added later.

Perry Street School, Perry and Grand Ave., \$85,000. Architect, Sydney B. Newson, Nevada Bank Bldg., S. F. The building will be for primary and grammar school purposes. Two-story and base, Class A construction, 18 rooms.

College Ave. School, College Ave., near Shattuck, \$100,000. Architect, Walter D. Reed, Oakland Bank of Savings, Oakland. The building will be two-story and basement, Class A construction, 18 rooms. Note: Twelve rooms will be erected at once and 6 added later.

Bay School, San Pablo Ave., \$15,000. Architect not selected.

Peralta Heights School, Peralta Heights, \$15,000. Architect not selected.

Alameda School, Oakland, \$10,000. Architect not selected.

San Francisco.—School vacuum cleaning system \$600. City Architect, Alfred L. Coffey, 1201 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Bids were opened for the vacuum cleaning piping in the Girls' High School. The General Engineers bid \$6, S. F. were low at \$577. For a complete list of the bids open see under San Francisco.

San Jose, Los Angeles Co., Cal.—School, 2 story and base, brick, \$100,000. Architect, A. P. Smith, 207 South Broadway, L. A. Owners, San Jose School District. All bids received by

cently for this work have been rejected and the architect instructed to revise the plans. This work is now being done and new figures will be called for within the next few weeks.

San Diego, Cal.—School group, 1 and 2 story and base, reinforced concrete buildings. Cost not stated. Architects, Quayle Bros. & Cressey, San Diego. Owners, City of San Diego. Bids opened for the general construction of these buildings show the Coast Construction Co. 4 Hill Bldg., San Diego, low at \$133,931 and E. O. Engstrom Co., L. A., next at \$162,597. It is reported that the contract will be awarded to the Engstrom Co. as the lowest responsible bidder. Munger & Munger, Pasadena, were low at \$17,979 on the heating and ventilating.

Richmond, Contra Costa Co., Cal.—School, 2 story and base, brick and steel, \$65,000. Architect, Louis D. Stone, Marchionni Bldg., Oakland. Owners, Richmond School District. Contractor, Robert Arlett, care of the architect. Contract price not stated. Note: A complete list of the bids for this work will be published next week.

Richmond, Contra Costa Co., Cal.—School, 2 story and base, brick, \$15,000. Architect, F. D. Voorhes, Central Bank Bldg., Oakland. Owners, Richmond School District. Contractors, Stockholm & Allen, S. F. Contract price not stated. Note: A complete list of these bids will be published next week.

SEWERS, STREET WORK AND WATER SYSTEMS.

Brewster, Wash.—Water system, etc. Cost not stated. City Engineer Brewster. Owners, City of Brewster. Plans are on file with the City Clerk for a municipal water system, consisting of a vertical deep well triplex pump, concrete pump house and reservoir and the laying of about 6,000 feet of water mains. Bids will be opened on April 16th. Plans and specifications can be secured from the City Clerk.

Modesto, Stanislaus Co., Cal.—Water system, pumping plant, mains, etc., \$25,000. Engineers, Roberts & Demaree, S. F. Owners, City of Modesto. The work, for which bonds have been voted, will consist of the construction of 2 steel reservoirs, each of 100,000 gallons capacity, modern pumping equipment and the material extension of the existing mains. Bids will be called for shortly.

STORES & OFFICE BUILDINGS.

San Francisco—Stores and lofts, 3 story and base, brick, \$25,000. Architects, O'Brien Bros., Clinic Bldg., S. F. Owner, Mrs. Braumsehweiger. The building will be erected in the commission district. There will be two stores on the first floor and modern lofts above. The interior of the stores will be finished in pine. There will be an elevator installed. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Oakland, Cal.—Stores and lofts, 3 story and base, brick, \$20,000. Architect, Washington J. Miller, 45 Kearny St., S. F. Owner, A. Cleak. The work has been mentioned here before when the architect was preparing the plans. The building will contain stores on the first floor and lofts above. There will be elevator service. The exterior of the structure will be faced with terra

cotta. The plans are complete and the architect is taking figures on the work.

Oakland, Cal.—Stores and offices or rooms, 6 story and base, reinforced concrete, \$125,000. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, R. J. Pavert, Delger Block, Oakland. This work was mentioned here at the time the architect was first selected. The working drawings are now complete and work will be started shortly. The owner is a well known builder and the work will be done by Day Labor. Mr Pavert is now purchasing all supplies.

Oakland, Cal.—Stores, 1 story and base, brick, \$20,000. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owner, Mr. McHenry. The building will be similar to another structure erected by the same owner. There will be six stories with plate glass windows. The exterior finish will be of pressed brick. The plans are complete and a contract will be awarded at once.

Oakland, Cal.—Stores and lofts, 3 story and base, brick and steel. Architects, Cunningham & Polton, First National Bank Bldg., S. F. Owner, A. E. Corder. The building will contain three stories on the first floor and lofts above. There will be elevator service. The stores will be finished in pine with plate glass display windows. The exterior of the building will be faced with pressed brick. The contract for the excavating has been awarded and plans for the balance of the work are nearly complete.

San Francisco—Stores and lofts, 4 story and base. Class A construction, \$10,000. Architect, Lewis H. Hobart, Crocker Bldg., S. F. Owners, Crocker Estate. The work has been mentioned here several times before. The plans have been changed from stores and offices to lofts. There will be a complete steel frame. The exterior walls will be faced with pressed brick and terra cotta. There will be steam heat and elevator service. The plans are complete and figures are being taken.

Lodi, San Joaquin Co., Cal.—Store and rooms, addition, 1 story, brick, \$8,000. Architect, Walter King, Elks' Bldg., Stockton. Owners, Friedberger and Blodgett, Lodi. The work will include the complete construction of the upper floor which will be arranged for single rooms. The interior will be finished in pine. There will be some mosaic work. The exterior will be faced with pressed brick. The plans are being prepared.

Los Angeles, Cal.—Stores and lofts, 2 story and base, steel and reinforced concrete. Cost not stated. Architects, Train & Williams, Exchange Bldg., L. A. Owner, Herk J. Goudge. The building will be 120x185 feet. The foundations will be heavy enough to support additional stories. The entire structure has been leased for a long term and construction is to be started as soon as the working drawings are complete. As yet the architects have prepared only sketches of the work and details will be given later.

Los Angeles, Cal.—Stores and offices, 12 story and base, steel and reinforced concrete. Cost not stated. Architect, Fred R. Dorn, Douglas Bldg., L. A. Owners, Frank R. Strong and Robert Marsh. The building will be designed to cover a site of 117x118 feet. But half of the structure will be erected at

this time. The first floor will contain stores and the upper floors 242 offices. There will be metal trim, elevators, vacuum cleaning system, mail chutes, marble wainscoting and tile floors. The exterior of the building will be faced with terra cotta. The architect is preparing the plans.

Seattle, Wash.—Stores and offices, 2 story and base, reinforced concrete, \$250,000. Architects, Kingsley & Eastman, Empire Bldg., Seattle. Owners, Times Publishing Co. The owners have recently purchased a new site for their building and the plans for the former structure will be revised at once to meet the requirements of the new location. The entire building will be devoted to the business of the owners. The details of the construction cannot be given at this time. The exterior will be faced with stone.

Salem, Ore.—Stores and offices, 2 story and base, brick, \$12,000. Architect, Fred Legg, Salem. Owner, J. H. Lauterman. The building will be 66x75 feet. There will be several stores on the first floor and offices above. The interior will be finished in pine. The exterior of the building will be faced with pressed brick. The plans are complete and figures will be called for at once.

Salem, Ore.—Stores, and offices, 2 story and base, brick. Cost not stated. Architect, Ellis T. Lawrence, Portland. Owner's name withheld. The building will be 53x140 feet. There will be three stores on the first floor and 32 modern offices on the upper floor. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans are complete and figures will be taken May 1st.

San Francisco—Offices, additions, 4 story and base, reinforced concrete, \$5,000. Architect, Engineering Dept. Pacific Tel and Tel Co., New Montgomery St., S. F. Owners, Pacific States Tel and Tel Co. The building will be erected in the rear of the present exchange. There will be steam heat. There will be considerable addition made to the Capp Street exchange and the interior will be modernized. The exterior of the addition will be faced with cement plaster. Plans are nearly complete and figures are being taken.

San Francisco—Stores and lofts, 2 or 3 story and base, reinforced concrete, \$10,000. Architect, Frank S. Holland, 100 Haight St., S. F. Owner's name withheld. The building will be erected in the wholesale district. There will be one store on the first floor and a large loft above and two lofts if three stories are decided upon. The exterior will be faced with cement plaster. The plans are complete and figures will be called for at once.

Oakland, Cal.—Offices, 4 story and base, brick and steel, \$50,000. Architect, Engineering Dept. Pacific Tel and Tel Co., New Montgomery St., S. F. Owners, Pacific Tel and Tel Co. The building will be an addition to the Franklin St. Exchange. There will be steam heat and other modern conveniences. The exterior will be faced with pressed brick. The plans are nearly complete and figures will be called for shortly.

Contracts Awarded.

San Francisco—Department store, 1 story and base, reinforced concrete, \$35,000. Architects, Reid Bros., Call Bldg., S. F. Owners, Hale Bros., Inc. Contractors, MacDonald & Kahn, Ri-

alto Bldg., S. F. Contract price, \$351,000.

Portland, Ore.—Stores and offices, 10 story and base, reinforced concrete. Cost not stated. Architect, Hanselmann, Portland. Owners, Multnomah Securities Co. Contractors, Leonard Construction Co., Portland. Note: This contract has been taken on the cost plus a percentage. Construction will be started at once.

THEATRES.

San Francisco—Theatre and offices, 20 story and basement. Class A construction. Cost not stated. Architect, Paul V. Deuel, Mardonough Bldg., Oakland. Owners, Temple Theatre and Realty Co. The proposed building will be 176x320 feet. The promoters have secured a site and state that considerable stock has been placed. Representatives are now in the east placing large blocks of stock and report such success that the management have hopes of starting the structure within a year. The main portion of the building will be devoted to the theatre proper and four towers, 48x48, will extend up twenty stories. The construction will be fire and earthquake proof. The representatives of the corporation can be seen at 227 Montgomery St., or 433 First National Bank Bldg., Oakland.

San Francisco—Theatre and hotel, 9 story and basement. Class A construction. Cost not stated. Architects, O'Brien Bros & Werner, Foxcroft Bldg., S. F. Owners, Tivoli Realty Co. This building has been mentioned before on several occasions. The working drawings are now complete and figures are being taken by the architect. The construction will be Class A throughout with a complete steel frame and exterior walls faced with terra cotta. There will be steam heat, metal trim, elevator service, a vacuum cleaning system and all other modern improvements.

San Pedro, Los Angeles Co., Cal.—Theatres, 1, 2 story and 1, 1 story, brick and steel, \$250,000 and \$150,000 each. Architect A. Lawrence Volk Story Bldg. L. A. Owner's name withheld. The two-story structure will be 50x100 feet and will contain besides the moving picture house a large meeting hall on the upper floor. The one-story structure will be 50x100 feet. The exteriors of both buildings will be faced with pressed brick. The plans are being prepared.

Playa del Rey, Los Angeles Co., Cal.—Amusement park, frame construction, \$200,000. Architects, Eager & Eager, Story Bldg. L. A. Owners represented by J. H. Caswell. The working drawings have not been started and details of the construction will be given later. The exterior of all buildings will be covered with cement plaster.

Portland, Ore.—Theatre, 4 story and base, brick and steel, \$250,000. Architect, De Camp, Portland. Owners, Sullivan and Conside Co. This building has been mentioned here several times before. The architect is now ready to receive figures on the heating plumbing and painting. The excavating is complete and the steel contract has been let. The work is being done by Day Labor.

Contracts Awarded.

Modesto, Stanislaus Co., Cal.—Theatre and stores, 3 story and base, brick

and steel, \$55,000. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, W. T. Messenger. Contractors, Home Construction Co., Modesto. Contract price, \$35,369. Note: This figure does not include the plumbing, electric work or painting.

SEALED PROPOSALS.

PROPOSALS FOR STEEL DOORS.

(Bids close April 25.)

OFFICE of the Board of State Harbor Commissioners, Union Depot and Ferry House, San Francisco, Cal.

Sealed Proposals or bids will be received at this office at or prior to 11:00 o'clock a. m. on Thursday, April 25, 1912, for furnishing and installing steel rolling doors on the sheds on Piers No. 30 and 32 and connecting wharf, on the waterfront of the City and County of San Francisco, in accordance with the plans for said piers and connecting wharf, and specifications prepared for these doors by the Assistant State Engineer, and adopted by the Board March 28, 1912, and on file in this office, to which special reference is hereby made.

All openings indicated on the plans shall be fitted with steel rolling doors. Each opening may be closed by a single door or by a pair of doors with a movable post between, the choice of type of door to be with the Board. The doors shall be furnished and installed complete, with guides, hoods, operating mechanism, supports, fasteners, etc.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal; said check to be made payable to the order of the Secretary of the Board, as a guarantee on the part of the successful bidder that he will within six (6) days after the acceptance of the bid and the award of contract, enter into a written contract to do said work, according to the plans and specifications prepared therefor, and will also execute and file with the Board a bond in such sum as the Board may deem adequate, with two or more sureties, to be approved by said Board and conditioned for the faithful performance by the Contractor of all the terms and conditions of said contract, nor will said bid be considered by the Board unless delivered to the Secretary, or the Assistant Secretary at the office of the Secretary at or prior to 11:00 o'clock a. m. on Thursday, April 25, 1912, at which time and place the bids will be opened. The Board reserves the right to reject any and all bids if deemed for the best interests of the State.

Bidders are invited to be present at the opening of the bids. Plans and specifications of this work to be had at Room 18, Ferry Building, upon depositing \$20.00 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid, "Bid for Steel Rolling Doors Piers No. 30 and 32."

A. V. SAPH,
Assistant State Engineer.

CONSTRUCTING WHARF.

(Bids close April 25.)

OFFICE of the Board of State Harbor Commissioners, Union Depot and Ferry House, San Francisco, Cal.

Sealed Proposals or bids will be re-

ceived at this office at or prior to 11:00 o'clock a. m. on Thursday, April 25, 1912, for furnishing materials and constructing bulkhead wharf and retaining wall on Section "11" of the seawall; Piers No. 30 and 32 and connecting wharf on the water front of the City and County of San Francisco, in accordance with the plans and specifications prepared therefor by the Assistant State Engineer and adopted by the Board March 14, 1912, and on file in this office, to which special reference is hereby made.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal; said check to be made payable to the order of the Secretary of the Board, as a guarantee on the part of the successful bidder that he will within six (6) days after the acceptance of the bid and the award of contract, enter into a written contract to do said work, according to the plans and specifications prepared therefor, and will also execute and file with the Board a bond in such sum as the Board may deem adequate, with two or more sureties, to be approved by said Board and conditioned for the faithful performance by the Contractor of all the terms and conditions of said contract, nor will said bid be considered by the Board unless delivered to the Secretary, or the Assistant Secretary at the office of the Secretary at or prior to 11:00 o'clock a. m. on Thursday, April 25, 1912, at which time and place the bids will be opened. The Board reserves the right to reject any and all bids if deemed for the best interests of the State.

Bidders are invited to be present at the opening of the bids. Plans and specifications of this work to be had at Room 18, Ferry Building, upon depositing \$20.00 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid, Bid for Piers No. 30 and 32."

A. V. SAPH,
Assistant State Engineer.

PROPOSALS FOR PAVEMENT.

(Bids close April 25.)

OFFICE of the Board of State Harbor Commissioners, Union Depot and Ferry House, San Francisco, Cal.

Sealed Proposals or bids will be received at this office at or prior to 11:00 o'clock a. m. on Thursday, April 25, 1912, for furnishing materials and constructing wood block pavement on Piers No. 30 and 32 and connecting wharf, on the waterfront of the City and County of San Francisco, in accordance with the plans and specifications for wood block pavement prepared therefor by the Assistant State Engineer and adopted by the Board March 28, 1912, and on file in this office, to which special reference is hereby made. The materials to be used in this work will consist of the requisite quantity of treated wood blocks, sand and asphalt. All materials will be subjected to a rigid examination and test, and if found defective, undersized, unsuitable or not as specified, will be condemned and must be immediately removed from the work by the contractor at his expense.

No bid will be received unless it is made on a blank form furnished from

this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal; said check to be made payable to the order of the Secretary of the Board, as a guarantee on the part of the successful bidder that he will within six (6) days after the acceptance of the bid and the award of contract, enter into a written contract to do said work, according to the plans and specifications prepared therefor, and will also execute and file with the Board a bond in such sum as the Board may deem adequate, with two or more sureties, to be approved by said Board and conditioned for the faithful performance by the Contractor of all the terms and conditions of said contract, nor will said bid be considered by the Board unless delivered to the Secretary, or the Assistant Secretary at the office of the Secretary at or prior to 11 o'clock a. m. on Thursday, April 25th, 1912, at which time and place the bids will be opened. The Board reserves the right to reject any and all bids it deemed for the best interests of the State.

Bidders are invited to be present at the opening of the bids. Plans and specifications of this work to be had at Room 18, Ferry Building, upon depositing \$2000 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid, "Bid for Wood Block Payment Piers No. 26 and 32"

A. V. SAYRE,

Assistant State Engineer.

PROPOSALS FOR STEEL RAILS.

(Bids close April 18.)

OFFICE of the Board of State Harbor Commissioners, Union Depot and Ferry House, San Francisco, Cal.

S. Engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. Army, general purchasing officer.

PROPOSALS FOR BUILDING.

(Bids close April 13.)

BUILDING, ETC.—Sealed proposals indorsed "Proposals for Administration Building" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. April 13, 1912, and then and there publicly opened, for the construction of an administration building at the naval station, Pearl Harbor, Hawaii. Plans and specifications can be obtained on application to the bureau or to the commandant of the naval station, Honolulu, Hawaii. H. R. STANFORD, Chief of Bureau.

Items desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—3 story and base, frame, \$12,000. San Francisco. Architects, J. E. Kraft & Sons, Phelan Bldg., S. F. Owner, Mrs. D. May. This work was mentioned in these columns some time ago. The bids are now in the hands of the architects and a contract will be awarded shortly. The building will contain six apartments of three and four rooms each with baths. The interior will be finished in redwood. The exterior will be covered with shingles.

Apartment House—5 story and base, reinforced concrete, \$35,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, James E. Relter. The building will be erected on a corner lot. There will be in the neighborhood of 15 rooms and baths. The suites will be arranged in two, three and four room apartments with baths. There will be steam heat and elevator service. The exterior will be faced with cement plaster. The plans are complete and figures have been taken.

Apartment House—3 story and base, frame, \$12,500. San Francisco. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner, S. F. Enger. The building will be 25x92 feet and will contain six apartments of four rooms and bath each. There will be steam heat and wall beds. The interior will be finished in redwood. The exterior will be covered with brick veneer and cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$10,000. San Francisco. Architects, McNally & McCaw, Mechanics' Institute Bldg., S. F. Owner, S. A. Born. The dwelling will contain twelve rooms and baths. There will be a finished basement with a garage. The interior will be finished in redwood and hardwoods with hardwood floors throughout. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$9,000. San Francisco. Architects, Righetti & Headman, Phelan Bldg., S. F. Owner, T. J. Crowley. The dwelling has been designed for an eight-room house with two baths. The interior will be finished in pine and hardwoods. Hardwood floors will be used throughout. There will be furnace heat and open fire places. The mantels will be of brick or tile. The tile will be used in the baths and kitchen. The exterior of the house will be covered with cement plaster on metal lath. The plans are being prepared.

Residence—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owners, McKillop Bros., 540 Cole St., S. F. Each dwelling will contain eight rooms and bath. The interior trim will be of pine and redwood. There will be hardwood floors. There will be furnace heat and

open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster and brick veneer. The plans are in the hands of the owners and the work will be done by Day Labor.

Stores and Lofts—1 story and base, brick, \$35,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, Mrs. Braunschweig. The building will be erected in the commission district. There will be two stories on the first floor and modern flats above. The interior of the stores will be finished in pine. There will be an elevator installed. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Stores and Lofts—2 or 3 story and base, reinforced concrete, \$10,000. San Francisco. Architect, Frank S. Holland, 100 Haight St., S. F. Owner's name withheld. The building will be erected in the wholesale district. There will be one store on the first floor and a large loft above and two lofts if three stories are decided upon. The exterior will be faced with cement plaster. The plans are complete and figures are being taken.

Office Additions—1 story and base, reinforced concrete, \$35,000. San Francisco. Architect, Engineering Dept., Pacific Tel. and Tel. Co., New Montgomery St., S. F. Owners, Pacific Tel. and Tel. Co. The building will be erected in the rear of the present exchange on Copp street. There will be considerable addition made to the Copp street exchange and the interior will be modernized. The exterior of the addition will be faced with cement plaster. Plans are nearly complete and figures will be called for at once.

Apartment House—2 story and base, frame, \$10,000. San Francisco. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner, A. Miquen, 825 Monadnock Bldg. The building will be 22x66 feet and will contain six four-room apartments with baths. The interior will be finished in pine with some hardwood floors. There will be wall beds. The exterior of the building will be covered with brick veneer and cement plaster. The plans are being prepared.

Apartment House—1 story and base, frame, \$12,000. San Francisco. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner, Dr. W. A. Lampe. The building will be erected on a corner and will contain eleven small apartments with connecting baths. The interior finish will be of pine. There will be steam heat and wall beds. The exterior of the building will be covered with cement plaster on metal lath. The plans are nearly complete.

Harbor Work—Cost not stated. San Francisco. Engineer, Assistant State Engineer Saph, Ferry Bldg., S. F. Owners, State of California. The plans for the construction of piers Nos. 20 and 22 are now out for figures and bids will be opened by the State Board of Harbor Commissioners on April 25th. On the same date bids will be opened for wood block paving and for steel roll-

ing doors for wharf sheds. On April 18th bids will be opened for furnishing steel track specials for the Belt Line Railroad. For full particulars of this work apply to the Assistant State Engineer, Ferry Bldg.

Hotel and Canteen—3 story and base, Class A construction, \$85,000. San Francisco. Architects, L. B. Dutton & Co., Chronicle Bldg., S. F. Owner, M. H. Young. The building will be erected on a corner lot near Euclid. There will be a large and handsomely finished cafe on the first floor and hotel rooms with connecting baths on the upper floors. There will be a complete steel frame. The exterior will be faced with pressed brick and terra cotta. The plans are being prepared.

Hotel—7 story and base, reinforced concrete, \$100,000. San Francisco. Architects, Righetti & Headman, Phelan Bldg., S. F. Owner, George Metcalf, Contractors, Mutual Construction Co., 350 Monadnock Bldg., S. F. Contract price not stated. Note: The contractors are now taking subfigures on all parts of this work.

Harbor Work, Locomotive and Locomotive Crane—Cost not stated. San Francisco. Engineer, Assistant State Engineer Saph, Ferry Bldg., S. F. Owners, State of California. Bids for furnishing the State Harbor Commissioners with a locomotive for the Belt Line R. R. and with a 20-ton locomotive crane have been returned unopened to the bidders and new figures will be called for shortly. The bids for furnishing 12,000 basalt paving blocks have been laid over until the next meeting.

Flats—2 story and base, frame, \$6,000. San Francisco. Architect, Herman Harth, 12 Geary St., S. F. Owner, Mr. Schlobo. The building will contain four flats of five and six rooms each with baths. The interior will be finished in pine with some hardwood floors. The exterior will be covered with shiplap. The plans are complete and figures are being taken.

Flats—2 story and base, frame, \$6,000. San Francisco. Architect, none. Owner, A. Perry, 326 Pierce St., S. F. The building will cover an area of 30x74 feet and will contain four flats of five and six rooms each with bath. The interior will be finished in pine with elm panels. There will be gas grates. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Garage—1 story, brick, \$6,000. San Francisco. Architects, Righetti & Headman, Phelan Bldg., S. F. Owner, Mrs. S. Righetti. The building will be erected in the rear of the owner's residence, and will be designed for a private garage. The exterior will be faced with pressed brick. The plans are complete and the work will be done by Day Labor.

Hotel and Stores—1 story and base, brick and steel, \$45,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The building will be erected in the Chinese quarter. There will be stores on the first floor and rooms above. The construction will be of a higher class than usually found in buildings in this section. The upper floors will contain a number of single rooms. There will be running water throughout the building. The exterior will be faced with

pressed brick. The plans are complete and figures are being taken.

Hotel—1 story and base, brick and steel, \$50,000. San Francisco. Architects, Cunningham & Patton, First National Bank Bldg., S. F. Owners, Greening Estate. The building will be erected south of Market street. There will be a number of stores on the first floor and single rooms above. There will be steam heat and elevator service. There will be in the neighborhood of 24 bath rooms. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken on all parts of the work.

School Vacuum Cleaning System—\$600. San Francisco. City Architect Alfred I. Coffey, 1201 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Bids were opened for the vacuum cleaning piping in the Girls' High School. The General Engineering Co., S. F., were low at \$577. For a complete list of the bids opened see under San Francisco.

Theatre and Office—2 story and basement. Class A construction. Cost not stated. San Francisco. Architect, Paul V. Deuel, Macdonough Bldg., Oakland. Owners, Temple Theatre and Realty Co. The proposed building will be 176x329 feet. The promoters have secured a site and state that considerable stock has been placed in the large blocks of stock and report such success that the management have hopes of starting the structure within a year. The main portion of the building will be devoted to the theatre proper and four towers, 18x48, will extend up twenty stories. The construction will be fire and earthquake proof. The representatives of the corporation can be seen at 227 Montgomery St., or 133 First National Bank Bldg., Oakland.

Theatre and Hotel—9 story and basement. Class A construction. Cost not stated. San Francisco. Architects, Otis Bros & Werner, Foxcroft Bldg., S. F. Owners, Tivoli Realty Co. This building has been mentioned before on several occasions. The working drawings are now complete and figures are being taken by the architect. The construction will be Class A throughout with a complete steel frame and exterior walls faced with terra cotta. There will be steam heat, metal trim, elevator service, a vacuum cleaning system and all other modern improvements.

Stores and Lofts—1 story and base, Class A construction, \$10,000. San Francisco. Architect, Lewis F. Hobart, Crocker Bldg., S. F. Owners, Crocker Estate. This building has been mentioned here several times before. The plans have been changed from stores and offices to lofts. There will be a complete steel frame. The exterior walls will be faced with pressed brick and terra cotta. There will be steam heat and elevator service. The plans are complete and figures are being taken.

Flats—1 story and base, frame. Cost not stated. San Francisco. Architect, none. Owner, Mrs. R. Scholt, S. F. The building will contain six flats of four and five rooms, each with bath. The interior finish will be of pine and redwood with some hardwood floors. The exterior of the building will be covered with shingle and rust. The plans are complete and the work will be done by Day Lath.

Contracts Awarded.

Department Store—1 story and base, reinforced concrete, \$554,000. San Francisco. Architects, Reid Bros., Call Bldg., S. F. Owners, Hale Bros., Inc. Contractors, MacDonald & Kahn, Rialto Bldg., S. F. Contract price, \$554,000.

Harbor Work—Blasting and removing rock, \$10,000. San Francisco. Engineer, Assistant State Engineer Saph, Ferry Bldg., S. P. Owners, State of California. Contractors, O'Brien Bros. & Smith, S. F. Contract price, \$9,970.

City Bids Opened.

BIDS WERE OPENED AT WEDNESDAY'S MEETING OF THE BOARD OF PUBLIC WORKS FOR A NUMBER OF JOBS.

Bids were opened at the Wednesday meeting of the Board of Public Works for the construction of the North End Police Station, for the construction of Engine House No. 28, for the vacuum cleaning system of the Girls' High School and for a number of jobs of street and sewer work. OAKLAND AND ALAMEDA COUNTY.

Bungalow—1 story and base, frame,
 \$2,000. Alameda, Alameda Co, Cal.
 Architect, none. Owner, V. N. Strang,
 1116 Santa Clara Ave., Alameda. The
 bungalow will contain six rooms and
 bath. The interior will be finished in
 pine and redwood. There will be some
 hardwood floors. There will be open
 fire places with attractive brick man-
 tels. The exterior of the bungalow
 will be covered with rustic. The plans
 are complete and the work will be
 done by Day Labor.

Bungalow—1 story and base, frame,
 \$2,000. Oakland, Cal. Architect, none.
 Owner, J. E. Cofer, 1635 Bridge Ave.,
 Oakland. The dwelling has been de-
 signed for a seven-room house with
 bath. The interior trim will be of red-
 wood with some oak floors. There will
 be open fire places and brick mantels.
 The exterior will be covered with rus-
 tic. The plans are complete and in the
 hands of the owner. The work will be
 done by Day Labor.

Residences—2, 2 story and base,
 frame, \$3,000 each. Oakland, Cal. Archi-
 tect, none. Owner, J. J. Pfaff, 5187
 Claremont Ave., Oakland. The dwell-
 ings will each contain seven rooms and
 bath. The interior finish will be of
 pine and elm. There will be oak floors
 in the principal rooms. There will be
 open fire places with tile or brick man-
 tels. Tile will be used in the kitchen.
 The exteriors of the houses will be
 covered with rustic and shingles. The
 plans are complete and the work will
 be done by Day Labor.

Residence—2 story and base, frame,
 \$3,200. Oakland, Cal. Architect, none.
 Owner, C. M. McGregor, 460 13th St.,
 Oakland. The dwelling has been de-
 signed for a seven-room house with
 bath. The interior will be finished in
 pine and redwood with some oak
 floors. There will be open fire places
 and brick mantels. The exterior of the
 house will be covered with rustic. The
 plans are complete and the work will
 be done by Day Labor.

Bungalow—1 story and base, frame,
 \$2,000. Berkeley, Alameda Co, Cal.
 Architect, none. Owner, C. O. Brad-
 hoff, 5562 Market St., Oakland. The
 bungalow will contain five rooms and
 bath. The interior will be finished in
 redwood. There will be open fire
 places and the mantels. The exterior of
 the bungalow will be finished with
 rustic. The plans are complete and
 the work will be done by Day Labor.

Bungalows—2, 1 story and base,
 frame, \$2,300 each. Architect, none.
 Owner, C. M. McGregor, 460 13th St.,
 Oakland. The bungalows will contain
 five rooms and bath each. The interior
 finish will be of pine with some oak
 floors. There will be open fire places
 and brick or tile mantels. The exter-
 iors will be finished in cement plaster
 on metal lath. The plans are complete
 and the work will be done by Day Labor.

Bungalow—1 story and base, frame,
 \$2,000. Berkeley, Alameda Co., Cal.
 Architect, none. Owner, Frank G. Ap-
 pelle, 2420 Edwards St., Berkeley. The
 dwelling will contain five rooms and
 bath. The interior will be finished in
 pine throughout. There will be an
 open fire place with brick mantel. The
 exterior of the bungalow will be covered
 with shingles. The plans are complete
 and the work will be done by Day Labor.

Offices—1 story and base, brick and base, brick and steel, \$50,000. Oakland, Cal. Architect, Engineering Dept. Pacific Tel. and Tel. Co., New Montgomery St., S. F. Owners, Pacific Tel. and Tel. Co. The building will be an addition to the Franklin street exchange. There will be steam heat and other modern conveniences. The exterior will be faced with pressed brick. The plans are nearly complete and figures will be called for shortly.

Stores and Lofts—2 story and base, brick, \$30,000. Oakland, Cal. Architect, Washington J. Miller, 45 Kearny St., S. F. Owner, A. Cheek. The work has been mentioned here before when the architect was preparing the plans. The building will contain stores on the first floor and lofts above. There will be elevator service. The exterior of the structure will be faced with terra cotta. The plans are complete and the architect is taking figures on the work. **Stores and Offices or Rooms**—1 story and base, reinforced concrete, \$125,000. Oakland, Cal. Architect, A. W. Smith, 1019 Broadway, Oakland, Owner, R. J. Pavert, Delger Block, Oakland. This work was mentioned here before at the time the architect was first selected. The working drawings are now complete and work will be started shortly. The owner is a well known builder and the work will be done by Day Labor. Mr. Pavert is now purchasing all supplies.

Stores—1 story and base, brick, \$20,000. Oakland, Cal. Architect, C. W. Dickey, Central Bank Bldg., Oakland, Owner, Mr. McHenry. The building will be similar to another structure erected by the same owner. There will be six stores with plate glass windows. The exterior finish will be of pressed brick. The plans are complete and a contract will be awarded at once.

Stores and Lofts—2 story and base, brick and steel, \$25,000. Oakland, Cal. Architects, Cunningham and Politeo, First National Bank Bldg., S. F. Owner, A. E. Corder. The building will contain three stores on the first floor and lofts above. There will be elevator service. The stores will be finished in pine with plate glass display windows. The exterior of the building will be faced with pressed brick. The contract for the excavating has been awarded and plans for the balance of the work are nearly complete.

Residence—2 story and base, frame, \$3,300. Oakland, Cal. Architect, none. Owner, C. M. McGregor, 460 13th St., Oakland. The dwelling will contain 7 rooms and bath. The interior finish will be of pine with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Schools—14 buildings, brick and steel and reinforced concrete construction, \$1,755,900. Oakland, Cal. Architects selected as given below. Owners, City of Oakland. City Architect J. A. Donovan of Oakland has announced the selection of the following architects to prepare the plans for the various schools. The supervision of the construction and the letting of all contracts will be done through the office of the City Architect:

Longfellow School, 29th and Market streets, \$100,000. Architect, C. W. Dickey, Central Bank Bldg., Oakland.

Nine-room addition, Class A construction. Thirteenth Ave. School, East 13th Ave., between Cameron and Millbury, \$75,000. Architect, Lewis S. Stone, Macdonough Bldg., Oakland. Two-story and base, reinforced concrete, 18 rooms. Note: Only 8 rooms will be created at this time and 10 added later.

Emerson School, 49th St. and Shafter Ave., \$160,000. Architect, John Galen Howard, 601 Mission St., S. F. Two-story and base, Class A construction, 18 rooms.

Infant School, West St., between 25th and 29th streets, \$160,000. Architect, Louis C. Mulgard, Chronicle Bldg., S. F. The building will be 2 stories and basement. Class A construction, 18 rooms.

Washington School, Shattuck, between 59th and 61st streets, \$100,000. Architect, Lewis E. Hobart, Crocker Bldg., S. F. Class A construction, 9 rooms, assembly hall and kindergarten.

Lockwood School, Union Ave. and County Road, \$75,000. Architect, Lewis P. Hobart, Crocker Bldg., S. F. The building has been designed for an Intermediate High School. Two-story and base, Class A construction, 18 rooms. Note: Eight rooms will be built at once and 10 rooms added later.

Fifty-fourth Street School, 54th and Market streets, \$65,000. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. The building will be one-story and basement. Class A construction, 8 rooms.

Perry Street School, Park and Division streets, \$75,000. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. The building will be two-story and basement. Class A construction, 18 rooms. Note: Six rooms only will be built at this time, 12 will be added later.

Perry Street School, Perry and Grand Ave., \$85,000. Architect, Sidney B. Newson, Nevada Bank Bldg., S. F. The building will be for primary and grammar school purposes. Two-story and base, Class A construction, 18 rooms.

Pewee School, Carrington and 10th streets, \$100,000. Architect, W. J. Mathews, 559 Broadway, Oakland. Two-story and basement, Class A construction, Intermediate High School. Note: Twelve rooms will be created at once and 6 added later.

College Ave. School, College Ave., near Shafter, \$100,000. Architect, Walter D. Reed, Oakland Bank of Savings, Oakland. The building will be two-story and basement. Class A construction, 18 rooms. Note: Twelve rooms will be created at once and 6 added later.

Ray School, San Pablo Ave., \$15,000. Architect, not selected.

Peralta Heights School, Peralta Heights, \$45,000. Architect, not selected.

Alameda School, Oakland, \$10,000. Architect, not selected.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

Exhibition Building—1 story and mezzanine floor, frame, \$25,000. Oroville, Butte Co., Cal. Architects, Smith & Stewart, 244 Kearny St., S. F. Owners, Mr. Felkelin and Mr. Hammond, Oroville. The building, which is to be erected for the combined purpose of an exhibition building and auditorium, will cover a ground area of 100x200 feet. There will be a gallery around the entire floor space. The floor will be of maple. The exterior of the building will be covered with cement plaster on metal lath. The foundation will be carried partly on piles. The plans are being prepared.

Apartment House—2 story and base, frame, \$10,000. Stockton, San Joaquin Co., Cal. Architect, Walter King, Elks' Bldg., Stockton. Owner, G. V. Risetto. The building will contain a number of small apartments arranged in two and three room suites. There will be private baths and wall beds. The interior will be finished with rustic. The architect is preparing the plans.

Lodge Hall—2 story and base, brick, \$15,000. Susanville, Lassen Co., Cal. Architects, Smith & Stewart, 244 Kearny St., S. F. Owners, Native Sons, Masonic Orders, etc. The building will be devoted exclusively to the offices of the different orders, lodge halls and banquet room. There will be a central heating system. The interior will be faced with pressed brick trimmed with local stone. The plans are nearly complete and figures will be taken shortly.

Residence—2 story and base, frame, \$4,000. Stockton, San Joaquin Co., Cal. Architect, Walter King, Elks' Bldg., Stockton. Owner, Mr. Kurty. The dwelling has been designed for an eight-room house with bath. The interior will be finished in pine with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be faced with rustic. The plans are being prepared.

Store and Rooms—Addition, 1 story brick, \$8,000. Lodi, San Joaquin Co., Cal. Architect, Walter King, Elks' Bldg., Stockton. Owners, Friedberger & Blodgett, Lodi. The work will include the complete construction of the upper floor which will be arranged for single rooms. The interior will be finished in pine. There will be some mastic work. The exterior will be faced with pressed brick. The plans are being prepared.

LOS ANGELES AND SOUTH-ERN CALIFORNIA.

Warehouse—2 story and base. Class
A construction. Cost not stated. Los
Angeles, Cal. Architects, Train &
Williams, Exchange Bldg., L. A. Owner's
name withheld. The building will
cover a ground area of 12,000 square
feet and will be of steel frame con-
struction of sufficient strength to sup-
port three additional stories. Steel
beams and columns, brick curtain
walls, composition roof, reinforced con-
crete floors, figured for 150 pounds to
the square foot, steel sash doors, steel
and concrete loading platforms. The
architects are completing the working
drawings.

Apartment House—3 story and base,
brick and steel. Cost not stated. Los
Angeles, Cal. Architects, Krenpel &
Erkes, Heine Bldg., L. A. Owner,
Richard Matthias. This work has been
mentioned here before when the plans
were first out for figures. The bids
were found to be too high and re-
visions have been made. The new plans
will be complete and out for figures
in a few days.

Apartment House—4 story and base,
brick and steel. Cost not stated. Los
Angeles, Cal. Architects, R. B. Young &
Son, Lankershim Bldg., L. A. Owner,
Mrs. R. A. Yale. The building will be
50x60 feet. There will be forty rooms,
lobby, large amusement rooms. There
will be blue brick facing, galvanized
iron cornice, pine trim, composition
floors in bath rooms. There will be
standard plumbing fixtures, a vacuum
cleaning apparatus, wall and disap-
pearing beds, automatic electric pas-
senger elevator, dumb waiter and
steam heating. The plans are complete
and figures are being taken.

Apartment House—4 story and base, brick and steel, \$30,000. Los Angeles, Cal. Architect, S. Tilden Norton, Tilden Insurance Bldg., L. A. Owner, S. T. Norton. There will be sixty rooms, entrance, lobby, social and storerooms in the structure. The interior trim will be of pine and hardwoods with hardwood floors. There will be an automatic electric passenger elevator, steam heat and a vacuum cleaning system. The exterior of the building will be faced with cold pressed brick, trimmed with artificial stone, galvanized iron cornice, composition roof and fire escapes. The plans are being prepared.

Bank and Offices—2 story and base, brick. Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, First National Bank of Santa Barbara. This work has been mentioned here before when the plans were first started. The architects have completed the working drawings and figures for the general contract are being taken. The contract for the vault work has been awarded to the Bi-Hold Safe and Lock Co.

Church—1 story and base, frame. Cost not stated. Irwin, Merced Co., Cal. Architects, Walker & Vawter, Wright and Callender Bldg., L. A. Owners, First Methodist Church of Irwin. The architects have just been commissioned to prepare plans for this work, and details of the construction cannot be given at this time. The building will probably be covered with cement plaster.

Church Auditorium—Frame and brick, \$15,000. Orange, Orange Co., Cal. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, Presbyterian Church of Orange. The addition will have a seating capacity of 500 people. There will be furnace heat. The interior finish will be of pine. The exterior of the building will be covered with brick veneer. The plans are complete and separate figures are being taken.

Packing Plant—2 story and base, brick. Cost not stated. Locans, Fresno Co., Cal. Architect's name not given. Owners, Bonner Packing Co., Fresno. Plans for a two-story brick addition to the present plant are in the hands of Charles A. Bonner, Fresno. He is taking figures for the complete construction.

Packing Plant Addition—2 story and base, brick and concrete, \$20,000. Los Angeles, Cal. Architect, none. Owners, Swift & Co., 922 East First St., L. A. The addition will be 30x96 feet. The interior partitions will be of hollow tile, the floors of concrete and the sash, doors and window frames will be of L. A. There will be a large freight elevator. The exterior of the building will be faced with pressed brick. The owners are now taking figures.

Grain Warehouse—Brick and concrete. Cost not stated. El Centro, Imperial Co., Cal. Architect, none. Owners, Imperial Grain and Warehouse Co., represented by the Newmark Co., L. A. The building will be of fire proof construction throughout, and will cover an area of 60x300 feet. There will be a hollow tile roof, brick paved floors and metal sash, doors and window frames. The plans are in the hands of the owners and figures are

being taken.

Hotel—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, California Real Estate Co., 112 South Spring St., L. A. Owners, Hill St., Lot Co. The building will be 60x165 feet. The first floor will contain two stores besides the hotel lobby. The upper floors will contain 110 rooms and about 40 baths. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Residence—2 story and base, frame, \$25,000. Los Angeles, Cal. Architects, Althouse Bros., Story Bldg., L. A. Owners name withheld. The building will contain 14 rooms and four baths. The interior will be finished in pine, cedar, and mahogany. There will be furnace heat and open fire places. The mantels will be brick. Tile will be used extensively. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

School—2 story and base, brick, \$40,000. Van Nuys, Los Angeles Co., Cal. Architect, A. C. Smith, 307 So. Broadway, L. A. Owners, Van Nuys School District. All bids received recently for this work have been rejected and the architect instructed to revise the plans. This work is now being done and new figures will be called for within the next few weeks.

School Group—1 and 2 story and base, reinforced concrete buildings. Cost not stated. San Diego, Cal. Architects, Quayle Bros. & Cressey, San Diego. Owners, City of San Diego. Bids opened for the general construction of these buildings show the Coast Construction Co., 4 Hill Bldg., San Diego, low at \$152,334, and E. O. Engstrom Co., L. A., next at \$165,267. It is reported that the contract will be awarded to the Engstrom Co. as the lowest responsible bidder. Munger & Munger, Pasadena, were low at \$17,979, on the heating and ventilating.

Stores and Lofts—3 story and base, steel and reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owner, Herbert J. Goudge. The building will be 120x185 feet. The foundations will be heavy enough to support additional stories. The entire structure has been leased for a long term and construction is to be started as soon as the working drawings are complete. As yet the architects have prepared only sketches of the work and details will be given later.

Stores and Offices—12 story and base, steel and reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, Fred D. Dorn, Douglas Bldg., L. A. Owners, Frank R. Strong and Robert Marsh. The building will be designed to cover a site of 11x148 feet. But half of the structure will be erected at this time. The first floor will contain stores and the upper floors 242 offices. There will be metal trim, elevators, vacuum cleaning system, mail chutes, marble wainscoting and tile floors. The exterior of the building will be faced with terra cotta. The architect is preparing the plans.

Theatres—1, 2 story and 1, 1 story, brick and steel, \$25,000 and \$15,000 each. San Pedro, Los Angeles Co., Cal. Architect, A. Lawrence Valk, Story

Bldg., L. A. Owner's name withheld. The two-story structure will be 50x100 feet and will contain besides the moving picture house a large meeting hall on the upper floor. The one-story structure will be 50x110 feet. The exteriors of both buildings will be faced with pressed brick. The plans are being prepared.

Amusement Park—Frame construction, \$200,000. Playa del Rey, Los Angeles Co., Cal. Architects, Eager & Eager, Story Bldg., L. A. Owners represented by J. H. Caswell. The working drawings have not been started and details of the construction will be given later. The exterior of all buildings will be covered with cement plaster.

Contracts Awarded.

Apartment House—3 story and base, brick, \$36,000. Los Angeles, Cal. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owner, F. C. Finkle, Contractors, Pozzo Construction Co., 421 Macy St., L. A. Contract price, \$36,000.

Bridges—Concrete, \$2,500. Twin Creek, San Bernardino Co., Cal. Engineer, County Surveyor, San Bernardino. Owners, San Bernardino County. Contractor, C. H. Leffer, Thila. Contract price, \$2,100.

Church—Stone and brick construction, \$10,000. Santa Barbara, Santa Barbara Co., Cal. Architects, Frohman & Martin, Slavin Bldg., Pasadena. Owners, Trinity Episcopal Church. Contractor, Magnus Johnson, 109 West Mission St., Santa Barbara. Contract price, \$10,000.

Residence—2 story and base, brick and frame, \$15,000. Los Angeles, Cal. Architects, Hudson & Munsell, Stinson Bldg., L. A. Owner, Mrs. Mary A. Briggs, Contractors, Alta Planing Mill Co., 320 McCarty St., L. A. Contract price, \$14,226. Note: This figure does not include the plumbing, painting or the work.

Residence—2 story and base, brick \$15,000. Los Angeles, Cal. Architects Hudson & Munsell, Stinson Bldg., L. A. Owner, Dr. D. Granville MacGowan. Contractor, John L. Conner, 435 West 31st St., L. A. Contract price, \$36,887. Note: This contract does not include the plumbing, painting or tile work.

SEATTLE AND WASHINGTON

Harbor Work—\$5,000,000. Seattle Wash. Engineer, Paul Whitton, Seattle. Owners, City of Seattle. Seal Engineer Paul Whitton has just been appointed to the position of Chief Engineer to the Port of Seattle Commission, and the big construction work mentioned here before will be carried out under his direction.

Warehouse—8 story, reinforced concrete. Cost not stated. Bellingham Wash. Architects, Blackwell & Baker, Northern Bank Bldg., Seattle. Owners, Inland Navigation Co., Colma Bldg., Seattle. The architects will be ready to receive figures for the general construction of this work within the next few days. The building is one of the largest construction enterprise undertaken in the Puget Sound in many years. In connection with this work a 200-foot dock will be built. The total expenditure will be close to \$100,000.

Garage—2 story and base, brick and concrete, \$25,000. Seattle, Wash. Architect, V. W. Voorhees, Ellet Bldg., Se

attle. Owner, E. C. Roe. The building will have a full basement. A concrete floor will be used on the first floor. There will be a machine shop, offices and sales rooms. The upper floor will be divided into offices. The exterior of the building will be faced with pressed brick. The plans are nearly complete and figures will be called for shortly.

Hotel—2 story and base, brick and steel. Cost not stated. Bellingham, Wash. Architect, C. Alfred Briefling, Seattle. Owner, Byron Hotel Co., Bellingham. This work was mentioned here last year when the architect was notified to complete the plans for the addition to the present building. The plans are now in the hands of Leopold Schmidt, who is in Bellingham arranging for the letting of all contracts. Plans may also be secured from the architect.

Hotel—7 story and base, reinforced concrete. \$25,000. Seattle, Wash. Architect, James H. Schack, Downs Bldg., Seattle. Owner, George W. Dilling. The building has been proposed for the past two years. The project has been revived and the architect notified to complete the working drawings. The structure will contain several stories on the first floor and in the neighborhood of 125 rooms on the upper floors. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick and terra cotta. The plans will be complete and ready for figures in the course of the next few weeks.

City Hall—2 story and base, brick. \$15,000. Kelso, Wash. Architect, Clayton D. Wilson, Arcade Annex, Seattle. Owners, City of Kelso. The building will contain the offices of the City Clerk, City Treasurer, Police Department and Fire Chief on the first floor and a large meeting hall for the council on the second floor. There will be a central heating system. The interior finish will be of pine and hardwood. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Library—1 story and base, brick. \$10,000. Lewiston, Idaho. Architect, Loring, Lewiston. Owners, City of Lewiston. The building will be in the nature of an addition to the present Carnegie Library. The design is in the classic style, and will be carried out in pressed brick. The interior will be finished in hardwood. The architect is now preparing the working drawings.

Depot—2 story and base, brick. \$60,000. Chehalis, Wash. Architects, Engineering Dept. Northern Pacific R. R. Co., St. Paul. Owners, Northern Pacific R. R. Co. The building will be 60x235 feet. The building will contain the passenger depot, offices of the agent and the freight department. There will be steam heat. The exterior of the building will be faced with pressed brick. Plans may be had from the Tacoma office of the road or from the Chehalis office.

Residence—2½ story and base, brick. \$25,000. Seattle, Wash. Architect, J. L. McCauley, New York Bldg., Seattle. Owner, R. A. Hurlbut. The dwelling has been mentioned here before. The plans have been revised and new figures are being taken. There will be hardwood trim throughout and hot water heating. The ex-

terior of the dwelling will be faced with pressed brick. The plans are complete and figures are being taken.

Water System, Etc.—Cost not stated. Brewster, Wash. City Engineer Brewster. Owners, City of Brewster. Plans are on file with the City Clerk for a municipal water system, consisting of a vertical deep well triplex pump, concrete pump house and reservoir, and the laying of about 6,000 feet of water mains. Bids will be opened on April 16th. Plans and specifications can be secured from the City Clerk.

Stores and Offices—2 story and base, reinforced concrete. \$250,000. Seattle, Wash. Architects, Kingsley & Eastman, Empire Bldg., Seattle. Owners, Times Publishing Co. The owners have recently purchased a new site for their building, and the plans for the former structure will be revised at once to meet the requirements of the new location. The entire building will be devoted to the business of the owners. The details of the construction cannot be given at this time. The exterior will be faced with stone.

PORTLAND AND OREGON.

Apartments—1, 1 story and base, brick and steel. \$8,000. Portland. Architect, Ellis F. Lawrence, Portland. Owners (syndicate headed by the Fred A. Jacobs Co.) The owners have taken a long term lease on important property and have instructed their architect to prepare the plans for four similar buildings. The plans for the first of these structures are complete and segregated figures are being taken. The building will be 50x100 feet, and will contain 28 apartments of three and four rooms each with baths. There will be sleeping porches for each apartment. There will be a hot water heating system, disappearing beds, vacuum cleaning, automatic elevator and hardwood floors. A garbage incinerator will be erected and a central heating plant, both of which will serve all four of the apartment houses. The exterior of the building now being figured will be faced with pressed brick.

Garage Additions—3 story, brick and steel. \$25,000. Portland, Ore. Architect, Edward T. Root, Portland. Owner, Realty Associates. The work will consist of the addition of three stories, the installation of a 10,000-pound elevator and the complete rearrangement of the first floor. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Hotel—5 story and base, brick and steel. \$125,000. Roseburg, Ore. Architects, Roberts & Roberts, Portland. Owners, Provident Trust Co., Portland. The building will be 80x125 feet, and of semi-fire proof construction. The main floor will be given over to the lobby, dining room, writing room and parlors. There will be in the neighborhood of 125 guest rooms, about half of which will have connecting baths on the upper floors. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The plans are now being prepared.

Stores and Offices—2 story and base, brick. \$12,000. Salem, Ore. Architect, Fred Legg, Salem. Owner, J. H. Lauterman. The building will be 60x75 feet. There will be several stories on

the first floor and offices above. The interior will be finished in pine. The exterior of the building will be faced with pressed brick. The plans are complete and figures will be called for at once.

Stores and Offices—2 story and base, brick. Cost not stated. Salem, Ore. Architect, Ellis F. Lawrence, Portland. Owner's name withheld. The building will be 35x110 feet. There will be three stories on the first floor and 32 modern offices on the upper floor. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans are complete and figures will be taken May 1st.

Theatre—1 story and base, brick and steel. \$250,000. Portland, Ore. Architect, De Camp, Portland. Owners, Sullivan and Condit Co. This building has been mentioned here several times before. The architect is now ready to receive figures on the heating, plumbing and painting. The excavating is complete and the steel contract has been let. The work is being done by Day Labor.

Contracts Awarded.

Lodge Hall—2 story and base, brick. Cost not stated. Oregon City, Ore. Architect's name not given. Owners, Oregon City Elks' Hall Association. Contractors, Simmonds & Co., Portland. Contract price, \$24,000.

Stores and Offices—1 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architect, Hanselman, Portland. Owners, Multnomah Securities Co. Contractors, Leonard Construction Co., Portland. Note: This contract has been taken on the cost plus a percentage. Construction will be started at once.

CONSTRUCTION WORK ABROAD.

CANADA.

Building Construction—Railway Plans.

Indications point to considerable building during the ensuing summer and fall. Hence there should be an increased demand for building material, particularly builders' hardware.

It appears that the Canadian Northern Railroad is planning to build an electric railway from Toronto to St. Catharines, joining there with the road already laid to Niagara Falls.

It is reported that certain Belgian interests have concluded to construct an electric railway from London to Windsor, to which end a charter has been obtained.

Opens up Rich Farming Area.

In the southernmost part of Canada, on the northern shore of the western half of Lake Erie, are three counties of very rich agricultural land, which will be traversed by the electric railway above mentioned. This vicinity is about the only area in

Canada that will produce corn in marketable quantities, it being reported to yield as high as 100 bushels to the acre. It also about the only place where tobacco can be grown in Ontario. It would appear that the fertility of this locality was not fully appreciated until a few years ago.

Within the last 18 months American concerns have obtained options on about 25,000 acres of this land, which they are materially improving and cutting up into smaller farms for the new buyers coming from all directions. It

appears that there are 80 English farmers en route to this locality to be located on 20-acre farms in what is known as the celery and onion district. Land values in this vicinity have increased 50 per cent within the last two years.

New Line to Be Built with Belgian Money.

The Railway Committee of the Canadian House of Commons has decided to renew the charter granted in 1906 for an electric railway from Windsor to London by way of Chatham.

The new line is a proposed extension of the Windsor, Essex & Lake Shore Railway. It will branch off the present line between Maidstone and Essex, running through South Woodlee and Tilbury to Chatham and thence to London.

Sometime ago directors of the Windsor, Essex & Lake Shore Railway interested some Belgian capitalists in the new line, and now that the charter has been extended, it is said the capitalists are prepared to invest a large sum of money in the project.

Street Car and Hydroelectric Enterprises.

A five-mile interurban street car line is to be built from Fredrickton to Springhill. It is to be on a one-car service this summer, with a storage battery, and later will become a part of the city system.

A bill will be introduced at the coming session of the provincial legislature to incorporate the New Brunswick Hydroelectric Co., utilizing the water power in the Lepreau and Magogadavie Rivers and their tributaries to generate and transmit electric, hydraulic, pneumatic and others forms of power. This will provide for this city and the neighboring towns a cheap and economical power. The company intends to commence operations in a short time.

New Railway Shops in Canada.

It is announced in press dispatches that a contract, valued at about \$2,500,000, has been placed by the Canadian Pacific Railway with a firm in New York for the construction of new shops near Calgary, Alberta. The new buildings will include a main locomotive shop, 305 by 712 feet, to accommodate erecting, machine, blacksmith, and boiler shops; tender and wheel shop, 180 by 240 feet; storehouse and office building, 80 by 250 feet, in two stories; oil house, 42 by 192 feet; foundry, 80 by 294 feet; pattern shop, 20 by 160 feet; coach-repair and paint shops, 146 by 562 feet; freight-car repair shop, 231 by 300 feet; power house, 81 by 104 feet, to provide steam for heating the shops and for other purposes; planing mill, 80 by 300 feet, to contain the woodworking machinery; and mess building, 30 by 150 feet, in two stories. Several of the buildings will be provided with electric traveling cranes and also cranes of the jib pattern, while a high-speed traveling crane of 16 tons capacity will operate in the yard on about 1,200 feet of track. The work also includes the provision of a 75-foot transfer table having a capacity of 150 tons and various small buildings for minor purposes.

MR. ARCHITECT:

You are keen for every improvement in the building line. You want to save money for your client and give him the best.

You want to protect him from damage suits.

In window construction you can save him money by specifying the Simplex, because it is cheaper than the common double hung.

No damage suits from window cleaners, because the Simplex is reversible.

The common double hung is out date.

The Simplex is manufactured in 49 different varieties.

Send for details.

Editorial Comment.

Building statistics for the month of March show comparatively little activity, except in a few spots. Reports from 13 cities representing building centers throughout the country show a loss of seven-tenths of one per cent over the same month last year. This in showed a gain of more than eleven millions over March 1911, about one-fourth of the entire amount reported.

Outside of New York, New Orleans and Des Moines, Iowa, and a few of the minor New England cities show a gain and the total from the others show a uniform decrease.

Of the Pacific Coast cities San Francisco, Seattle and Spokane show a gain while, Los Angeles, Portland and Tacoma show a loss. The following list shows the official reports made to the American Contractor, Chicago:

City.	March, 1912.	March, 1911.

The steamship Titanic seems to have gone down in record time considering modern construction of ships and the enormous size of the vessel. There is a good deal of speculation as to just what happened to her as with her many water tight compartments it was thought that under almost any kind of disaster she would still keep afloat. From the news that has filtered through it seems that the great ship went down in four hours time or less under these circumstances the collision with the iceberg must have practically destroyed the ship. Otherwise if they had simply been an injury to her bow or forward apartment the vessel would have remained afloat for a number of hours.

As it is this seems to have been the record disaster of the sea, both as to lives lost and property destruction. Perhaps the very size and speed of the vessel were the causes of the appalling disaster. These two elements which are the principal factors in the ease and comfort of travel were in all probability the great ships undoing.

What lesson the disaster will teach remains to be seen. Whether it is practiced to build so large a vessel, whether she is as safe to handle and what are the risks attendant are questions to be determined. Whether or not this will affect the contest of the shipbuilding companies in constructing larger and larger vessels remains to be seen.

One thing the disaster does emphasize, however, is the value of wireless telegraphy. Had it not been for this apparatus on board the fate of the great ship would have perhaps never been known. For the ship foundered amongst the ice floes and in all probability few, if any, of the survivors would have ever been picked up. This suggests the necessity of suitable wireless equipment of all vessels and the regulation, if possible, of private stations. For wireless signals are often interfered with by these private stations butting into the message being sent and confusing important communications.

Even the reactionary newspapers now admit that Roosevelt is a formidable candidate. Since his victory in Pennsylvania there is no longer any room for doubt that the contest is with the Colonel and not with Senator La Follette. Above all there is a growing conviction sitting through the most prejudiced hardshell politician that even if nominated Taft could never win. So it will be up to the powers that be of the privileged classes to combine on some other man or switch to the democratic candidate and control his election and destiny if possible.

Second Annual Convention Of The Architectural League Of The Pacific Coast Held At Los Angeles.

APRIL 10 AND 11, 1912.

The Second Annual Convention of the Architectural League of the Pacific Coast opened in the Convention Hall on the second floor of the Angels Hotel at Los Angeles on April 10th. The registration of delegates and visiting members at that hour showed a list of sixty members among whom were included a large delegation from San Francisco, San Diego, Portland, and Seattle with representatives from Salt Lake City, Tacoma, Spokane and smaller interior towns in California. Among those registered from San Francisco were the names of William Curlett, Willis Polk, Sylvain Schnaitacher, Lionel Deane, J. Cather Newsum and C. H. Russell.

The morning was particularly inclement, a rain falling steadily and a southwest wind blowing making it disagreeable to be outside. The meeting was called to order by the President, A. F. Rosenheim, of Los Angeles, and after a preliminary statement was adjourned till the afternoon session at two o'clock in order that the members might have time to register and the preliminary work be effected.

At 2 P. M. the regular meeting convened and after a short address by the president, in which he touched on the history and purposes of the League and what had been accomplished and the splendid future that was in store for the Architects of the Pacific Coast, the regular order of business was taken up and the committees appointed to whom the addresses and reports were to be referred. The convention being open for business the various committees reported, among them being the:

Executive Council on (a) Membership, John Bakewell, (b) Finance; (c) Method by which the League proposes to conduct and control ateliers, George W. Kelham, (d) Method of holding competitions amongst League students, Myron Hunt; (e) Plan for judging drawings and prizes to be offered.

As this was the regular forenoon business the time was taken up by the procedure and after the report by the constitution and by-laws committee the remaining portion of the program of the day session was postponed till Thursday morning.

The afternoon session Wednesday witnessed the arrival of a large number of belated delegates among whom was John Galen Howard. Following the address of welcome made by John W. Mitchell of the Los Angeles Art Commission on behalf of Mayor Alexander and the address of President Rosenheim, the feature of the session was Mr. Howard's address on "The Future of Architecture on The Pacific Coast." He spoken extemporaneously and his address was enthusiastically received. Among other things he urged careful planning for future requirements, higher education of the young draughtsmen in the office, school, and in the ateliers, adherence to the ethics

of the profession; the strengthening of the position of the state board of architects by the loyal support of members of the profession; taking the state architect's office from under the supervision of the state engineer; and the appointment of strong men on committee to force favorable legislation relative to public buildings competitions.

In the discussion which followed William Curlett urged that the legislative action suggested by Howard be taken at once. He further urged that a movement be undertaken to raise the moral standard of young draughtsmen or apprentice architects.

In further detail the several committees reported in the regular order of business. George W. Kelham, who could not be present, submitted recommendations by wire on the "Method by which the League proposes to conduct and control Ateliers," which was referred to the proper committee.

The various committees appointed were as follows: President's Address, Willis Polk, San Francisco, Myron Hunt, Los Angeles and J. S. Cote, Seattle. Constitution and By-Laws: Arthur R. Kelly, Los Angeles, W. S. Hubbard San Diego and Lionel Deane, San Francisco. Nominations and time and place of next convention: J. S. Cote, Seattle, Sylvain Schnaitacher, San Francisco and A. C. Martin, Los Angeles. Treasurer's Report: G. R. Walker, Los Angeles, John C. Austin, Los Angeles and John P. Krempel, Los Angeles.

Executive Council: Myron Hunt, Los Angeles, Wm. Curlett, San Francisco, R. B. Young, Los Angeles, and Willis Polk, San Francisco.

The paper on "Historical Precedent in Pacific Coast Architecture" was forwarded by Charles B. Alden of Seattle and was read by Mr. Myron Hunt of Los Angeles and the report of the Treasurer, Mr. W. R. B. Wilcox of Seattle was read by the Secretary, Mr. John P. Krempel.

As the delay in the morning session caused an unusual amount of work to be carried over, the afternoon session did not adjourn till 5 p. m. The visiting architects were the guests of the local Chapter of the American Institute of Architects at a theatre party at the Orpheum, and a pleasant evening was enjoyed.

Thursday's Session.

The morning session was called at 11 a. m. by President Rosenheim. As on the previous day the rain and inclement weather caused a poor attendance, but the regular work proceeded.

The report of the Committee on Education by John Bakewell, San Francisco, was submitted and approved. The report showed a splendid work to have been done in the various ateliers of the League, and showed that the San Francisco Architectural Club leads in membership of Ateliers, courses of study pursued, and in honors taken.

The report further stated that the Panama Pacific Exposition Company

was relying on San Francisco Ateliers for supply of draughtmen.

Following the report a resolution was passed to call on fifty men to subscribe \$20 each year for three years to provide a fund to pay for a traveling scholarship. Willis Polk was the first to subscribe. Provision was made to carry the resolution into effect and Geo. W. Kelham was appointed to receive subscriptions.

The report on the President's address was submitted and approved, and some suggestions were made by Willis Polk on the organization of a Press Committee. Thanks were expressed to the newspapers generally and to **The Daily Pacific Builder** in particular for the interest taken in the convention and the proceedings of the League generally.

By-laws Arouse Discussion.

The report of the Committee on By-laws provoked a warm discussion. Opposition arose to the proposition of granting architectural clubs equal representation on the Executive Council with the Chapters. The opposition was led by Lionel Deane, but when the proposition came to a vote the proponents won and the report was adopted in its entirety.

The paper by Mr. G. Albert Linsburgh, of San Francisco, on "Rationalism of the Twentieth Century Architecture" was a scholarly production and warmly received.

Following the reading of a letter from Mr. E. F. Lawrence, of Portland, urging the selection of Portland as the next meeting place, an election was held to choose the officers for the ensuing year, which resulted in the following men being chosen: President, E. F. Lawrence, Portland; Vice-President, John Bakewell, San Francisco; Secretary, Mr. Whitehouse, Portland; Treasurer, Myron Hunt, Los Angeles.

Executive Council, Portland: E. F. Lawrence, Whitehouse, Albert Doyle, Edgar Lazarus, Wm. M. Whidden and Toulieu.

San Francisco, John Bakewell, John Galen Howard, Wm. Curlett, G. Albert Linsburgh, George W. Kelham and Louis C. Mullgardt.

Los Angeles, Myron Hunt, A. F. Rosenheim, Octavius Morgan, Robert Farquhar, A. R. Kelley, and Henry E. Bean.

Seattle, W. R. B. Wilcox, Charles Elden, Carl F. Gould and Mr. Mulholland.

Tacoma, Mr. Potter.

Spokane, Mr. Sweet.

Portland was selected as the place for holding the next convention. A resolution was introduced by Willis Polk of San Francisco, putting the League on record as favoring action by the Los Angeles authorities in securing a city plan and urging that no action be taken looking to the building of a City Hall, Library, or other public buildings on the Temple site as is now

planned. The resolution was carried and steps were taken to secure action on the proposition at once.

The report of the committee on awarding the medal for designing the best building on the coast was taken under advisement and a further committee of five was appointed to further consider the matter and report at the next convention.

As, owing to bad weather a great deal of the business of the previous day had to be carried over. The auto trip for the day, as planned in the program, had to be abandoned.

The convention ended its proceedings in the Gold Room of the Angelus Hotel this evening at a banquet at

which thirty-five of the members were present.

The paper of Mr. Carl P. Gould of Seattle, on "The Seattle City Plan," was read at the table. So, also, was that of Mr. Edgar M. Lazarus of Portland on "Codes Governing the Professional Practice of Architecture" and on the "Purposes of The Architectural League" by Mr. Lawrence of Portland. They were well received and with the excellent dinner the Second Annual Convention of the Architectural League of the Pacific Coast ended its labors, which all felt had been of primary importance to the profession and auspicious for its future development.

contest at Salt Lake City are now considered as being in the same direction.

Fifth.—The convention was scheduled to be held more than a year ago, but by reason of the fact that the A. I. A. had planned to convene at San Francisco in January of last year, it was deemed advisable to postpone it because our object namely in bringing the Pacific Coast Architects together, was attained. It is safe to say that the influence of the League brought the Institute Convention West of the Mississippi River for the first time in its history, and I am firmly convinced that it heard serious session from the rank of its membership in case it failed to heed the warning which seemed to be floating in the atmosphere.

It would certainly appear from the foregoing review that, despite the fact that general interest seemed to be wanting, the League has kept its pledges and at least in some degree fulfilled its mission.

In general, our policy should be identical with that of the A. I. A. and consequently it may not be out of order here to comment briefly on the work of the Institute as indicated in the Committee reports submitted to the last Convention, but before going into this permit me to suggest that every capable, reputable practitioner on the Pacific Coast should deem it his first and most important duty to affiliate with the Institute and I would like to see all such submit their applications for membership at the earliest possible moment. Our Institute membership in the Pacific Coast Chapters is entirely out of proportion to our total membership and it must be borne in mind that the stronger we are in this respect, the better representation and the larger voice we shall have in the administration of the Institute's affairs. Hence my advice is "get busy."

At the recent Convention of the A. I. A. held at Washington in December last, no new direction was given to the activities of the Institute but rather a report of progress on or closing up of old business occupied the sessions. These reports were very important, and in the nature of a summing up of many years work. The one I found close application given by the Committee on "Contracts and General Conditions" was brought down to a concrete exhibit by the fact that a report that the important documents evolved from its labors had been placed in the publisher's hands. The treaty, which the somewhat drastic (both to the layman and to many practitioners) rules on competitions, issued two years ago, had received, and the virtue of which was reaffirmed by a large majority of the convention, showed that the Institute had taken a wise as well as irrevocable stand. It was shown that the practitioner was relieved of all responsibility and risk by merely ascertaining if a given program had been approved by the Standing Committee on Competitions. That, therefore, not a hardship but a safeguard was contained in the rule that it was considered "unprofessional conduct" for a member of the Institute to take part in a competition which had not been previously approved by such committee. It was further found that owners began to realize that this rule, like others adopted by architects, was for their protection and in the

President's Address Delivered to the Architectural League of the Pacific Coast.

By A. F. Rosenheim, Pres., Los Angeles.

Fellow Members:

It is my pleasure as well as my privilege to greet you and to preside over the Second Convention of this League. Judging from the number of visiting members present I should venture to say that general interest in the League and the task it has undertaken to perform is unfortunately lacking. The record of its achievements at least justifies its existence in some measure and it may not be amiss here to briefly summarize these for the benefit of such of you as have not kept in close touch with the League's affairs.

First—Exhibitions have been held once each, at Seattle, Portland and San Francisco and three times at Los Angeles. The attendance at the far Northern points was not up to expectations, while at San Francisco it averaged about 1,000 daily for a period of twelve days. It has remained for this city to make what must be regarded as a most remarkable and enviable record. The first Exhibit held in January 1910 averaged about 2,000 daily or a total of about 24,000. The second, held in January and February 1911, in much smaller quarters, averaged about 1,250 daily, or a total of approximately 15,000, and the third, which closed on the 16th of March, an average of over 2,000 daily for three weeks, or a total of more than 45,000, and this in the face of the fact that rainy weather prevailed during one-third of that period. We could ask for no better proof of the deep interest manifested by the Public in the work of the Architect and the result must, of necessity, prove wholesome and beneficial to the Public as well as to the Profession.

Second—The plan of awarding an annual Scholarship Prize of \$1,000 to the draughtsman or student making the best showing, was first put into effect this year—the prize having been awarded to Mr. Edward L. Frick, a member of the San Francisco Architectural Club. In considering the drawings submitted, some 16 or 18 in number and representing all the cities comprising the League, the Education Committee was assisted (in advisory capacity merely) by Messrs. Thomas R. Hastings, Henry Bacon and Wm. D. Richardson, eminent architects of New

York and members of the Architectural Commission of the Panama-Pacific Exposition. Further details of this subject will be contained in the reports of the Education and Finance Committees. It would, however, be in order here to suggest that every member of this organization should use his influence to obtain from his friends and clients subscriptions to an endowment fund of \$20,000 or \$25,000, the annual income from which would yield an amount sufficient to pay the prize and meet all expenses incidental thereto. This should not be impossible of accomplishment if the matter is taken up in a systematic way by the general chairman of the Finance Committee assisted by sub-committees in each city.

Failure to award the prize last year, according to our announced intention, has had a most detrimental effect on our members in Seattle. Quoting from a letter recently received from one of our others in that city: "I don't believe I am as convinced of the League's importance as is my friend Gould, or rather, while I may feel that it should serve a good purpose it has seemed to be something that has failed to rouse a feeling of intimate interest. I suppose that comes from the fact of the weakness of the Seattle Architectural Club. A year or two ago there seemed to be a good chance for an active club, but the asking of the notice of the 'Traveling Scholarship Prize' appeared to dispirit the boys and from that time it simply fell apart. The chapter men have not as yet been able to feel its importance."

Third—We have added to our membership the Utah Association of Architects of Salt Lake City, a five organization comprised of practically all the reputable practitioners in that city. When I met with them in January last, they promised not only to send a delegation to this convention, but that one of their number would present a paper.

Applications have been received from the Architectural Club of the University of California at Berkeley, and the Oakland Architectural Club of Oakland.

Fourth—The architects of Portland have succeeded, with the influence of the League, in organizing the "Oregon State Chapter" of the A. I. A. and the

interest of good design and safe construction. The time given in the Convention to the discussion of the Educational Committee's report, which is for and many years will necessarily be a report of progress, was well employed and this year the next report was emphasized by the paper of Mr. Lloyd Warren of New York, which was so broadly pertinent and so clearly sounded the needs of the student in architecture, that the Convention voted to print immediately for general distribution. These three papers, so vital in their potential reactions, and which formed the important work of the Educational Committee of the International Progress, it one seeks to see the purpose that seems to lie behind them there stands out whether rational or not, the desire to systematize the profession, both in its theory and its practice. This has been brought to a definite conclusion in Chicago and in Competitions, but in Education it is only so far expressed in the growing inclination among students to seek out draughtsmen who have had a technical school training, and who are for aesthetic progressiveness with these students and while the practitioners should study the works of nature, of art and of its combination in a structure, it is the student with unformed habits of thought to which, from advancement, belongs.

It seems to be recognized by our Institute that there will always be a large number of architectural students whose only opportunity for development must be through the architecture office. This issue from such theoretical instruction they are, object to the local architectural club, therefore, to the ministrations of those educators who seem to devote time to their instruction for the good of the profession, or with the too often unsystematic instruction of the night school, many aspirants to architectural knowledge will be shut out from employing talents that they may have and that properly developed would make them valuable members of the profession. In fact, it is singular but true, that those practitioners who, today, stand among the best in the estimation of their fellows for architectural ability, are very evenly divided between graduates from schools and from architects' offices. Secondly, it is a matter of latent talent rather than character of training that brings the result, and it may be also suggested that the disappearance of the architect who was willing to teach his draughtsmen, and the progress of architectural schools may even now have something to do with the growing preponderance of the school-trained architect. The late Mr. W. L. F. Jenney of Chicago, who has been for his art and the best for the public concerned, has left a long tradition to the honor roll of professional success. The "Heavenly Arts" Architects have done, and are doing, much to inspire, if not to train draughtsmen in architectural thought, but probably the most practical force today in the line of in-school education is the "Architectural Club." These societies which grew out of conditions that then existed and always with the generous spirit and the need for more education than could be obtained in the office have developed into veritable schools in which tradition, as well as the inspiration inspired by the sun, is a strong and insistent factor. And this too, largely without the encouragement

of the employing practitioner. Now, with an active committee of the Institute giving attention to the draughtsmen to whom the architectural school is not open, it may be that a combination of effort between the Architectural club classes and the "other" system established in each office, with the employer as patron, might be effected with good results. There is no doubt but that the future of architectural progress lies in the education of draughtsmen. It is also true that the schools cannot be depended upon to supply the demand and much good material is lost through a lack of the encouragement and training which might be given to a promising draughtsman if he will realize its importance and give time to the work.

Nearly every man feels that it is in him to do something better than he has accomplished if he only had the chance. Big things seem to come so easily and so quickly to the man who does them that the other fellow always wonders why he had not thought of the same thing. The truth is that the world is likely to accept us at face value. If a man thinks well of himself the world is pretty certain to concur in his good opinion. Men often miss success and happiness by the simple

omission to take their own good qualities as seriously as they deserve. The realization of a man's own genius and the perfect freedom and fearlessness of its expression present the one sure road to achievement. A man's genius is the light that is within himself and it is strange that he waits to recognize that inner touch in thousands of others before he looks to see it expressed in himself.

No man can be so engrossed in the imagination of the senses or in the satisfaction of animal appetites that he does not dream of the untroubled powers which are dominant within him, and the success of those who arrive should not so much stimulate admiration or hero worship as it should suggest the possibilities within the reach of us all.

In concluding and thanking you for your respectful attention, permit me to express the hope that each one of you will have reason to feel at the close of this convention, that he has gained materially by his presence, whether actively participating in its deliberations or not, and that such gain will prove an incentive to him to work for the future success of the Architectural League of the Pacific Coast.

Rationalism of the Twentieth Century Architecture.

Paper By G. Albert Lansburgh, San Francisco.

Rationalism is the formation of ideas, produced by reasoning and depending alone upon logic for its support.

Rationalism in architecture is the logical expression of a correct and practical solution and depends also upon correctness in the aesthetic requirements of the design and correctness in the methods of their construction. Rationalism is a characteristic of any true art and is highly developed feature of twentieth century architecture.

In architecture rationalism is that element in the human mind that must bring to an ideal culmination the successful union of the aesthetic and constructive, and these two elements are the principal elements that can give a logical solution to the great architectural problems of the day.

The art of architecture has always been composed of two great principles, The Aesthetic and the Constructive. When these two features have been the simultaneous outgrowth of a developed sense of refinement and a highly scientific knowledge, they have produced an ideal architecture. As an example of this: What more successful treatment is there than the blank side and rear walls of the Pantheon in Paris, whose beautifully studied stone joints are its sole decoration.

Let us analyze these two great elements.

The aesthetic itself is composed of three minor elements, namely:

1. Composition (grouping or arrangement and proportion.)

2. Character.

3. Detail.

The Constructive element is sec-

ondary and is a means to the end. This has always been the case and is especially so today, because of the great complexity of the problems with which the architect has to cope, hence the increased importance of this secondary element.

There is no art that so fully and absolutely indicates what the human problems are and how they have been solved as does this art of architecture, for every monument, that is every successful monument, tells its tale and leaves to the history of the world an indelible phrase for the great architects of the future to read and understand and thereby know their past.

As compared with the problems of the past ages, the problems of today are vastly complex. For example let us compare the simplicity of the antique monument with that of the monuments of the middle ages, and those of the middle ages with those of today. Some of you may say, "But the middle ages were dark ages," and therefore the art of simplicity was lost, but let me add here, that architecturally speaking, there was never a dark age. The Renaissance is nothing more than a period of survival in architecture, rather than a revival.

Admitting that rationalism has always, more or less, been a feature of the different styles and periods of architecture, especially so is rationalism the dominant feature of today, because in almost every country of Europe and America where the present decade is making such vast strides in the development of new architecture, although localizing its character to the needs of the respective in-

habitants, there is a tendency to, in a measure, adapt all styles and all periods to a new and economical method of construction.

In the past, however, and up to the time of the steel skeleton, styles have been formed more or less, upon the true stereotomic principles that have been developed throughout the long ages from the early post and lintel principle of the Egyptian, down to the most complex geometric problems of the French designers.

Now, in speaking of styles, let me define what is "style" in architecture and what is "period." A style in architecture is created by the fundamental principle of construction, characterized by its adaptation to a distinct characteristic aesthetic line. The antique styles have been created by the constructive principle of the post and lintel or straight line. They may be divided into innumerable "periods," such as the Greek period, the Egyptian period, etc. The Roman style has been characterized by the arch or semicircle. It, likewise, has its different periods. The Romanesque is really nothing more than an extremely decadent period of this style. The constructive principle of the so-called Gothic style, is the lancet arch or two arcs of circles. This style is divided into several periods, such as the "Flamboyant," the "Perpendicular," etc. The Renaissance has for its distinctive constructive line, the ellipse and its divisions are nothing more than historic periods, named according to the epoch of the king under whom it was produced. The dominant principle of construction today is the elongated pier. This has been combined with the lintel, the arch, the lancet and the ellipse. Imagine, therefore, the complexity of the problem that now confronts the creators of this new style of the 20th century and this required rationalism to be perfected.

All the past styles have been more or less analogous with a country and limited within a certain clearly defined period of years. This present style or the Rationalistic is characteristic of America, solely because of the steel skeleton as a new element of construction having been born and being highly developed on American soil.

The 20th century era in art has shown us in America that every style of the aesthetic is at least attempted in its adaptation to the great constructive principle that the Occident is supposed to have initiated. It is therefore evident that although the constructive element is well defined, the aesthetic is not yet determined, and the 20th century or Rational style will not become distinctive until these two elements are simultaneously developed and harmoniously wedded. Then it will give to the history of art its beautiful offspring.

It is only the element of rationalism that can produce ideal 20th century architecture, and undoubtedly that 20th century architecture will in the future be known as "American." It is only now that the American architect has been able to attempt to create for himself and his country a distinctive architecture. I will admit that up to the present time this architecture has not yet blossomed forth, but its buds are fast making their appearance upon the great architectural tree of the Occident and at the rate

we are now progressing will in no very distant future have blossomed forth into a beautiful maturity or at least into a healthy youth.

The stereotomic requirements of the past are no longer a principle of the present, and when I speak of the present I am speaking of the American Architecture. The steel skeleton has changed the "poche" or the expression of the plan. Where large masses of stone were required for the expansion of pressure upon the bases of support, the steel frame has minimized this "poche," and the character of the plans will necessarily be judged by the rational expression of the two great elements of design—the aesthetic and constructive, harmoniously combined.

The stereotomic indication of stone joints, etc. in stone or brick or of stone ashlar which is hung upon a steel frame is an architectural lie, since it gives the impression of being self-supporting. These faults when obliterated will develop the required aesthetic.

We are all too apt to copy from the past, instead of inspiring ourselves from the successes of antiquity in order to create. By blindly helping ourselves to fragments from this or that constructive we will never produce more than a "potpourri." We will never create or evolve a style by this tendency. Did Greece borrow from Egypt, or did she inspire herself? Did Rome borrow from Greece, or did she ask instruction? Did France in the Gothic period borrow from decadent Rome, or in the Renaissance period help herself to Italian fragments? No, these styles were all of them logically evolved by studios and continued efforts refined by inspirations, if you will, but decidedly not by plagiarism. We likewise must thoughtfully and studiously strive to attain our goal, and we likewise may seek inspiration from the glories of the past.

The masters of the great schools of the past are today teaching a local expression of requirements and their rational solution. We do not today speak of a period in our present architecture, although most of us have become slaves to a particular period of expression that may be adapted to the American needs. But these periods of style unless they can be rationally expressed in the construction of today are wrong in principle, and as such are condemned by the great modern teachers.

Fads have always been prevalent and fads have always caused the birth of the embryo of a style. American Architecture is at present full of fads. Although most of them are faulty, there are some that are bound to develop the so-called "Twentieth Century Embryo," viz. the elongated pier, the disproportionate cornice, etc. Although at present called a fad, this fad is nothing more or less than an attempt to connect frankly the method of construction with the aesthetic, as at present understood and as logically arranged as it may be possible to reconcile a foreign or exotic style with the ultra occidental construction.

One of our great problems is nothing more nor less than the principle of clothing the skeleton with a suitable gown in the form of an agreeable and attractive protection against the elements.

Another fad that seems to have crept into our very recent architecture is the excessive use of columns. Pure simplicity in design, devoid of anything more than an absolute lack of anything like character, has marked the "progress" of most competitors of the last few years.

Let us desire this tendency to accept as a successful simplicity nothing more nor less than an affected and sought for simplicity. A beautiful simplicity is the outgrowth of a successful and logical design. It has never been created by being sought for. It comes of itself. It is the natural result of success.

As to the second failure of American designs of late, let us consider that all important requirement, Character. Character has never been successfully indicated by any other methods than logic and a refined expression, an understanding of the problem at hand. Today we see museums, temples of justice, court houses, auditoriums and educational buildings, all of them nothing but a plain classical colonnade, and when I say "classical" I must apologize to those great ancients, because as a rule there has been an exceedingly marked discrepancy in proportion. Occasionally, we may see a colonnade broken by a pavilion at the center, at other times there may be pavilions at the extremities, and still again there may be pavilions at both the center and extremities. But it seems that the real architectonic use of material, the treatment of plain surfaces decorated only by their stereotomic indication of construction, has been cast aside. Why? Because it is much more difficult to design by using these elements than by borrowing from the classical past, more difficult to create than to plagiarize.

Now, there can be no doubt as to which tendency we are to accept in order to reach the goal. There is but one choice between plagiarism and rationalism. Rationalism is to be our guiding power, or Rationalism alone can mould these elements the aesthetic and constructive, into a great and lasting Twentieth Century American Architecture.

FOREIGN TRADE OPPORTUNITIES.

No. 8253. Hospital Construction.—

The American consulate general at Bangkok, Siam, reports that tenders for the construction of the administration block, surgical house, two wards, and a covered way or the Chulalongkorn Hospital were submitted to the Ministry of War on December 12, 1911, but it is understood that other tenders will be called for, as all the bids were higher than the outlay that Ministry of War is prepared to sanction for this part of the work. Names of the firms tendering and the amount of their bids can be obtained from the Bureau of Manufactures.

No. 8255. Armory Construction.—

The American consul at Fernie, British Columbia, Canada, reports that the Dominion Government is planning to build during the present year at Fernie a brick armory, with stone trimmings to cost from \$100,000 to \$300,000. Tenders have been called for, but, owing to some misunderstanding, are not to be acted upon at once.

The Future Of Architecture On The Pacific Coast.

Address by John Galen Howard
San Francisco

Mr. President, Gentlemen, Friends—

Much has been said and written in appreciation of architecture on the Pacific Coast as exemplified in the old missions; and we have even heard tell of the old architecture of San Francisco—sometimes with approval and sometimes with dispraise, but mostly with more vigorous anathemas than any other like quality of architecture ever received probably in the history of this or any other country.

We all know how charming the old Spanish missions are—how rich California is in possessing them, how fortunate we are that there remain even these few examples of the work of the old padres. They make the fertile valleys which they dominate delights indeed to the architectural student as well as to the general tourist. But, perhaps, it is less generally known how many delightful examples of beautifully simple, straightforward design of the early days in the way of building the typical commercial buildings were lost in the San Francisco fire. Those of us who, before the fire of six years ago, were wont to make pilgrimage through the streets of the lower city and rejoice ourselves in the delights of San Francisco's earliest essays in masonry architecture are among the very few who realize that the city had such a delightful group of structures. They are all gone now, things of the past, sincerely to be regretted. Far otherwise, with the triumphs of the jig-sawyer, which may be relegated to a well-deserved oblivion.

We hear of the architecture of today, too, sometimes. Those of us who have been seeing San Francisco rebuilt in no time realize that there is perhaps too much talk about the present day architecture, and that the less said about it the better, except if be to keep our courage up; we are at too close range to criticize it, to estimate it justly.

But, now, the architecture of the future, we are all interested in that. It is a thing of vital concern to us, and yet, perhaps, we don't think enough about it to give it a fair chance to come into its own. Are we making such preparations today as are likely to blossom forth in the next generation into a genuine expression of our Coast conditions? We do not give enough consideration to such possibilities, and I believe we ought to ask very seriously how our art of architecture should develop in this part of the world. We haven't looked at this subject in its proper light. We haven't given it its due importance. We have been doing things without any thought of what their effect would be in the future—what their value would be for future development. And yet, on the other hand, we are already really living in the future. We are already looking forward to the time when the Canal will be finished and people will come from all parts of the world to inhabit this coast which is still almost a wilderness, except here and there where men congregate together and build

cities. This immense empire of emptiness will, we all believe, be settled up almost as soon as the Canal is finished. We are all looking forward to the time, near at hand, when our city, whichever city it is, will have a million inhabitants, or ten million inhabitants, as the case may be. We have fully-grown ambitions in that regard. Yes! We are all looking forward to the future, but we are not making much of any preparation for it.

Now, needless, that future's character must depend upon what we do today. This is a time of preparation, rather than of accomplishment; of laying in foundations sane and sound, rather than of rearing a superstructure fair and free. We are using, and rightly, the old thoughts that were originally thought on the other side of the continent, and abroad, in the older countries, and we are using them under very difficult conditions—conditions that are so difficult at times as to seem almost impossible, professionally speaking. For the most part we are in reality simply pottering, getting along as best we can, from hand to mouth, so far as ideas and original imaginative power are concerned.

That is not the way in which to lay the foundations for the great architecture of the future. The time is coming, and is almost at hand, I think, when architecture on the Pacific Coast is destined to be the significant architecture of the world. Our friends, coming from the east, when they see the things that are being produced here on this far isolated island, as it were at the ends of the earth, between the sea on one side and the desert on the other, wonder at what is being accomplished. And they go back and spread the good word and say, "We architects in the East must look to our laurels; the men on the Pacific Coast are forging ahead while we are standing still!" That is not wholly true, though it may seem so to them. They see things through a golden sunlight glamor. They come out here to have a good time and they see things with a kindly vocation eye. We are out of range of competition with them, too, and they see with a more friendly eye than they see the work of their own communities—Philadelphia, Washington, New York, Chicago, Boston, or elsewhere. There is no personal friction to bias their judgment unfavorably; no personal end to be gained, which prevents them half of the time from seeing how good the things around home are. So we must not take their praise too seriously. At the same time, we must take to heart the significance of their tribute. Powers for good lie in that direction. To be heartened is to be strengthened, and on the foundation that we are now laying, the future of our architecture is necessarily to be built.

I want today to say a few words with regard to several different ways in which, it seems to me, we can do something for that future architecture. We can know nothing of it naturally, in detail. We cannot see the precise

direction in which our architecture is going to develop; we cannot even see what its general style and characteristics will be, nor, perhaps, define in advance just what direction we think it should pursue. What we can do is to improve the conditions under which that architecture, whatever it may prove to be, may develop; so that it may develop freely and sincerely into a true style which shall be an intelligible, suitable, harmonious and beautiful expression of the actual physical, and intellectual conditions of which it is the flower.

First of all, there is one set of conditions which we have absolutely in our hands to control and to fix. Those are what we may call, speaking largely and broadly, professional conditions. We want a better professionalism on this Coast than exists at the present time. My mind can go back twenty or twenty-five years and visualize the conditions that existed in New York and Boston—the two towns with which I happen to be most familiar, for there my early life was spent—and I can recall how distressing many of the conditions were which obtained at that time, though there were many architects who wanted to improve things. And I have been familiar with the changes which have been going on there during the period within my memory. Professional conditions there are immensely improved. To be sure, are not quite on a Utopian order even yet. There are difficulties; there are distresses; there are dissatisfactions; there are frictions, and I suppose there always will be. But on the whole the profession has got together to such a degree in our eastern communities and especially along the eastern seaboard, from Washington to Boston, that there is such a thing recognized even among the laymen, as professional conduct. And attacks upon proper professionalism, and attempts at seduction from proper professional practice are very much less frequent now than ten or fifteen years ago. The intelligent layman perceives that he has nothing to gain and much to lose by attempting to get results under unprofessional conditions of employment.

On this Coast professional conditions were hardly equal to what they were in New York and Boston twenty or twenty-five years ago. An yet, the architects have absolutely in their own hands the making of these conditions what they will. We should have better conditions in order that we may produce better art, and in order that we may do fuller justice to those who come to us as clients, and in order to serve the community better. Better professional conditions will result in better art, and better service in every way because they will make the architect more self-respecting, and enable him to devote himself to rendering the service rather than to getting the work.

There is one type of unprofessional conduct which is rampant in our town (San Francisco), and I dare say is not wholly unknown in Los Angeles, Seat-

de and some other cities of architectural activity; and that is "butting in." I call it by the only name I know for the practice,—a slang expression which has no equivalent in good language, any more than the thing has a place in good society. When the slang expression gets so worn that it can be given up, the practice itself will be obsolete. If we could only get rid of the attempts among our fellows to snatch work from one another, if we could only get each one of our profession to recognize that he has no more right to take from another architect a piece of work which has been given to him than he has to go into his house and steal his table silver, then we should begin to have what is really decent and really professional feeling. Until such recognition is general, we never shall have tolerable professional conditions.

This seems almost a commonplace; but it has to be said, and the reason it has to be said is because this sort of thing is going on all the time, under our very eyes. We are all aware of the fact it is going on, and yet nothing is said about it. Now the time has come, I believe, when it is proper and necessary to speak frankly and straightforwardly about these things. Let us have it out in a friendly way among ourselves, and call a spade a spade. This architectural League of the Pacific Coast has a great opportunity to accomplish a fine work in that regard. All it needs to do, I believe, to correct this abuse, is to speak of it in a friendly and frank spirit between man and man, and between individuals and the gathering of his fellows. I know that it is so among the architects in San Francisco. We have recently instituted a Committee on Practice which is expected to take up individual cases of unfair, unfriendly, unfellowly conduct, whatever the breaches of professional principles may be, not in a spirit of "muckraking" in the least, but merely to get together on a fellowship basis and to have it out with each other so that we may look each other in the eye and say, "You are my friend; I will stand by you," and "You are my friend; you will have to stand by me." The work we do under the existing unfavorable conditions is not what it should be, or what it would be if each felt he could devote himself wholly to his work without having to safeguard and spend his time in his own work. That applies to pieces of work that are given outright to a man,—of course, by far the greater number of cases; but it applies even more, if possible, to work which is won in competition. When a man has won a fair competition he should have absolute assurance that the work is his, and not that his work is open to the scheming and "wire-pulling" and "pipe laying" of other members of the profession to get it away from him into their own hands. This is a question of the simplest fair play, it would seem. But we all know flagrant cases in which fairness and justice have been ruthlessly flouted; and yet nothing is done to discontinue such outrages of common decency. No beauty in the building which results from such methods is sufficient to justify the means taken for securing the work. It must stand as a permanent monument to the unscrupulousness of its author. And what is still worse, the buildings so secured are in many cases alleged to

be as open to suspicion in their construction as in their author's means of getting them to do.

The question too, of competitions themselves,—I understand you have very recently, yesterday, in fact, taken definite action with regard to certain practices in the line of competitions and that there is promise of better times coming in that regard. I believe there is a definite promise of good times coming when any body of architects get together and say "We will not submit to conditions of competition which do not fair to our profession, because we cannot do justice to our clients or to ourselves under such conditions." There is a type of competition which is required by the law of this State, in certain cases, and which is so contrary to the interests of the community, that work of this sort should be ruled out absolutely from his office by every self-respecting practitioner. The time is coming when we must get changed the law of the State in this regard. I refer to the law of 1872 governing school buildings under certain conditions to be given out by competitions which are on the very face of them so contrary to the interests of the community, so unfair to the profession, that no architect should think of going into them. And yet every day members are going into them or asking "May I?" or "Is there a chance of getting through without criticism if I go into the competition?" And these competitions require the filing of bond by the architect,—a bond which so ties up the architect with a contractor that he can't call his soul his own. Let us put a stop to that. All we have to say is, "We will not accept those conditions." And we get the conditions changed. To be sure, we have to do a little bit of hard work. We have got to go before the legislature and see that the proper influences are brought to bear to change the law. The State won't do it otherwise. Just what new law must be substituted for the old remains to be seen. That should be a matter for committee work and committees should be appointed from every one of the Architectural Associations of our State and co-operate, one with the other, and get something done. We have recently appointed a committee on Legislation in the Chapter of the Institute in San Francisco. I fancy there is such a committee in the Chapter here, and hope there is one in the League, but if there are not such committees, they should be appointed at the earliest opportunity and work together with a definite purpose for accomplishing a definite result.

Then the old-fashioned habit of "knocking,"—what more detestable vice is there in our profession? I speak of San Francisco, and San Francisco has a most unenviable reputation as the "locus knockerorum"; but I understand there is more or less knocking in Los Angeles, too, and perhaps elsewhere,—who knows? An honest, friendly criticism to a fellow architect's face, and above board is a desirable thing, if it is intended to help matters. It is a friendly act. But to "knock" behind a fellow architect's back, to run down his reputation and to "black eye" his work, is a thing that is altogether too common among us, and a thing we ought to frown down. Destructive criticism is of little or no use anyway. Only yesterday

the design of a great building was put before a group of architects of whom I happened to be one, by the representative of the owner, with the request that we criticize it. The position we took was that we should be glad to criticize it if he would just put us in communication with the architect. The owner's representative might come with him if he liked but let us talk with the architect personally. We would not talk behind his back.

Creative criticism is the only kind that is worth while, and creative criticism we are all willing and glad to give, providing it is a friendly, good-fellowly relation that is established and not back-biting criticism which tends to weaken a man's position and destroy the good that might be accomplished by the criticism.

The old question of proper charges comes in here, too, it has an important bearing on mutual relations among fellow architects. From one point of view any architect has a right to do his work for any figure he cares to charge, no matter how low, but two considerations are of the greatest weight in this matter. The first is that, as is well known, the profession as a whole has, by long experience, and in view of the best interests of all concerned, client as well as architect, agreed that the architect's full service, under the very exacting conditions of today, and the high cost of producing the work, cannot be properly rendered without loss, or, at any rate, without inadequate compensation, for less than 6%. The American Institute of Architects has therefore fixed that rate as the minimum proper charge; and members are expected to adhere to it. The San Francisco Chapter, and other similar organizations on this Coast, have adopted the same schedule, and it is the duty of all members to practice in accordance therewith. It is not too much to say that any member who charges less is by that very act practically certain to be competing in charges with some fellow architect if not with the great majority of his fellow members—one of the most unprofessional things he can do. We are not shop-keepers—we are professional men, in duty bound to establish safeguards round the heavy responsibilities of the architect's service. Most of our members are doing the honorable thing and standing by their mutual agreements in this matter of charges. But statements are frequently made that many of our members are not doing so. If it is true, such architects are trending on disagreeable and dangerous ground and should be made the subject of fellowly criticism and correction to say the least.

We have a system of certification in this State, and it is based on a sound principle. That whole system of certification should be strengthened from top to bottom. We should all stand behind the State Board of Architecture, supporting its efforts to raise the standards of our profession and enlarging its work in every possible way.

There are numerous attempts to get around the State Board of Architecture, and, incidentally, the Board is not as strong as it ought to be. But why isn't it as strong as it ought to be? It is because we don't stand behind it and back it up and see that its rules are really adhered to. We have men who are practicing archite- ture in

the State without certificates, and others who have had certificates but have allowed them to lapse. The only reason they are not prosecuted in a court of law is presumably because there are no funds with which to supply the ammunition. I know of one or two cases—one which particularly happened to come within my knowledge—of a well known architect who let his certificate lapse by reason of non-payment of dues, who simply snapped his fingers at the State Board of Architects, and went on practicing. He told me himself he had quite forgotten about the Board of Architecture for several years. That ought not to be. The State Board of Architecture represents a certain principle, and that principle can obtain and be recognized in the general community only in the degree in which we ourselves recognize its value. Support it—strengthen it, so that it can go on to further accomplishment. Instead of wiping out that principle as some architects might advise, because the standard cannot all at once be set as high as desirable, I say we can make certification mean a great deal more than it means today, and the time for it has come.

The architect should be more generally recognized at his real value before the law. At the present time he is scarcely recognized at all except in a back-handed way. Let me mention one little example. The San Francisco charter, which was got up some ten or twelve years ago with the idea of being a model city charter, uses the word "architect" only once, and in a very secondary way—it does not use it in a direct way at all. It uses it something like this—All the employees of the city shall be subject to civil service requirements and examination, "excepting the city architect." The city architect is not even mentioned as an officer of the city! Well, I'm not so sure that there should be a city architect at all; perhaps it would be better for the city's architectural work to be looked after by private architects, but if the charter is going to provide for a city architect at all it should make suitable provision.

That is only one instance, but it is typical of what has happened all up and down the State. The architect is not recognized as a professional man. He is not recognized as a necessary element of the community. He is not recognized as one of the most essential contributors to the community's well-being. Laymen look upon architects in many cases as city architects' evil. Well, he is something better than that as you all know, but we have got to bring all our power, all our influence, to bear on the laity, and upon the community, and have the architect properly recognized. Until he is properly recognized, he can't do his work properly for he is wretchedly handicapped.

The position of the State Architect is even worse than that of the City Architect. We are living in this supposedly civilized State of California under a system which puts the State Architect in the position of being a mere hireling of the State Engineer. That condition is an absolutely intolerable one in this country, and all agree with me and yet we accept it without a word of protest. We are going about our private business and

never wasting a thought upon the unfavorable condition governing the architect who has charge of the great bulk of the State's building. This is not a personal matter—I am talking about the principle. The State Architect ought to be, if there is going to be a State Architect, the head of a separate department and not a mere employee of an engineer. If anything, the engineer ought to be employed by the architect, but at any rate the architect ought to be independent. Doubtless there is room for the State Engineer, too. I am not questioning that. Least of all, am I criticizing any personal incumbent of that office. What I am addressing my remarks to is the principle upon which the State architecture is standing today. It is a situation which it is our duty to clear up. It can be cleared up only by our concerted efforts.

Then that great work of education—education of our younger fellows, and education of the public. Mr. Rosenheim has given us an admirable outline of the work that is being done and work that is being attempted by this League, but we are not doing enough. We ought to be ambitious to enlarge our educational facilities not only in our schools, but in the attention given by individual practicing architects to helping along the younger men in their offices. A great deal is being accomplished, but not nearly enough. The efforts are too sporadic. They ought to be correlated into a great unified movement for the uplifting of our art and profession. We ought to offer better inducements for our scholars. The suggestion of Mr. Kelham, which was just read, that we induce fifty men to contribute twenty dollars a year for three years in order to guarantee a scholarship prize for that period, this is in the right direction. But we should extend the work, enlarge the field and put our whole heart and soul into the effort. We can do that only by working together and by working with absolute enthusiasm and sincerity.

And we have to educate the public as well. It all comes down, most of what I have said, to a question of education of the profession and of the public. We don't have enough evidence of the best that may reasonably be expected of the architectural profession. A very large part of the progress made in the east in the last twenty-five years has been made because of the interest that has been aroused in the public mind by exhibitions, which have become more and more influential. The standard has been raised from year to year, until it is now really high. After a lapse of some years since the last exhibition I happened to see in New York, I was astonished and gratified last winter at the Architectural League. The exhibition was smaller and much more select, and that was by reason of raising the standard. There were fewer things on the wall, but the things that were there, for the most part, were things of vital interest and genuine beauty. There is no reason why our exhibitions on this Coast should not be just as good as the exhibitions in New York, but are they? Not a bit. We haven't set any standard, nothing that indicates that we have a definite opinion as to what constitutes good work and what constitutes bad work. The line

is very difficult to draw, to be sure, between good and bad—different men would draw it in different places. But after all, we really can agree if we are willing to face the situation. Draw the line somewhere. Draw it up as high as you can—nothing below a certain standard to be exhibited. Put the big work in prominent places and make the exhibition tell, for all it is worth. Don't be afraid of offending because you have turned down something. You often help a man by not hanging his work. You can't at once set up a high standard for the public or for the profession; you can, however, in the course of a very few years, set up such a standard that the profession itself will be raised and the public enlightened.

If we look after all these things the future will take care of itself. Who cares what the style may be? Call it Mission, or what you like. If it grows naturally out of the conditions of this wonderful country and if we provide for it an environment and a nourishment of genuine professional feeling, it should be the finest style the world has yet seen. (Applause.)

REPORT OF EDUCATIONAL COMMITTEE.

By John Bakewell,
San Francisco.

To the President and Members of the Architectural League of the Pacific Coast:

Gentlemen: Your Committee on Education presents the following report:

During the past two years the following bi-monthly competitions have been held with the programs issued by the Beaux Arts Society of New York. Our jury has been a local jury for the judging of these competitions.

The Education Committee elected the following members of the Jury: Mr. John Gates Howard, Mr. Louis C. Mulgardt, Mr. Geo. W. Kelham, Mr. Loring P. Rixford, Mr. John Bakewell, Jr.

To these names should be added Mr. Arthur Brown, Jr., Patron of an Atelier.

Mr. Wm. C. Hays and Mr. G. Albert Lansburgh were appointed as additional members of the Jury during the past year by Mr. Rosenheim.

The members of the Education Committee who happen to be present at any judgment and any patrons of Ateliers represented by men whose work is exhibited have acted upon Juries.

The number of competitions held under the joint auspices of the A. L. P. C. and N. Y. Society of Beaux Arts is as follows:

1910—5 plan problems, 5 order problems, 1 Archæology.

1911—5 plan problems, 5 order problems, 1 Archæology.

1912—2 plan problems, 2 order problems, 1 prize problem.

In addition to these the students have done 12-hour sketches—7 in 1910, 3 in 1911 and 2 in 1912.

Also one special problem gotten out by your jury. They have also entered competitions for Paris Prize, and one man, Mr. Welhe, received a mention in 1911, and one man, Mr. Michelson, succeeded as alternate in this year first twelve-hour competition.

Seven men in all were placed in this

competition entered by men from all over the United States.

For these competitions the number of men registered, spring of 1910, was: Seattle, 7; Portland, 5; San Francisco, 16. Total, 1910, 28.

Fall of 1910, spring of 1911. Forty-one students, Ateller Brown and Kelham, S. F. A. C.; 3, Ateller Schallert, Reno; 2, Ateller Nicholas, Vancouver; 5, Ateller Allison, L. A. A. C.; 17, Ateller E. F. Lawrence, P. A. C.; 3, Wm. C. Hays, Oakland Architectural Club Total, 1911, 71.

Season 1911-1912: Forty, Ateller Brown, S. F. A. C.; 28, Ateller Kelham, S. F. A. C.; 2, Ateller Rixford, S. F. A. C.; 10, Macomber, Seattle, 17, Allison, L. A. A. C.; 3, Schallert, Reno; 2, Nicholas, Vancouver; 17, Portland Architectural Club; 25, University of California. Total number of men registered in 1912, 214.

Results of judgments were as follows:

1910—116 projects rendered, 66 received mentions, 12 placed H. C., 38 received no mark.

1911—124 projects rendered, 2 placed H. C., 88 received mentions, 43 received no mark.

1912—From January to April—83 rendered, 44 received mentions, 5 placed H. C., 34 received no mark.

Special prize of \$1,000 raised by Special Finance Committee by subscriptions from Architects of the State, 25 men took part, 16 rendered, 8 San Francisco, Ateller Brown, 4 University of California, Ateller Hays, 2 Los Angeles, Ateller Allison, 1 Portland, Ateller Lawrence, 1 Seattle Ateller Macomber.

The prizes and mentions were awarded as follows: First place and prize Mr. Ed. Erick, S. F. A. C.; second place, Mr. S. Jorey, University of California; third place, Mr. C. L. Harrison, S. F. A. C.; fourth place, Mr. J. P. Davis, Los Angeles & Co.; fifth place, Mr. H. Michelson, S. F. A. C.

Jury—Messrs. Howard, Mullgardt, Kelham, Brown, Farquhar, Rixford, Lansburgh, Hays, E. Blackwell.

President—Messrs. Rosenheim and Polk, President and Ex-President, A. L. P. C.

Advisory Jury—Messrs. Thos. Hastings, Henry Bacon, Wm. Richardson and J. G. Howard.

Your committee wishes to report that the work done for Prize Competition was very good. The work of students has shown improvement from the very beginning.

A great deal of enthusiasm has been aroused among students in San Francisco and the work done by them has been more regular and consequently improvement shown is much greater.

The Los Angeles men have recently taken hold of the work with much vim and the Los Angeles Ateller shows up very well in the judgment.

The U. of C. men have also recently entered competitions and promise to add to the interest of the competitions. Many of the Portland men have dropped out, but there are always certain ones who take part and their work shows improvement.

The Seattle men who started in the strongest, not only in numbers, but also in quality of work presented, have gradually dropped out. Recently they have taken up work again and we trust will make a good showing this year.

The progress made by the draughtsmen is noted by many of their employers. The showing made by the students, we think, on the whole, has been very remarkable.

We hope that the success of this work depends more upon the students themselves and their patrons than it does upon the work of this committee.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will send such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco—Apartment house, 3 story and base, brick, \$25,000. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected on a corner and will contain two stories on the first floor and a number of small apartments on the upper floors. There will be private baths, wall beds and steam heat. The interior will be finished in pine. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

San Francisco—Apartment house, 3 story and base, frame, cost not stated. Architect, Rudolph J. Patcha, Foxcroft Bldg., S. F. Owner, A. Galen. The building will contain a number of apartments arranged in suites of two and three rooms each with baths. There will be wall beds. The interior trim will be of pine. The exterior of the building will be covered with shiplap and brick veneer. The plans are complete and figures are being figured.

San Francisco—Apartment house, 3 story and base, frame, \$10,000. Architects, C. M. and A. F. Roussau, Monndock Bldg., S. F. Owner's name withheld. The building will contain six modern apartments of four rooms and bath each. The interior finish will be of pine and hardwood. There will be wall beds. The exterior of the building will be covered with shiplap and brick veneer. The plans are complete and figures are being figured.

San Francisco—Apartment house, 1 story and base, brick and steel, \$50,000. Architect, Smith O'Brien, Humboldt Bank Bldg., S. F. Owner, J. A. Buckingham. The building will cover a large area and will contain in the neighborhood of ten rooms. The suites will be arranged in apartments of two, three and four rooms each with connecting baths. There will be steam heat, wall beds, elevator service and vacuum cleaning system. The exterior of the building will be faced with pressed brick. The plans are complete and the architect is taking figures on the construction.

San Francisco—Apartment house, 3 story and base, frame, \$10,000. Architects, C. M. and A. F. Roussau, Monndock Bldg., S. F. Owner's name withheld. The building has been designed for a small apartment house containing six four-room apartments. There will be connecting baths. The chambers will have wall beds. The interior will be finished in pine. The exterior will be covered with shiplap. The plans are complete and figures are being taken.

San Francisco—Apartment house, 3 story and base, frame, \$15,000. Architects, Falch & Knoll, Examiner Bldg., S. F. Owners, Hencke Estate. The building has been mentioned here before when the plans were first started. There will be a number of two and

three room apartments with connecting baths and wall beds. The interior trim will be of pine. The exterior of the building will be covered with shiplap and brick veneer. The plans are complete and the architect has taken the figures under advisement.

San Jose, Santa Clara Co., Cal.—Apartment house, 3 story and base, reinforced concrete, \$75,000. Architect, William Bander, Rea Bldg., San Jose. Owner, John Twany. The building will cover a large ground area and will contain stories on the first floor and apartments above. The construction will be fire proof throughout. There will be wall beds and steam heat. The interior will be handsomely finished in pine and hardwoods. The exterior of the building will be faced with pressed brick. Plans will be ready for figures the latter part of this week.

Los Angeles, Cal.—Apartment house, 1 story and base, brick. Cost not stated. Architects, Elsen & Son, Wilcox Bldg., L. A. Owner, C. S. Hamberg. The building will be 45x80 feet. There will be 15 large rooms arranged in suites of two and three rooms each with connecting baths. There will be steam heat, elevator service and wall beds. The exterior of the building will be faced with pressed brick. The plans are being prepared.

CHURCHES.

San Francisco—Church, Class A construction, \$10,000. Architect, John J. Foley, Monndock Bldg., S. F. Owners, St. Joseph's Parish. The building will be 16x100 feet. The main portion will be 67 feet in height with two towers 150 feet high. There will be a complete steel frame. The exterior walls will be faced with Bedford Lime Stone. The main auditorium will have a seating capacity of 1200 people. The interior will be handsomely finished in oak and ornamental plaster. The roof will be of slate. The architect has completed the working drawings and contracts for the stone and brick work have been awarded.

Oakland, Cal.—Church, brick and stone, \$100,000. Architect, W. C. Hays, Foxcroft Bldg., S. F. Associated with Architects Cram, Goodhue & Ferguson, Boston. Owners, First Presbyterian Church of Oakland. This work has been mentioned here a number of times before. The plans are now complete and figures are being taken by the architect. The exterior will be faced with stone. There will be considerable stone used. There will be steam heat.

Newman, Stanislaus Co., Cal.—Church, 2 story and base, frame, \$20,000. Architect, John J. Foley, Monndock Bldg., S. F. Owners, Roman Catholic Church of Newman. The building will be designed in the Spanish Mission style. The main auditorium will have a seating capacity of 500 people.

The interior will be finished in oak and ornamental plaster. The exterior will be covered with cement plaster on metal lath. The roof will be of red clay tile. The plans will be completed shortly.

FLATS.

San Francisco—Flat alteration, 3 story frame, \$3,000. Architect, David Safford, Clunie Bldg., S. E. Owner, Paul Barbier. The work will include the alteration of the first floor flats into modern stores. The upper floors will also be rearranged. There will be new plumbing and electric work. The plans are complete and figures will be taken.

San Francisco—Flats, 2 story and base, frame, \$1,000. Architect, none. Owner, A. C. Jones, 246 San Carlos Ave., S. E. The building will be 35x83 feet. There will be two modern four and five room flats with baths. The interior will be finished in pine and redwood. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

San Francisco—Flats, 3 story and base, frame, \$6,000. Architect, none. Owner, H. C. Keenan, 300 Webster street, S. E. The building will contain six flats of four and five rooms each with baths. The interiors will be finished in pine and redwood with some hardwood floors. The exterior of the building will be covered with shiplap and brick veneer. The plans are in the hands of the owner and the work will be done by Day Labor.

Oakland, Cal.—Flats, 2 story and base, frame, \$2,500. Architect, none. Owner, Mrs. L. Lorenzen, 2129 West St., Oakland. The building will contain four flats of four and five rooms each with bath. The interior will be finished in pine. The exterior of the building will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Flats and store, 2 story and base, frame, \$6,000. Architect, William Rich, 5331 Lawton Ave., Oakland. Owner, C. W. Jacks. The building will contain stores on the first floor and several four and five rooms flats on the upper floors. The exterior of the building will be covered with cement plaster on metal lath and rustic. The plans are complete and the architect is now taking figures.

GARAGES.

San Francisco—Garage, 1 story and base, concrete, \$10,000. Engineer, R. C. Doering, Mondnock Bldg., S. E. Owner, St. George Holden. The building has been designed for a commercial garage. There will be considerable reinforcing steel used. The engineer is now taking figures on the plumbing, concrete work, steel and corrugated iron work.

GOVERNMENT WORK AND SUPPLIES.

wrought-iron pipe, plumbing fixtures, Portland cement, etc., for delivery at Pearl Harbor, H. T.

Item 1. 91,000 sq. yds. metal lath; 2, 60,400 sq. yds. do. Bids received from American Rolling Mill Co., Middletown, Ohio; Stokes Metal Lath and Roofing Co., Niles, Ohio; General Fireproofing Co., Youngstown Ohio; Truss Construction Steel Co., Detroit, Mich.; Northwestern Expanded Metal Co., Chicago.

20,000 Barrels Portland Cement.
H. Hatfield & Co. (Ltd.), 310 Sanson street, San Francisco, Cal., \$2.25 per bbl., f. o. b. San Francisco, \$2.80 per bbl., f. o. b. Honolulu, allowance of 10c to be made for return of bags in good condition; delivery f. o. b. steamer 24 days.

H. Davis & Co. (Ltd.), San Francisco, Cal., \$2.25 per bbl., f. o. b. San Francisco; \$2.80 per bbl., f. o. b. Honolulu; to be delivered in sacks; allowance of 10c to be made for all sacks returned in good condition; delivery as follows: 5,000 bbls in 3 days, 20,000 bbls in 10 days, delivered at San Francisco; 5,000 bbls 2 weeks, 20,000 bbls 30 days, delivered at Honolulu.

Atlas Portland Cement Co., New York city, \$1.02 per bbl in export coarage and \$1.05 per bbl in bags f. o. b. Northampton, Pa.; \$1.25 per bbl in export coarage, \$1.30 per bbl in bags, delivery New York Harbor, for delivery at Jersey City deduct 10c per bbl; for delivery in double cloth bags, add 40c per bbl; allowance for return of bags, 8.5c, time of delivery, 20,000 bbls 5 days.

Santa Cruz Portland Cement Co., San Francisco, Cal., \$2.25 per bbl., f. o. b. San Francisco, \$2.80 per bbl., f. o. b. Honolulu, allowance of 10c each for all sacks returned in good condition; time for delivery, 25 days.

Alpha Portland Cement Co., Easton, Pa., \$1.10, delivery f. o. b. mill; \$1.33, in wooden bbls, f. o. b. New York; \$1.10 in cloth, f. o. b. mill; \$1.33, in cloth, f. o. b. New York; an allowance of 10c each will be made for all bags returned in good condition, delivery, 750 bbls in wood, 2,500 bbls in cloth, in 1 or 2 days.

Pacific Portland Cement Co., San Francisco, Cal., \$2.25 per bbl., f. o. b. San Francisco; \$2.80 per bbl., f. o. b. Honolulu; an allowance of 10c each will be made on all bags returned in good condition; delivery, 5,000 bbls in 3 days, f. o. b. San Francisco, total 20 days.

4,000 Barrels Lime.

H. Hatfield & Co., San Francisco, Cal., \$10 per ton, f. o. b. San Francisco; \$12.50 per ton, f. o. b. Honolulu; \$13 per ton, delivery f. o. b. Honolulu via sailing vessel; a rebate of 10c will be made on all bags returned in good condition; delivery, 4,000 bags in 25 days, f. o. b. San Francisco.

Holmes Lime Co., Mondnock Building, San Francisco, Cal., \$10 per ton net, \$12 gross, delivery f. o. b. San Francisco; \$13 per ton net, \$15 per ton gross, delivery, Honolulu; \$13.50 net, \$15.50 gross, delivery Honolulu via sailing vessel, net prices are per ton, without allowance for sacks; gross prices allow \$2 for return of sacks; delivery, 4,000 bags in 30 days.

Material—Class E Steel for Buildings.
Item 1, field officers' quarters, one building; item 2, do. 5 buildings; item 3, double officers' quarters, one build-

ing; item 4, do. 19 buildings; item 5, barracks; item 6, 160 pieces steel channel, 16 ft long; 7, 60 pieces 2½-in channel, 20 ft long; item 8, 24 pieces steel angles, 20 ft long; item 9, 300 square nuts; 10, 5,500 machinists' bolts, 8 in; item 11, 450 lag bolts.

Bids on all items received from the following firms: Berkeley Steel Co., Balboa Building, San Francisco, Cal.; Independent Ridge Co., Pittsburgh, Pa.; Griffith Iron Works Co., 230 and Papin streets, St. Louis, Mo.; J. B. Kendall Co., Washington, D. C., class E total f. o. b. factory, \$14,124.95 80 days; Honolulu, \$18,177.77, 145 days; class F f. o. b. factory, \$12,873.30 30 days; Honolulu, \$19,840.91, 100 days.

Berger Manufacturing Co., Canton, Ohio, on first four items, Belmont Iron Works, 223 and Washington avenues, Philadelphia, Pa.

Steel Pipes for Water Pipe.
Item 1, 350 tons R. W. G. No. 7; item 2, 350 tons do. No. 9.

Federal Construction Co., Midland, Pa., item 1, \$18,600, f. a. s. New York; \$223,500, f. a. s. San Francisco; item 2, \$21,000, f. a. s. New York; \$26,500, f. a. s. San Francisco; delivery in 6 weeks and 200 days.

J. B. Kendall Co., Washington, D. C., item 1, total, \$26,600, f. o. b. Pittsburgh; \$28,070, f. o. b. New York; \$35,910, f. o. b. Honolulu; if shipped in government bottoms add 70c per ton shipment at Pittsburgh by June 1.

T. S. Steel Products Co., New York city, item 1, \$31,472 per 100 lbs. delivery f. o. b. Ambridge; \$2.49 per 100 lbs, f. o. b. Honolulu; item 2, \$1.72, Ambridge; \$2.19, Honolulu.

Honolulu Iron Works, 29 Broadway, New York city, \$1.85 per 100 lbs. delivery at New York.

Reinforcing Rods.
Belmont Iron Works, Philadelphia, Pa., 129,000 lbs 1 inch square, \$1.15, factory; \$1.81, Honolulu; 199,000 lbs ¾ in square, \$1.15, factory; \$1.81, Honolulu; 252,000 lbs ¾ in square, \$1.40, factory; \$1.60, Honolulu; 255,000 lbs ¾ in round, \$1.20, factory; \$1.86, Honolulu; 285,000 lbs ½ in round, \$1.25, factory; \$1.91, Honolulu; 125,000 lbs ½ in round, \$1.40, factory; \$2.06, Honolulu; 39,000 lbs 1-8x1 in flat, \$1.50, factory; \$2.16, Honolulu; 30,000 lbs 1-8x1 in flat, \$1.25, factory; \$1.91 Honolulu.

Plumbing Fixtures.

Federal-Huber Co., Chicago, Ill., class A, f. o. b. factory, \$23,841; class B, f. o. b. Honolulu, \$26,763; shipment in 75 days, complete delivery in 240 days.

L. Wolf Manufacturing Co., Chicago, Ill., f. o. b. factory, \$23,249.1; f. o. b. delivery at Honolulu via New York, \$32,192.41.

J. L. Mott Iron Works, Trenton, N. J., \$29,863.80; shipment at Trenton or f. o. s. steamer at New York.

Haynes, Jones & Galloway Co., Philadelphia, Pa., unit prices only, no totals.

The John Douglas Co., Chicago, Ill., class C, f. o. b. factory, \$27,900; on dock at Honolulu, \$31,650.

Crane Co., Chicago, Ill., f. o. b. factory, \$24,039.12; Honolulu, \$25,977.71.

Water Heaters, Etc.

Kewanee Boiler Co., Kewanee, Ind., item 1, \$122, f. o. b. factory; 2, \$670.5, f. o. b. factory.

Crane Co., Chicago, Ill., item 1, f. o. b. factory, \$115,500; Honolulu, \$137,235; item 2, \$58.30, factory; \$72.80, Honolulu.

Waste and Vent Pipe.

Crane Co., Chicago, Ill., \$5,282.42, f. o. b. factory; \$6,511.81, f. o. b. Honolulu.

Water Pipe.

Crane Co., Chicago, Ill., \$1,218.63, f. o. b. factory; \$1,192.58, f. o. b. Honolulu.

The contract for the construction of a brick dormitory in connection with the Indian School at Albuquerque, N. Mex., has been awarded by the commissioner of Indian Affairs, Washington, D. C., to J. A. Holland & Son, of Albuquerque, at \$24.88.

SCHOOLS

Richmond, Contra Costa Co., Cal.—School, 2 story and base, brick and concrete, \$60,000. Architect, F. D. Voorhes, Central Bank Bldg., Oakland. Owners, City of Richmond. Bids for the general construction and for the heating and ventilating of this building were opened as follows:

For General Construction—Kuykendall, \$4,126.11; J. P. Price, \$3,559.632; Stockholm & Allen, Oakland, \$59,672 (successful bidder); Brady & Fisher, S. F., \$66,550; Walter Sorenson, S. F., \$62,812; R. W. Moller, Berkeley, \$63,772; James & McQuinn, S. F., \$66,000; Crickshank, Richmond, \$63,000; Robinson & Place, Richmond, \$61,778.

For Heating and Ventilating—Murray & Co., \$9,362; Charles E. Thomas, Oakland, \$6,974; Whitman-Lyman, S. F., \$8,987; O'Meara, S. F., \$8,192; Pacific Heating and Heating Co., Oakland, \$7,000.

625; Sutton, Co., S. F., \$7,880; Mangrum & Otter, S. F., \$7,445; Gilley Schmidt, S. F., \$7,737; Pacific Fire Extinguisher Co., S. F., \$8,895; Abrahamson & De Gier, \$6,225 (successful bidder); General Eng. Co., \$7,115; Daltzell, Oakland, \$8,227.

Richmond, Contra Costa Co., Cal.—School, 2 story and base, brick and steel, \$55,000. Architect, Louis L. Stone, Macdonough Bldg., Oakland. Owners, City of Richmond. The following bids for this work were opened:

For General Construction—Furlong, \$63,700; Brady & Fisher, \$64,960; McLean, Haggins & Aden, S. F., \$68,900; W. W. Anderson, \$69,790; Walter Sorenson, \$68,100; R. W. Moller, Berkeley, \$64,497; Thurston, S. F., \$64,984; Onseley, S. F., \$61,250; Cruickshank, Richmond, \$67,400; Stockholm & Allen, \$64,788; Kuykendall, S. F., \$66,957; Arlet, S. F., \$60,965 (successful bidder); Whalen, \$63,315; O. B. Ackerman & Sons, Oakland, \$61,567.

For Heating and Ventilating—Charles E. Thomas Co., \$7,879 (successful bidder); Whitman-Lyman, S. F., \$8,925; O'Meara, S. F., \$8,677; Pacific Heater and Heating Co., Oakland, \$8,580; J. G. Sutton & Co., S. F., \$9,280; Mangrum & Otter, S. F., \$8,545; Gilley-Schmidt, S. F., \$9,997; Pacific Fire Extinguisher Co., \$9,969; Gen. Eng. Co., S. F., \$8,472; Abrahamson & De Gier, S. F., \$8,472; Oakland, \$10,610.

Salt Lake City, Utah—School, 3 story and base, Class A construction, \$300,000. Architects, Edlridge & Chesbro, Brady Bldg., Salt Lake City. Owners, City of Salt Lake. The plans for one of the largest and most modern high schools erected in the west have been completed by the above mentioned architects and have been placed in the hands of the Board of Education. Figures on the work will be taken at once and bids will be opened on May 1st. Bids are being received for both the general construction of the building and for segregated contracts. Complete plans and specifications may be obtained from the architects.

SEWERS, STREET WORK AND WATER SYSTEMS

San Francisco—Sewer construction, \$150,000. City Engineer, Marsden Manson, 1404 David Hewes Bldg., S. F. Owners, City and County of San Francisco. The following bids for the construction of an outfall sewer were opened by the Board of Public Works: Consolidated Construction Co., \$141,000; State Construction Co., \$150,000; Harney Bros. Construction Co., \$160,000; R. C. Storrie & Co., \$181,000; Healy-Tibbitts Construction Co., \$200,000; Contra Costa Construction Co., \$200,000; Daniel Construction Co., \$250,000. As the first mentioned company is low, it will no doubt receive the award.

SEALED PROPOSALS.

(Bids close April 27.)

PROPOSALS FOR CANAL SUPPLIES. CANAL CIRCULAR 608.—Proposals for Material for Sixty Cylinders, Rivets, Steel Bolting Bars, Rabbit Metal, Bolster Truck Springs, Pipe Material, Bolster Hangers, Fire Hose, Heating Boilers, Hot Water Service Heaters, Sanitary Fixtures, Cast-iron

Pipe and Fittings, Steel Pipe and Fittings, Brads, Pipe and Fittings, Lead Bends and P Traps, Valves, Cloaks, Lumber, Untreated Piles and Artificial Vermilion.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m., April 27, 1912, at which time they will be opened in public, for furnishing the above-mentioned articles. Blanks and general information relating to this circular (No. 698) may be obtained from this office or the offices of the assistant purchasing agent, 1056 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR CANAL SUPPLIES.

(Bids close May 6.)

CANAL CIRCULAR 701.—Proposals annual estimates for the period ending June 30, 1913, Blasting Caps, Detonators, Safety Fuse, Insulating Tape and Lead Wire.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 11 a. m., May 6, 1912, at which time they will be opened in public for furnishing the above-mentioned articles. Blanks and general information relating to this circular (No. 701) may be obtained from this office or the office of the assistant purchasing agent, 1056 North Point street, San Francisco, Cal. F. C. BOGGS, major, corps engineers, U. S. army, general purchasing officer.

PROPOSALS FOR CEMENT.

(Bids close April 25.)

CEMENT.—Department of the Interior, United States Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, 408 Commonwealth Building, Denver, Colo., until 10 o'clock a. m., April 25, 1912, for furnishing 260,000 barrels of Portland cement f. o. b. cars at the works of the bidder, for shipment during the years 1913 to 1916, inclusive. The estimated requirements for each of the above years are as follows: 1913, 70,000 barrels; 1914, 85,000 barrels; 1915, 85,000 barrels; 1916, 20,000 barrels. For particulars address the U. S. Reclamation Service, 408 Commonwealth Building, Denver, Colo., or Washington, D. C. E. T. NEWELL, director.

PROPOSALS FOR CANAL SUPPLIES.

(Bids close May 6.)

CANAL CIRCULAR 700.—Proposals for Dynamite; annual estimate for the period ending Dec. 31, 1912.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m., May 6, 1912, at which time they will be opened in public for furnishing the above-mentioned article. Blanks and general information relating to this circular (No. 700) may be obtained from this office or the office of the assistant purchasing agent, 1056 North Point street, San Francisco, Cal.; also from the engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps engineers, U. S. army, general purchasing officer.

CONSTRUCTING BUILDING.

(Bids close May 1.)

NOTICE is hereby given that sealed bids will be received by the undersigned up to 12 o'clock, noon, Wednesday, May 1, 1912, for the erection and completion of a brick and concrete building known as the Salt Lake high school, to be located on lot bounded by Thirtieth and Twelfth East streets and Eighth and Ninth South streets, Salt Lake City, for the Salt Lake City Board of Education.

Plans and specifications and all information can be obtained by bidders at the office of Eldredge & Chesedro, on Saturday, April 6, 1912, and after, at their offices, 626 Deedy building, Salt Lake City, Utah, and all bids and proposals will be publicly opened and read at the meeting of the School Board on Wednesday, May 1, 1912, at 12 o'clock noon, at the Board of Education rooms, 202, in the City and County building, Salt Lake City, Utah.

Each general contractor will be given an complete set of plans and specifications from which to figure his work and he will be required to make a deposit for same of twenty-five dollars (\$25.00), which deposit will be returned to him on return of plans and specifications. If additional sets be desired, a reasonable charge, as stated in specifications will be made for same as well as a deposit.

All bids must be addressed to "Board of Education for Salt Lake City," and must be marked in lower left hand corner "Bid for Erection and Completion of Salt Lake High School," and delivered to the Clerk of the Board of Education at the said place of opening.

All bids must be given on a form as will be found in the office of the archi-

tects and no other form of bid will be received.

A certified check or cashier's check on some bank in Salt Lake City, Utah, for five per cent of the amount of each bid must be enclosed. Each check is to be made payable to the undersigned and is to be forfeited to the undersigned in case the bid is accepted and the bidder does not enter into contract within six days after its acceptance for the faithful execution of the contract and bond heretofore mentioned. A surety company's bond must be furnished for one-half the bid satisfactory to the undersigned. The undersigned reserves the right to reject any or all bids.

Salt Lake City, Utah, Friday, April 5, 1912.

BOARD OF EDUCATION, SALT LAKE CITY, UTAH.

By L. P. Judd, Clerk.

NOTICE TO CONTRACTORS.

(Bids close April 25.)

OFFICE Constructing Quartermaster, Fort Mason, Cal., April 10th, 1912.—Sealed proposals, in triplicate, for installing plumbing, heating, electric wiring and fixtures, elevator and kitchen equipment in kitchen at Letterman General Hospital, U. S. A., will be received here until 11 a. m., April 25th, 1912, and then opened. Plans, specifications, blank forms and all necessary information can be obtained here. Deposit of \$10.00 required to insure return of plans, etc. Envelopes containing proposals to be endorsed "Proposals for (as the case may be) in Kitchen at Letterman General Hospital" and addressed to Lt. Col. GEO. McK. WILLIAMSON, D. Q. M. S. U. S. A.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—2 story and base, brick, \$25,000. San Francisco, architect, V. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected on a corner and will contain two stores on the first floor and a number of small apartments on the upper floors. There will be private baths, wall beds and steam heat. The interior will be finished in pine. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Apartment House—3 story and base, frame, cost not stated. San Francisco, architect, Rudolph J. Patcha, Foxcroft Bldg., S. F. Owner, A. Gaden. The building will contain a number of apartments arranged in suites of two and three rooms each with baths. There will be wall beds. The interior will be of pine. The exterior of the building will be covered with ship-lap and brick veneer. The plans are complete and figures are being taken.

Apartment House—2 story and base, frame, \$10,000. San Francisco, architects, C. M. and A. F. Rousseau, Monahan Bldg., S. F. Owner's name withheld. The building will contain 6

modern apartments of four rooms and bath each. The interior finish will be of pine and hardwood. There will be wall beds. The exterior of the building will be covered with ship-lap and brick veneer. The plans are complete and plans are being figured.

Apartment House—1 story and base, brick and steel, \$50,000. San Francisco, architect, Smith O'Brien, Humboldt Bank Bldg., S. F. Owner, Mrs. A. Buckingham. The building will cover a large area and will contain in the neighborhood of 100 rooms. The suites will be arranged in apartments of two, three and four rooms each with connecting baths. There will be steam heat, wall beds, elevator service and vacuum cleaning system. The exterior of the building will be faced with pressed brick. The plans are complete and the architect is taking figures on the construction.

Apartment House—2 story and base, frame, \$10,000. San Francisco, architects, C. M. and A. F. Rousseau, Monahan Bldg., S. F. Owner's name withheld. The building has been designed for a small apartment house containing six four-room apartments. There will be connecting baths. The chambers will have wall beds. The interior will be finished in pine. The exterior

terior will be covered with shiplap. The plans are complete and figures are being taken.

Apartment House—2 story and base, frame, \$15,000. San Francisco. Architects, Faleh & Knoll, Examiner Bldg., S. F. Owners, Hencke Estate. The building has been mentioned here before when the plans were first started. There will be a number of two and three room apartments with connecting baths and wall beds. The interior trim will be of pine. The exterior of the building will be covered with shiplap and brick veneer. The plans are complete and the architects have taken the figures under advisement.

Church—Class A construction, \$100,000. San Francisco. Architect, John J. Foley, Monadnock Bldg., S. F. Owners, St. Joseph's Parish. The building will be 162x100. The main portion will be 67 feet high with two towers 150 feet high. There will be a complete steel frame. The exterior walls will be faced with Bedford Lane Stone. The main auditorium will have a seating capacity of 1200 people. The interior will be handsomely finished in oak and ornamental plaster. The roof will be of slate. The architect has completed the working drawings and contracts for the stone and brick work have been awarded.

Flat Attention—2 story, frame, \$2,000. San Francisco. Architect, David Salmel, Union Bldg., S. F. Owner, Paul Larberg. The work will include the alteration of the first floor flats into modern stores. The upper floors will also be rearranged. There will be new plumbing and electric work. The plans are complete and figures will be taken.

Flats—2 story and base, frame, \$1,000. San Francisco. Architect, none. Owner, A. Cuno, 216 San Carlos Ave., S. F. The building will be 27x81 feet. There will be two modern four and five room flats with baths. The interior will be finished in pine and redwood. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Garage—1 story and base, concrete, \$10,000. San Francisco. Engineer, R. C. Doering, Monadnock Bldg., S. F. Owner, St. George Holden. The building has been designed for a commercial garage. There will be considerable reinforcing steel used. The engineer is now taking figures on the plumbing, concrete work, steel and corrugated iron work.

Materials for Kitchen, Plumbing, Etc.—Cost not stated. San Francisco. Engineers, Constructing Co., M. Dept. C, S. A., Fort Mason, Owners, U. S. Government. Bids will be opened on Williamson for the plumbing, electric work and electric fixtures elevator kitchen building which is to be erected at the General Hospital at the Presidio.

Hotel—5 story and base, reinforced concrete and steel, \$60,000. San Francisco. Architects, Frey & S. Foster, Monadnock Bldg., S. F. Owners, Hart Estate. The general contract for this work has been awarded to Ramon Lopez, Builders' Exchange, and the contractors are taking subcontracts on all parts of the work.

Hotel and Stores—7 story and base, brick and steel, \$100,000. San Francisco. Architect, V. Patterson Ross, 222 Kearny St., S. F. Owner, Emma Joseph Estate. The building will oc-

cupy a corner site. There will be several stories on the first floor and in the neighborhood of 150 rooms on the upper floors. There will be steam heat and elevator service. The interior will be handsomely finished. A large proportion of the rooms will have connecting baths. The exterior of the structure will be faced with pressed brick and cement plaster. The plans are complete and figures are being taken.

Hotel—8 story and base, reinforced concrete, \$150,000. San Francisco. Architects, MacDonald & Applegarth, Call Bldg., S. F. Owner, William F. Wilson. The building is another of the recent improvements announced for Mason street. The construction throughout will be of reinforced concrete. There will be upwards of 200 rooms on the upper floor besides the baths. The first floor will contain the office and stores. The exterior of the structure will be faced with pressed brick. There will be steam heat, elevators, vacuum cleaning and other modern features. The plans are being prepared.

Hotel—3 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, H. C. Keenan, 300 Webster St., S. F. The building will contain six flats of four and five rooms each with baths. The interiors will be finished in pine and redwood with some hardwood floors. The exterior of the building will be covered with shiplap and brick veneer. The plans are in the hands of the owner and the work will be done by Day Labor.

Sewer Construction—\$150,000. San Francisco. City Engineer, Marsden Manson, 1104 David Hayes Bldg., S. F. Owners, City and County of San Francisco. The following bids for the construction of an outlet sewer were opened by the Board of Public Works: Consolidated Construction Co., \$111,000. State Construction Co., \$150,000. Hatney Bros. Construction Co., \$160,000. R. C. Storrie & Co., \$191,000. Healy-Thibault Construction Co., \$200,000. Contra Costa Construction Co., \$200,000. Daniel Construction Co., \$230,000. As the first mentioned company is low, it will no doubt receive the award.

School—3 story and base. Class A construction, \$200,000. Salt Lake City, Utah. Architects, Eldridge & Chesbro, Dooly Bldg., Salt Lake City. Owners, City of Salt Lake. The plans for one of the largest and most modern high schools erected in the west have been completed by the above mentioned architect and have been placed in the hands of the Board of Education. Figures on the work will be taken at once and bids will be opened on May 1st. Bids are being received for both the general construction of the building and for segregated contracts. Complete plans and specifications may be obtained from the architects.

Residence—2 story and base, frame, \$8,000. San Francisco. Architect, Joseph Galen, 45 Kearny St., S. F. Owner, Mrs. L. H. Susman. The dwelling has been designed for a ten-room house with all modern conveniences. The interior finish will be of pine and redwood with some white enamel and hardwood floors throughout. There will be furnace heat and open fire places. The mantels will be of brick. The tile will be used in the baths and kitchen. The exterior of the house will be covered with cement plaster on

metal lath. The plans are being prepared.

Residence—3 story and base, frame, \$8,000. San Francisco. Architect, J. C. Kincanon, 1170 Hayes St., S. F. Owners, Metropolitan Investment Co. The dwelling has been designed for an eight-room house with a finished attic. There will be three baths. The interior finish will be of pine and hardwoods. There will be steam heat and open fire places. The exterior of the dwelling will be finished in brick veneer and shiplap. The plans are complete and in the hands of the owner who will do the work by Day Labor.

Residence—2 story and base, frame, \$5,000. San Francisco. Architects, Faleh & Knoll, Examiner Bldg., S. F. Owner, J. E. Casis. The dwelling will contain eight rooms and bath. The interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—5 story and base, frame, \$2,000 each. San Francisco. Architect, none. Owner, Joseph Kemp, 242 San Jose Ave., S. F. The dwellings have been designed for six-room houses with baths. The interior finish will be of pine throughout. There will be open fire places and tile mantels. There will be some hardwood floors. The exteriors of the dwellings will be covered with shiplap and rustic. The plans are in the hands of the owner and the work will be done by Day Labor.

SAN JOSE AND THE SANTA CLARA VALLEY.

Apartment House—3 story and base,
reinforced concrete, \$75,000. San Jose,
Santa Clara Co., Cal. Architect, Wil-
liam Binder, Rea Bldg., San Jose. Own-
er, John Twedy. The building will
cover a large ground area and will con-
tain stores on the first floor and apart-
ments above. The construction will be
late proof throughout. There will be
wall beds and steam heat. The interior
will be handsomely finished in pine
and hardwoods. The exterior of the
building will be faced with pressed
brick. Plans will be ready for figures
the latter part of this week.

Residence—2 story and base, frame,
\$15,000. San Mateo Co., Cal. Archi-
tects, Havens & Toepke, 46 Kearny St.,
S. F. Owner, John Banghart. This work
was mentioned here before when the
architects were first commissioned to
prepare the plans. The working draw-
ings are now complete and figures are
being taken. The dwelling has been
designed as a handsome country home.
There will be furnace heat and all
other modern conveniences. The ex-
terior will be covered with cement
plaster on metal lath. Bids will be
opened next week.

Contracts Awarded.

Editorial Comment.

Among the inventions that have been perfected to add to the comfort and conveniences of the traveling public is that of the loud speaking telephone train annunciator. By means of this contrivance the arrival and departure of trains is announced in all the waiting rooms of stations without delay or inconvenience.

The official who announces the outgoing trains speaks into a special water-cooled telephone transmitter installed in a booth conveniently placed and from which his voice is telephonically transmitted and reproduced in no less than sixteen loud speaking receivers with amplifying horns connected in multiple and distributed throughout the waiting rooms. Incoming trains are announced from the same transmitter by throwing a switch to connect a separate circuit of ten of the loud speaking receivers installed on the track levels below the waiting room floor. By this indirect telephone method a single announcement serves for all the waiting rooms. The articulation is simultaneously reproduced, with equal volume of sound, in all the receivers, and by installing several receivers at equal distance in each of the large inclosed spaces which make up the waiting rooms, the enunciation in exact unison not only fills the space, but obviates the confusion of echoes.

To those who have earnestly tried to catch the meaning of the barkers who spied in the waiting rooms of the great union stations, this invention will appeal with a great deal of favor. It always seems that those leather-lunged individuals speak a language that no human being can understand and their principal occupation is to hellow around and make a noise and thereby create confusion in the minds of innocent travelers.

It is to be hoped that when the railroads install these devices they will employ some sweet voiced girl to make the announcements or else some American citizen who speaks the language and enunciates so that an ordinary individual can tell what he is talking about.

Substitutes for rubber have been used in electrical appliances and many departments of industry. The cost of good rubber has made such a substitute desirable and numerous experiments have been made to secure substance that would answer the purpose. The current number of Scientific American describes a new substitute for hard rubber, gutta percha, and leather that is obtained from the common seaweed.

A new product, based on common seaweed, which is found in such unlimited abundance, is announced as the result of many years of experiment

in England. Many scientists have foreseen the enormous possibilities afforded by seaweed, and the material just discovered, called Seagumite, bids fair to exceed all expectations, as it is of special value in all electrical industries, being a non-inflammable insulation of high dielectric strength proof against heat, cold, oils and weather. A singular property is the increase in insulation resistance following immersion in water. The material is unaffected by dilute sulphuric acid, which makes it well adapted to storage-battery jars and separators. Among associated mechanical uses, Seagumite seems well adapted for motor gears, switchboard panels, switch handles, steam and gas packings, especially for high pressures. The product is also well suited to replace leather in belting and all the other varied uses of leather.

Lately the seaweed of the Pacific Coast has been found to be productive of potash and a great fertilizer for soils. So if it can be used for the production of this seagumite, as it is called, and also produce fertilizing potash, the gathering of seaweed from the ocean may become a profitable industry.

Details of the great wreck as told by the survivors of the Titanic, seem to indicate a lack of discretion and sound judgment on the part of the men in charge, of course in almost any accident the hindsight is better than the foresight and there are numerous things, if noted, would have prevented the catastrophe.

But here the ship had been warned of icebergs directly in its path. The temperature of the water must have told the officers that they could expect them at any time. And as experienced seamen, knowing the treacherous nature of the fies, it was up to them to take double precautions, knowing the limitations of their craft and the danger to those on board. Perhaps the tranquility of the night made them less apprehensive. In any event the testimony shows that there was no slackening of speed and the ship rushed headlong into the disaster.

That such a catastrophe was possible was known to all men connected with the shipping business. Yet in spite of this fact the great ship was equipped with less than one fourth enough life boats to accommodate its full complement of passengers and crew. It seems remarkable that such conditions exist. Yet it has always been so. It takes a fire and the destruction of hundreds of human lives to pass building ordinances that ensure the safety of life in public buildings. So in marine travel it has taken this awful sacrifice on the altar of mammon to bring about conditions that ensure the safety of the traveling public.

Proposed Standard Specifications For Hollow Clay Tile.

For several years the building department of the city of Cleveland, Ohio has taken an active interest in the subject of the use of hollow clay tile as a substitute for brick in the construction of load-bearing walls. As a result, the conviction has been forced upon the department that the subject was worthy of careful and thorough investigation. In order to secure all possible data relating to the subject, exhaustive tests were made by the building department direct and also by competent engineers acting in harmony with the department, and in conjunction with one of its engineers, to determine the strength, stability, fire-resisting qualities, etc., of hollow building tile.

In the crushing tests, a large number of samples were gathered from different places, some from the yards of the manufacturers and some from the sites of buildings under process of erection. A complete range of quality of tile was thus secured and tests made to determine absorption and crushing strength. All tile tested were first carefully measured and a complete detailed record kept of each tile throughout the entire test.

Some of the tile were built up into columns of different dimensions and with tile laid in different positions in the various columns and then tested for crushing strength; other tile were tested singly. From the results of these tests it was found that where the tile did not absorb more than 12 per cent of their weight in moisture, with vertical webs spaced not more than 4 inches apart, center to center, and with web thickness at least 20 per cent of height and blocks placed so that the vertical webs occurred directly over each other, no single tile or column failed under a less load than 3,645 pounds per square inch of vertical web.

Under the authority invested in the inspector of buildings by the Cleveland building code, the writer ordered a fire test to be made to determine if hollow tile, erected as a wall supporting a heavy uniformly distributed load, would satisfactorily stand the fire test prescribed by the ordinance. A testing inclosure was built with 12-inch walls, having outside dimensions of 9 feet 6 inches by 10 feet 3 inches by 8 feet 9 inches high, with a 3-inch coping of concrete on top. The entire top of the walls was loaded with an even distribution of load of about 1,066 pounds per square foot.

The internal temperature developed was over 2,000 deg. Fahr. at the upper perimeter and 1,600 deg. Fahr. at the lower, the outside wall surface remained cool throughout the entire test and showed no warping, settlement or cracking of any kind. After the water had been turned on and the fire quenched, it was found that the inside plaster had been burned off but the inside face of the hollow tile was true and no apparent damage evident. Later, the rear wall was further loaded to an evenly distributed load of 4,847 lbs. per

square foot without showing evidence of crushing, chacking or disintegration of any sort.

After thus determining the properties of hollow tile from tests, the next step taken by the department was the framing of a suitable specification regulating the safe use of these tile for load-bearing walls and the revision of the building code relative to the subject.

It is evident to the writer that hollow tile can be safely used in the construction of load-bearing walls, only when proper specifications are followed. The specifications must treat them from the standpoint of their supporting webs and not as solid units. The tile must be hard burned. Vertical webs must be spaced not too far apart, and their thickness must be proportioned to their height. All vertical webs must stand in vertical alignment with vertical webs in adjacent tile below and there must be mortar between tiles under the vertical webs. The following specifications cover these points, and amply safeguard the use of hollow tile for load-bearing wall construction and at the same time are readily complied with by builders and the manufacturers.

The limiting of the width of beds that the tile are susceptible of is a most important feature. The mason cannot be relied upon to bed properly and thoroughly a large unit with a broad bed. The mortar is likely to be omitted from a portion of the bed and vertical webs be left without a supporting mortar bed. By limiting the width of the bed that the tile is susceptible of, to $1\frac{1}{2}$ in. (width of common brick), a good bedding will be a certainty as in common brickwork.

From the results of the experimenting the department has done and the consideration given the subject, the writer recommends the following as the essential points to be covered, by building-law restrictions, in permitting the use of hollow clay tile for the construction of load-bearing walls:

Tentative Specifications for Hollow Clay Tile.

(1) Quality of tile: Tile to be made of shale or fireclay or any clay that will burn to a good dense body without undue warping or checking and must be burned to such a degree of hardness that they will not absorb more than 12 per cent of their weight in moisture.

(2) Webs: Vertical webs should be spaced not more than 4 in. apart, c. to c., and should have a thickness of at least 20 per cent of their height.

(3) Bedding: To secure thorough bedding, tile should be so constructed as to preclude mortar beds of more than $1\frac{1}{2}$ in. (same as brick work) in width, and should be laid with broken joints and be thoroughly bedded and bonded.

(4) Quality: Tile should be true and joints and be thoroughly bedded and bonded.

(5) Position in wall: Tile should be so laid in walls that all vertical webs

are in vertical alignment with vertical webs of the adjacent tiles below.

(6) Loads: Hollow tile walls should be loaded with not more than 200 lbs. per sq. in. of vertical web section.

(7) Thickness of walls: Permissible thickness of walls same as for common brick.

(8) Joint bearing: Where joists or beams are seated in walls, they should have a bearing extending over at least two of the vertical webs.

It will be noted that the above specifications only contemplate the use of hollow tile when laid with their voids horizontal. This has been done advisedly. The vertical type has been avoided not only from the standpoint of insufficient bedding and bonding, but also from economical considerations. In the first place, the end of a tile web is too narrow ($\frac{1}{2}$ or $\frac{3}{4}$ in.) for the mason to apply a mortar bed in a practical way and in the second place heat nonconductivity is defeated in walls where the voids of the tiles are vertical. In order to secure nonconductivity, the tiles must be set in the wall with their voids horizontal. If the voids are vertical, opportunity is given for up and down circulation of air within the wall with the following result:

In summer the sun heats the exterior face of the wall. This heats the air in adjacent voids within the tile. The voids being vertical this heated air rises to the top of the wall. While the heated air is rising, the cooler air within the vertical voids adjacent to the interior face of the wall is falling, and, since it is impracticable to prevent communication between the exterior and interior vertical voids, circulation within the wall takes place, the air going up one side and down the other, transferring the heat from one face of the wall to the other. In winter the same operation takes place except the air currents take the opposite direction, and nonconductivity is not secured.

If, on the other hand, the tile are laid with voids horizontal, circulation within the walls is prevented; the air is confined and a nonconductive wall is secured.

It will also be noticed that, although no single tile or column failed under a less load than 3,645 lbs. per sq. in. of vertical web section, the above specifications limit the permissible load to 200 lbs. per sq. in. of web section (a safety factor of about 17). This much load when applied to tile as ordinarily made for load-bearing walls permits their being loaded over 3 tons per sq. ft. of wall area.

There is a marked difference between the clay body of the webs of hollow tile and that of common brick. This results from the different process by which each is manufactured, tile by the "stiff clay," and common brick by the "soft clay" process. A given weight of clay made to properly constructed hollow tile builds as much wall of equal strength and far less conductivity than double that amount

of clay made into common brick and the "soft clay" process, by which they are made.

The more the writer has studied the subject of building with hollow tile instead of common brick or wood, the more he has felt that it is a subject well worthy of careful investigation by engineers and architects, and that cities should avail themselves of the use of this valuable form of construction, by adopting specifications that properly prescribe its use. Cleveland

architects as well as those in some other localities are recognizing that they can build tile residences, many of them situated on their exterior practically as cheap as frame.

The suggestions embodied in the above are particularly to the laid with good advantage. It is advisable to use tile laid with joints vertically, a specification requiring this type of construction should be adopted in addition to the above specifications.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco.—Apartment house, 5 story and base, reinforced concrete. Cost not stated. Architect, E. G. Garden, Phelan Bldg., S. F. Owner, D. Wasserman. The building will be erected in the district south of Market street. There will be a large number of apartments arranged in suites of 3 and 4 rooms each. There will be connecting baths, wall beds, elevator service and steam heat. The interior will be finished in pine throughout. The exterior of the building will be faced with cement plaster. The plans are now out for figures and bids will be opened on April 29th.

San Francisco.—Apartment house, 2 story and base, frame, \$10,000. Architect, C. A. Neussdorfer, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be in the nature of an addition to the present structure and will contain four-room apartments with baths. The interior finish will be of pine with some hardwood floors. The exterior will be covered with shiplap. The plans are complete and figures are being taken.

San Francisco.—Apartment house, 7 story and base, brick and steel, \$100,000. Architects, William Carleton & Son, Phelan Bldg., S. F. Owner, R. E. McElroy. The building will be erected on an inside lot with an L through to another street, giving the building two street frontages. There will be stores on the first floor and a large number of two and three room apartments on the upper floors. There will be elevator service, steam heat and hot and cold running water in all the rooms. There will be considerable structural steel used. The exterior of the building will be faced with pressed brick. The preliminary plans have been prepared.

Berkeley, Alameda Co., Cal.—Apartment house 2 story and base frame, \$75,000. Architect, Earl G. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will cover a large site. The interior will be arranged in four three and four room apartments with connecting baths. There will be steam heat and elevator service. The bed rooms will be equipped with wall beds. The interior finish will be of pine with hardwood floors. The exterior of the building will be covered with cement plaster on metal lath. The architect is preparing the plans.

San Francisco.—Apartment house at ferations, frame construction, \$20,000.

Architect, Earl G. Scott, Humboldt Bank Bldg., S. F. Owner, Mrs. Proff. This work has been mentioned here before. The alterations will consist of the remodeling of four frame residences into modern apartments. The plans have been out for figures and the same are now under advisement in the offices of the architect. A contract will be awarded at once.

Los Angeles, Cal.—Apartment house, 1 story and base, brick. Cost not stated. Architect, S. Tilden Norton, Title and Insurance Bldg., L. A. Owner, S. Tilden Norton. The building has been mentioned here before when the architect first started the plans. Separate bids are now being received. The exterior trim will be of pine and hardwood. There will be wall beds, automatic elevator service and steam heat. The exterior of the building will be faced with pressed brick and artificial stone.

Ocean Park, Los Angeles Co., Cal.—Apartment house, 2 story and base, brick. Cost not stated. Architect, E. M. Morris, Coe Bldg., L. A. Owner, John Stein. The building will be 150 ft. long and will contain 80 rooms arranged in suites of two and three rooms each with connecting bath. There will be steam heat, wall beds, a vacuum cleaning system and trunk elevator. The exterior of the building will be faced with glazed brick. The plans are complete and figures will be called for at once.

Seattle, Wash.—Apartment house, 6 or 8 story and base, Class A construction. Cost not stated. Architect, James H. Schuck, Dwyer Bank Bldg., owner, T. S. Lipp. The architect has just started preliminary plans for a large apartment building for this owner who is heavily interested in the building of this type of structures. The owner is now in California and complete details of the work can not be given until his return.

Portland, Ore.—Apartment house, 2 story and base, brick \$25,000. Architects, Clausen and Clausen, Portland, Owner, John Barney. The building will be 150 ft. long and will contain 15 two and three room apartments with connecting baths. There will be steam heat and wall beds. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

San Pedro, Los Angeles Co., Cal.—Bank, 2 story and base, brick. Cost

not stated. Architects, Edelman and Barnett, Blumhaldt Hall Bldg., L. A. Owner, San Pedro Bank of San Pedro. The work was mentioned here when the architects were first commissioned to prepare the plans. The first floor will be occupied by the banking offices. The second floor will contain 12 modern offices. There will be steam heat. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Los Angeles, Cal.—Bank building and alterations. Cost not stated. Architects, Parkinson and Bergstrom, Security Bldg., L. A. Owner, General American Savings Bank. This institution has leased a large space in the Union Building and are having plans drawn for one of the finest banking rooms in the West. There will be a mezzanine floor, installed coin and safety deposit vaults and elaborate banking fixtures. Plans are now being prepared.

Albany, Ore.—Bank and offices, 5 story and base, reinforced concrete, \$75,000. Architect, W. F. Tobey, Portland, Owner, First National Bank of Albany. The building will cover an area of 5000 sq. ft. The bank will occupy the entire first floor with the exception of the entrance and lobby to the upper floors. There will be 20 offices on each of the floors from the second to the fourth. The fifth floor will be left undivided for lodge room purposes. There will be steam heat, vacuum cleaning system and elevator. The interior of the banking rooms will be handsomely finished in hardwoods and marble. The exterior of the building will be faced with Bedford stone, pressed brick and terra cotta. Plans are now being prepared.

Seattle, Wash.—Bank, 2 story and base, brick and steel, \$10,000. Architects, Beazer Bros., Northern Bank Bldg., Seattle. Owners, University State Bank. The building will contain the banking quarters and offices. There will be steam heat. Large coin and safety deposit vaults will be installed. The exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

Bellingham, Wash.—Bank and offices, 6 story and base, Class A construction, \$37,000. Architect, John Graham, Lyon Bldg. Seattle. Owners, Bellingham National Bank. The structure will cover a ground area of 100 x 125 feet. There will be a large number of offices on the upper floors. The first floor will be given over to the banking quarters and entrance. The construction will be absolutely fireproof. The interior will be of metal. The interior trim will be of metal, ornamental wood and plaster used in the banking offices. There will be elevators, steam heat and a vacuum cleaning system. The exterior of the building will be faced with pressed brick and terra cotta. The plans will be complete in about six weeks.

Contracts Awarded.

San Francisco.—Bank, 1 story and base, brick and steel, \$21,000. Architect, Herbert A. Schmidt, Royal Insurance Bldg., S. F. Owner, General American Savings and Loan Society, Co. Executors, Anthony Brock, Jr., Crocker Bldg., S. F. Contract price, \$21,000.

BANKS.

BRIDGES, DAMS AND HARBOR WORK.

Pittsburgh, Contra Costa Co., Cal.—Bridge, steel span, cost not stated. Engineer's name not given. Owners, Oakland and Antioch R. R. Co., S. F. Naphaly, Vice-President of the company, has applied to the War Department for the right to construct the bridge which he describes as follows: "It is proposed to put in a bridge to accommodate railroad and vehicle traffic across the Suisun Bay at a point a little south of Black Diamond and opposite the center of Clipp's Island. It is to be a steel truss bridge on cylinder piers, with a lift span at some convenient location, in the neighborhood of 100 feet long, which can be opened 120 feet, giving a clearance of 120 feet above the water mark."

Ventura, Ventura Co., Cal.—Bridges, steel and reinforced concrete. Cost not stated. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A. County Engineer E. E. Everett, Ventura, Owners, Ventura County. The following bridges are to be erected in Ventura County, bids for which will be opened by the Board of Supervisors on May 9th: A reinforced concrete thrifolder bridge over the Santa Paula creek near Ferndale Ranch. It will have a 20-foot roadway, 60-foot span and 200 feet of fill for approaches. A reinforced concrete deck girder bridge across Sias creek near Ferndale Ranch. It will have 20-foot roadway, 10-foot span and 100 feet of fill approach. A reinforced concrete deck girder bridge at the West Main street crossing over the Ventura river. It will be 380 feet long and will have 61½-foot spans, 18-foot roadway and no approaches. Replacing the trestle approaches to the Montalvo bridge with combination trusses. Between 800 and 900 feet of trestle will be replaced with combination trusses in 83-foot spans, the ends of the trusses being supported by cement filled culs sons.

Tacoma, Wash.—Bridge, steel, \$290,000. Engineer's name not given. Owners, Oregon-Washington Railway and Navigation Co. It is reported that the plans for a steel bridge at 17th street have been completed and that as soon as permission can be secured from the authorities bids will be called.

San Bernardino, San Bernardino Co., Cal.—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, San Bernardino. Owners, San Bernardino County. Bids for the construction of a reinforced concrete bridge over the Lytle Creek will be opened on April 25th. Plans and specifications can be secured from the County Surveyor.

Santa Ana, Orange Co., Cal.—Bridges, 2 concrete and frame, \$1,000 and \$2,000. Engineer, County Surveyor Santa Ana, Owners, Orange County. The supervisors have appropriated the above mentioned sums for the construction of two bridges in the county and the County Surveyor is now preparing plans for the same.

CHURCHES.

Riverside, Riverside Co., Cal.—Church, 2 story and base brick and stone. Cost not stated. Architect, Myron Hunt, Hillman Bldg., L. A. Owners, First Congregational Church of Riverside. The revised plans for

this work, which has been mentioned here before, have been completed and the three lowest bidders will be asked to refigure the work.

Orange, Orange Co., Cal.—Church alterations, \$15,000. Architect, H. M. Patterson, C. T. Johnson Bldg., L. A. Owners, Orange Presbyterian Church. Bids are now being received for the painting, oil glass work and heating system in this building. Plans can be secured from the architect.

Phoenix, Ariz.—Church additions, brick construction. Cost not stated. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, First Baptist Church of Phoenix. Twelve class rooms will be added and the seating capacity of the main auditorium will be considerably increased. The exterior of the building will be faced with cement plaster. Plans are being prepared.

Los Angeles, Cal.—Church, 2 story and base, concrete and brick. Cost not stated. Architect, Elmer Gray, Wilcox and Gallender Bldg., L. A. Owners, First Church of Christ, Scientist. The building will be 17x11½ feet. There will be considerable structural steel used. The work has been described here before when the architect was first selected to prepare the plans. The exterior of the building will be faced with tapestry brick, trimmed with terra cotta. Plans are complete and figures are being taken.

Everett, Wash.—Church, 1½ story and base, brick. Cost not stated. Architect, Ellsworth Storey, New York Bldg., Seattle. Owners, Trinity Parish of Everett. The building will be 75x120 feet. There will be a central heating system. The main auditorium will have a seating capacity of 1200 people. There will be a library and study in connection, Sunday School rooms and social hall. The exterior of the building will be faced with pressed brick and terra cotta. Plans have been figured and a contract will be awarded at once.

COURT HOUSES.

Hillshorn, Washington Co., Ore.—Court house annex, 2 story and base, reinforced concrete. Cost not stated. Architect, Newton C. Gaunt, Henry Bldg., Portland. Owners, Washington County. Bids for the construction of this annex were opened on April 21st. Complete list of bidders will be given in the next issue.

FACTORIES & WAREHOUSES.

San Francisco—Warehouse, 3 story and base, brick and steel, \$80,000. Architect, S. Helman, 127 Montgomery St. S. F. Owners, Zellerbach Paper Co. The architect is now completing the working drawings for a large wholesale building for the Zellerbach Paper Co., which will be erected on the lot recently purchased by them in Townsend street. The structure will cover an area of 255x155 feet. There will be fire proof doors and metal window frames and sash. There will be elevators, modern plumbing and a sprinkler system. The exterior of the building will be faced with pressed brick. Construction will be started as soon as the plans can be completed.

Sacramento, Cal.—Warehouse and stores, 5 story and base, brick and steel, \$100,000. Architect E. C. Hem-

ming, Sacramento. Owners, John Bremer Furniture Co. This work has been mentioned here before when the architect was first commissioned to prepare the plans. The building has been designed as an annex to the present building of the firm and will be used as a salesroom and storage place. The construction will be semi-fireproof with metal sash and frames and fireproof doors. There will be steam heat and elevator service. The exterior will be faced with cement plaster. The plans are complete and figures are being taken.

Meridian, Sutter Co., Cal.—Factory buildings, steel and brick, \$2,000,000. Engineer J. C. M. Stut 417 Montgomery St. S. F. Owners, Alameda Sugar Co., Alaska Commercial Bldg., S. F. The Alameda Sugar Co. have recently sold bonds amounting to nearly \$2,000,000 and have acquired extensive property holdings in Meridian. The local manager, Mr. Atkinson, states that Engineer Stut has completed working drawings for several of the buildings. A contract for the steel work has been let to Dry Bros. of this city and the steel is now being fabricated in their shops. The walls of the buildings will be of brick. Separate contracts will be let for each structure. There is nearly a million dollars to be expended in machinery, and this work will probably be done on this coast. The manager states that actual construction will be started in the fall.

Los Angeles, Cal.—Warehouse, 2 story and base, brick and concrete. Cost not stated. Architects, Train and Williams, Exchange Bldg., L. A. Owners, California National Supply Co. The building will be 60x200 feet. There will be considerable structural steel used. The floors will be of concrete. There will be metal doors and window sash. An automatic sprinkler system will be installed. There will be elevators. The exterior will be faced with cement plaster. Plans will be complete within a week and figures will be called.

San Diego, Cal.—Warehouse, 6 story and base, reinforced concrete, \$150,000. Architects, Bristow and Lyman, Timken Bldg., San Diego. Owners, Freyritz-Brosius Furniture Co. The building will cover an area of 100x100 feet. The work has been mentioned here before. The working drawings are now complete and figures are being taken.

Bellingham, Wash.—Warehouse and dock, reinforced concrete, \$250,000. Architects, Luckwell and Baker, Northern Bank Bldg., Seattle. Owners, Pacific Terminal Co., represented by Charles Penn, Leary Bldg., Seattle. The structure will be 1000 feet long and will contain a large warehouse, cod bunkers and offices for the local agent of the company. The plans are being prepared and will be ready for figures shortly. This is but one of several large structures of a similar nature which the Pacific Terminal Co. will erect on Puget Sound.

Contracts Awarded.

Bellingham, Wash.—Oil refinery, and tanks reinforced concrete. Cost not stated. Engineer's name withheld. Owners Standard Oil Co. Contractors, Harris and Ecklund, Bellingham. Concrete foundations. Contract price not stated.

Seattle, Wash.—Factory, 1 story and base, mill construction, \$50,000. Architect, Julian Everett, Seattle. Owners Seattle Candy and Cracker Co. Con-

tractors, Butler Construction Co., Central Bldg., Seattle. Contract price \$60,000.

Los Angeles, Cal.—Warehouse, 3 story and base, brick and concrete, \$20,000. Architects, Engineering Dept., Swift Packing Co., Chicago. Owners, Swift Packing Co., Contractors, Davidson Construction Co., Union Oil Bldg., L. A. Contract price \$19,000.

FIRE HOUSES AND JAILS.

Portland, Ore.—Firehouses, 1 1/2 story and base, brick, \$10,000 each. Architect, Portland Chief L. G. Holden. Portland. Owners, City of Portland. Plans are being prepared for four new stations, one each at Montavilla, Woodlawn, Kinton and Rose City Park. Each building will accommodate one company. The exteriors will all be fired with pressed brick. Bids will be called for as soon as the plans can be completed.

FLATS.

San Francisco.—Flats, 2 story and base, frame, \$3,000. Architect, none. Owner, M. Devenezzi, 119 Union St., S. F. The building has been designed to contain two modern flats of five and six rooms each. The interior trim will be of pine and redwood with tile used in the bath. There will be gas grates. The exterior of the house will be covered with shiplap. The plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco.—Flats, 3 story and base, frame, \$1,500. Architects, Rhodes & Marisch, 2372 16th St., S. F. Owners J. and M. O'Connor. The building will contain three modern flats of five and six rooms each and bath. The interior trim will be of pine and redwood with some elm panels. There will be terrazzo steps and entry vestibule. There will be gas grates. The exterior of the building will be covered with brick veneer and cement plaster. The plans will be placed in the hands of the owners and the work will be done by Day Labor.

San Francisco.—Flats, 2 story and base, frame. Cost not stated. Architect, W. S. Rhodes, 2372 16th St., S. F. Owner, John Murphy. The building will contain two flats of four and five rooms each with baths. The interior trim will be of pine throughout. There will be open fire places and tile mantels. The exterior of the building will be covered with rustic and shiplap. The plans are complete and the architect is taking figures.

San Francisco.—Flats, 2 story and base, frame, \$5,000. Architect, W. S. Rhodes, 2372 16th St., S. F. Owner, Mrs. J. P. O'Connor. The building has been designed to contain two modern flats of four and five rooms each with bath. The interior finish will be of pine and redwood with some hardwood floors and elm panels. There will be gas grates. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

San Francisco.—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, G. Anderson, 2320 21th St., S. F. The building will be 27x60 feet and will contain four small flats. There will be baths and gas grates. The interior finish will be of pine and redwood. The exterior of the building will be cov-

ered with shiplap. The plans are complete and in the hands of the owner who will do the work by Day Labor.

GARAGES.

San Francisco.—Garage, 2 story and base, reinforced concrete, \$10,000. Engineer, Victor H. Poss, Mechanics' Institute Bldg., S. F. Owners, Olympia Salt Water Co. The building will be erected on the lot adjoining the Luning Bldg. It has been designed for a commercial garage with living apartments above. There will be a cement floor on the first floor. The exterior of the building will be faced with artificial stone. The plans are complete and figures are being taken.

GOVERNMENT WORK AND SUPPLIES.

The contract for furnishing miscellaneous iron and steel work for the reclamation service, Klamath Falls Ore., has been awarded to the Benicia Iron Works, of Benicia, Cal., at \$112.50.

The motor generating sets and control panels for the Puget Sound, Wash., navy yard, bids for which are to be opened on April 27 at the bureau of yards and docks, Navy Department, is to consist of two sets, each set to be a three-phase 60-cycle 220-volt induction motor, mounted on the same bedplate, and direct connected to two 20-K. W. direct-current 115-volt generators. A ten-panel switchboard shall be furnished.

The contract for dredging in Olympia Harbor, Wash., under the bids opened March 29 by the U. S. engineer, Seattle, Wash., has been awarded to the Puget Sound Bridge and Dredging Co., of Seattle, Wash., at 14 cents.

Vault Protection System.—The supervising architect, Treasury Department, Washington, D. C., received on April 4 the following bids for installing an electric vault protection system in the U. S. post office and court house, San Francisco, Cal.

Levi Electric Co., Philadelphia, Pa., \$1,350; time, 55 days.

Parker Electric Protective Association, Boston, Mass., \$1,498; Dec. 1, 1912.

McPell Electric Co., San Francisco, Cal., \$900; time, 15 days.

American Bank Protection Co., Minneapolis, Minn., \$780; June 15, 1912.

American District Telegraph Co., New York City, \$363.32; June 3.

Electric Bank Protection Co., New York City, \$2,500; July 15.

Derrick.—Bids were received as follows by the Brighton inspector, 19th district, Honolulu, H. T., on March 19 for furnishing one derrick as per plans and specifications:

Judson Iron Works, San Francisco, Cal., \$20, accepted.

Honolulu Forge Co., Honolulu, H. T., \$97.

Cotton, Neff Co., Honolulu, H. T., \$1200.

Excavation and Dredging.—Abstract of bids received by Major J. B. Cavanaugh, corps of engineers, U. S. army, on Feb. 15, 1912, at Seattle, Wash., for excavating and dredging on right of way for Lake Washington Canal:

Section 1—750,000 Cubic Yards.

Standard American Dredging Co., San Francisco, Cal., 19.9-10c.

Holt & Jeffery (Inc.), Seattle, Wash.,

Puget Sound Bridge and Dredging Co., Seattle, Wash., 17.5c.

Erickson Construction Co., Seattle, Wash., 37c.

Section 2—68,000 Cubic Yards.

Standard American Dredging Co., San Francisco, Cal., 33.7c.

Holt & Jeffery (Inc.), Seattle, Wash., 21c.

Puget Sound Bridge and Dredging Co., Seattle, Wash., 20c.

Erickson Construction Co., Seattle, Wash., 30c.

Section 3—180,000 Cubic Yards.

Andrew Peterson, Seattle, Wash., 12.4-10c.

Sullivan Bros., Seattle, Wash., 29.1c.

Holt & Jeffery (Inc.), Seattle, Wash., 20c.

George C. Dietrich & Co., Seattle, Wash., 37c.

Graft Construction Co., Seattle, Wash., 56c.

Erickson Construction Co., Seattle, Wash., 40c.

The contract for the construction of a sewer system at Pearl Harbor has been awarded to the Lord-Young Engineering Co., Honolulu, H. T., at \$29, 51c.

HALLS & SOCIETY BLDGS.

San Francisco.—Lodge hall, 3 story and base, brick and steel. Cost not stated. Architect, E. F. Antonovich, 332 Kearny St., S. F. Owners, United and Ancient Order of Druids. This work has been on the board for some months. The final drawings have been completed and bids are now being called. The building will be used exclusively by the order. There will be a mezzanine floor, which will be occupied by the officers of the order, a large banquet room, dance hall and complete kitchen equipment. The exterior of the building will be faced with pressed brick.

Sacramento, Cal.—Association building, 4 story and base. Class A construction, \$160,000. Architect, E. C. Hemmings, Sacramento. Owners, U. S. A. The building will be erected on a site at the corner of 5th and J streets. The Building Committee has just announced the selection of the architect, and this selection has yet to be approved by the Board of Directors. The details of the structure will be given as soon as more complete plans can be worked out.

HOSPITALS.

Camp Ascension, Cal.—Hospital, 1 story frame. Cost not stated. Architect, Constructing Q. M. Dept., U. S. A. Chronicle Bldg., S. F. Owners, U. S. Government. The plans for a temporary hospital building have been completed and are now out for figures. The construction will include the plumbing and lighting of the building. Plans can be secured from the Constructing Q. M. Dept. in this city. Bids will be opened on May 16th.

Los Angeles, Cal.—Hospital, 2 story and base, brick. Cost not stated. Architect, A. E. Benton, 114 North Spring St., L. A. Owners, University of Southern California. Bids for this work have all been rejected as too high. The plans will be revised and new bids will be called for at once. The lowest bid exceeded the appropriation by \$10,000.

HOTELS.

San Francisco.—Hotel, 7 story and base, brick and steel, \$150,000. Architects, William Curlett & Son, Phelan Bldg., S. F. Owner, James D. Phelan. The building will be erected on the property adjoining the Argonaut Hotel and when completed will be used as an annex to that hotel. The construction will include considerable structural steel. There will be in the neighborhood of 200 rooms, a large number of which will have connecting baths. There will be steam heat from the present system. Elevators will be installed. The exterior of the building will be faced with pressed brick and terra cotta. Plans are being completed.

San Francisco.—Hotel, 7 story and base, brick and steel, \$100,000. Architect, Washington J. Miller, 45 Kearny St., S. F. Owners Vrooman Co. The building will occupy a corner lot and will contain stores on the first floor and about 210 rooms and 60 baths above. The interior will be finished in pine. There will be steam heat and elevator service. The exterior will be faced with pressed brick and terra cotta. The plans are now being prepared.

San Francisco.—Hotel and stores, 2 story and base, brick and steel, \$60,000. Architects, William Curlett & Son, Phelan Bldg., S. F. Owner, C. R. Davis. The building will be 76x198 feet. The first floor will contain two large stores. The two upper floors will be divided into 144 single rooms and a number of baths. The interior finish will be of pine. There will be steam heat and running water in all rooms. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Redwood City, San Mateo Co., Cal.—Hotel and stores, 3 story and base, brick, \$25,000. Architects, C. E. Hodges and W. G. Mitchell, associated, Monalnock Bldg., S. F. Owners, Redwood City Hotel Co. This work has been mentioned here before. The architects have been instructed to prepare the final plans and figures will be called for shortly. The building will occupy the most important commercial site in the city at the corner of Main and Broadway streets and will cover an area of 110x150 feet. There will be seven large stores on the first floor besides the main office and lobby and a public dining room. The upper floors will be arranged for single rooms, fourteen of which will have connecting baths. There will also be a number of public baths and toilets. The interior will be handsomely finished. The exterior will be faced with pressed brick or cement plaster.

Fresno, Fresno Co., Cal.—Hotel and stores, 3 story and base, brick, cost not stated. Architect, Frederick D. Howe, 45 Kearny St., S. F. Owner, George A. Clough. The building will be similar in design to the hotel structure now under construction in this city by the same owner. There will be in the neighborhood of 100 rooms on the upper floors and several stores on the ground floor. There will be steam heat and running water in all rooms. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

Los Angeles, Cal.—Hotel, 3 and 1 story and base, brick and steel, cost not stated. Architect, Fred Hign,

Broadway Central Bldg., L. A. Owner's name withheld. The building will be erected on a corner site. The upper floors will contain in the neighborhood of 122 rooms besides a large number of baths. There will be steam heat and hot and cold running water in all rooms. The exterior of the building will be faced with pressed brick. The plans are complete.

Los Angeles, Cal.—Hotel, 10 story and base, reinforced concrete, \$200,000. Architect, Noonan and Kysor, Wright and Callender Bldg., L. A. Owners, Los Angeles Cemetery Association. The building will be erected on Grand Ave. Between 5th and 9th streets, and will cover a site 60x155 feet. The architects have completed the working drawings and will segregate all contracts. The figures will be called within a few days on the general contract which will include the reinforced concrete work and the plastering.

Los Angeles, Cal.—Hotel and stores, 3 story and base, brick, \$25,000. Architect, Joseph F. Rhodes, Central Bldg., L. A. Owner's name withheld. The building will be 70x112½ feet. There will be six stores on the first floor and 72 rooms and a number of public baths on the upper floors. There will be steam heat and running water provided for each room. The exterior of the building will be faced with pressed brick. The plans are complete and the work will be done by Day Labor, the architect purchasing all materials.

Ocean Park, Los Angeles Co., Cal.—Hotel, 4 story and base, brick and steel, cost not stated. Architect, Thornton Fitzhugh, 1001 Pacific Electric Bldg., L. A. Owner, George W. Fox. The building will be 39x112 feet. There will be the entrance, main lobby, three stores and a barber shop on the first floor. The upper floors will contain 60 rooms, 20 of which will have private baths. There will be steam heat. The exterior of the building will be faced with enamel brick. The plans are complete and figures will be taken May 1st.

Fresno, Fresno Co., Cal.—Hotel, 3 story and base, class A construction, \$150,000. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owners, Robert Kennedy and Ward E. McInture. The building will be 120x150 feet and is to be used as an annex to the present Sequoia Hotel. There will be stores on the first floor as well as a large office, lobby, dining room, etc. Each of the upper floors will contain 36 guest rooms and 12 baths. There will be a large roof garden. The interior finish will be of birch. There will be steam heat, vacuum cleaning system and elevator service. There will be a complete steel frame with exterior walls of pressed brick and terra cotta. Plans will be complete early in May and actual construction work started shortly afterwards.

Roseburg, Ore.—Hotel addition, 4 story and base, mill construction, \$110,000. Architects, Emil Schacht and Son, Portland. Owners, McCallan Hotel Co., Roseburg. The building will be 100x100 feet. There will be over 100 rooms added besides a large number of baths. There will be steam heat and elevator service. Hot and cold water will be provided for all rooms. The interior will be finished in pine and hard wood. The exterior of the building will be faced with pressed brick. Plans will be complete and ready for figures by May 1st.

Contracts Awarded.

Fresno, Fresno Co., Cal.—Hotel additions, 3 story and base, brick and steel, \$10,000. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owner, Ogil House. Contractors, Andrew Wilkie Co., S. F. Contract price not stated.

LIBRARY.

Upland, San Bernardino Co., Cal.—Library, 1 story and base, brick, \$10,000. Architect, Homer W. Glidden, Wright and Callender Bldg., L. A. Owners, Upland Library Trustees. The building will be 10x50 feet. There will be a public reading room, reference room, rack rooms and office for the Librarian. The interior finish will be of pine and oak. The exterior of the building will be faced with pressed brick trimmed with artificial stone. The architect is now preparing the plans.

Hemet, Riverside Co., Cal.—Library, 1 story and base, frame and brick, cost not stated. Architect, S. I. Pillar, Crescent Bldg., Riverside. Owners, Library Trustees of Hemet. The building will be 4x64 feet. There will be an office, public reading room, reference room, rest room and lecture room. The exterior of the building will be finished with cement plaster on metal lath. The interior finish will be of pine with oak floors. The plans are complete and figures are being taken.

POST OFFICES.

Alameda Alameda Co., Cal.—Post Office, 1 story and base, stone and brick, cost not stated. Architect, James Knox Taylor, Washington, D. C. Owner, U. S. Government. The building will cover a ground area of approximately 6,100 square feet. The construction will be fire proof with the exception of the roof. The exterior will be faced with stone. There will be a central heating system. Plans are in the hands of the custodian of the site at Alameda. Bids will be opened by the architect on May 21st.

RAILROAD CONST. STATIONS AND EQUIPMENT.

San Francisco.—Railroad construction, \$250,000. Engineer, City Engineer Marsden Manson, 1404 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Bids for this work have been opened for the second time and the figures show the Mahoney Bros. low. For a complete list of the bids see under Bids Opened San Francisco.

Cajon Pass, San Bernardino Co., Cal.—Tunnel construction, \$1,000,000. Engineering Dept., Santa Fe R. R., Los Angeles. Owners, Santa Fe Railway Co., L. I. Hibbard, general manager of the coast lines of the Santa Fe Co. has announced that a tunnel will be constructed through Cajon Pass in San Bernardino County. None of the details other than the fact that the company expects to expend nearly a million dollars on the work can be learned at this time.

RESIDENCES.

San Francisco.—Residence, 2 story and base, frame, \$1,500. Architect, S. Helman, 127 Montgomery St., S. F. Owner,

C. Weller. The building has been designed for a six-room house with sleeping porch. The interior will be finished in pine and redwood with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with brick veneer and cement plaster on metal lath. The architect is taking figures on the work.

San Francisco—Residence, 2, 2 story and base, frame, \$1,000. Architect, J. J. Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwellings will each contain seven rooms and bath. The interior finish will be of redwood with hardwood floors in the principal rooms. There will be gas radiators and open fire places. The tile will be used in the bathrooms and kitchens. The exteriors of both dwellings will be covered with brick veneer and shingles. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$500. Architect, J. J. Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwelling has been designed for a seven room house with bath. The interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Tile will be used in the bath and kitchen. The exterior of the house will be covered with brick veneer and cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$2,000. Architect, O. E. Evans, 215 Ashby St., S. F. Owner, J. Walsh. The dwelling will contain six rooms and bath. The interior finish will be of pine and redwood with some elm panels. There will be an open fire place with a tile mantel. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$2,000. Architect none. Owner, Joseph G. McKinley, 513 Connecticut St., S. F. The dwelling will contain six rooms and bath. The interior trim will be of pine throughout. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with shingles. The plans are complete and in the hands of the owner who will do the work by Day Labor.

Oakland, Cal.—Residence, 2 stor and base, frame, \$11,800. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, E. T. Elsey. The dwelling has been designed for an eleven-room house with baths. The interior finish will be of pine, redwood and mahogany. The floors in the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The roof will be of clay tile. The plans are complete and figures are being taken.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,600. Architect none. Owner, B. A. Stewart, 616 41st St., Oakland. The dwelling will contain seven rooms and bath. The interior finish will be of pine and oak with hardwood floors in the first story. There will be open fire places with brick mantels. The exterior of the dwelling will be covered with rustic and cement plaster on met-

al lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$1,000. Architect, none. Owner, Lester Kell, 1008 Grand St., Oakland. The dwelling will contain eight rooms and bath. The interior trim will be of pine and redwood with some oak floors. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect, none. Owners, Peak-Munroe Co., 2625 Shattuck Ave., Berkeley. The dwelling will contain five rooms and bath. The interior finish will be of redwood with hardwood floors in the principal rooms. There will be open fire places with brick mantels. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2, 2 story and base, frame, \$3,000. Architect none. Owners, Oakland Building and Mortgage Co., 1601 Telegraph Ave., Oakland. Each of the dwellings will contain six rooms and bath. The interior finish will be entirely of pine. There will be open fire places and tile or brick mantels. The exteriors of the houses will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, Mrs. Minnie A. Smith, Oakland. The dwelling has been designed for a six-room house with bath. The interior will be finished in pine and redwood with some hardwood floors. There will be open fire places and tile or brick mantels. The exterior of the dwelling will be covered with rustic. The plans are in the hands of the owner and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect none. Owner, E. B. Dpiter, 2145 Ashby Way, Berkeley. The dwelling will contain five rooms and bath. There will be pine interior finish throughout. There will be open fire places with brick mantels. Tile will be used in the bath and kitchen. The exterior of the house will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect none. Owner, Charles A. Werner, 2313 9th St., Berkeley. The dwelling will contain five rooms and bath. The interior trim will be of pine throughout. There will be open fire places with brick mantel. The exterior of the bungalow will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story, attic and base frame \$2,000. Architect, Lewis C. Mulgardt, Chronicle Bldg., S. F. Owner, H. T. Harper. This work has been out for figures before. The plans have been considerably revised. The dwelling will contain in the neighborhood of fourteen rooms and three baths. The interior will be finished in pine, redwood, mahogany and white enamel. There will be furnace heat

and open fire places. The mantels will be of brick. There will be a garage erected in connection. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Oakland, Cal.—Residence, 2, 2 story and base, frame, \$3,250 each. Architect none. Owner, C. M. McGregor, 470 13th St., Oakland. Each of the dwellings will contain seven rooms and bath. The interior finish will be of pine and redwood with some hardwood floors. There will be open fire places and brick or tile mantels. Tile will be used in the baths and kitchens. The exteriors of the dwellings will be covered with rustic and shingles. The plans are complete and in the hands of the owner who will do the work by Day Labor.

Alameda, Alameda Co., Cal.—Bungalows, 2, 1 story and base, frame, \$2,000 each. Architect, W. W. Landgrebe, Penside and Liberty Aves., Alameda. Each of the bungalows will contain five rooms and bath. The interior trim will be of pine throughout. There will be open fire places and tile mantels. The exterior of the dwellings will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalows, 6, 1 story and base, frame, \$1,600 each. Architect, none. Owners, Realty Syndicate, 144 Broadway, Oakland. Each of the six dwellings will contain four rooms and bath. The interior finish will be of pine throughout. There will be open fire places with tile or brick mantels. The exterior will be covered with rustic and shingles. The plans are in the hands of the owners and the work will be done by Day Labor.

Haywards, Alameda Co., Cal.—Bungalow, 1½ story and base, frame, \$2,500. Architects, Haar & Davis, Central Bank Bldg., Oakland. Owner, W. Ellis. The dwelling has been designed for a six-room house with bath. The interior will be finished in pine with some elm panels. There will be open fire places with brick mantels. The exterior of the house will be covered with shingles. The plans are complete and ready for figures.

Haywards, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,500. Architects, Haar & Davis, Central Bank Bldg., Oakland. Owner, Matheson. The dwelling has been designed for a six-room house with bath. The interior finish will be of pine throughout. There will be furnace heat and open fire places. The mantels will be of brick. There will be some elm panels. The exterior of the dwelling will be covered with rustic. The architects are completing the working drawings.

Haywards, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,500. Architects, Haar & Davis, Central Bank Bldg., Oakland. Owner, Fred Noel. The dwelling has been designed for a six-room house with bath. The interior finish will be of pine. There will be open fire places with tile mantels. Tile will be used in the bath and kitchen. The exterior of the house will be covered with shingles. The plans are now being prepared.

Stockton, San Joaquin Co., Cal.—Residence, 2 story and base, frame, \$1,250. Architect, W. B. Thomas, Main and Commercial Sts., Stockton. Owner's name withheld. The dwelling will contain eight rooms and bath. The inter-

floor trim will be of pine with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with rustic. The plans are being prepared.

Stockton, San Joaquin Co., Cal.—Bungalow, 1½ story and base, frame, \$32,850. Architect, W. R. Thomas, Main and Commercial Sts., Stockton. Owner's name withheld. The dwelling will contain seven rooms and bath. There will be furnace heat and open fire places. The interior trim will be of pine with hardwood floors in the principal rooms. The mantels will be of brick. Tile will be used extensively. The exterior will be covered with rustic and shingles. The architect is now preparing the working drawings.

Tracy, San Joaquin Co., Cal.—Bungalow, 1 story and base, frame, \$3,000. Architect, Walter King, Elks' Bldg., Stockton. Owner, W. J. Fredericks, Tracy. The bungalow has been designed for an eight-room house with baths and all modern conveniences. The interior finish will be of pine and redwood with hardwood floors throughout. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with brick veneer. The plans are complete and figures are being taken.

SCHOOLS

Woodland, Yuba Co., Cal.—School, 2 story and base, brick. Cost not stated. Architect, W. H. Weeks, 251 Kearny St., S. F. Owners, City of Woodland. This work has been mentioned here before when the architect was first commissioned to prepare the plans. The working drawings have been approved and figures are now being taken. Bids will be opened by the Board of Education the first part of May. Plans can be secured from the architect. The building has been designed for a high school.

Bakersfield, Kern Co., Cal.—Schools, 2, 2 story and base, brick, \$120,000. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owners, City of Bakersfield. The architect has just been commissioned to prepare plans for two new schools and for a four-room addition to one of the present buildings. Each of the two new schools will contain eight standard sized class rooms beside the principal's office, teachers' rooms, playrooms, toilets and space for the mechanical equipment. There will be a plenum system of heating and ventilation installed. The exterior of one of the buildings will be faced with pressed brick and the other with cement plaster. The four-room addition will also be of brick construction and will cost in the neighborhood of \$20,000. Plans will be completed and ready for figures in the course of two months.

SEWERS, STREET WORK AND WATER SYSTEMS

San Francisco—Building for Incinerating plant. Class A construction. Cost not stated. City Engineer Marsden, Mission, 1101 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Plans for the structural steel

and for the general construction of a Class A building for the new incinerating plant, which is to be erected at Islais Creek are complete and have been placed in the hands of the Board of Public Works for figures. Bids will be opened on both contracts on May 1.

Roseville, Placer Co., Cal.—Municipal lighting plant. Cost not stated. Engineer, City Engineer, Roseville. Owners, City of Roseville. This work has been mentioned here before. Bids for furnishing lamps, transformers and for constructing a building for the plant will be opened by the City Clerk on April 29th. Plans and specifications can be obtained from the City Clerk at Roseville.

Sacramento, Cal.—Sewer system and levee work. Cost not stated. Engineer, City Engineer Randle, Sacramento. Owners, City of Sacramento. City Engineer Randle of Sacramento has a large field force at work in the districts recently annexed compiling data for the construction of storm water sewers. The water will be carried off by concrete conduits to a main trunk line sewer with an outfall at the Sacramento River. The plans will be complete in two months. Engineer Randle is also to report to the City Council shortly on an extension levee system, which will extend some 15 miles on each side of the Sacramento River.

Wapato, Wash.—Water system. Cost not stated. Engineer, City Engineer D. R. Redman, Wapato. Owners, City of Wapato. Bids will be opened on May 5th for laying 18,000 feet of from 4 to 10 inch pipe and setting 27 hydrants, valves etc. Plans can be secured from the City Engineer.

STORES & OFFICE BUILDINGS.

San Francisco—Stores and lofts, 4 story and base, brick, \$10,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, Mrs. Braunschweiger. This work has been mentioned here before. The architects have completed taking figures for the construction and will award the contract within a day or two. There will be two stores on the first floor and lofts above. There will be elevator service. The exterior will be faced with pressed brick.

San Francisco—Offices, 10 story and base. Class A construction, \$500,000. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owners, Standard Oil Co. The following contracts have been awarded on this work: Arthur Arlett, Berkeley, masonry and brick work; Gladding, McBean, terra cotta work; Newberry, Bendheim Electric Co., electric wiring. Other contracts will follow at once.

Sacramento, Cal.—Offices, 4 story and base, reinforced concrete, \$100,000. Architect, E. C. Hennings, Sacramento. Owners, Pacific Gas and Electric Co. This building has been mentioned here several times before. The architect has completed the working drawings and figures are now being taken. The structure has been designed for the exclusive use of the owners. The first floor will contain the general offices and display rooms. The upper floors will be arranged for the department heads and private offices. There will be steam heat and elevator service. The exterior will be faced with pressed brick.

Redclay, Fresno Co., Cal.—Stores and

offices, 2 story and base, brick, \$20,000. Architect, W. F. Jennings, Fresno. Owner, J. C. McCubbin, Redclay. The building will be 30x150 feet. The first floor and basement will be occupied by the California Rochdale Co. The upper floor will contain modern offices and lodgings. There will be an elevator from the basement to the first floor. There will be modern plumbing and steam heating. The exterior of the building will be faced with pressed brick. A contract for the excavating has been awarded and plans are being completed for the balance of the work as rapidly as possible.

Lakeview, Ore.—Stores and lodge hall, 3 story and base, brick, \$65,000. Architect, F. J. de Longchamps, Modoc Bldg., S. F. Owner, F. Herford, Lakeview. The building will cover an area of six and one-half acres. The first floor will contain stores, the second offices and the third has been arranged for a large lodge room. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans have been completed and placed in the hands of the owner who is superintending all the work.

Oakdale, Stanislaus Co., Cal.—Stores, 1 story and base, brick, \$2,000. Architect, none. Owners, Rodden Bros., Oakdale. The building will be 17x67 feet. The entire building will be occupied by the owners. The interior will be finished in pine. The exterior of the building will be faced with pressed brick. The plans are being prepared and when complete the work will be done by Day Labor.

Los Angeles, Cal.—Stores and offices, 12 story and base. Class A construction, \$500,000. Architects, Parkinson and Bergstrom, Security Bldg., L. A. Owners, syndicate headed by J. S. Torrence. The building will be erected at the southeast corner of 2d and Spring streets, the site now occupied by the Ramona Hotel. The work has been mentioned here before when the architects were first commissioned to prepare plans. The announcement has been made that actual construction will be started by July 1st when the present building will be demolished. The upper floors of the new structure will contain 300 offices.

Los Angeles, Cal.—Stores and lofts, 7 story and base, brick. Cost not stated. Architects, McAlmontgomery, Associated with Ross Montgomery, Trust and Savings Bldg., L. A. Owner, R. Fred Vogel. The building will contain one large store on the first floor and lofts above. There will be a freight elevator. The exterior of the building will be faced with glazed terra cotta. The plans are complete and the work will be done by Day Labor.

Los Angeles, Cal.—Stores and offices or hotel. Height not decided. Class A construction. Cost not given. Architects, Parkinson and Bergstrom, Security Bldg., L. A. Owner, Edward Hennings. The architects have been commissioned to prepare sketches for a modern store and office building which the owner who has just purchased the Flatiron Block in the south side of Eighth street between Spring and Main streets, contemplates. Sketches will be prepared for both a store and office structure and for a hotel. Details of the building will be given later.

Los Angeles, Cal.—Stores and offices, 12 story and base, reinforced concrete, \$250,000. Architect, Fred R. Dorn,

Douglas Bldg., L. A. Owners, Robert Marsh and Frank H. Strong. The building will be 58x118 feet. There will be a bank, four modern stores and the main entrance on the first floor and about 125 offices on the upper floors. There will be elevator service, steam heat and vacuum cleaning system. The exterior of the building will be faced with terra cotta. The plans are nearly complete and bids will be asked for shortly on the foundation work and excavating.

Taft, Kern Co., Cal.—Stores and offices, 2 story and base, brick, \$10,000. Architect, Oroville L. Clark, Brower Bldg., Bakersfield, Owner, C. A. Fox. The building will be 58x125 feet. There will be four stores on the first floor and 36 modern offices on the upper floor. There will be steam heat. The interior will be handsomely finished with a marble entrance. There will be considerable structural steel used. The exterior of the building will be faced with pressed brick. Plans are now nearly complete.

Seattle, Wash.—Stores and offices, 2 story and base, brick and concrete, \$100,000. Architect, James H. Schack, Bowers Bldg., Seattle, Owner, T. S. Lapps. The building will cover an area of 119x120 feet. The first floor will contain a number of small stores. The upper floor will be arranged for offices and living rooms. The exterior of the building will be faced with pressed brick. The plans are being prepared.

El Monte, Los Angeles Co., Cal.—School, 1 story and base, brick, \$10,000. Architects, Tuttle and Hopkins, Delta Bldg., L. A. Owners, La Puente School District. The building will be 92x65 feet and will contain four class rooms. The exterior of the structure will be faced with cement plaster. The architects are preparing the working drawings and bids will be called for shortly.

Santa Barbara, Santa Barbara Co., Cal.—School, 1 story and base, reinforced concrete. Cost not stated. Architectural Dept., State of California, Sacramento. Owners, State of California. The building will be designed in the Mission style of architecture with two large wings each 230 feet long with a connecting wing 225 feet. There will be 18 class rooms each 19x30 feet, administration rooms, library, 6 manual training rooms and shops, laboratories for chemistry and biology and a large domestic science department. The interior finish will be of brick. The exterior of the building will be faced with cement plaster. The mechanical equipment will be complete in every detail. The plans will be completed shortly and figures will probably be called for by the end of April.

Contracts Awarded.

Anaheim, Los Angeles Co., Cal.—Convict and school, 2 story and base, frame, \$29,000. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Roman Catholic Church. Contractors, Bender and Selbernagel, Anaheim, general contractor. Contract price, \$15,858.75. Note—the plumbing, heating, painting and electric work will be let separately.

THEATRES.

Oakland, Cal.—Theatre, Class A construction, \$60,000. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, Price and Smith. The building will be erected in South 11th

street, between Broadway and Franklin streets. The details of the construction have not been decided upon, and the owners are to determine whether to erect a Class A building seating 1800 people or a Class C structure costing \$15,000 and seating 500. Further details will be given as the work progresses.

Alameda, Alameda Co., Cal.—Marine gardens, frame construction, \$100,000. Architect, Charles E. J. Rogers, 21 California St., S. F. Owners, Neptune Gardens Co. The owners have commissioned the architect to prepare plans for a large amusement park with bath house and other features. The plans have not been fully worked out and more complete details will be given later.

Vancouver, B. C.—Theatre, 10 story and base, Class A construction, \$450,000. Architect, E. W. Houghton, Collins Bldg., Seattle. Owner, John Cort. The preliminary plans for this building have just been approved by the owner. The structure will be arranged for a modern apartment house, in addition to the theatre. Further details will be given as soon as the working drawings are completed. Actual construction will be started this summer.

SEALED PROPOSALS.

NOTICE TO CONTRACTORS.

(Bids close May 21.)

TREASURY DEPARTMENT—Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be received in this office until 3 o'clock p. m. on the 21st day of May, 1912, and then opened, for the construction (including plumbing, gas piping, heating apparatus, electric conduits and wiring and interior lighting fixtures) of the United States post office at Alameda, Cal. The building is one story and basement, and has a ground area of approximately 6,100 square feet; fireproof construction throughout except roof; stone facing; tile and tin roof.

Drawings and specifications may be obtained from the custodian of site at Alameda, Cal., or at this office, at the discretion of the Supervising Architect, JAMES KNOX TAYLOR, Supervising Architect.

PROPOSALS FOR CANAL SUPPLIES.

(Bids close May 1.)

CANAL CIRCULAR 703—Proposals. Annual Estimate for the Period Ending June 30, 1912—Cast Iron Car Wheels.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. May 1, 1912, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 703) may be obtained from this office or the office of the assistant purchasing agent, 1066 North Point street, San Francisco, Cal.; also from the U. S. Engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. BOGGS, major, corps of engineers, U. S. Army, general purchasing officer.

PROPOSALS FOR CONSTRUCTING BUILDING.

(Bids close May 10.)

TEMPORARY Hospital building, Camp Yosemite, Cal.—Office of Chief Quartermaster, Chronicle building, San

Francisco, Cal.—Sealed proposals, in triplicate, will be received here until 11 a. m. May 10, 1912, and then opened, for the construction and plumbing of a frame hospital building at Camp Yosemite, Cal. Plans and specifications may be seen only in this office. Information furnished on application. Envelopes containing proposals should be indorsed "Proposals for Hospital Building, Camp Yosemite," and addressed to F. VON SCHRAEDER, Chief Q. M.

NOTICE TO CONTRACTORS.

(Bids close May 14.)

STONE SCHOOLHOUSE—Department of the Interior, Office of Indian Affairs, Washington, D. C.—Sealed proposals plainly marked on the outside of the sealed envelope "Proposals for Stone Schoolhouse, Western Navajo Indian School, Arizona," and addressed to the commissioner of Indian Affairs, Washington, D. C., will be received at the Indian Office until 2 o'clock p. m. May 14, 1912, for furnishing materials and labor for the erection of a stone schoolhouse at the Western Navajo Indian School, Arizona, in strict accordance with the plans, specifications and instructions to bidders, which may be examined at this office, the offices of the supervisor of construction, Denver, Colo.; the Builder and Contractor, Los Angeles, Cal.; the United States Indian warehouses at Chicago, Ill.; St. Louis, Mo.; Omaha, Neb., and San Francisco, Cal. For further information apply to the superintendent of the Western Navajo Indian School, Tuba, Ariz. F. H. ARBOTT, acting commissioner.

PROPOSALS FOR ELEVATOR.

(Bids close May 17.)

ELEVATOR—Treasury Department, Office of the Supervising Architect, Washington, D. C.—Sealed proposals will be received at this office until 3 o'clock p. m. on the 17th day of May, 1912, and then opened for an electric passenger elevator in the U. S. post office and court house, Great Falls, Mont., in accordance with the drawings and specification, copies of which may be obtained at this office, at the discretion of the supervising architect, JAMES KNOX TAYLOR, supervising architect.

CONSTRUCTING BUILDING.

(Bids close May 24.)

SEALED proposals will be received in the office of the Supervising Architect, Treasury Department, Washington, D. C., until 3 o'clock p. m. on the 24th day of May, 1912, and then opened for the construction (including plumbing, gas piping, heating apparatus, electric conduits and wiring, and lighting fixtures) of the United States post office at Bonham, Tex. The building is non-fire proof, one story and basement, of approximately 4,230 square feet ground area, brick faced with stone trimmings, and is to be constructed in accordance with drawings and specifications, copies of which may be obtained from the custodian of the site at Bonham, Tex., or at this office, at the discretion of the Supervising Architect, JAMES KNOX TAYLOR, Supervising Architect.

PROPOSALS FOR CONSTRUCTING BUILDING.

(Bids close May 1.)

OFFICE of the Board of Public Works of the City and County of San Francisco—Sealed proposals will be

received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 1st day of May, 1912 for doing the following work:

The general construction of a building for the Islais Creek Incinerating Plant to be located in the block south of Army street, between Kansas and Rhode Island streets.

Progressive payments will be made. Said work must be done in accordance with the plans and specifications therefor on file in this office, to which reference is hereby made, and must be commenced within fifteen (15) calendar days and completed within two hundred and twenty (220) calendar days from the date of the contract.

The amount of bond for faithful performance has been fixed at \$35,000.00.

All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County, for an amount not less than ten per centum of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at room 1108, David Hewes Building, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.

JOSEPH L. MCCORMICK, Secretary.

PROPOSALS FOR STEEL WORK.

(Bids close May 1.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 1st day of May, 1912 for doing the following work:

The steel work for a building for the Islais Creek Incinerating Plant to be located in the block south of Army street, between Kansas and Rhode Island streets.

Progressive payments will be made. Said work must be done in accordance with the plans and specifications therefor on file in this office, to which reference is hereby made, and must be commenced within fifteen (15) calendar days and completed within one hundred and five (105) calendar days from the date of contract.

The amount of bond for faithful performance has been fixed at \$1,000.00.

All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County, for an amount not less than ten per centum of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at room 1108, David Hewes Building, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.

JOSEPH L. MCCORMICK, Secretary.

REMOVAL NOTICE.

THE CALIFORNIA GRANITE CO. will move their offices and yard to 7th and Hubbel streets, this city, on or about May 1st.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the top part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—5 story and base, reinforced concrete. Cost not stated. San Francisco, Architect, E. G. Garden, Phelan Bldg., S. F. Owner, D. Wasserman. The building will be erected in the district south of Market street. There will be a large number of apartments arranged in suites of three and four rooms each. There will be connecting baths, wall beds, elevator service and steam heat. The interior will be finished in pine throughout. The exterior of the building will be faced with cement plaster. The plans are now out for figures and bids will be opened on April 29th.

Apartment House—2 story and base, frame, \$100,000. San Francisco, Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be in the nature of an addition to the present structure and will contain four-room apartments with baths. The interior finish will be of pine with some hardwood floors. The exterior will be covered with shiplap. The plans are complete and figures are being taken.

Apartment House—7 story and base, brick and steel, \$100,000. San Francisco, Architects, William Corlett & Son, Phelan Bldg., S. F. Owner, R. L. McElroy. The building will be erected on an inside lot with an L through to another street, giving the building two street frontages. There will be stores on the first floor and a large number of two and three room apartments on the upper floors. There will be elevator service, steam heat and hot and cold running water in all the rooms. There will be considerable structural steel used. The exterior of the building will be faced with pressed brick. The preliminary plans have been prepared.

Residence—2 story and base, frame, \$1,500. San Francisco, Architect, S. Heiman, 127 Montgomery St., S. F. Owner, C. Weller. The building has been designed for a six-room house with sleeping porch. The interior will be finished in pine and redwood with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with brick veneer and cement plaster on metal lath. The architect is taking figures on the work.

Residence—2, 2 story and base, frame, \$1,000. San Francisco, Architect, J. J. Leonard, Phelan Bldg., S. F. Owner, Urban Realty Co. The dwellings will each contain seven rooms and bath. The interior finish will be redwood with hardwood floors in the principal rooms. There will be gas radiators and open fire places. Tile will be used in the baths and kitchens. The exteriors of both dwellings will be covered with brick veneer and shingles. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$5,000. San Francisco, Architect, J. J. Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwelling has

been designed for a seven-room house with bath. The interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Tile will be used in the bath and kitchen. The exterior of the house will be covered with brick veneer and cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,000. San Francisco, Architect, O. E. Evans, 2154 Mission St., S. F. Owner, J. Walsh. The dwelling will contain six rooms and bath. The interior finish will be of pine and redwood with some elm panels. There will be an open fireplace with a tile mantel. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,000. San Francisco, Architect, none. Owner, Joseph B. McKinley, 513 Connecticut St., S. F. The dwelling will contain six rooms and bath. The interior trim will be of pine throughout. There will be an open fire place and tile or brick mantel. The exterior of the house will be covered with shiplap. The plans are complete and in the hands of the owner who will do the work by Day Labor.

Apartment House Alterations—frame construction, \$20,000. San Francisco, Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner, Mrs. Profpe. This work has been mentioned here before. The alterations will consist of the remodeling of four frame residences into modern apartments. The plans have been out for figures and the same are now under advisement in the offices of the architect. A contract will be awarded at once.

Garage—2 story and base, reinforced concrete, \$10,000. San Francisco, Engineer, Victor H. Pass, Mechanics' Institute Bldg., S. F. Owners Olympia Salt Water Co. The building will be erected on the lot adjoining the Lurline Baths. It has been designed for a commercial garage with living apartments above. There will be a cement floor on the first floor. The exterior of the building will be faced with artificial stone. The plans are complete and figures are being taken.

Warehouse—3 story and base, brick and steel, \$80,000. San Francisco, Architect, S. Heiman, 127 Montgomery St., S. F. Owners, Zellerbach Paper Co. The architect is now completing the working drawings for a large wholesale building for the Zellerbach Paper Co., which will be erected on the lot recently purchased by them in Townsend street. The structure will cover an area of 255x125 feet. There will be fire proof doors and metal window frames and sash. There will be elevators, modern plumbing and a sprinkler system. The exterior of the building will be faced with pressed brick. Construction will be started as soon as the plans can be completed.

Flats—2 story and base, frame, \$3,000. San Francisco, Architect, none.

Owner, M. Devenenzi, 119 Union St., S. F. The building has been designed to contain two modern flats of five and six rooms each. The interior trim will be of pine and redwood with tile used in the baths. There will be gas grates. The exterior of the house will be covered with shiplap. The plans are in the hands of the owner and the work will be done by Day Labor.

Flats—3 story and base, frame, \$1,500. San Francisco. Architects, Rhodes & Marisch, 3372 16th St., S. F. Owners, J. and M. O'Connor. The building will contain three modern flats of five and six rooms each and bath. The interior trim will be of pine and redwood with some elm panels. There will be terrazzo steps and entry vestibule. There will be gas grates. The exterior of the building will be covered with brick veneer and cement plaster. The plans will be placed in the hands of the owners and the work will be done by Day Labor.

Flats—2 story and base, frame, Cost not stated. San Francisco. Architect, W. S. Rhodes, 3372 16th St., S. F. Owner, John Murphy. The building will contain two flats of four and five rooms each with baths. The interior trim will be of pine throughout. There will be open fire places and tile mantels. The exterior of the building will be covered with rustic and shiplap. The plans are complete and the architect is taking figures.

Flats—2 story and base, frame, \$5,000. San Francisco. Architect W. S. Rhodes, 3372 16th St., S. F. Owner, Mrs. J. F. O'Connor. The building has been designed to contain two modern flats of four and five rooms each with bath. The interior finish will be of pine and redwood with some hardwood floors and elm panels. There will be gas grates. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Flats—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, G. Anderson, 2320 24th St., S. F. The building will be 28x80 feet and will contain four small flats. There will be baths and gas grates. The interior finish will be of pine and redwood. The exterior of the building will be covered with shiplap. The plans are complete and in the hands of the owner who will do the work by Day Labor.

Hotel—7 story and base, brick and steel, \$150,000. San Francisco. Architects, William Curlett & Son, Phelan Bldg., S. F. Owner, James D. Phelan. The building will be erected on the property adjoining the Argonaut Hotel and when completed will be used as an annex to that hotel. The construction will include considerable steel. There will be in the neighborhood of 200 rooms, a large number of which will have connecting baths. There will be steam heat from the present system. Elevators will be installed. The exterior of the building will be faced with pressed brick and terra cotta. Plans are being completed.

Hotel—7 story and base, brick and steel, \$100,000. San Francisco. Architect, Washington J. Miller, 45 Kearny St., S. F. Owners, Vrooman Co. The building will occupy a corner lot and will contain stores on the first floor and about 210 rooms and 60 baths above. The interior will be finished

in pine. There will be steam heat and elevator service. The exterior will be faced with pressed brick and terra cotta. The plans are now being prepared.

Hotel and Stores—2 story and base, brick and steel, \$60,000. San Francisco. Architects, William Curlett & Son, Phelan Bldg., S. F. Owner, C. K. Davis. The building will be 76x198 feet. The first floor will contain two large stores. The two upper floors will be divided into 141 single rooms and a number of baths. The interior finish will be of pine. There will be steam heat and running water in all rooms. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Hotel and Construction—\$250,000. San Francisco. Engineer, City Engineer Marsden Manson, 1494 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Bids for this work have been opened for the second time and figures show the Mahoney Bros. low. For a complete list of the bids see under Bids Opened, San Francisco.

Lodge Hall—1 story and base, brick and steel. Cost not stated. San Francisco. Architect, E. P. Antonovich, 323 Kearny St., S. F. Owners, United and Ancient Order of Druids. This work has been on the boards for some months. The final drawings have been completed and bids are now being called. The building will be used exclusively by the order. There will be a mezzanine floor, which will be occupied by the offices of the order, a large banquet room, dance hall and complete kitchen equipment. The exterior of the building will be faced with pressed brick.

Hospital—1 story frame. Cost not stated. Camp Yosemite, Cal. Architect, Constructing Co. M. Dept., U. S. A., Chronicle Bldg., S. F. Owners, U. S. Government. The plans for a temporary hospital building have been completed and are now out for figures. The construction will include the plumbing and lighting of the building. Plans can be secured from the Constructing Co. M. Dept. in this city. Bids will be opened on May 16th.

Building for Incinerator Plant—Class A construction. Cost not stated. San Francisco. City Engineer Marsden Manson, 1494 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Plans for the structural steel and for the general construction of a Class A building for the new incinerator plant, which is to be erected at Islais Creek, are complete and have been placed in the hands of the Board of Public Works for figures. Bids will be opened on both contracts on May 1.

Stores and Lofts—3 story and base, brick, \$10,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, Mrs. Braunschweiger. This work has been mentioned here before. The architects have completed taking figures for the construction and will award the contract within a day or two. There will be two stores on the first floor and lofts above. There will be elevator service. The exterior will be faced with pressed brick.

Offices—10 story and base. Class A construction, \$500,000. San Francisco. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owners, Standard Oil Co. The following contracts have been awarded on this work: Arthur Artlett,

Berkeley, masonry and brick work, Gladding, McBean terra cotta work, Newberry, Bondham Electric Co., electric wiring. Other contracts will follow at once.

Contracts Awarded.

Bank—1 story and base, brick and steel, \$34,000. San Francisco. Architect, Herbert A. Schmidt, Royal Insurance Bldg., S. F. Owners, Commercial Savings and Loan Society. Contractors, Mahoney Bros. Jr., Crocker Bldg., S. F. Contract price, \$31,000.

Building Contracts Awarded.

San Francisco.

OAKLAND AND ALAMEDA COUNTY.

Apartment House—2 story and base, frame, \$70,000. Berkeley, Alameda Co., Cal. Architect, Earl B Scott, Humboldt Bank Bldg. 8. F. Owner's name withheld. The building will cover a large site. The interior will be arranged for three and four room apartments with connecting baths. There will be steam heat and elevator service. The bed rooms will be equipped with wall beds. The interior finish will be of pine with hardwood floors. The exterior of the building will be

covered with cement plaster on metal lath. The architect is preparing the plans.

Residence—2 story and base, frame, \$11,800. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, F. T. Elsey. The dwelling has been designed for an 11-room house with baths. The interior finish will be of pine, redwood and mahogany. The floors in the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The roof will be of clay tile. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owner, B. A. Stewart, 616, 41st St., Oakland. The dwelling will contain seven rooms and bath. The interior finish will be of pine and oak with hardwood floors in the first story. There will be open fire places with brick mantels. The exterior of the dwelling will be covered with rustic and cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$4,000. Oakland, Cal. Architect, none. Owner, Lester Reif, 1995 Grand St., Oakland. The dwelling will contain 8 rooms and bath. The interior trim will be of pine and redwood with some oak floors. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,500. Berkeley, Alameda Co., Cal. Architect, none. Owners, Peak-Munroe and Shattuck Ave., Berkeley. The dwelling will contain five rooms and bath. The interior finish will be of redwood with hardwood floors in the principal rooms. There will be open fire places with brick mantels. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by City Labor.

Residences—2, 2 story and base, frame, \$2,000. Oakland, Cal. Architect, none. Owners, Oakland Building and Mortgage Co., 1600 Telegraph Ave., Oakland. Each of the dwellings will contain six rooms and bath. The interior finish will be entirely of pine. There will be open fire places and tile or brick mantels. The exteriors of the houses will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, Mrs. Minnie A. Smith, Oakland. The dwelling has been designed for a six room house with bath. The interior will be finished in pine and redwood with some hardwood floors. There will be open fire places and tile or brick mantels. The exterior of the dwelling will be covered with rustic. The plans are in the hands of the owner and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, E. B. Sliptier, 2143 Ashby Way, Berkeley. The dwelling will contain five rooms and bath.

There will be pine interior finish throughout. There will be open fire places with brick mantels. Tile will be used in the bath and kitchen. The exterior of the house will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, Charles A. Weiner, 2312 9th St., Berkeley. The dwelling will contain five rooms and bath. The interior trim will be of pine throughout. There will be an open fire place with brick mantel. The exterior of the bungalow will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residences—2 story, attic and base, frame, \$29,000. Oakland, Cal. Architect, Lewis C. Mulgardt, Chronicle Bldg., S. F. Owner, H. T. Harper. This work has been out for figures before. The plans have been considerably revised. The dwelling will contain in the neighborhood on 14 rooms and 3 baths. The interior will be finished in pine, redwood, mahogany and white enamel. There will be furnace heat and open fire places. The mantels will be of brick. There will be a garage erected in connection. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residences—2, 2 story and base, frame, \$2,250 each. Oakland, Cal. Architect, none. Owner, C. H. MacGregor, 470 13th St., Oakland. Each of the dwellings will contain seven rooms and bath. The interior finish will be of pine and redwood with some hardwood floors. There will be open fire places and brick or tile mantels. Tile will be used in the bath and kitchen. The exterior of the dwellings will be covered with rustic and shingles. The plans are complete and in the hands of the owner who will do the work by Day Labor.

Bungalow—2, 1 story and base, frame, \$2,000 each. Alameda, Alameda Co., Cal. Architect, W. W. Landgrebe, Fernside and Liberty Aves., Alameda. Each of the bungalows will contain 5 rooms and bath. The interior trim will be of pine throughout. There will be open fire places and tile mantels. The exterior of the dwellings will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Bungalow—6, 1 story and base, frame, \$2,000 each. Oakland, Cal. Architect, none. Owners, Realty Syndicate, 1114 Broadway, Oakland. Each of the dwellings will contain four rooms and bath. The interior finish will be of pine throughout. There will be open fire places with tile or brick mantels. The exteriors will be covered with rustic and shingles. The plans are in the hands of the owners and the work will be done by Day Labor.

Bungalow—1½ story and base, frame, \$2,500. Hayward, Alameda Co., Cal. Architects, Haar & Davis, Central Bank Bldg., Oakland. Owner, W. Ellis. The dwelling has been designed for a six room house with bath. The interior will be finished in pine with some elm panels. There will be open fire places with brick mantels. The exterior of the house will be covered with shingles. The plans are complete and ready for figures.

Hungaw—1 story and base, frame, \$2,300. Haywards, Alameda Co., Cal. Architects, Hagar & Davis, Central Bank Bldg., Oakland. Owner, Matheson. The dwelling has been designed for a six-room house with bath. The interior finish will be of pine throughout. There will be furnace heat and open fire places. The mantels will be of brick. There will be some elm panels. The exterior of the dwelling will be covered with rustic. The architects are completing the working drawings.

Hungaw—1 story and base, frame, \$2,500. Haywards, Alameda Co., Cal. Architects, Hagar & Davis, Central Bank Bldg., Oakland. Owner, Fred Noel. The dwelling has been designed for a six-room house with bath. The interior finish will be of pine. There will be open fire places with the mantels. Tile will be used in the bath and kitchen. The exterior of the house will be covered with shingles. The plans are now being prepared.

Post Office—1 story and base, stone and brick. Cost not stated. Alameda, Alameda Co., Cal. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. The building will cover a ground area of approximately 6,000 square feet. The construction will be fire proof with the exception of the roof. The exterior will be faced with stone. There will be a central heating system. Plans are in the hands of the custodian of the site at Alameda. Bids will be opened by the architect on May 21st.

Theatre—Class A construction, \$60,000. Oakland, Cal. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, Price and Smith. The building will be erected in South 11th street, between Broadway and Franklin streets. The details of the construction have not been decided upon and the owners are to determine whether to erect a Class A building seating 1800 people or a Class C structure costing \$15,000 and seating 900. Further details will be given as the work progresses.

Marine Gardens—Frame Construction, \$100,000. Alameda, Alameda Co., Cal. Architect, Charles E. J. Rogers, 24 California St., S. F. Owners, Neptune Gardens Co. The owners have commissioned the architect to prepare plans for a large amusement park with bath house and other features. The plans have not fully worked out and more complete details will be given later.

FRESNO, MODESTO, STANISLAUS AND CENTRAL ERN CALIFORNIA.

Hotel and Stores—3 story and base. Brick. Cost not stated. Fresno, Pres-

no Co., Cal. Architect, Frederick D. Boese, 45 Kearny St., S. F. Owner, George A. Clough. The building will be similar in design to the hotel structure now under construction in this city by the same owner. There will be in the neighborhood of 100 rooms on the upper floors and several stores on the ground floor. There will be steam heat and running water in all rooms. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

Schools—2 story and base, brick, \$120,000. Bakersfield, Kern Co., Cal. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owners, City of Bakersfield. The architect has just been commissioned to prepare plans for two new schools and for a four-room addition to one of the present buildings. Each of the two new schools will contain eight standard sized class rooms beside the principal's office, teachers' rooms, playrooms, toilets and space for the mechanical equipment. There will be a plenum system of heating and ventilation installed. The exterior of one of the buildings will be faced with pressed brick and the other with cement plaster. The four-room addition will also be of brick construction and will cost in the neighborhood of \$20,000. Plans will be completed and ready for figures in the course of two months.

Stores and Offices—2 story and base, brick, \$30,000. Fresno, Fresno Co., Cal. Architect, W. F. Jennings, Fresno. Owner, J. C. McCubbin, Reedley. The building will be 50x150 feet. The first floor and basement will be occupied by the California Roadside Co. The upper floor will contain modern offices and lodgings. There will be an elevator from the basement to the first floor. There will be modern plumbing and steam heating. The exterior of the building will be faced with pressed brick. A contract for the excavating has been awarded and plans are being completed for the balance of the work as rapidly as possible.

Stores—1 story and base, brick, \$2,000. Oakdale, Stanislaus Co., Cal. Architect, none. Owners, Rodden Bros., Oakdale. The building will be 17x87 feet. The entire building will be occupied by the owners. The interior will be finished in pine. The exterior of the building will be faced with pressed brick. The plans are being prepared and when complete the work will be done by Day Labor.

Stores and Offices—2 story and base, brick, \$10,000. Taft, Kern Co., Cal. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owner, O. A. Fox. The building will be 75x125 feet. There will be steam heat. The interior will be handsomely finished with a marble entrance. There will be considerable structural steel used. The exterior of the building will be faced with pressed brick. Plans are nearly complete.

Hotel—5 story and base. Class A construction, \$150,000. Fresno, Fresno Co., Cal. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owners, Robert Kennedy and Ward B. Minturn. The building will be 120x150 feet and is to be used a san annex to the present Sequoia Hotel. There will be stores on the first floor as well as a large office, lobby, dining room etc. Each of the upper floors will contain 36 guest rooms and 12 baths. There will be a large roof garden. The interior finish

will be of birch. There will be steam heat, vacuum cleaning system and elevator service. There will be a complete steel frame with exterior walls of pressed brick and terra cotta. Plans will be complete early in May and actual construction work started shortly afterwards.

Contracts Awarded.

Hotel—Additions 2 story and base, brick and steel, \$100,000. Fresno, Fresno Co., Cal. Architect, Benj. G. McDonald, Sheldon Bldg., S. F. Owner, Ogil House, Contractors, Andrew Wilkie Co., S. F. Contract price not stated.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

Residence—2 story and base, frame, \$4,250. Stockton, San Joaquin Co., Cal. Architect, W. B. Thomas, Main and Commercial Sts., Stockton. Owner's name withheld. The dwelling will contain eight rooms and bath. The interior trim will be of pine with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with rustic. The plans are being prepared.

Bungalow—1½ story and base, frame, \$2,850. Stockton, San Joaquin Co., Cal. Architect, W. B. Thomas, Main and Commercial Sts., Stockton. Owner's name withheld. The dwelling will contain seven rooms and bath. There will be furnace heat and open fire places. The interior trim will be of pine with hardwood floors in the principal rooms. The mantels will be of brick. Tile will be used extensively. The exterior will be covered with rustic and shingles. The architect is now preparing the working drawings.

Bungalow—1 story and base, frame, \$2,000. Tracy, San Joaquin Co., Cal. Architect, Walter King, Elks' Bldg., Stockton. Owner, W. J. Fredericks, Tracy. The bungalow has been designed for an eight-room house with baths and all modern conveniences. The interior finish will be of pine and redwood with hardwood floors throughout. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with brick veneer. The plans are complete and figures are being taken.

Warehouse and Store—5 story and base, brick and steel, \$100,000. Sacramento, Cal. Architect, E. C. Hemmings, Sacramento. Owners, John Brugger Furniture Co. This work has

been mentioned here before when the architect was first commissioned to prepare the plans. The building has been designed as an annex to the present building of the firm and will be used as a sales room and storage place. The construction will be semi-fire proof with metal sash and frames and fire proof doors. There will be steam heat and elevator service. The exterior will be faced with cement plaster. The plans are complete and figures are being taken.

Factory Buildings—Steel and brick, \$2,000,000. Meridian, Sutter Co., Cal. Engineer, J. C. H. Stitt, 117 Montgomery St., S. F. Owners, Alameda Sugar Co., Alameda Commercial Bldg., S. F. The Alameda Sugar Co. have recently sold bonds amounting to nearly \$2,000,000 and have acquired extensive property holdings in Meridian. The local manager, Mr. Atkinson, states that Engineer Stitt has completed working drawings for several of the buildings. A contract for the steel work has been let to Dyer Bros., of this city, and the steel is now being fabricated in their shops. The walls of the buildings will be of brick. Separate contracts will be let for each structure. There is nearly a million dollars to be expended in machinery, and this work will probably be done on this coast. The manager states that actual construction will be started in the fall.

Association Building—6 story and base. Class A construction, \$160,000. Sacramento, Cal. Architect, E. C. Hemmings, Sacramento. Owners, Young Men's Christian Association. The building will be erected on a site at the corner of 5th and J streets. The Building Committee has just announced the selection of the architect and this selection has yet to be approved by the Board of Directors. The details of the structure will be given as soon as more complete plans can be worked out.

School—2 story and base, brick. Cost not stated. Woodland, Yolo Co., Cal. Architect, W. H. Weeks, 251 Kearny St., S. F. Owners, City of Woodland. This work has been mentioned here before when the architect was first commissioned to prepare the plans. The working drawings have been approved and figures are now being taken. Bids will be opened by the Board of Education the first part of May. Plans can be secured from the architect. The building has been designed for a high school.

Municipal Lighting Plant—Cost not stated. Roseville, Placer Co., Cal. Engineer, City Engineer, Roseville. Owners, City of Roseville. This work has been mentioned here before. Bids for furnishing lamps, transformers and for constructing a building for the plant will be opened by the City Clerk on April 29th. Plans and specifications can be obtained from the City Clerk at Roseville.

Sewer System and Levee Work—Cost not stated. Sacramento, Cal. Engineer, City Engineer Randle, Sacramento. Owners, City of Sacramento. City Engineer Randle of Sacramento has a large field force at work in the districts recently annexed compelling data for the construction of storm water sewers. The water will be carried off by concrete conduits to a main trunk

line sewer with an outfall at the Sacramento River. The plans will be complete in two months. Engineer Randle is also to report to the City Council shortly on an extension levee system, which will extend some 13 miles on each side of the Sacramento River.

Offices—1 story and base, reinforced concrete, \$100,000. Sacramento, Cal. Architect, E. C. Hemmings, Sacramento. Owners, Pacific Gas and Electric Co. This building has been mentioned here several times before. The architect has completed the working drawings and figures are now being taken. The structure has been designed for the exclusive use of the owners. The first floor will contain the general offices and display rooms. The upper floors will be arranged for department heads and private offices. There will be steam heat and elevator service. The exterior will be faced with pressed brick.

This work was mentioned here when the architects were first commissioned to prepare the plans. The first floor will be occupied by the banking offices. The second floor will contain twelve modern offices. There will be steam heat. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Bank, Fixtures and Alterations—Cost not stated. Los Angeles, Cal. Architects, Parkinson & Perestrom, Security Bldg., L. A. Owners, German American Savings Bank. This institution has leased a large space in the Union Oil Building and are having plans drawn for one of the finest banking rooms in the west. There will be a mezzanine floor installed, coin and safety deposit vaults and elaborate banking fixtures. Plans are now being prepared.

Warehouse—2 story and base, brick and concrete. Cost not stated. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, California National Supply Co. The building will be 60x230 feet. There will be considerable structural steel used. The floors will be concrete. There will be metal doors and window sash. An automatic sprinkler system will be installed. There will be elevators. The exterior will be faced with cement plaster. Plans will be completed within a week and figures will be called.

Warehouse—6 story and base, reinforced concrete. \$150,000. San Diego, Cal. Architects, Blaisdell & Leman, Timken Bldg., San Diego, owners, Prevost-Bloissee Furniture Co. The build-

ing will cover an area of 100x100 feet. The work has been mentioned here before. The working drawings are now complete and figures are being taken.

Factory—1 story and base, mill construction, \$60,000. Seattle, Wash. Architect, Billan Everett, Seattle. Owners, Seattle Candy and Cracker Co. Contractors, Butler Construction Co., Central Bldg. Seattle. Contract price, \$60,000.

Bridges—Steel and reinforced concrete. Cost not stated. Ventura, Ventura Co., Cal. Engineers, Mayberry & Parker, Radio Electric Bldg., L. A. County Engineer, E. E. Everett, Ventura. Owners, Ventura County. The following bridges are to be erected in Ventura County, bids for which will be opened by the Board of Supervisors on May 20th. A reinforced concrete trestle bridge over the Santa Paula creek near Ferndale Ranch. It will have a 20-foot roadway, 60-foot span and 200 feet of fill for approaches. A reinforced concrete deck girder bridge across Sierra creek near Ferndale Ranch. It will have 20-foot roadway, 10-foot span and 100 feet of fill approach. A reinforced concrete deck girder bridge at the West Main street crossing over the Ventura river. It will be 350 feet long and will be 14 feet wide, 15-foot roadway and no approaches. Replacing the trestle approaches to the Montalvo bridge with combination trusses between 8th and 9th streets. The trestle will be replaced with combination trusses. In 58-foot spans, the ends of the trusses being supported by cement filled culverts.

Bridges—Reinforced concrete. Cost not stated. San Bernardino, San Bernardino Co., Cal. Engineer, County Surveyor, San Bernardino. Owners, San Bernardino County. Bids for the construction of a reinforced concrete bridge over the Little Creek will be opened on April 29th. Plans and specifications can be secured from the County Surveyor.

Bridges—2 concrete and frame. \$4,000 and \$2,000. Santa Ana, Orange Co., Cal. Engineer, County Surveyor, Santa Ana. Owners, Orange County. The supervisors have appropriated the above mentioned sums for the construction of the bridges in the county and the County Surveyor is now preparing plans for the same.

Church—2 story and base, brick and stone. Cost not stated. Riverside, Riverside Co., Cal. Architect, Thos. Hunt, Biberian Bldg., L. A. Owners, First Congregational Church of Riverside. The revised plans for this work, which has been mentioned here before, have been completed and the three lowest bidders will be asked to refigure the work.

Church—Alterations, \$15,000. Orange, Orange Co., Cal. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, Orange Presbyterian Church. Bids are now being received for the painting, oil glass work and heating system in this building. Plans can be secured from the architect.

Church—Additions, brick construction. Cost not stated. Phoenix, Ariz. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, First Baptist Church of Phoenix. Twelve class rooms will be added and the seating capacity of the main auditorium will be considerably increased. The exterior of the building will be faced with cement plaster. Plans are being prepared.

Church—2 story and base, concrete and brick. Cost not stated. Los Angeles, Cal. Architect, Elmer Grey, Wright and Callender Bldg., L. A. Owners, First Church of Christ, Scientist. The building will be 175x114 feet. There will be considerable structural steel used. The work has been described here before when the architect was first selected to prepare the plans. The exterior of the building will be faced with tan brick, tiled with terra cotta. Plans are complete and figures are being taken.

Hospital—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, A. B. Benton, 114 North Spring St., L. A. Owners, University of Southern California. Bids for this work have all been rejected as too high. The plans will be revised and new bids will be called for at once. The lowest bid exceeded the appropriation by \$15,000.

School—1 story and base, brick, \$10,000. El Monte, Los Angeles Co., Cal. Architects, Tuttle and Hopkins, Delta Bldg., L. A. Owners, La Puente School District. The building will be 32x55 feet and will contain four class rooms. The exterior of the structure will be faced with cement plaster. The architects are preparing the working drawings and bids will be called for shortly.

Hotel—6 story and base, reinforced concrete, \$200,000. Los Angeles, Cal. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owners, Los Angeles Cemetery Association. The building will be erected on Grand avenue, between 8th and 9th streets, and will cover a site 60x155 feet. The architects have completed the working drawings and will segregate all contracts. The figures will be called within a few days on the general contract, which will include the reinforced concrete work and the plastering.

Tunnel Construction—\$1,000,000. Cajon Pass, San Bernardino Co., Cal. Engineering Dept. Santa Fe R. R. Co., Los Angeles. Owners, Santa Fe Railway Co. L. L. Hubbard, general manager of the coast lines of the Santa Fe, has announced that a tunnel will be constructed through Cajon Pass in San Bernardino County. None of the details other than the fact that the company expects to spend nearly a million dollars on the work can be learned at this time.

Stores and Offices—12 story and base, Class A construction, \$500,000. Los Angeles, Cal. Architects, Parkinson & Longstrom, Security Bldg., L. A. Owners, syndicate headed by J. S. Torrence. The building will be erected at the southeast corner of 3rd and Spring streets, the site now occupied by the Ramona Hotel. The work has been mentioned here before when the architects were first commissioned to prepare plans. The announcement has been made that actual construction will be started by July 1st, when the present building will be demolished. The upper floors of the new structure will contain 300 offices.

Stores and Lofts—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Mott Montgomery, associated with Ross Montgomery, Trust and Savings Bldg., L. A. Owner, R. Fred Vogel. The building will contain one large store on the first floor and lofts above. There will be a freight elevator. The exterior of the building will be faced with glazed terra cotta. The plans are complete

and the work will be done by Day
Labor.

Stores and Offices or Hotel—Height not decided. Class A construction. Cost not given. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owner, Edward Henning. The architects have just been commissioned to prepare sketches for a modern store and office building which the owner, who has just purchased the Flatiron Block, in the south side of Eighth street, between Spring and Main streets, contemplates. Sketches will be prepared for both a store and office structure and for a hotel. Details of the building will be given later.

Stores and Offices—12 story and base, reinforced concrete, \$250,000. Los Angeles, Cal. Architect, Fred R. Dorn, Douglas Bldg., L. A. Owners, Robert Marsh and Frank R. Strong. The building will be 50x148 feet. There will be a bank, four modern stores and the main entrance on the first floor and about 198 offices on the upper floors. There will be elevator service, steam heat and vacuum cleaning system. The exterior of the building will be faced with terra cotta. The plans are nearly complete and bids will be asked for shortly on the foundation work and excavations.

Hotel and Stores—3 story and base, brick, \$25,000. Los Angeles, Cal. Architect, Joseph F. Rhodes, Central Bldg., L. A. Owner's name withheld. The building will be 70x112½ feet. There will be six stores on the first floor and 72 rooms and a number of public baths on the upper floors. There will be steam heat and running water provided for

each room. The exterior of the building will be faced with pressed brick. The plans are complete and the work will be done by Day Labor, the architect purchasing all materials.

Hotel—1 story and base, brick and steel. Cost not stated. Ocean Park, Los Angeles Co., Cal. Architect, Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owner, George W. Fox. The building will be 39x112 feet. There will be the entrance, main lobby, three stores and a barber shop on the first floor. The upper floors will contain 60 rooms, 20 of which will have private baths. There will be steam heat. The exterior of the building will be faced with enamel brick. The plans are complete and figures will be taken May 1st.

Library—1 story and base, brick \$10,000. Upland, San Bernardino Co., Cal. Architect, Homer W. Glidden, Wright and Callender Bldg., L. A. Owners, Upland Library Trustees. The building will be 40x60 feet. There will be a public reading room, reference room, rack rooms and office for the librarian. The interior finish will be of pine and oak. The exterior of the building will be faced with pressed brick trimmed with artificial stone. The architect is now preparing the plans.

Library—1 story and base, frame and brick. Cost not stated. Hemet, Riverside Co., Cal. Architect, S. L. Pillar, Crescent Bldg., Riverside. Owners, Library Trustees of Hemet. The building will be 44x64 feet. There will be an office, public reading room, reference room, rest room and lecture room. The exterior of the building will be finished with cement plaster on metal lath. The interior finish will be of pine with oak

floor. The plans are complete and figures are being taken.

School—1 story and base, reinforced concrete. Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Architectural Dept., State of California. Owners, State of California. The building will be designed in the Mission style of architecture with two large wings each 240 feet long with a connecting wing 27½ feet. There will be 18 class rooms each 20x30 feet, administration rooms, library, manual training rooms and shops laboratories for chemistry and biology and a large domestic science department. The interior finish will be of brick. The exterior of the building will be faced with cement plaster. The mechanical equipment will be complete in every detail. The plans will be completed shortly and figures will probably be called for by the end of April.

Hotel—3 and 4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Fred Biren, Broadway Central Bldg., L. A. Owner's name withheld. The building will be erected on a corner site. The upper floors will contain in the neighborhood of 122 rooms besides a large number of baths. There will be steam heat and hot and cold running water in all rooms. The exterior of the building will be faced with pressed brick. The plans are complete.

Contracts Awarded.

Warehouse—3 story and base, brick and concrete, \$20,000. Los Angeles, Cal. Architects, Engineering Dept. Swift Packing Co., Chicago. Owners, Swift Packing Co. Contractors, Davidson Construction Co., Union Oil Bldg., L. A. Contract price, \$19,885.

Convent and School—2 story and base, frame, \$20,000. Anaheim, Orange Co., Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Roman Catholic Church. Contractors, Bender & Selhernagle, Anaheim, general construction. Contract price, \$15,588.75. Note: The plumbing, heating, painting and electric work will be let separately.

SEATTLE AND WASHINGTON.

Apartment House—6 or 8 story and base. Class A construction. Cost not stated. Seattle, Wash. Architect, James H. Schack, Downs Block, Seattle. Owner, E. S. Lippy. The architect has just started preliminary plans for a large apartment building for this owner, who is heavily interested in the building of this type of structures. The owner is now in California and complete details of the work cannot be given until his return.

Bank—2 story and base, brick and steel, \$10,000. Seattle, Wash. Architects, Deeger Bros., Northern Bank Bldg., Seattle. Owners, University State Bank. The building will contain the banking quarters and offices. There will be steam heat. Large coin and safety deposit vaults will be installed. The exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

Warehouse and Dock—Reinforced concrete, \$350,000. Bellingham, Wash. Architects, Blackwell & Baker, Northville Terminal Co., represented by Everett Terminal Co., represented by Charles Fenn, Leary Bldg., Seattle. The structure will be 1,000 feet long

and will contain a large warehouse, coal bunkers and offices for the local agent of the company. The plans are being prepared and will be ready for figures shortly. This is but one of several large structures of a similar nature which the Pacific Terminal Co. will erect on Puget Sound.

Bank and offices—6 story and base. Class A construction, \$275,000. Bellingham, Wash. Architect, John Graham, Lyon Bldg., Seattle. Owners, Bellingham National Bank. The structure will cover a ground area of 110x125 feet. There will be a large number of offices on the upper floors. The first floor will be given over to the banking quarters and entrance. The construction will be absolutely fireproof. The interior will be of metal. There will be hardwood finish and ornamental iron and plaster used in the banking offices. There will be elevators, steam heat and a vacuum cleaning system. The exterior of the building will be faced with pressed brick and terra cotta. The plans will be complete in about six weeks.

Bridge—Steel, \$296,000. Tacoma, Wash. Engineer's name not given. Owners, Oregon-Washington Railway and Navigation Co. It is reported that the plans for a steel bridge at 15th street have been completed and that as soon as permission can be secured from the authorities bids will be called.

Church—1 1/2 story and base, brick. Cost not stated. Everett, Wash. Architect, Ellsworth Storey, New York Bldg., Seattle. Owners, Trinity Parish of Everett. The building will be 75x120 feet. There will be a central heating system. The main auditorium will have a seating capacity of 1200 people. There will be a library and study in connection, Sunday School rooms and social hall. The exterior of the building will be faced with pressed brick and terra cotta. Plans have been figured and a contract will be awarded at once.

Theatre—10 story and base. Class A construction, \$450,000. Vancouver, B. C. Architect, E. W. Houghton, Collins Bldg., Seattle. Owner, John Cort. The preliminary plans for this building have just been approved by the owner. The structure will be arranged for a modern apartment house in addition to the theatre. Further details will be given as soon as the working drawings are completed. Actual construction will be started this summer.

Stores and Offices—2 story and base, brick and concrete, \$100,000. Seattle, Wash. Architect, James H. Schack, Downs Bldg., Seattle. Owner, T. S. Lippy. The building will cover an area of 119x120 feet. The first floor will contain a number of small stores. The upper floor will be arranged for offices and living rooms. The exterior of the building will be faced with pressed brick. The plans are being prepared.

Water System—Cost not stated. Wapato, Wash. Engineer, City Engineer D. R. Redman, Wapato. Owners, City of Wapato. Bids will be opened on May 24th for laying 19,000 feet of from 4 to 10 inch pipe and setting 27 hydrants, valves, etc. Plans can be secured from the City Engineer.

Editorial Comment.

A great deal has been said and written of the inequality of the rich and poor before the law. And justly so. A man goes to jail for stealing a loaf of bread, or if he is caught in some technical violation of the law the majesty of the law is invoked to vindicate the solidarity of our judicial system that insures to all men the right to life, liberty and the pursuit of happiness.

But when Standard Oil is indicted for violation of penal statutes and a judge finds it guilty the case is appealed and draws out from day to day and from year to year and is finally reversed by a higher court and meanwhile the trust goes on doing business and there has been little or no expense added to its legal department. So, also, the meat packers can sell poisoned meat to the public and the patriotic youth of the land can form combinations in violation of law and it takes ten years to bring them to trial. But the man who has not the means to take advantage of the legal machinery comes up for trial and is convicted or acquitted as the case may be. In most cases he gets a fair trial and that is all any one could ask. But the point is that the wealthy manufacturers do not get a fair trial and the cards are all stacked in their favor. For this reason the people have demanded that the people who have the making of the rules of trials and determine the status of laws shall be subject to the will of the people. And that a judge elected for a term of years shall look to the people themselves for future preferment rather than to corporations that have been in the habit of controlling him. In the progressive states, therefore, the recall has been placed where it belongs, in the hands of the people.

In speaking of trials, that of Michael Joseph Conboy, police captain for the murder of Bernard Lagan is a notable example. After five abortive attempts at a trial he has been found guilty of manslaughter. On the night of June 26, 1909, being crazy drunk, he shot and killed the man who attempted to help him up from the sidewalk where he had fallen.

These are the essential facts of the case as detailed by all the witnesses. In the case just ended the jury bring in a verdict of manslaughter with a recommendation to mercy and he has been set at liberty on \$10,000 bonds, between the time of conviction and sentence, a most unusual thing.

Conboy has no doubt suffered much for the deed he done in his drunken frenzy. But he had no right to get drunk. He should have the same

rights that any other man would have under the premises and no more.

Now and again some great disaster or some sociological crisis come along that brings out certain facts that the public generally had forgotten. These are emphasized by their seeming incongruity. Thus the strike of the textile workers at Lawrence, Massachusetts, brought out the fact that many men and women were working at an outside wage of five or six dollars a week in the protected industries that the tariff sponsors have always howled about. They must protect American labor against the pauper labor of Europe. And this is the sort of protection they get. The manufacturer pays them all he has to and no more.

So oftentimes there is an embezzlement in a bank or some great corporation and investigation develops the fact that the man upon whom enormous responsibility rests is paid scarcely enough to live upon for his services.

The investigation into the Titanic disaster develops the fact that the wireless operators on the British ships get from \$7.50 to \$10 per week. In case of disaster he is the most important man aboard the ship. The occupation should be sufficiently remunerative to make it worth an intelligent man's efforts to become an adept.

No one can hope to follow such an occupation all his life and accumulate any thing for his age or support a family. There should be some adjustment of these relations else sooner or later there will be government supervision of the whole business.

An opinion of the City and County Attorney to the effect that the recent amendment to the constitution of the State prevents the water company from making any extension to its mains seems to be the subject of much comment. The Chronicle particularly has a sarcastic editorial on the subject stating that instead of reform we have placed the water company in the position to say go hang yourself.

So far as the opinion of the City Attorney is concerned all that it says after a great many words is that the water company can not extend its mains without the grant of a franchise by the Board of Supervisors. It would seem then that all that is necessary is for the City authorities to extend the franchise where it is needed and the procedure will be the same as before. What there is in the City Attorney's opinion to alarm any body we fail to see. There are a lot of words that mean practically nothing and all that he says is that when any main lines of water or power systems are extended a permit must be granted from the Board of Supervisors.

LICENSING ARCHITECTS.

An Able Discussion of the Different Phases of the Subject By A Member of the Illinois Board of Examiners.—Read Before the 45 Annual Convention of the American Institute of Architects. By H. B. Wheelock, F. A. I. A.

Licensing architects is essentially a modern idea. It has been brought about through the evolution of a new and great nation with new and great needs. In the twinkling of an eye we have sprung from a few feeble colonies to a world power among the peoples of the earth. So rapid has been our increase in stature that old world clothes will not fit us and old world ideas can not entirely govern us. The changing conditions attending the development of a nation always demand the creation of new laws, and the discarding of traditions or customs which have proven either useless or inimical to healthy growth. Up to the present decade in our history individual strife for mastery and success has been the predominant force, but now a true sense of brotherhood is awakening. This is the era of the "get together" spirit where men shall stand shoulder to shoulder in well organized effort to forward the greatest good of the greatest number. "Down with the commercialism that knifes the neighbor in greed for individual gain" is the slogan. Shall we, as architects, hear or ignore it?

In a way ours is a unique calling—or at least we like to consider it so. The architect, as we best know him, is a marked individual, full of individuality and imagination, coupled with the genius of art, one born to create and to be the master builder. The love of his art is so absorbing, so fascinating, that it not to be wondered at that he forgets his brother men, his duties as a citizen, and sometimes his obligations to society. For this reason we find few in our profession who are sufficiently public spirited to willingly devote their time to finding ways and means of better protection for the public or elevation of the profession. We are either indifferent to the need or scorn the idea that it exists. But it does exist—it is real, and it is urgent. We need higher ideals, better education along artistic as well as scientific lines, greater preparation for our work. Because our nation is so young, has grown so rapidly, and has necessarily been so occupied with developing its vast outlying territories, its ideas of what is good architecture, at the least, very immature, very narrow, very absurd. The majority of buildings erected in this country are bad from every standpoint, they are inartistic, unsafe, unsanitary—even when the owner is able and willing to pay for a creditable structure. We all know this and we all know the reason for it. How can it be otherwise, when any man or woman who chooses may hang out his shingle as an "architect," and may design and construct any building for public or private use, without question as to his fitness or preparation, or even his knowledge as to the common laws of safety and hygiene? Until time and education have produced men who shall command respect for their ability to design and supervise structures that shall be a credit to our pro-

fession. I say that until such time arrives, architects the country over should lend a hand to bring about legislation that shall at least insure greater safety and proper sanitation in all our buildings, and eventually place the profession of architecture on the high pedestal it deserves. In order to command this respect of the public for our profession, we must first prove that we know how to build well construct safely, ventilate and sanitize correctly, and then to clothe the skeleton in a pleasing manner. The sculptor's secret of success lies in his accurate knowledge of the structural parts within that enables him to give strength and proportion to his art, and how much more should the architect be well versed as to the construction of his work of art, for it is not alone from the exterior that his work is to be judged, but it must be also lived in; therefore the public demands and has a right to demand safe building first and art afterwards. How can this best be accomplished? We are loth to acknowledge that the only feasible, in fact the only possible solution is a legal one. Law is necessary to govern mankind, always has been, and always will be and the architect has no pass from his Creator exempting him from legal restrictions. Our brother professional man, the lawyer, informs us that laws which interfere with the personal liberty of the citizen and his right to pursue such vocation or calling as he may choose, cannot be constitutionally enacted, unless the public health, comfort safety or welfare demands this enactment. Quoting from Brooks' legal maxims:

"Salus populi, suprema lex"

"That regard for the public welfare is the highest law."

There is an implied assent on the part of every member of society that his own individual welfare, shall, in case of necessity, yield to that of humanity. The object of all government must be to control human action to the extent necessary and proper for the common good. This control is accomplished by what is commonly known as the police power of the State, that inherent or plenary power which justifies the prohibition of all things hurtful to the comfort, safety, and welfare of society, and may be termed "The law of over-ruling necessity," therefore it is plainly evident that by virtue of this, it is not only the right, but the solemn duty of the State to enact such laws as will be conducive to these ends; and the profession of architecture should not be found wanting or negligent as compared with the other recognized professions in assisting and co-operating with legislative bodies to have proper and sufficient laws enacted that will give adequate protection to the public against unsafe and poorly constructed and insubstantial buildings. The architectural profession has nothing to lose but everything to gain. To license a man to practice a profession

is to grant permission to him, due to his special knowledge and equipment, to do that which common sense dictates others must not do. "Common sense" is here used as a definition of law, therefore it must follow that it is not only right but should be made compulsory for all men who would practice a profession such as architecture to be licensed.

Where the successful prosecution of a calling requires a certain amount of technical knowledge and professional skill, and the lack of them in the practitioner will result in material damage to the one who employs him, it is a legitimate exercise of the police power to prohibit any one from engaging in the calling who has not previously been examined by the lawful constituted authority, and received a certificate of his qualifications to practice the profession. Thus we find in every State, statutes which provide for the examination of those who wish to engage in the practice of law, of medicine and surgery, and of pharmacy. Many States, no less than seven, have now enacted laws to govern the practice of architecture. The index finger is even now pointing to the inevitable, that all States must sooner or later adopt similar laws. Illinois was the first to have such a law, which was passed some fourteen years ago, and has been amended several times, and is still not altogether perfect; however, it has not yet been conducive to protecting the public, but has been of a very material aid in promoting architectural education and has unquestionably raised the standard of the profession as nothing else could have done. Many applicants for license have spent from three to five years in serious preparation after having discovered their lack of qualifications through taking an examination. As many fail to prove their ability in plan and design before the Board of Examiners as fail in construction, which shows how thorough the Board is in executing its authorized commission, the same holds good in many of the other States.

The Technical Schools throughout the country testify that their courses of instruction have been greatly advanced since the advent of such laws, that their architectural departments have a much larger attendance, that the establishing of architectural schools and departments is in greater demand the country over.

The State Boards all testify that they constantly serve in the capacity as an advisory Board to young men, advising them by all means to seek the advantages offered in some recognized Technical School. What a God-send to any young man to be permitted the privilege of taking an examination before a competent Board who will point out to him wherein he is deficient, that he may the better prepare himself before entering upon his life calling; again, how fortunate for the young man who has unwisely chosen his profession, to have his

mistake pointed out before. His too late. The public and the profession are mutually benefited by such incidents which are occurring constantly in several States; and inversely is it true—the public and the profession is greatly wronged in those States where no adequate law prevails to govern the practice of architecture.

It is a little early in the history of architectural license laws to draw many definite conclusions, but the following has been gleaned from a very carefully selected list of questions which were submitted to the various Examining Boards in the several States having such laws. These States are Illinois, California, New Jersey, Colorado, Louisiana, Utah, and also Manitoba and Quebec.

1. Architects in States where such laws exist give their almost unanimous approval of same. This means only one thing—that the law is operating satisfactorily.

2. The law has not been a hindrance to any worthy practitioner, but rather the reverse, since it has removed the once popular individual called the "independent contractor," the "architect-builder," the "architect and engineer," and the alleged architect that carried his office in his hat. Some declare it has been the means of eliminating a brand of the "drifter of something for nothing" that in their far western country had become a menace as well as a nuisance to the profession.

3. Many State Universities and Technical Schools have, since the advent of the architects' license laws revised their curriculum, added thereto and modernized their courses to meet the present demands. It is particularly interesting to note that the University of the State of Colorado is about to establish a course of architectural study, due solely to the fact of the existence of a license law; there is not, at the present time, any technical school in Colorado that has a chair of architecture. Their license law provides that "all surplus funds accruing from fees" shall form the nucleus of a fund to provide for an advanced course of architectural study to be established in the University of the State of Colorado.

4. The law has created a higher ethical and moral standard in the practice of the profession as well as competency in planning and designing.

5. There is no doubt that the applicant for a license makes a greater special effort in preparation for the examination than he would otherwise do, thus becoming far better fitted to practice from the very beginning of his architectural career.

6. The public has already learned that in a State where a license law exists, the man who has not a license is a questionable man to deal with. No one thing done by the architects has had such a salutary effect towards better architectural education than the establishing of such laws as are now in existence in the several States, and the inevitable result of all of this will be that in a few years will thoroughly competent men will dare attempt to practice architecture.

These are indeed the cardinal reasons why the architect should be licensed, and they should also appeal to every member of the A. I. A. who loves his profession and desires to have it receive proper recognition from the public. It is hardly possible to conceive that any broad-minded architect

would lessen his dignity or suffer insult to his esthetic nature by being obliged to prove to the public in some positive manner his ability to build well. Who is there that is not striving almost every day to convince the public of his ability by indulging in competition? Are we not always required to show a client what we have done before we fully secure his confidence?

After a law governing the practice of architecture is once established, it would thereafter only apply to the young and inexperienced man, who before presenting himself before the public and demanding its confidence, should first demonstrate his qualifications and ability. The older men in the profession should have sufficient loyalty to the public and interest enough in their close nothing to lend themselves wholeheartedly to this result. So much for the necessity of licensing architects. Now just a word as to the necessity of good and adequate license laws as nearly uniform as possible in all the States of the Union. Not statutes concocted by political schemers for political ends, but enactments conceived and put through by the best brains of our profession. It must be so if we are to meet with any measure of success. It is evident that the architect is the logical person to prepare suitable laws for the purpose of governing the practice of architecture and without hesitation he should take an active part in obtaining such legislation. Why should not the Institute, which takes such a fatherly interest in its chapters, follow the same course? It has taken in presenting the chapters with model "contract documents," also present its chapters with a model architectural "Institute" license law, and then lend its moral support to its enactment and enforcement. If this were accomplished, I am certain we would not be mortified by having such ridiculous edicts spread on the statute books as exist in one or two of our States. When a State declares that an architect's license can be revoked for only one cause, that of "committing a crime," it is high time the profession should arouse itself to force all such compromises in architectural legislation, save the inevitable, and prepare proper forms, suitable to our purposes, upholding the dignity of the profession while at the same time conserving the public interest. Delay is especially dangerous, for while we sleep bad legislation goes on.

Immediate inter-State communication and co-operation is essential if we would avoid the embarrassing and difficult work of undoing and making over such laws governing the practice of architecture as are now enacted.

ENGLISH BRICK EXHIBITIONS OUTDONE BY AMERICA'S FIRST SHOW.

"You've got to show me," said a certain man from Missouri. Who the certain man was nobody seems to know. Whatever his name he was a liberal descendant, in and if not in blood, of the Apostle Thomas—Doubting Thomas, who wouldn't believe till he saw with his own eyes. The originator of the "show me" phrase may have lived and died in St. Louis, Kansas City or the Ozark Mountains, but today the man from Missouri doesn't necessarily dwell west of the Mississippi and east of Kansas. His name is legion in these United States. You'll meet him on the

farm, on the train, on the street corner. And don't try to give him any "soft" talk, or build castles in the air for him to admire. He's not interested in such things. In all probability he is lacking in poetry, imagination, but he has common sense to spare. He continues his dreaming to the night time. He wants to be shown.

It was to attract and convince this man that the brickmakers of the country not long ago held their big show in the Coliseum in Chicago. It was called the "Chief Doubters Exposition," and pretty nearly everything made of clay was to be seen there, water pipes, drain pipes, conduits, tiles, fancy terra cotta and whatnot. But the brick part of it was the genuine revelation. Thousands, tens of thousands, who started to make the round of the exhibits in a rush, showed up before they were hardly underway, then stopped and looked for hours. White brick, black brick, red brick, cream-colored, gray, brown, common and fancy, simple and ornate—they were all there, and they made such a display as had never been seen in America before.

The immensity of it may have staggered the ordinary citizen, but when he comes away it was with one clear impression, that brick was not a material merely for great railroad stations and schools and churches and factories, but a thing of interest to the man of moderate income, even to the poor man. Of course the brickmakers themselves and architects and contractors have known this for a long time. What the brick men wanted to do was to give a public demonstration of it. Their ambition was to reach the meek, the persistent, the cautious, and every Man from Missouri. And they did.

A visitor from Omaha, who was soon to build a home for himself and his brick, stood in the crowd and finally decided upon frame construction, and he didn't intend to be convinced. He was a hard-headed young business man. He asked stupid questions and tried to trap the champions of brick. When he came out of the Coliseum after two hours and returned to his hotel, he happened to bump into a fellow townsman who knew of his building plans.

"I'm going to build a brick home," announced the hard-headed young business man from Omaha.

"Why?" exclaimed his friend in surprise. "You told me a week ago anything but wood was too expensive."

"Harry, my boy," said the brick-maker, grabbing the other by the arm, "do you think I'm going to be fooled enough to spend thousands on hardwood floors and carved wainscoting and cozy corners and all sorts of fancy filigree, and then enclose 'em all in a flimsy shell so that I can save two or three hundred dollars and have the privilege of paying high premiums to the insurance companies the rest of my life? How's that for economy, eh? It's a wonder to me I didn't put my wife's jewels and those two Union Pacific bonds of mine in a safe deposit vault made of cardboard instead of steel. Harry, a man who says he can't afford brick is like a man with a fifty-dollar suit who says he can't afford to wear a necktie."

This convert told in his breezy Western way what many others besides himself thought after leaving the brick show. The citizen of average knowl-

color, who has never given the subject much thought, rarely thanks of brick in connection with a small building project. Or, if he does, his mental picture is of some ugly, shapeless structure "flung together" out of the kind of common brick that were never meant to be used for exteriors. But in the Coliseum he had only to ask a few careful questions, and make a brief examination of the ornamental "face" brick, to learn the artistic possibilities of this safest and most durable of all materials. And invariably he was surprised to find out, from the figures of actual houses already built, how small was the difference in cost between frame and brick.

It was odd to see how surely the women visitors went to the heart of the subject—got the meat of the nut, so to speak.

"We had newly-weds by the dozen," said one of the brick exhibitors, "and nearly every time it was the wife who looked far ahead, through the years, and saw what a big saving would come in the end from a little more money spent on the beginning. You could see the man's mind was troubled over the question of the first cost—maybe because he didn't know where the cash was coming from—but the woman saw values more clearly. She saw right away what a slight difference \$500 made in the cost of a \$5,000 house compared with the difference in durability, safety and health. When it comes to home-building I guess the female of the species has a good deal of the financial acumen that men like to think they have all to themselves."

The Building Brick Association had got together definite figures showing relative costs of frame and brick homes, and those who went to the Clay Products Exposition could have the information for the asking. Not only estimates by contractors and architects, but costs of actual houses, were obtained from all parts of the country. After the show closed the officers of the Association took the figures home to their office in the Flatiron Building in New York, and are sending 'em out from there to anybody who wants 'em.

A well known Boston contractor sent in a report in which he said that he had designed a \$10,000 brick house and had afterwards thought of using wood instead. To his surprise he learned that the cost of the house with a shingle or clapboard exterior would be only \$400 less. Some of the experts estimated a somewhat larger percentage of original saving by the use of wood, but in no case was the difference anything like enough to counterbalance the advantages of brick in cutting down maintenance charges, insurance rates, doctors' bills, painting bills and coal bills.

Of all remarkable exhibits the most striking was the \$200 brick bungalow that was built in four days and a half. No, this is not a fairy tale—the building was actually put up between Saturday at breakfast time and Wednesday evening. The work went on night after night, with three eight hour shifts. Such a hustling of masons, plasterers, carpenters and laborers was never before seen in Chicago or anywhere else. And when the last workman walked out there were no loose ends yet to be cut off. Inside and out the job was done—ceilings and walls and floors and windows, even the garden wall with vines trailing over it.

"Three thousand dollars worth of brick in a house that size is not so cheap," snifted a visitor who looked as if his dinner had disagreed with him.

"No, it's not," replied his wife, who'd been asking questions. "The point is, though, that it wasn't the brick that cost the three thousand. It was the whole house, trimmings and all. The brick cost not more than three or four hundred dollars, and lumber in its stead would have cost almost as much."

Which was literally true. The bungalow, with its six rooms and broad piazza, was built from prize-winning plans submitted in an architects' competition. More than six hundred architects competed, the condition being that the bungalow built with walls of brick and finished throughout, should not cost more than \$33,000 altogether. Numerous were the inquiries about this little wonder house, and a dozen or two men and women could be seen, at any time in the day or evening, putting down facts and figures—some of them drawing rude sketches—on the backs of envelopes and on odds and ends of crumpled paper.

Not only were there bricks of all patterns piled high in the Coliseum, but there were specially designed fire places and chimneys. These showed the varied texture of brick, and how the separate units could be so arranged as to produce perfect harmony. One who has not seen these creations can hardly imagine the flexibility possessed by brick when treated with the taste and skill of the practiced architect. A spontaneous tribute to this quality was offered by one visitor, a woman, who exclaimed:

"Why, that's woven together so it reminds you of a Persian rug!"

Only such an exhibition as this was required to impress upon prospective home-builders the beauty of the brick house. Brick has been called the aristocrat of all building materials. Its known history goes back some 5,000 years. There is nothing experimental about it—it is "tried and true." In Europe it has been recognized for centuries not only as the most substantial of all materials, but as the one that offers the greatest opportunity to the architect who is also a real artist.

The man or woman who visited the Clay Products Exposition with the idea that brick was for the old man, came away with a clear understanding of his mistake. The clerk who was to put up a \$4,000 house and the prosperous merchant whose "palatial residence" was to cost him \$10,000—each of them learned here that brick would suit his plans. The merchant would use a greater quantity than the clerk, and his home would be more spacious and imposing. But taste is a stranger to poverty no more than to wealth; and a home of brick, no matter how modest, can be in perfect taste, artistic if not imposing, not so splendid, but perhaps even more soothing to the eye.

"But it's the practical that counts most with American," said one of the exhibitors. "We all want homes that look good, but what each wants to know most urgently is this: 'What will it cost, can I afford it? And if it costs more, how much better will it wear and how much will it save me in the long run.' And it was on that point that brick men were able, and always are able, to make the strongest appeal. They can show a man that he will save

more than enough in paint alone to make up for the difference in original cost. And then, in the frame house there are the depreciation, repairs, the frozen pipes, the heavy fuel bills, and higher insurance, and finally the actual physical danger from fire. A frame house wastes away with time; the value of a brick house goes up with the natural rise in value of real estate and buildings. If you build with wood you're trying to beat Father Time at his own game; if you build with brick you've got Father Time as a fellow conspirator dealing you trumps off the bottom of the deck."

NEW MAPS ISSUED.

United States Geological Survey Completes Five New Topographic Atlas Sheets Showing Distinctive Surveys.

Five topographic maps issued during the last week of March by the United States Geological Survey comprise typical examples of the wide variation of topographic surveying done by this map-making bureau. The maps represent surveys ranging from very detailed, large-scale work—5 inches to 1 mile with 1/8-mile contour intervals, showing the smallest gradient—to the small scale of half an inch to one mile, with 100-foot contour intervals. The regions surveyed vary as widely in character—from the mountainous, rugged area of the High Sierra, with only trails for transportation routes, to the low, almost flat area of the Sacramento Valley and to the well-settled Otsego region of New York, traversed by railroads and highways in every direction.

The High Sierra type of map, that of the famous Mount Goddard quadrangle, is perhaps the most interesting. The map portrays an area of about 1000 square miles, in which the highest point, Mount Goddard, rises 13,555 feet above sea level. Scores, or even hundreds, of other majestic peaks in this region tower to heights of 10,000, 11,000, 12,000 and 13,000 feet, and the intervening valleys and meadows are dotted with thousands of lakes. Types of Appalachian mountain country are seen in the maps covering the area known as the Milledgeville quadrangle, in Georgia, where the mountains fade away into foothills, and the Hartwick quadrangle in New York, where the highest points stand at altitudes of 1800 and 2000 feet. The map last named is on the scale of 1 mile to the inch, with 20-foot contour intervals.

A map of still different type is that of the Miami Copper Belt, Arizona, on the large scale of more than 5 inches to 1 mile, but with a contour interval of 25 feet. This map covers the famous Miami copper camp and shows every detail of the topography as well as all the works of man. The Sacramento Valley map includes a portion of the low flats along the Feather River, a main tributary of the Sacramento River in Yuba County—an area known as the Gridley quadrangle. Copies of each of these maps and other atlas sheets of the Geological Survey can be purchased from the Director of the Survey at Washington, D. C., for 5 cents a copy, or \$3 a hundred if at least that number are purchased.

Plans describing news on special classes of buildings such as Banks, churches, schools, hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These since items are again repeated under "HOLD ALPHEUS" in the last part of our news department.

APARTMENT HOUSES.

San Francisco.—Apartment house, 3 story and base, brick and steel structure. Architects, J. E. Kraft and Sons, 1014 Eddy St., S. F. Owners, Condon & Co. The structure will be erected at the corner of Page and Franklin streets and has been designed for stores on the first floor and in the neighborhood of 150 rooms on the upper floors. The suites will be arranged in two, three and four room apartments with baths. There will be steam heat, elevator service, and all other modern conveniences. The exterior of the building will be faced with pressed brick. The plans are complete and the figures are being taken.

San Francisco.—Apartment house, 3 story and base, frame, \$15,000. Architects, A. J. Barnett, 585 California street, S. F. Owner's name withheld. The building will be designed to contain 12 apartments of 2 and 3 rooms each with baths. The interior will be finished in pine and redwood. The exterior of the building will be covered with brick veneer and shingles. The architect is preparing the plans.

San Francisco.—Apartment house, 3 story and base, brick and steel, \$10,000. Architects, Welch and Carey, Western Metropolitan Bank Bldg., S. F. Owner's name withheld. The building will be erected at the corner of California and Stockton streets and will cover a large area. There will be in the neighborhood of 150 rooms in the building arranged in suites of 2, 3 and 4 rooms each with connecting baths. There will be steam heat, elevator service, a vacuum cleaning plant, and wall beds. The interior will be handsomely finished. The exterior of the building will be faced with pressed brick. The architects are now preparing the working drawings.

Berkeley, Alameda Co., Cal.—Apartment house, 3 story and base, frame, \$12,000. Architect, C. N. Berrell, Central Bank Bldg., Oakland. Owner, George H. S. Haiv. The building will contain stores on the first floor and 12 rooms on the upper floors. The suites will be arranged in two and three room apartments with baths. The interior trim will be of redwood. There will be a central heating system. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Los Angeles, Cal.—Apartment house, 2 story and base, brick and steel, \$75,000 to \$80,000. Architect, A. B. Benton, 114 North Spring street, L. A. Owner, R. Vail. The building will be 50x100 feet, and will contain 100 rooms arranged in suites of from 2 to 4 rooms each with baths. There will be steam heat, elevators and wall beds. The exterior of the building will be faced with pressed brick. The architect is preparing the working drawings.

Los Angeles, Cal.—Apartment house, 3 story and base, frame, cost not stated. Architects, Noonan and Kiser, Wright and Collier, 1442 1/2, L. A. Owner, Mrs. Lillie M. Whiteside. The building will contain 29 rooms arranged

in two, three and four room apartments. There will be wall beds, steam heat, elevator service and all other modern conveniences. The exterior of the building will be covered with pressed brick. The plans are complete and the figures are being taken.

Los Angeles, Cal.—Apartment house, 2 story and base, brick and steel, cost not stated. Architects, Chamberlain & Co., 1014 Eddy St., L. A. Owner, C. J. Chamberlain. The building will be 50x100 feet, and will contain 100 rooms arranged in suites of from 2 to 4 rooms each with baths. There will be steam heat, elevator service and all other modern conveniences. The exterior of the building will be faced with pressed brick. The plans are complete and the figures are being taken.

Los Angeles, Cal.—Apartment house, 2 story and base, brick and steel, cost not stated. Architects, Charles W. Rider, 211 South Figueroa street, L. A. Owner, Charles W. Rider. The building will contain 127 rooms arranged in two and three room suites with connecting baths. There will be steam heat, elevator service and all other modern conveniences. The exterior of the building will be faced with pressed brick. The plans are complete and the figures are being taken.

Los Angeles, Cal.—Apartment house, 2 story and base, brick and steel, cost not stated. Architects, Austin and Bond, 1014 Eddy St., L. A. Owner, James M. Patton. The building will be 50x100 feet, and will contain 100 rooms arranged in suites of from 2 to 4 rooms each with baths. There will be steam heat, elevator service and all other modern conveniences. The exterior of the building will be faced with pressed brick. The architect is preparing the working drawings.

San Jose, Santa Clara Co., Cal.—Apartment house, 2 story and base, reinforced concrete, \$25,000. Architect, William Bender, Box 1302, San Jose. Owner, John Twedy. This work is mentioned here before. The plans are now complete and the figures are being taken. The building will be 50x100 feet, and will contain 100 rooms arranged in suites of from 2 to 4 rooms each with baths. There will be steam heat, elevator service and all other modern conveniences. The exterior of the building will be faced with pressed brick. The architect is preparing the working drawings.

Los Angeles, Cal.—Apartment house, 2 story and base, brick and steel, cost not stated. Architects, A. B. Benton, 114 North Spring street, L. A. Owner, R. Vail. The building will be 50x100 feet, and will contain 100 rooms arranged in suites of from 2 to 4 rooms each with baths. There will be steam heat, elevator service and all other modern conveniences. The exterior of the building will be faced with pressed brick. The architect is preparing the working drawings.

Los Angeles, Cal.—Apartment house, 2 story and base, frame, cost not stated. Architects, Benton and Son, Wilson Bldg., L. A. Owner, R. Vail. The building will be 50x100 feet, and will contain 100 rooms arranged in suites of from 2 to 4 rooms each with baths. There will be steam heat, elevator service and all other modern conveniences. The exterior of the building will be faced with pressed brick. The architect is preparing the working drawings.

in two, three and four room apartments. There will be wall beds, steam heat, elevator service and all other modern conveniences. The exterior of the building will be covered with pressed brick. The plans are complete and the figures are being taken.

Los Angeles, Cal.—Apartment house, 2 story and base, brick, cost not stated. Architects, Kronig and Baker, 1014 Eddy St., L. A. Owner, John Dietrich. The building will be 50x100 feet, and will contain 100 rooms arranged in suites of from 2 to 4 rooms each with baths. There will be steam heat, elevator service and all other modern conveniences. The exterior of the building will be faced with pressed brick. The plans are complete and the figures are being taken.

Portland, Ore.—Apartment house, 1 story and base, brick and steel, cost not stated. Architects, Clauson and Clauson, Portland. Owners names withheld. The building will be 50x100 feet. There will be 5 suites of 3 and 4 rooms each on the several floors. All apartments will have connecting baths. There will be unsupervising beds, steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. The plans will be complete and ready to figures by May 6th.

Contracts Awarded.

Portland, Ore.—Apartment house, 3 story and base, brick, \$20,000. Architects, MacNaughton and Raymond, Portland. Owners, Chambers and Widener Contractors. The Alvan Construction Co., Portland. Contract price, \$21,000.

Fresno, Fresno Co., Cal.—Apartment house, 2 story and base, brick, \$23,000. Architects, A. C. Schwartz and Son, Fresno. Owners, Kodin and Kamp. Contractor, Peter Anderson, Fresno. Contract price, \$24,000.

Los Angeles, Cal.—Apartment house, 2 story and base, brick, cost not stated. Architects, Allen Finch, 211 Aliso street, L. A. Owners, Allen Finch and M. L. Vogel. Contractors, United Contracting Co., L. A. Contract price not stated.

BRIDGES DAMS AND HARBOR WORK.

San Luis Obispo, San Luis Obispo Co., Cal.—Bridges, 3 steel spans, \$15,000. Engineer, Emily Surveyor, San Luis Obispo. Owners, San Luis Obispo County. Plans for three new bridges are complete and the bids will be opened on May 9th by the Board of Supervisors.

One of the bridges will contain four 102 foot spans, another, two 124 foot spans, and the third one, 120 span. The complete cost is estimated at \$15,000.

San Francisco.—Harbor work, 2 piers, reinforced concrete, \$1,000,000. Engineer, Asst. State Engineer Saph, Ferry Bldg., S. F. Owners, State of California. Bids were opened for the construction of piers 20 and 22. The general contractor has been awarded to Robert Winkler, having to do of Portland for \$755,000. The paving to do of Portland Street Paving Co. for \$2,007,20. Bids for the steel rolling doors have been taken under advisement and will be awarded next week. For a complete list of the bids opened see under San Francisco.

San Francisco.—Dry Dock, reinforced concrete and steel, \$1,000,000. Engineers, Union Iron Works, S. F. Owners,

Union Iron Works. Representatives of the eastern companies affiliated with the Union Iron Works have been on the coast for several days and information has been given out which states that work will be undertaken at once which will terminate in the construction of one of the largest dry docks in the world. Besides the dry dock extensive improvements are to be made to the plant of the Union Iron Works. The plan of the company is to make the Union Iron Works the largest and best equipped plant on the Pacific Coast. The big dry dock is to be erected at Hunter's Point. More complete details of the work will be given as the plans progress.

San Diego, Cal.—Pier, reinforced concrete, \$1,000,000. City Engineer, E. M. Capps, San Diego, Owners, City of San Diego. Plans for the construction of a 1,000 foot pier at the foot of D street have been approved and bids will be called for at once. There will be freight sheds and modern cargo handling machinery installed. For full information address the City Engineer.

Seattle, Wash.—Bridge, steel and concrete, bascule type, \$100,000. Engineer, A. R. Clark, care of the Northern Pacific Co., Seattle. Owners, Northern Pacific Co. This bridge, which has been mentioned here before, will be erected over the Lake Washington Canal. The plans will be ready for figures within a day or two.

Contracts Awarded.

Riverside, Wash.—Bridge, steel construction, \$1,000. Engineers, Bowerman and McVey, Central Bldg., Seattle. Owners, State of Washington. Contractors Gerrick and Gerrick Co., Central Bldg., Seattle. Contract price, \$1,000.

CHURCHES.

Walla Walla, Wash.—Church, 2 story and base, brick and stone, \$50,000. Architects, Pontellier and Hummel, Boise, Idaho. Owners, First Methodist Church of Walla Walla. The building will cover a considerable ground area and will consist of a main auditorium, Sunday school rooms, study and social rooms. There will be a central heating system. The interior will be finished in pine. The exterior of the building will be faced with stone and pressed brick. The plans are complete and figures will be taken at once.

FACTORIES & WAREHOUSES.

San Francisco—Laundry plant, 2 story and base, mill constructed, \$30,000. Architects, J. E. Kraft and Sons, Phelan Bldg., S. F. Owners, La Grande Laundry. The building will be in the middle of an addition to the present plant. The plans are complete and the architects are taking figures on the work.

Los Angeles, Cal.—Warehouses, 3 story and base, brick. Cost not stated. Architects, Haley and Putnam, Higgins Bldg., L. A. Owners, Heinz Truck Co. The architects have completed the plans and specifications for this building, which has been mentioned in these columns before. Figures are now being taken for the brick work, plumbing, electric work, and elevators. The carpentry work will be done by Day Labor.

Los Angeles, Cal.—Warehouse, 2 story and base, brick and steel. Cost not

stated. Architects, Train and Wohlman, Exchange Bldg., L. A. Owners, California National Supply Co. The building will be 60x200 feet. There will be a considerable amount of structural steel work. The floors will be of concrete. The plans are complete and figures are now being taken.

Portland, Ore.—Warehouse and stables, 4 story and base, reinforced concrete. Cost not stated. Architect, C. A. Duke, Portland. Owner, E. E. Radlins. The building will cover a ground area of 50x100 feet. The upper floors have been designed for a modern warehouse. The basement will be divided into stalls and will accommodate 120 head of horses. The plans have been out for figures and a contract will be awarded at once.

Contracts Awarded.

San Diego, Cal.—Warehouse, 6 story and base, reinforced concrete, \$100,000. Architects, Eckstein and Lyman, Timken Bldg., San Diego. Owner, Mrs. A. S. Radlins. Contractor, William Sampson Construction Co., San Diego. Contract price \$100,000. Note. This contract is drawn only for the general construction.

FLATS.

San Francisco—Flats, 3 story and base, frame. Cost not stated. Architects, Welsh and Carey, Western Metropolitan Bank Bldg., S. F. Owner, P. Reilly. The building has been designed to contain three modern flats of five and six rooms each with baths. The interiors will be handsomely finished in pine and redwood. There will be some hardwood floors. There will be open fire places and brick mantels. The exterior of the building will be covered with shiplap and rustic. The plans are being prepared.

San Francisco—Flats, 3 story and base, frame, \$8,000. Architect, E. H. Hilderbrand, Crocker Bldg., S. F. Owner, E. H. Hilderbrand. The building will contain three modern flats of five and six rooms each with baths. There will be pine and redwood interior finish with some hardwood floors. A garage will be built in the basement. There will be open fire places. The exterior of the building will be covered with brick veneer and shiplap. The plans are being prepared.

San Francisco—Flats, 3 story and base, frame, \$8,000. Architect, A. J. Barnett, 585 California street, S. F. Owner's name withheld. The building will contain three flats of five and six rooms each with baths. The interior will be finished in pine and redwood with some hardwood floors. There will be open fire places and tile or brick mantels. The exterior will be finished with shiplap or cement plaster on metal lath. The architect is preparing the plans.

San Francisco—Flats and stores, 3 story and base, frame, \$6,000. Architect, Theo. W. Lenzen, Humboldt Bank Bldg., S. F. Owner's name withheld. The building has been designed with a store on the first floor and two five-room flats on the upper floors. The interior trim will be of pine and redwood. The exterior of the building will be covered with rustic and shiplap. The architect is taking figures on the work.

San Francisco—Flats, 3 story and base, frame \$2,000. Architect, David Sathoff, Christie Bldg., S. F. Owner,

Paul Barbieri. The work, which has been mentioned here before, will consist of the alteration to the present building. Several stores will be built into the lower floor and the interior arrangement of the upper floors will be changed. The plans are complete and figures are being taken.

GARAGES.

Los Angeles, Cal.—Garage, 1 story and base, brick. Cost not stated. Architect, Frank M. Tyler, Hibernian Bldg., L. A. Owner, W. J. Newton. The building will be 34x70 feet. There will be a concrete floor. The exterior of the building will be faced with pressed brick. The plans are complete and the work will be done by Day Labor.

Los Angeles, Cal.—Garage, 2 story and base, brick and steel. Cost not stated. Architect, J. B. Nicholson, Wright and Callender Bldg., L. A. Owners, William Pollock. The building will be 48x120 feet and will have walls of sufficient strength to support an additional story. There will be a concrete floor. The exterior of this building will be faced with pressed brick. The plans are complete and have been placed in the hands of the owner who will do the work by Day Labor.

Portland, Ore.—Garage, 1 story and base, brick and steel, \$12,500. Architects, Hardin and Richmond, Couch Bldg., Portland. Owners, Hardin and Richmond. The building will cover a site 100x100 feet. There will be a steel truss roof. The floor will be of concrete. The main floor will contain sales rooms, office and machine shop besides a large storage space. There will be a 10 foot basement which will contain a wash room and more storage space. The exterior of the building will be faced with pressed brick. The plans will be complete by May 1st and the work will be done by Day Labor.

GOVERNMENT WORK AND SUPPLIES.

Presidio of San Francisco—Brick addition, electric work and construction of rostrum. Cost not stated. Architect, Constructing, G. M. Dept., U. S. Fort Mason. Owners, U. S. Government. The plans are being prepared for the construction of a brick addition to the present pumping plant, for changing over of the feeder system of the general hospital and for the construction of a rostrum in the National Cemetery. Complete details of the work will be given as the plans progress. The first two mentioned pieces of work will be undertaken very shortly.

The following awards have been made to date in connection with recent opening for furnishing miscellaneous material for buildings at Schofield Barracks, Honolulu, all to the Berger Mfg. Co. of Canton, Ohio, delivery to be made F. O. B. Canton: Pressed steel for studs, floor joists, bridging, ties and rafters for five officers' quarters, \$4,857.30, and for ten double sets of officers' quarters, \$13,-

864, 60, steel frames for six field officers' quarters, \$918 each and for 23 double steel company officers' quarters, \$1,212.16 each; for structural material for two-story porches for six buildings, \$57 each, and for the 23 buildings, \$78 each. Other awards will be noted as action is taken.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for the construction of an administration building at the U. S. naval station, Pearl Harbor, H. T.

Item 1, administration building, complete, in accordance with plans and specifications; 2, add to the price under item 1 for an addition of one 15-foot bay on the east end of the building; 3, deduct from item, if an alternative type of reinforced concrete floor construction is adopted with suspended ceilings plastered on metal lath; Item 4, amount to be added or deducted from each cubic yard of concrete in foundations added or deducted at the direction of the officer in charge to adapt the foundation to actual conditions as determined.

Fort Young Engineering Co., Campbell Bldg., Honolulu, H. T., item 1, \$24,700, 2, \$1,000, 3, \$1,500, 4, \$12 per cubic yard.

W. N. Connaman Co., Monalinee Bldg., San Francisco, Cal., item 1, \$24,752; 2, \$2,500; \$12 per cubic yard.

The time for opening bids for constructing garbage crematories at the navy yards Puget Sound, Wash., Norfolk, Va., and the Naval Training Station, San Francisco, Cal., has been extended by the chief of the bureau of yards and docks, Navy Department, Washington, from April 13, 1912, to May 11, 1912. The official call for bids appears elsewhere in this issue.

Motors and Transformers — Boise project, Idaho, bids opened by the U. S. reclamation service, Los Angeles, Cal.:

Allis-Chalmers Co., items 1 to 3, \$2,575; 4, \$320; total, \$3,825.

Crocker-Wheeler Co., items 1 to 3, \$3,842; 4, \$268; total, \$4,110.

General Electric Co., items 1 to 3, \$4,200; 4, \$254; total, \$4,454.

Westinghouse Electric and Mfg. Co., items 1 to 3, \$5,000, 4, \$282; total, \$5,282.

Wagner Electric Mfg. Co., items 1 to 3, \$5,065; 4, \$268; total, \$5,333.

HALLS & SOCIETY BLDGS.

San Francisco—Armory, 4 story and base steel and reinforced concrete, \$500,000. Architect, State Engineering Dept., Sacramento. Owners, State of California. This work has been mentioned here a number of times before. The plans for the excavating, grading, and foundation work have been completed and are now on file at this office. Plans for the balance of the work will be completed at an early date and figures will be called for then.

Spokane, Wash.—City Hall, 8 story and base, Class A construction \$300,000. Architect, Julius Zittel, Spokane. Owners, City of Spokane. The building has been mentioned in these columns a number of times before. The working drawings have been completed by the architect and placed in the hands of the Builders' Exchange at Spokane for bids. Bids for the general construction will be opened the latter part of May.

Whittier, Los Angeles, Cal.—Hotel, 4 story and base, brick. Cost not stated. Architects, Hansen and Son, Whittier. Plans by A. O'Connor, 311 B'way. The building will be 125x200 feet. The first floor will contain several stores. The upper floor will be arranged for a large room for the Whittier Club. The exterior of the building will be faced with pressed brick. The plans are nearly complete.

HOTELS.

San Francisco—Hotel, 7 story and base, Class A construction. Cost not stated. Architects, MacDonald and Applegate, 1111 Hyde. S. F. Owner, Charles Holbrook. The building has been mentioned here a few times when the architect was first selected to prepare the plans. The contract for the excavating has been awarded and bids for the general construction are being taken. There will be several stores on the first floor and in the neighborhood of 200 rooms above. The mechanical equipment will be modern in every particular.

Los Angeles, Cal.—Hotel, 4 story and base, brick. Cost not stated. Architects, Nohr and Skilling, Room 1100, Electric Bldg., L. A. Owner, Thomas Lee and Otto H. Nohr. The building will contain stores and the hotel lobby on the first floor and in the neighborhood of 100 guest rooms on the upper floors. There will be steam heat. The exterior of the building will be faced with pressed brick. Separate bids are now being taken on all parts of the work.

Los Angeles, Cal.—Hotel and stores, 4 story and base, brick and steel. Cost not stated. Architects, Nohr and Skilling, Pacific Electric Bldg., L. A. Owner, Washington Sullivan. The building will be 120x142 feet. The ground floor will be arranged for seven stores. There will be 123 rooms on the upper floor besides a large number of baths. There will be steam heat and elevators service. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Los Angeles, Cal.—Hotel and stores, 4 story and base, brick, \$25,000. Architect, A. Reiff, Higgins Bldg. L. A. Owners, John O'Connell and Ben Wenzel. The building will be 50x250 feet. The first floor will contain stores and the hotel lobby. The upper floor floors will be divided into 232 rooms and a number of baths. There will be steam heat, elevator service and running water in all rooms. The exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

Portland, Ore.—Hotel, 4 story and base, brick. Cost not stated. Architect, A. C. Exalt, Portland. Owner, George A. Housman. The building will cover a site 70x100 feet. There will be in the neighborhood of 85 rooms on the upper floors and lobby on the first floor and a full basement. There will be steam heat and elevator service. Running water will be provided for all rooms. The exterior of the building will be faced with pressed brick. The plans will shortly be completed and the work will be done by Day Labor.

Contract Awarded.

Portland, Ore.—Hotel, 4 story and base, brick, \$50,000. Architects, Emil Schacht and Son, Portland. Owners,

E. and L. M. S. O. Contractors, Boone Bros., Portland. Carpentry work, F. Seck, brick work and plumbing to Jacobson and De Tomp.

Los Angeles, Cal.—Hotel, 3 story and base, brick, \$200,000. Architect, P. T. Harris, Redlands. Owner, Joseph Baker. Contractors, The King Co., Hotel Bldg., L. A. and J. C. Best, Long Beach. Contract price, \$200,000.

POST OFFICES.

Riverside, Riverside Co., Cal.—Post office, 4 story and base, Class A construction, \$75,000. Architect, James Knox Taylor, Washington, D. C. Owners, U. S. Government. Contractors, Southwestern Construction Co., Central Bldg., L. A. Contract price, \$84,214 for lime stone trim and \$27,911 for granite trim.

RAILROAD CONSTRUCTION—STATIONS AND EQUIPMENT.

San Francisco—Sub station equipment. Cost not stated. Engineer, City Engineer, Marsden Manson, 1101 David Bowry Bldg., S. F. Owners, City and County of San Francisco. Plans for the substation equipment on the Geary Street Municipal road have been completed and placed in the hands of the Board of Public Works for figures. The work will include a large amount of electric machinery. Bids will be opened on May 1st.

RESIDENCES.

San Francisco—Residence, 4 story and base, frame, \$3,000. Architect none. Owner, E. Guley, 131 Fifth avenue, S. F. The dwelling has been designed for a 7-room house with bath. The interior will be finished in redwood and pine. There will be some hardwood floors. There will be open fire places and brick mantels. The exterior of the house will be covered with brick veneer. The plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Residences, two 2-story, 40 ft and base, frame, \$3,500 each. Architect none. Owner, John Turner, 75 11th avenue, S. F. Each of the dwellings will contain 7 rooms and bath. The interior finish will be of pine with some oak floors. There will be open fire places and furnace heat. The mantels will be of brick. The exterior if the houses will be covered with brick veneer and rustle. The plans are complete and work will be done by Day Labor.

San Francisco—Bungalow, 1 story and base, frame, \$7,000. Architect, E. A. Neunmark, 412 Battery Street, S. F. Owner, Charles F. Thierbach. The bungalow has been designed for an 8-room house with baths. The interior finish will be of pine and redwood with oak paneling. The floors in the principal rooms will be of hardwood. There will be furnace heat and open fire places. The mantels will be of brick. The tile will be used in the bath and kitchen. The exterior of the bungalow will be covered with cement plaster on metal lath and with brick veneer. The plans are complete and figures are being taken.

Rockley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$2,000.

Architect none. Owners, Pierce Bros., 138 Alcatraz avenue, Berkeley. The dwelling will contain five rooms and bath. The interior finish will be of pine and redwood. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story, attic, base, frame, \$25,000. Architect, John Galen Howard, Atlas Bldg., S. F. Owner Eugene Hallett. This work has been mentioned here before when the plans were first being prepared. The architect has now completed the working drawings and figures are being taken. The dwelling will contain in the neighborhood of 11 rooms and bath. The interior finish will be largely of hardwoods and white enamel. The floors throughout will be of oak. There will be furnace heat and open fireplaces. The mantels will be of brick. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath.

Oakland, Cal.—Residences, Two, 2-story and base, frame, \$2,000 each. Architect, A. J. Mazurette, 1522 Broadway, Oakland. Owner, L. C. Hinkel. Each of the dwellings will contain 7 rooms and bath. The interior finish will be of pine and redwood. There will be open fire places and tile mantels. Each of the dwellings will be piped for furnace heat. The exteriors will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Oakland, Cal.—Residence, 2 story and base, reinforced concrete, \$7,000. Architect, E. W. Hartman, 1461 Alice street, Oakland. Owner, E. W. Hartman. The dwelling has been designed for an 8 room house with bath. The interior will be finished in pine and hardwoods. There will be furnace heat and open fire places. The mantels will be of tile or brick. The exterior of the dwelling will be faced with cement plaster. The roof will be of tile. There will be two water beds. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Residence, 2-story and base, frame, \$25,000. Architect none. Owner, Fred Hall, 2313 College avenue, Berkeley. The dwellings will each contain 6 rooms and bath. The interior trim will be of pine and redwood. There will be open fire places with tile or brick mantels. The exteriors will be covered with cement plaster. The plans are complete and the work is being done by Day Labor.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, A. J. Mazurette, 1522 Broadway, Oakland. Owner, L. C. Hinkel. The dwelling will contain 5 rooms and bath. The interior trim will be of pine and redwood. There will be open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Stockton, San Joaquin Co., Cal.—Bungalow, 1 story and base, frame, \$3,000. Architect, A. L. Phillips, Hotel Stockton, Stockton. Owner, P. T. Dermody. The bungalow has been designed for an eight-room house with bath. The interior trim will be of pine and redwood.

The floors of the principal rooms will be finished in hardwood. There will be open fire places and brick or tile mantels. The exterior of the building will be finished in rustic. The plans are complete and figures are being taken. Note. The architect would like to receive data on patent chimneys.

Eureka, Humboldt Co., Cal.—Residence, Warren Skillings, Garden City Bank Bldg., San Jose. Owner, E. A. Leach, Eureka. The dwelling will contain 5 rooms and bath. The interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Woodside, San Mateo Co., Cal.—Bungalow, 1 story and base, frame, \$9,000. Architects, Mitchell & Hodges, Monadnock Bldg., S. F. Owner's name withheld. The bungalow will contain a large number of rooms with several baths. The interior will be handsomely finished in pine, redwood and hardwoods with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. There will be considerable tile used in the baths and kitchen. The exterior of the bungalow will be covered with rustic and shingles. The architects are preparing the plans.

San Francisco—Residence, 2 story and base, frame, \$9,000. Architects, Righetti & Headman, Philan Bldg., S. F. Owner, T. J. Crowley. The dwelling has been mentioned here before when the architects first started the plans. Bids on the work are now being taken. The dwelling will contain a large number of rooms and is to be erected in one of the most fashionable districts of the city. The exterior will be covered with cement plaster on metal lath. There will be furnace heat and open fire places. The interior will be trimmed with pine and hardwoods.

Oakland, Cal.—Bungalows, 4, 1 story and base, frame, \$2,000 each. Architect, Sidney E. Newsome, Nevada Bank Bldg., S. F. Owner, J. C. McMillin. Each of the bungalows will contain five rooms and a finished room in the attic. The interior finish will be of pine and redwood. There will be open fire places and tile mantels. The exteriors of the dwellings will be covered with shingles. The plans for this work are being prepared. The owner contemplates still further improvement to his property as soon as these buildings are erected.

SCHOOLS

Colorado Indian School, Arizona.—School and sewerage system, frame construction. Cost not stated. Architect, Dept. of Indian Affairs, Washington, D. C. Owners, U. S. Government. Plans and specifications are on file at the office of the Indian Agent at 312, 8th street, S. F. for the construction of two frame buildings and a sewer system at the above named school. Bids for the work will be opened on May 11th.

Tobatchi, New Mexico.—School and water and sewer system. Cost not stated. Architect, Department of Indian Affairs, Washington, D. C. Owners, U. S. Government. Plans and specifications are on file at the office of

Indian Agent at 312 8th street, S. F. for the construction of a one story frame school building and for a water and sewer system at the Tobatchi Indian School. Bids will be opened on May 18th.

Pasadena, Los Angeles Co., Cal.—College building, 2 story and base, reinforced concrete, \$50,000. Architect, Frederick L. Roehrig, American Bank Bldg., L. A. Owners, Throop Institute. The details of the building can not be learned at this time. The architect is at work on the preliminary studies, and it will be some time before bids are called for. The President, James A. B. Scherer states that construction will be undertaken this summer.

Eagle Rock Valley, Los Angeles Co., Cal.—College buildings, 2, 3 story and base, reinforced concrete. Cost not stated. Architect, Myron Hunt, Hibernian Bldg., L. A. Owners, Occidental College. Both of the buildings will be of a similar design and will each cover an area of 14x80 feet. There will be fire proof storage vaults, cement floors and oak interior finish. The exteriors will be faced with cement plaster. Plans will be complete and ready for figures this week.

SEWERS, STREET WORK AND WATER SYSTEMS

Fresno, Fresno Co., Cal.—Sewer work cost not stated. City Engineer, Jensen Fresno. Owners, City of Fresno. The engineer is now preparing plans for the construction of considerable six-inch sewers in some of the main streets and for a number more four-inch sewers in the alleys. Bids will be called for shortly. All of the work will be vitrified pipe.

Brawley, Imperial Co., Cal.—Sewer repairs etc. Cost not stated. City Engineer, Brawley. Owners, City of Brawley. Bids will be opened on May 6th for the repairs to the Brawley sewer system. The work will include considerable new 14 inch pipe and about 400 feet of main sewer. Plans can be secured from the City Clerk.

Spokane, Wash.—Intercepting sewer construction, \$215,000. City Engineer MacCartney, Spokane. Owners, City of Spokane. The City Engineer has completed the plans for the main intercepting sewer in the downtown district and the plans have been approved by the City Council. The work will soon be advertised for bids.

STORES & OFFICE BUILDINGS.

Seattle, Wash.—Stores and lofts, 2 or 3-story and base, brick, \$20,000. Architect, Max Umbrecht, Globe Bldg., Seattle. Owner, Isaac Cooper. The building will be 6x108 feet. The first floor will contain several stores. The owner has not fully decided on the height of the building and plans are being prepared for both a two and three story structure. The upper floors will be arranged for lofts. The exterior will be faced with pressed brick. When the plans are complete the work will be done by Day Labor.

San Francisco.—Stores and lofts, 2 story and base, brick and steel, \$50,000. Architects, Havens and Toepke, 46 Kearney street, S. F. Owner, A. W. Schoole. The building will be 75x130 feet and will be erected on a corner. The first floor will be arranged for several stores. The upper floor will con-

tain a large loft. There will be elevator service. The exterior of the structure will be faced with pressed brick. The plans are complete and the architects are taking figures.

San Francisco.—Stores and lofts, 5 story and base, reinforced concrete, \$50,000. Architect, P. A. Meunier, 1010 Humboldt Bank Bldg., S. E. Owner, Fred Hess. This work was mentioned here when the architect was first commissioned to prepare the plans. The interior will be arranged for publishing offices, composing rooms and press-rooms. There will be elevator service and steam heat. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Contracts Awarded.

Seattle, Wash.—Stores and lofts, 6 story and base, reinforced concrete, \$300,000. Architect, John Graham, Lyon Bldg., Seattle. Owner, Joshua Green. Contractors, Sound Construction Co., Globe Bldg., Seattle. Contract price \$300,000.

Fresno, Fresno Co., Cal.—2 story and base, brick, \$35,000. Architect's name not given. Owner, Milo Rowell. Contractor, H. A. Hansen, Fresno. Contract price \$35,000.

THEATRES.

Oakland, Cal.—Theatre and offices height not stated, Class A construction, \$200,000. Architect, E. W. Hartman, 1641 Alice street, Oakland. Owner's name withheld for the present. The building will be located near Broadway street with an entrance on that thoroughfare and will cover a ground area of over 100 feet square. The construction throughout will be fire proof, the only wood entering into the construction being the stage floor. The theatre will have a seating capacity of 2800 people. There will be steam heat and a modern system of ventilation. The exterior facing has not been fully decided upon. Mr. Hartman will probably construct the building for the owners on the percentage basis.

Portland, Ore.—Theatre and store, 2 story and base, reinforced concrete. Cost not stated. Architect, C. A. Duke, Portland. Owner, Mrs. Dogel. The building will be 100x116 feet, the theatre occupying a space on the first floor of 70x80 feet. The seating capacity will be 700. There will be several stores besides the theatre on the ground floor. The upper floor will contain 12 modern offices. There will be a hot water heating system. The exterior of the building will be faced with cement plaster. The plans have been out for figures and a contract will be let at once.

SEALED PROPOSALS.

PROPOSALS FOR PIG LEAD.

(bids close May 1)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 1st day of May, 1912, for furnishing and delivering the following material:

A quantity of pig lead, estimate at two hundred (200) tons for the Auxiliary Water Supply System for Fire Protection.

PROPOSALS FOR ELECTRIC MACHINERY.

(bids close May 1)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 1st day of May, 1912, for doing the following work, to wit:

The furnishing and installing of Sub-station equipment for the Geary Street Municipal Railway.

CANAL SUPPLIES.

(bids close May 20)

CANAL CIRCULAR 705.—Proposals for Transformer-Room Equipment for all Panama Canal Locks.—Sealed proposals will be received at the office of the general purchasing officer, Bathman Canal Commission, Washington, D. C., until 10:30 a. m., May 20, 1912, at which time they will be opened in public for furnishing the above-mentioned articles. Blanks and general information relating to this circular (No. 705) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; E. C. BOGGS, major, corps engineers, U. S. A., general purchasing officer.

PROPOSALS FOR CREMATORIES.

(bids close May 1)

GARBAGE CREMATORIES.—Sealed proposals, indorsed "Proposals for Garbage Crematories," will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m., May 11, 1912, and then and there publicly opened for garbage crematories at the navy yards, Puget Sound, Wash., and Norfolk, Va., and the naval training station, San Francisco, Cal. Plans and specifications can be obtained on application to the bureau or to the commandants of the navy yards or station named. W. M. SMITH, acting chief of the bureau.

PROPOSALS FOR STREET WORK.

(bids close May 1)

OFFICE of the BOARD of PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 1st day of May, 1912, for doing the following street work, including the furnishing of the necessary labor and material therefor, to wit:

1. That artificial stone sidewalks of the full official width be constructed on Twenty-second street, between Hampshire street and Potrero avenue, where artificial stone sidewalks of the full official width are not already constructed.

2. That artificial stone sidewalks of the full official width be constructed on Church street, between Twenty-sixth and Twenty-seventh streets, where artificial stone sidewalks at least twelve (12) feet in width are not already constructed.

3. That artificial stone sidewalks of the full official width be constructed on Golden Gate avenue, between Willard street and Arguino boulevard, where artificial stone sidewalks at least six

(6) feet in width are not already constructed.

4. That a 21-inch, vitrified, salt-glazed, iron-stone pipe sewer with 14 Y branches, be constructed along the center line of Anza street, between Twenty-fifth and Twenty-sixth avenues.

5. That artificial stone sidewalks of the full official width be constructed on Clement street, between Twenty-fifth and Twenty-sixth avenues, where artificial stone sidewalks at least nine (9) feet in width are not already constructed.

6. That the intersection of Chattanooga street and Twenty-first street be improved by constructing granite curbs and artificial stone sidewalks on the angular corners thereof by paving the roadway thereof with a bituminous rock pavement, consisting of a 6-inch concrete foundation and a 2-inch bituminous rock wearing surface, and by constructing a brick cesspool (catch-basin) with cast-iron frame grating and trap and 10-inch, vitrified, salt-glazed, iron-stone pipe culvert on the southwesterly angular corner thereof.

7. That the crossing of Greenwich St and Devisadero St, be improved by constructing granite curbs and artificial stone sidewalks on the angular corners thereof not already constructed, by paving the roadway thereof with a bituminous rock pavement, consisting of a 6-inch concrete foundation and a 2½-inch bituminous rock wearing surface by constructing one brick cesspool (catch-basin) with cast-iron frame, grating and trap and 10-inch vitrified, salt-glazed, iron-stone pipe culvert on the southeasterly angular corner, and by resetting to official line and grade the existing granite curbs that are not at official line and grade.

8. That the southerly one-half of the crossing of Hampshire and Sixteenth streets, except on that portion thereof required by law to be kept in repair by the railroad company having tracks thereon, be improved by constructing granite curbs, artificial stone sidewalks and brick cesspools (catch-basins) with cast-iron frames, gratings and traps on the angular corners thereof and by paving the roadway thereof with a bituminous rock pavement, consisting of a 6-inch concrete foundation and a 2½-inch bituminous rock wearing surface.

9. That Twenty-fifth avenue, between Clement street and California street, be improved by the construction of granite curbs, where not already constructed, and by paving the roadway thereof with an asphalt pavement, consisting of a six (6) inch concrete foundation and a two (2) inch asphaltic wearing surface, where not already constructed.

10. That an 18-inch, vitrified, salt-glazed, iron-stone pipe sewer with 14 Y branches and one brick manhole with cast-iron frame and cover and galvanized wrought iron steps be constructed along the center line of Fourteenth avenue, between Geary street and Anza street.

11. That the intersection of Lincoln Way and Twenty-first avenue be improved by constructing granite curbs, artificial stone sidewalks and brick cesspools (catch-basins) with cast-iron frames, gratings and traps and ten (10) inch, vitrified, salt-glazed, iron-stone pipe culverts on the angular corners thereof, and by paving the roadway thereof, except on that portion thereof required by law to be kept in repair by

the railroad company having tracks thereon with a bituminous rock pavement, consisting of a six (6) inch concrete foundation and a two (2) inch bituminous rock wearing surface.

12. That the crossing of Forty-first avenue and living street be improved by constructing redwood curbs and broken rock sidewalks on the angular corners thereof, and by paving the roadway thereof with a broken rock pavement.

13. That the northerly one-half of Fulton street from the easterly line of Forty-fourth avenue to the westerly line of Forty-fifth avenue be improved by constructing redwood curbs where not already constructed, and by constructing a broken rock pavement on the roadway and sidewalks thereof where not already constructed, except on that portion thereof required by law to be kept in repair by the railroad company having tracks thereon.

Said work must be done in accordance with the plans and specifications thereon on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) days and completed within ninety (90) days from the date of the contract to be made and entered into therefor.

Note—Sealed bids are to be submitted on each of the foregoing propositions.

CONSTRUCTING BUILDING.

(Bids close May 14.)

PROPOSALS FOR STONE SCHOOL HOUSE.—Department of the Interior, Office of Indian Affairs, Washington, D. C.—Sealed proposals, plainly marked on the outside of the sealed envelope: "Proposals for Stone School House, Western Navajo Indian School, Arizona," and addressed to the Commissioner of Indian Affairs, Washington, D. C., will be received at the Indian Office until 2 o'clock p. m., May 14, 1912, for furnishing materials and labor for the erection of a stone school house at Western Navajo Indian School, Arizona, in strict accordance with plans, specifications and instructions to bid, which may be examined at this office, the offices of the Supervisor of Construction, Denver, Colo., the United States Indian warehouse, San Francisco, Cal. For further information apply to the Superintendent of the Western Navajo Indian School, Tuba, Arizona, F. H. ABBOTT, Acting Commissioner.

CONSTRUCTING BUILDING AND SEWERS.

(Bids close May 18.)

(Bids close May 17.)

SEALED proposals will be received at office of Superintendent of Post Fund, Pacific Branch, N. H. D. V. S. Soldiers' Home, Los Angeles County, Cal., until 12 o'clock m., May 17, 1912, for furnishing and erection of a Granite Monument in Cemetery, and then opened, in accordance with instructions and specifications, copies of which, with blank proposals and other information, may be had upon application to T. A. McLAUGHLIN, Superintendent Post Fund.

PROPOSALS FOR CONSTRUCTING PIERS.

(Bids close May 27.)

NOTICE is hereby given that sealed proposals will be received up to and including the 27th day of May 1912, by the City Council of the City of San Diego, California, for the construction of a reinforced concrete pier at the foot of D street in San Diego, in accordance with plans and specifications prepared for the same by City Engineer E. M. Capps. Bids to be received first, for all the work of pier construction including freight sheds and approaches up to Beech street; second, for approaches from Beech to Date street. The pier will be 300 feet long and 120 feet wide, and bonds in the sum of \$100,000 have been voted for its construction.

CONSTRUCTING BUILDING.

(Bids close May 24.)

PROPOSALS FOR BUILDINGS WATER AND SEWER SYSTEMS.—Department of the Interior, Office of Indian Affairs, Washington, D. C.—Sealed proposals, plainly marked on the outside of the sealed envelope: "Proposals for Buildings Water and Sewer Systems, Colorado River Indian School, Arizona," and addressed to the Commissioner of Indian Affairs, Washington, D. C., will be received at the Indian Office until 2 o'clock p. m., May 24, 1912, for furnishing materials and labor for the erection of a frame office building and frame quarters and installation of water and sewer extensions, at the Colorado River Indian School, Arizona, in strict accordance with the plans, specifications and instructions to bid, which may be examined at this office, the offices of the Supervisor of Construction, Denver, Colo.; the United States Indian Warehouse, San Francisco, Cal., and at the school. For further information apply to the Superintendent of the Colorado River Indian School, Parker, Arizona, F. H. ABBOTT, Acting Commissioner.

discuss, Cal., and at the school. For further information apply to the Superintendent of the Colorado River Indian School, Parker, Arizona, F. H. ABBOTT, Acting Commissioner.

PROPOSALS FOR BUILDING.

(Bids close May 25.)

NOTICE is hereby given that the Visalia High School Board will receive sealed proposals to reconstruct and restore the High School building of the Visalia High School District and to construct a separate school building for school purposes. Said sealed proposals will be received up to 7:30 o'clock p. m. of the 25th day of May, 1912, by the undersigned Clerk of said High School Board, who has his office at the National Bank of Visalia, at Visalia, California. Each proposal must be accompanied by a certified check in a sum equal at least to five per cent of the amount of the proposal to do the work mentioned in proposition one of said proposal, made payable to the undersigned Clerk of said High School Board and as a guaranty that the bidder will execute the proper contract and bonds in case a contract is awarded to him by reason of his said proposal.

Plans and specifications for said proposed work may be seen at the office of Morse L. Weaver, Architect, Holt Building, Visalia, California, and copies thereof will be furnished to intending bidders upon depositing with said architect the sum of ten dollars as security for the return of same.

The said proposals must be prepared on, and strictly in accordance with, the form set forth in the specifications, copies of which form will be furnished by the said architect.

The said High School Board reserves the right to reject any or all proposals or any part or parts of any proposal or to accept any part or parts of any proposal and reject the balance thereof.

By order of said Visalia High School Board.

Dated April 24, 1912.

CHARS. T. FOGEL,
Clerk of Visalia High School Board.

CANADA.

New Branch of Canadian Pacific Railway.

Recent press publications here give the details of a contract made by the Canadian Pacific Railway with Deeks & Bindis, of 48 Scott street, Toronto, for the building of a branch leaving the present Toronto-Montreal line at Ashcroft and following it 20 miles west of Smiths Falls, a total distance of 188 miles. The value of the contract is said to be about \$10,000,000 and the work is to be completed in two years. A single track is to be laid, but the bed will be made wide enough to accommodate a double track when needed. The new line will follow the north shore of Lake Ontario, taking in nearly all the towns now served by the Grand Trunk and the recently inaugurated line of the Canadian Northern, which now runs from Toronto to Trenton and is to be extended to Ottawa. When the Toronto and Eastern Electric line, which is to operate over the same territory, these three roads will give this region exceptional transportation facilities.

Items dealing with certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find their place on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—7 story and base, brick and steel, \$100,000. San Francisco, Architects, J. E. Kraft & Sons, Phelps Bldg., S. F. Owners, Condon Estate. The structure will be erected at the corner of Page and Franklin streets, and has been designed for stores on the first floor and in the neighborhood of 150 rooms on the upper floors. The suites will be arranged in two, three and four room apartments with baths. There will be steam heat, elevator service, wall beds and all other modern conveniences. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Apartment House—3 story and base, frame, \$15,000. San Francisco, Architect, A. J. Barnett, 585 California St., S. F. Owner's name withheld. The building will be designed to contain 12 apartments of two and three rooms each with baths. The interior will be finished in pine and redwood. The exterior of the building will be covered with brick veneer and shiplap. The architect is preparing the plans.

Apartment House—7 story and base, brick and steel, \$100,000. Architects, Welsh & Carey, Western Metropolis Bank Bldg., S. F. Owner's name withheld. The building will be erected at the corner of California and Stockton streets and will cover a large area. There will be in the neighborhood of 160 rooms in the building arranged in suites of two, three and four rooms each with connecting baths. There will be steam heat, elevator service, a vacuum cleaning plant and wall beds. The interior will be handsomely finished. The exterior of the building will be faced with pressed brick. The architects are now preparing the working drawings.

Flats—3 story and base, frame, cost not stated. San Francisco, Architects, Welsh & Carey, Western Metropolis Bank Bldg., S. F. Owner, P. Reilly. The building has been designed to contain three modern flats of five and six rooms each with baths. The interiors will be handsomely finished in pine and redwood. There will be some hardwood floors. There will be open fire places and brick mantels. The exterior of the building will be covered with shiplap and rustic. The plans are being prepared.

Flats—2 story and base, frame, \$8,000. San Francisco, Architect, E. H. Hildebrand, Crocker Bldg., S. F. Owner, E. H. Hildebrand. The building will contain three modern flats of five and six rooms each with baths. There will be pine and redwood interior finish with some hardwood floors. A garage will be built in the basement. There will be open fire places. The exterior of the building will be covered with brick veneer and shiplap. The plans are being prepared.

Flats—3 story and base, frame, \$8,000. San Francisco, Architect, A. J. Barnett, 585 California St., S. F. Owner's name withheld. The building will contain three flats of five and six

rooms each with bath. The interior will be finished in pine and redwood with some hardwood floors. There will be open fire places and tile or brick mantels. The exterior will be finished with shiplap or cement plaster on metal lath. The architect is preparing the plans.

Flats and Store—3 story and base, frame, \$6,000. San Francisco, Architect, Theo. W. Lenzon, Humboldt Bank Bldg., S. F. Owner's name withheld. The building has been designed with a store on the first floor and two five-room flats on the upper floors. The interior trim will be of pine and redwood. The exterior of the building will be covered with rustic and shiplap. The architect is taking figures on the work.

Residence—2 story and base, frame, \$5,000. San Francisco, Architect none. Owner, E. Gibley, 131 Fifth avenue, S. F. The dwelling has been designed for a 7-room house with bath. The interior will be finished in redwood and pine. There will be some hardwood floors. There will be open fire places and brick mantels. The exterior of the house will be covered with brick veneer. The plans are in the hands of the owner and the work will be done by Day Labor.

Residences—Two 2-story, attic and base, frame, \$3,500 each. San Francisco, Architect none. Owner, John Turner, 275 11th avenue, S. F. Each of the dwellings will contain 7 rooms and bath. The interior finish will be of pine with some oak doors. There will be open fire places and furnace heat. The mantels will be of brick. The exterior of the houses will be covered with brick veneer and rustic. The plans are complete and the work will be done by Day Labor.

Bungalow—one story and base, frame, \$10,000. San Francisco, Architect, E. A. Hennmark, 443 Battery street, S. F. Owner, Charles F. Thierbach. The bungalow has been designed for an 8-room house with baths. The interior finish will be of pine and redwood with oak paneling. The floors in the principal rooms will be of hardwood. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the bungalow will be covered with cement plaster on metal lath and with brick veneer. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$9,000. San Francisco, Architects, Rigbetti & Headman, Phelps Bldg., S. F. Owner, T. J. Crowley. The dwelling has been mentioned here before when the architects first started the plans. Bids on the work are now being taken. The dwelling will contain a large number of rooms and is to be erected in one of the most fashionable districts of the city. The exterior will be covered with cement plaster on metal lath. There will be furnace heat and open fire places. The interior will be trimmed with pine and hardwoods.

Laundry Plant—2 story and base, mill construction, \$20,000. San Francisco, Architects, J. E. Kraft & Sons,

Phelan Bldg., S. F. Owner, La Grande Laundry. The building will be in the nature of an addition to the present plant. The plans are complete and the architects are taking figures on the work.

Flats—3 story and base, frame, \$7,000. San Francisco, Architect, David Saffield, Clunie Bldg., S. F. Owner, Paul Barbour. The work, which has been mentioned here before, will consist of the alteration to the present building. Several stories will be built into the lower floor and the interior arrangement of the upper floors will be changed. The plans are complete and figures are being taken.

Brick Addition, Electric Work and Construction of Rostrum—Cost not stated. President of San Francisco Architects, Constructing Q. M. Dept. U. S. Fort Mason, Owners, U. S. Government. The plans are being prepared for the construction of a brick addition to the present pumping plant, for changing over the feeder system of the general hospital and for the construction of a rostrum in the National Cemetery. Complete details of the work will be given as the plans progress. The first two mentioned pieces of work will be undertaken very shortly.

Hotel—7 story and base, Class A construction. Cost not stated. San Francisco, Architects, MacDonald & Applegarth, Call Bldg., S. F. Owner, Charles Holbrook. The building has been mentioned here before when the architects were first selected to prepare the plans. The contract for the excavating has been awarded and bids for the general construction are being taken. There will be several stories on the first floor and in the neighborhood of 25 rooms above. The mechanical equipment will be modern in every particular.

Monorail—1 story and base, steel and reinforced concrete, \$500,000. San Francisco, Architect, State Engineering Department, Sacramento. Owners, State of California. This work has been mentioned here a number of times before. The plans for the excavating, grading and foundation work have been completed and are now on file at this office. Plans for the balance of the work will be completed at an early date and figures will be called for then.

Substation Equipment—Cost not stated. San Francisco, Engineer, City Engineer Mersden Munson, 140 David Hewes Bldg., S. F. Owners, City and County of San Francisco. Plans for the substation equipment of the Geary Street Municipal road have been completed and placed in the hands of the Board of Public Works for figures. The work will include a large amount of electric machinery. Bids will be opened on May 1st.

Dry Dock—Reinforced concrete and steel, \$1,000,000. San Francisco, Engineers, Union Iron Works, S. F. Owners, Union Iron Works. Representatives of the eastern company affiliated with the Union Iron Works have been on the coast for several days and information has been given out which states that work will be undertaken at once which will terminate in the construction of one of the largest dry docks in the world. Besides the dry dock extensive improvements are to be made to the plant of the Union Iron Works. The plan of the company is to make the Union Iron Works the largest and best equipped plant on the

Pacific Coast. The big dry dock is to be erected at Hunter's Point. More complete details of the work will be given as the plans progress.

Pier—Reinforced concrete, \$1,000,000. San Diego, Cal. Engineer, City Engineer E. M. Capps. San Diego. Owners, City of San Diego. Plans for the construction of a 1,000 foot pier at the foot of B street have been approved and bids will be called for at once. There will be freight sheds and modern cargo handling machinery installed. For full information address the City Engineer.

Stores and Lots—2 story and base, base, brick and steel, \$50,000. San Francisco. Architects, Havens & Torpeke, 16 Kearny St., S. F. owner, A. W. Schaefer. The building will be 75x130 feet and will be erected on a corner. The first floor will be arranged for several stores. The upper floor will contain a large loft. There will be elevator service. The exterior of the structure will be faced with pressed brick. The plans are complete and the architects are taking figures.

Stores and Lots—5 story and base, reinforced concrete, \$50,000. San Francisco. Architect, C. A. Meussdorffer. Humboldt Bank Bldg. S. F. owner, Fred Hess. This work was mentioned here when the architect was first commissioned to prepare the plans. The interior will be arranged for publishing offices, composing rooms and press rooms. There will be elevator service and steam heat. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

BIDS FOR HARBOR WORK.

Robert Wakefield Is Awarded the Contract for the Construction of Piers Nos. 30 and 32.

What is probably the largest single contract awarded in this state in a number of years was awarded Thursday afternoon by the State Board of Harbor Commissioners for the construction of Piers 29 and 32. Seven bids were received, that of Robert Wakefield, of Portland, being the lowest at \$975,981, for the completion of the work exclusive of the steel rolling doors and block paving. The other bidders were as follows: San Francisco Bridge Co., \$1,088,890; Lindgren Construction Co., \$1,135,555; State Construction Co., \$1,298,000; and Grant, Smith & Co., \$1,262,300. The Carolinian Street Paving Co. was awarded the contract for the paving at \$2,792,220. The bids of Watershouse & Price and Lily-Thurston Co. for the steel rolling doors were as follows and have been taken under advisement: Watershouse & Price, for single doors, \$77,500, and for double doors, \$55,500; Lily-Thurston Co., single doors, \$69,855, double doors, \$62,270.

When complete these piers will be used by the American-Hawaiian Steam Ship Company.

Plans for two other piers have been approved and bids for the construction will be advertised for at once.

OAKLAND AND ALAMEDA COUNTY.

Apartment House—2 story and base, frame, \$13,000, Berkeley, Alameda Co, Cal. Architect, C. N. Burrell, Central Bank Bldg., Oakland. Owner, George J. S. Haly. The building will contain stores on the first floor and 42 rooms on the upper floors. The suites will

be arranged in two and three room apartments with baths. The interior trim will be of redwood. There will be a central heating system. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$3,000. Architect none. Owners, Grace Price and J. S. Mearns, owner, Berkeley. The dwelling will contain five rooms and bath. The interior finish will be of pine and redwood. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story, attic and base, frame, \$25,000, Berkeley, Alameda Co, Cal. Architect, John G. Howard. Albee Bldg., S. F. Owner, Eugene H. H. H. This work has been mentioned here before when the plans were first being prepared. The architect has now completed the working drawings and figures are being taken. The dwelling will contain in the neighborhood of 14 rooms and baths. The interior trim will be largely of hardwoods and white enamel. The floors throughout will be of oak. There will be furnace heat and open fire places. The mantels will be of oak. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath.

Residence—Two 2-story and base, frame, \$3,000 each, Oakland, Cal. Architect, A. J. Mazzurcette, 1222 Broadway, Oakland. Owner, L. C. Hinkel. Each of the dwellings will contain 7 rooms and baths. The interior finish will be of pine and redwood. There will be some oak floors. There will be open fire places and tile mantels. Each of the dwellings will be piped for furnace heat. The exteriors will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, reinforced concrete, \$7,000, Oakland, Cal. Architect, E. W. Hartman, 1041 Albee street, Oakland. Owner, E. W. Hartman. The dwelling has been designed for an school house with baths. The interior will be finished in pine and hardwoods. There will be furnace heat and open fire places. The mantels will be of tile or brick. The exterior of the dwelling will be faced with cement plaster. The roof will be of tile. There will be two wall beds. The plans are complete and figures are being taken.

Residence—Two 2-story and base, frame, \$2,500 each, Berkeley, Alameda Co, Cal. Architect none. Owner, Leola Hall, 2815 College avenue, Berkeley. The dwellings will each contain 6 rooms and bath. The interior trim will be of pine and redwood. There will be open fire places with tile or brick mantels. The exteriors will be covered with cement plaster. The plans are complete and the work is being done by Day Labor.

Household—One story and base, frame, \$2,000, Oakland, Cal. Architect, A. J. Mazzurcette, 1222 Broadway, Oakland. Owner, L. C. Hinkel. The dwelling will contain 5 rooms and bath. The interior trim will be of pine and redwood. There will be some oak floors. There will be open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with ce-

ment plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Theatre and Offices—1 story and base, frame, \$20,000 each, Oakland, Cal. Architect, T. Shiley, E. Newsome Nevada Bank Bldg., S. F. Owner, J. C. McMillan. Each of the buildings will contain five rooms and a finished room in the attic. The interior finish will be of pine and redwood. There will open fire places and tile mantels. The exteriors of the dwellings will be covered with shingles. The plans for this work are being prepared. The owner contemplates still further improvement to his property as soon as these buildings are erected.

Theatre and Offices—Height not stated, Class A construction, \$200,000, Oakland, Cal. Architect, E. W. Hartman, 1611 Albee St., Oakland. Owner's name withheld for the present. The building will be located near Broadway with an entrance on that thoroughfare, and will cover a ground area of over 100 feet square. The construction throughout will be fire proof, the only wood entering into the construction being the stage floor. The Theatre will have a seating capacity of 2800 people. There will be steam heat and a modern system of ventilation. The exterior facing has not been fully decided upon. Mr. Hartman will probably construct the building for the owners on the percentage basis.

SAN JOSE & SANTA CLARA VALLEY.

Bungalow—1 story and base frame
corner. Moonshine, San Mateo Co., Cal.
At Spruce Hill, Okd. & Hodges, Mon-
mouth Bldg. S. F. owner's name with-
held. The bungalow will contain a
large number of rooms with several
baths. The interior will be handsomely
finished in pine, redwood and hard-
woods with hardwood floors in the
main living rooms. There will be fire-
place heat and open fire places. The
materials will be of brick. There will
be considerable tile used in the baths
and kitchen. The exterior of the bun-
gallow will be covered with rustic and
shingles. The architects are preparing
the plans.

Apartment House—3 story and base,
remodeled concrete. \$7,000. San Jose,
Santa Clara Co., Cal. Architect, Wil-
liam Binder, Rea Bldg., San Jose. Own-
er, John Wray. This work was men-
tioned here before. The plans are now
complete and figures are being taken.
The building has been designed for
sixteen on the first floor and apart-
ments above. The exterior will be faced
with pressed brick. The equipment and
finch will be modern throughout.

Owners, John Orth and Ben Weingart, the building will be 50x250. The first floor will contain stores and the hotel lobby. The upper three floors will be divided into 235 rooms and a number of baths. There will be steam heat, elevator service and running water in all rooms. The exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

Lodge Hall and Stores—2 story and base, brick. Cost not stated. Whittier, Los Angeles Co., Cal. Architects: Elsen & Son, Wilcox Bldg., L. A. Owner, Mr. Berry. The building will be 125x90 feet. The first floor will contain several stores. The upper floor will be arranged for a lodge room for the Whittier Elks. The exterior of the building will be faced with pressed brick. The plans are nearly complete.

College Building—2 story and base, reinforced concrete, \$50,000. Pasadena, Los Angeles Co., Cal. Architect, Frederick L. Roehrig, American Bank Bldg., L. A. Owners, Throop Institute. The details of the building can not be learned at this time. The architect is at work on the preliminary studies, and it will be some time before bids are called for. The President, James A. B. Scherer, states that construction will be undertaken this summer.

College Buildings—2, 3 story and base, reinforced concrete. Cost not stated. Eagle Rock Valley, Los Angeles Co., Cal. Architect, Myron Hunt, Tibbrian Bldg., L. A. Owners, Occidental College. Both of the buildings will be of a similar design, and will each cover an area of 145x50 feet.

There will be fire proof storage vaults, cement floors and oak interior finish. The exteriors will be faced with cement plaster. Plans will be complete and ready for figures this week.

Contracts Awarded.

Apartment House—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Allen Finch, 234 Aliso St., L. A. Owners, Allen Finch and M. L. Vogel. Contractors, United Contracting Co. Contract price not stated.

Warehouse—3 story and base, reinforced concrete, \$100,000. San Diego, Cal. Architects, Bristow & Lyman, Timken Bldg., San Diego. Owner, Mrs. A. S. Bridges. Contractors, William Stinson Construction Co., San Diego. Contract price, \$100,000. Note: This contract is drawn only for the general construction.

Hotel—3 story and base, brick, \$60,000. Los Angeles, Cal. Architect, F. T. Harris, Redlands. Owner, Joseph Bucher. Contractors, The Kling Co., Frost Bldg., L. A. and J. C. Beer, Long Beach. Contract price, \$60,000.

PORTLAND AND OREGON.

Apartment House—4 story and base, brick and steel. Cost not stated. Portland, Ore. Architects, Clausen & Clausen, Portland. Owner's name withheld. The building will be 50x100 feet. There will be five suites of three and four rooms each on the several floors. All apartments will have connecting baths. There will be disappearing beds, steam heat, elevator and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. The plans will be

complete, and ready for figures by May 6th.

Warehouse and Stables—4 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architect, C. A. Duke, Portland. Owner, E. E. Radding. The building will cover a ground area of 50x100 feet. The upper floors have been designed for a modern warehouse. The basement will be divided into stalls, and will accommodate 120 head of horses. The plans have been out for figures and a contract will be awarded at once.

Garage—1 story and base, brick and steel, \$12,500. Portland, Ore. Architects, Hardin & Richmond, Couch Bldg., Portland. Owners, Hardin & Richmond. The building will cover a site of 100x100 feet. There will be a steel truss roof. The floor will be of concrete. The main floor will contain sales rooms, offices and machine shop, besides a large storage space. There will be a 10-foot basement which will contain a wash room and more storage space. The exterior of the building will be faced with pressed brick. The plans will be complete by May 1st and the work will be done by Day Labor.

Hotel—4 story and base, brick. Cost not stated. Portland, Ore. Architect, A. C. Ewart, Portland. Owner, George A. Housman. The building will cover a site of 70x100 feet. There will be in the neighborhood of 55 rooms on the upper floors, stores and lobby on the first floor and a full basement. There will be steam heat and elevator service. Running water will be provided for all rooms. The exterior of the building will be faced with pressed brick. The plans will shortly be completed and the work will be done by Day Labor.

Theatre and Store—2 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architect, C. A. Duke, Portland. Owner, Mrs. Degel. The building will be 100x116 feet, the theatre occupying a space on the first floor of 70x80 feet. The seating capacity will be 700. There will be several stores besides the theatre on the ground floor. The upper floor will contain 12 modern offices. There will be a hot water heating system. The exterior of the building will be faced with cement plaster. The plans have been out for figures and a contract will be let at once.

Stores and Lodge Hall—3 story and base, brick, \$65,000. Lakeview, Ore. Architect, F. J. de Longchamps, Monadnock Bldg., S. E. Owner, P. Herveford, Lakeview. The building will cover an area of 80x100 feet. The first floor will contain stores, the second offices and the third has been arranged for a large lodge room. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans have been completed and placed in the hands of the owner who is superintending all the work.

Apartment House—3 story and base, brick, \$25,000. Portland, Ore. Architects, Clausen and Clausen, Portland. Owner, John Barby. The building will be 45x60 feet and will contain 14 two and three room apartments with connecting baths. There will be steam heat and wall beds. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Bank and Office—2 story and base, reinforced concrete, \$15,000. Albany,

Index to Advertisers

Ore. Architect, W. F. Tobey, Portland. Owners, First National Bank of Albany. The building will cover an area of 50x100 feet. The bank will occupy the entire first floor with the exception of the entrance and lobby to the upper floors. There will be 20 offices on each of the floors from the second to the fourth. The fifth floor will be left undivided for lodge room purposes. There will be steam heat, vacuum cleaning system and elevator service. The interior of the banking rooms will be handsomely finished in hardwoods and marble. The exterior of the building will be faced with Bedford stone pressed brick and terra cotta. Plans are now being prepared.

Court house annex—2 story and base, reinforced concrete. Cost not stated. Hillsboro, Washington Co., Ore. Architect, Newton C. Gaunt, Henry Bldg., Portland. Owners, City of Portland. Bids for the construction of this annex were opened on April 24th. Complete list of bidders will be given in the next issue.

Firehouses—Four 1-story and base, brick, \$10,000 each. Portland, Ore. Architect, Easton Chief L. G. Holden, Portland. Owners, City of Portland. Plans are being prepared for four new stations, one each at Montavilla, Woodlawn, Kenton and Rose City Park. Each building will accommodate one company. The exteriors will all be faced with pressed brick. Bids will be called for as soon as the plans can be completed.

Hotel Addition—1 story and base, mill construction. \$110,000. Roseburg, Ore. Architects, Emil Schacht and Son, Portland. Owners, McClellan Hotel Co., Roseburg. The building will be 100x100 feet. There will be over 100 rooms added besides a large number of baths. There will be steam heat and elevator service. Hot and cold water will be provided for all rooms. The interior will be finished in pine and hardwood. The exterior of the building will be faced with pressed brick. Plans will be complete and ready for figures by May 1st.

SEATTLE AND WASHINGTON.

Church—2 story and base, brick and stone, \$50,000. Walla Walla, Wash. Architects, Fourtelotte & Hummel, Boise, Idaho. Owners, First Methodist Church of Walla Walla. The building will cover a considerable ground area, and will consist of a main auditorium, Sunday school rooms, study and social rooms. There will be a central heating system. The interior will be finished in pine. The exterior of the building will be faced with stone and pressed brick. The plans are complete and figures will be taken at once.

Stores and Lofts—2 or 3 story and base, brick, \$20,000. Seattle, Wash. Architect, Max Umbrecht, Globe Bldg., Seattle. Owner Isaac Cooper. The building will be 60x108 feet. The first floor will contain several stores. The owner has not fully decided on the height of the building, and plans are being prepared for both a two-story and three-story structure. The upper floors will be arranged for lofts. The exterior will be faced with pressed brick. When the plans are complete the work will be done by Day Labor.

MR. ARCHITECT:
You are keen for every improvement in the building line. You want to save money for your client and give him the best.

You want to protect him from damage suits.
In window construction you can save him money by specifying the Simplex, because it is cheaper than the common double hung.
No damage suits from window cleaners, because the Simplex is reversible.
The common double hung is out date.
The Simplex is manufactured in 49 different varieties.
Send for details.

Editorial Comment.

The building totals for San Francisco for the month of April show a substantial gain, a total of \$3,435,334 being registered in permits and recorded contracts. Of this \$1,891,688 was for brick and concrete construction, \$1,388,872 was for frame buildings and \$154,774 under the head of additions and alterations. This total exceeds any amount for any previous month since April 1910. Compared with April 1911 the gain is about 50 per cent, the figures for that month being only \$2,129,696.

As compared with this the past twelve months' record is as follows:
May, 1911.....\$2,326,562
June, 1911.....2,625,740
July, 1911.....2,126,720
August, 1911.....1,656,518
September, 1911.....2,100,653
October, 1911.....1,925,826
November, 1911.....2,647,518
December, 1911.....1,218,022
January, 1912.....1,692,810
February, 1912.....1,696,232
March, 1912.....2,146,011
April, 1912.....3,435,334

It will be seen from the above table that since last December there has been a steady increase in building totals, and this in spite of the fact that it is a presidential year and business throughout the country is pretty quiet the report from the cities representing the building centers showing a general falling off.

Comparison with the same month of the last ten years shows the following record:

April, 1903.....	\$1,509,694
April, 1904.....	1,614,714
April, 1905.....	2,226,555
April, 1906.....	817,084
April, 1907.....	6,556,007
April, 1908.....	3,206,676
April, 1909.....	3,320,969
April, 1910.....	3,383,269
April, 1911.....	2,129,696
April, 1912.....	3,435,334

Generally speaking April has been a pretty good month for the building business, but even at that the past month tops any total for the same month since the rebuilding period of 1907.

No doubt the prospect of the Panama Exposition and the civic center project have had a salutary effect on the building business generally. Things seem to be steadily looking up. Contractors report that they are figuring a good deal of work and all things considered the prospects are bright.

Open air schools are becoming popular in England, the first having been recently opened at Birmingham. The pupils are carefully selected by the medical inspector of the Birmingham

Education Committee from the elementary schools of the city, and are children who are, from environment or perhaps heredity, too weakly to derive any real educational advantage from attendance at the ordinary elementary schools of the city. It is reported that no expense has been spared to produce the nearest approach to perfection in this school. The buildings have been substantially and attractively constructed, and the smallest details are of the best workmanship. The main building consists of dining rooms, bath and drill rooms, and a central clock tower. The pavilions of the class rooms number three; they are open on three sides, and are provided with folding glass shutters in order to furnish protection should it be needed in unusually severe weather. However, it is the intention to give all instruction in the open air when possible and to use the classrooms only in inclement weather.

Even in Chicago the open air schools are said to be meeting with increasing success. Here in California there is so much life in the open air and as a general rule school buildings are constructed to furnish light and air in abundant quantities so that there is little demand as yet for the outdoor schoolroom. Outdoor life here is so universal and there is so little of the crowded city districts that practically every child has advantage of at least a portion of the day in the open at any time of the year.

The action of the Board of Supervisors of San Mateo County in passing a resolution to be forwarded to Congress-man Hayes, calling the attention of the National government to the harbor facilities of the southern bay district, emphasizes the enormous possibilities of the bay districts. The project, as outlined, looks to the construction of a deep channel between Redwood City and the deep water channel of the bay. The idea is a splendid one apparently and would provide for an inland harbor and the dockage of seagoing vessels as far south as the county seat of San Mateo County. After all the peninsular towns are of right a portion of San Francisco. They are separated to a certain extent by the hills of the coast range, but these will be tunneled in time and the Peninsula will be a greater San Francisco even if it does not include the suburban towns across the bay which naturally have a common center here.

The dockage facilities of San Francisco bay are practically unlimited. With cheap fuel from the oil fields there is absolutely no reason why this should not become one of the great commercial and industrial centers of the world.

The Development and Handling of Lumber--Its Relation To Tree Growth and Proper Piling.

The best knowledge makes possible the intelligent choice of lumber and the best results in general construction, as well as in house finishing and at the cabinet-maker's bench. It is valuable not only to wood-workers, but other craftsmen; also, knowledge of the properties and kinds of timber, its development, the essential characteristics of good timber, its natural defects, its preparation for market, the process of drying, proper handling, etc. A certain familiarity comes with the simple handling of wood, but even experienced buyers of the most necessary material will find in this article much useful information.

Trees are divided into three distinct classes, according to their respective modes of growth. First, exogenous, or outgrowers, as the oak, etc. This class includes all the timber used by the wood-worker. Second, endogenous, or inward growers, as the palmetto. Third, acrogenous, or summit growers, as the fern. The exogenous method of development gives character to the various woods in daily use, and should therefore be described. Cellular growth plants are made up of a succession of long or short cells and tubes. When the plant is young these cells have soft walls and contain a substance which is almost fluid; as the plant grows older the fluid contents of the cell become hard and fill the cell. After the plant is cut down and dried, these cells become hard, at the same time growing smaller. This fact accounts for the shrinkage of timber in drying. As the cells are crowded together they become hardened, in this way forming a woody tissue. The hardness and weight of timbers depend on the closeness with which the fibers are packed together after the hardening process has taken place.

All woods used in wood-working are composed of these tissues and fibers. From the core or heart of the tree a new layer or tissue is formed each year, so we can thus tell the age of a tree by counting the rings which appear on the cross-section of the trunk. As the tree grows older the woody tissue near the center becomes harder and is called the heart wood; the outer layers, which are younger and softer, are called sap wood. A microscopic enlargement of a section of an oak tree of five years' growth shows the pith and the annual growth of woody layers. At the core or heart is seen the medulla or pith, composed of cellular tissue, a net-like fabric of cells resembling a honeycomb, and the medullary sheath is shown, composed of spiral vessels and fiber ducts for the conveyance of the sap. This constitutes the inner layer of the first year's growth. The wood cells, or fiber tubes, compose the annual layers, which are formed in a series of concentric rings.

Each annual ring is called a circular belt or zone, and there is a well-defined line of separation between each pair of zones. About one-half of the width of the zone is occupied by bundles of fiber tubes containing large sap

vessels. These vessels are easily observed in oak, ash and chestnut, as compactness and firmness are the essential characteristics of the best lumber. Both young and second growth timber are unfit for use where strength, durability and "staying" qualities are concerned. Softwoods generally possess wider zones than the hard timbers, and much difference exists between the width of the zones in the same tree. The wider zones denote the most vigorous growth of the tree; and in the oak these are formed between the twentieth and thirtieth years.

The cambium layer, which is composed of cellular tissue like the pith, contains the rich life-giving secretions, called protoplasm, without which the tree could not live. The medullary rays, which radiate from the center of the tree, when exposed in cut timber, consist of a series of vertical plates or sheets. This is a most important factor in lumber for fine finishing purposes, and it is the presence of these medullary rays, or silver grain, that gives so much beauty to quarter-sawn oak. These rays are more pronounced in oak, beech and sycamore, but not so well defined in maple, birch and chestnut.

There are many things that cause the tree to possess defects during its growth, and which result in the several different grades of lumber. There frequently occur in the body of sound, healthy trees, circular seams, or cracks, where the layers have become separated from each other. These are generally caused by the action of violent windstorms upon the trunk of the tree, and are called cup shakes. For structural purposes trees should not be felled until after the mature growth has been attained; nor should they be used after the tree shows signs of declining vitality.

Most trees arrive at maturity between fifty and one hundred years, and begin to decline after 150 and 200 years. After passing the period of mature growth, timber loses its firmness and elasticity, and gradually becomes crisp and brittle. Straight and tall trees are generally found in the heart of the forest, because their branches and leaves grow nearer the top of the tree, and not along the whole length of the trunk, as it is necessary for their leaves to receive air and sunlight for vitalizing the sap. But on the edges of the forest, where the whole tree is exposed to the air and sun, the branches grow lower, and for this reason the timber is knotty and cross-grained.

The quality of the timber is also influenced by the soil in which it grows, where the ground is damp and marshy, the fiber is of a spongy character, the excess of water preventing the healthy action of the sap in forming firm and compact wood. Basswood, willow and whitewood grow better in this marshy soil; the hardwoods thrive better on dry, clay soil, and those of the pine group are best adapted to the sandy soils. The wood-worker frequently

finds a piece of timber in which the fibers run obliquely, and often in handling such a piece it will break from its own weight. This defect is usually caused by exposure of the tree in the forest to prevalent windstorms in one direction, which tend to produce a twisted, spiral mode of growth.

Timber is also affected by the action of insects, by water rust and by its own diseases. Rainwater, obtaining access to the cambium layers of the tree through cracks in the bark, causes a brownish rust, which changes the character of the sap and reduces the wood to a powder. Bugs and insects, obtaining access through the bark, thrive upon the sap of the tree, and are one of the greatest enemies to the growth of the perfect tree. But where the trunk of the tree is evenly formed and shows a perfect bark, free from cracks and excrescences, it may be assumed that it will produce perfect timber.

Great care should be taken in properly piling timber to prevent the attack of parasitic plants, known as fungi. Lumber piled in warm, damp places and excluded from the sunlight, is subject to the growth of fungi, which soon decomposes the fiber and results in what is known as dry rot. No vegetation should be allowed to grow around the lumber pile, as it creates conditions favoring the germination of the fungi spores. It should be piled in dry and high locations only, and should be placed well up from the ground on staking and strips placed between the boards, so as to permit a thorough circulation of air.

Lumber used for building purposes should be straight grain, free from large or loose knots, wind and heart shakes, or the signs of any of the diseases or imperfections which often occur. When sawed, the surface should be clean and lustrous, giving a solid, bright appearance, free from spongy places. The sawdust should be granular, crisp and free from stringy fibers. The heart wood should be mature and solid, and the layers next to the bark should be removed. The lumber should be uniform in texture, and, when cut, should smell sweet, a disagreeable odor being a sign of decay. Good lumber should be of uniform color; when blotchy or discolored it denotes a diseased condition, caused either by defective growth or by piling the lumber in unfavorable locations.

The black and blue streaks often seen in lumber are caused by close piling, which causes the sap to sour or ferment. When the wood is planed it should have a silky, shining surface; the shavings should be like ribbons and stand twisting around the fingers. When the surface appears dull and the shavings are short and easily broken, it is a sign that the material lacks in essential properties. Nearly all classes of timber are subject to "heart" shakes or "star" shakes, which are the result of shrinkage of the layers, incidental to the loss of proper nourishment, usually caused after the tree has reached its mature growth and the more active

layers absorb the sap juices from the heart wood.

One of the greatest drawbacks with which the wood-worker has to contend is the shrinkage and warping of his lumber. It is almost essential that he understand why and how this takes place. After cutting, the tree shrinks in all directions, caused by the drying of the sap, the shrinkage from without toward the center being more marked. As there is more moisture in the sap wood than in the heart wood, there is more shrinkage nearer the bark. The medullary rays, however, which radiate from the center of the tree outward and are formed of hard plates, shrink very little. The shrinkage of these rays tends to draw the ends of the rays together, and this causes cracks. As wood shows a tendency to split along these rays, logs are often halved or quartered soon after they are felled, to prevent cracking as far as possible. —R. A. B. in Woodworker.

CONSTRUCTION WORK ABROAD

CANADA.

British Columbia Construction Items. (From Consul General David F. Wilber, Vancouver, Canada.)

Firms interested in these items should advise the consulate general of the fact, sending their catalogues, if they desire, and also whether they are successful in obtaining business as a result of their inquiries. Some firms send merely carbon copies of their letters, without going to the unnecessary trouble of a transmitting letter. There have been cases where such action by manufacturers has caused the office to later put them in touch with other opportunities, as the names are on file here and we know them to be interested in obtaining business in British Columbia. Manufacturers having agents in this Province should advise this office of the agents' names and addresses.

With reference to the large number of developments each week in Vancouver, summarized as follows and previously announced in Daily Consular and Trade Reports, it will be apparent that there are many opportunities for the sale of American material, supplies, machinery and equipment. In some lines, as building hardware, there is keen competition and small profit for the local merchant but American hardware specialties are not well known, apparently, and could be introduced with profit to the dealer and manufacturer. In these and all other lines local representation is essential to obtain the most satisfactory results, even when sales are made exclusively to jobbers or to some one firm. It has been pointed out repeatedly that the period elapsing between the call for tenders and the closing of tenders is usually too short to permit of a competent not on the spot competing successfully. The importance has been shown also of making sure that architects and designers are fully acquainted with machinery, equipment, specialties, materials, or other supplies that might be utilized by them to advantage in works under their supervision.

Flour Mills.—The Moose Jay Milling Co., of Saskatchewan, whose plant was recently destroyed by fire, will build a mill at Port Mann.

Sawmills.—A sawmill proposed at Chicken Lake, British Columbia, ca-

pably 15,000 feet daily; no particulars are given. Robert Marr, of Princeton, British Columbia, is erecting a sawmill to cut 35,000 feet daily.

Powder Plant.—It is estimated that the increased demand for explosives for blasting is to result in extensions to each of the plants of the Canadian Explosives (Ltd.) in this Province, at Nanaimo, Victoria, and Bowen Island, particularly the last.

Machine Shops.—The Schnake Machine Works, of New Westminster, British Columbia, are to build a new and larger plant.

Laundry.—The New Model Laundry Co. is being incorporated by Crompton & Berton brokers (Hamberton Block, Victoria, British Columbia), and will erect a \$10,000 laundry building, equipped with most modern machinery.

Biscuit and Confectionery Factory.—Ramsey Bros. & Co. (Ltd.), 291 Ravymar avenue, Vancouver, British Columbia, are to make a \$17,000 extension to their factory.

Cold Storage Plant.—The Chilliwack (British Columbia) Creamery Association plans erection of a refrigerating plant, capacity of 24 tons daily. The equipment has probably been purchased through a Vancouver firm. The same concern contemplates manufacturing ice cream on an extensive scale.

Cannery.—The farmers about Arrow Lakes contemplate establishing a cannery at Nakusp, British Columbia.

Dairy and Creamery.—George E. Knight, Edmonds, British Columbia, plans to build a large modern dairy and creamery.

Steamer.—A 160,000 200-foot steamer, to be finest on interior waters, is to be built by Port Arthur Iron Works (said to be branch of Cleveland Iron Works), for use on Kootenai Lake between Nelson and Kootenai Landing, as a link in the Canadian Pacific Railway system.

Dock.—British and French financiers are reported to have decided to build a floating dry dock for Vancouver; capital subscribed and joint boards formed in London and Paris. The dock is to have a lifting power of 15,000 tons, a total length of 600 feet, a depth of 65 feet, and a width of 80 feet. It will be built in two years. It will be possible to use parts of the dock separately for smaller vessels or to put them together and use them as a whole for larger vessels.

Bridge.—Chief Provisional Engineer Griffiths, of Victoria, British Columbia, will recommend a \$250,000 bridge to cross the Kootenai River at Nelson, British Columbia, instead of a \$75,000 bridge, as previously stated.

Terminal.—Guthrie, McDougall & Co. (A. O. McDougall is of Portland, Ore.) have contract for reclamation and filling work for the \$2,000,000 yards and terminal of the Great Northern Railway here. Two steam shovels are to be put to work immediately. One million cubic yards of dirt, it is stated, will have to be moved. Alexander Stewart, assistant Chief Engineer of the Great Northern, of Seattle, is named as the official who is drawing the plans for this extensive work. In addition to Canadian Pacific plans for a large new terminal station here, that railway is making large extensions to its yards and freight handling facilities, spending \$2,000,000 this year in Vancouver.

Railway Stations.—It has been stated that F. M. Battenbury, architect, Vic-

toria, British Columbia, has been commissioned to design the stations for the Canadian Northern Pacific Railway of the Province.

Telegraph.—The Dominion Government is appropriating a sum to extend its telegraph line down through the Okanagan Lake district to Penticton and for running in additional wire to Vernon, Kelowna, Summerland, and Penticton.

Telephones.—The British Columbia Shipowners' Association and the local Shipmasters' Association are urging the Dominion Government to establish a telephone line along the coast between Powell River and Vancouver, similar to telephone lines along the St. Lawrence River and other shores in the East, which could be used in emergencies.

Light and Power.—Concerning the reported purchase of the Coteau Power Co. by MacKenzie & Mann (Canadian Northern Pacific Railway) and the loaning of the power plant of the city of Vernon, it is now reported likely that the city will not rebuild, but will arrange with the Coteau Power Co. for supply of light and power.

Hydroelectric Power Plants.—Tenders have been called for erecting a concrete and steel power station, including furnishing of all materials except as specified, for municipality of Penticton, British Columbia, tenders to be received by F. H. Latimer, consulting engineer, at that place, until April 18, accompanied by a certified check for 5 per cent of the contract price as a guaranty. Plans, specifications, etc., obtainable from consulting engineer.

Schools.—Robert McLean & Co., of this city, have awarded the contracts for the Florence Nightingale (\$6,500) and Cecil Rhodes (\$75,000) schools for the city of Vancouver.

Warehouse.—Thomas Hooper, Winch Building, Vancouver, is architect for McLean Bros. \$60,000 reinforced concrete warehouse.

Jail.—A jail to accommodate 100 prisoners is to be built by the provincial government on South Vancouver Island. Address: Minister of Works, Victoria, B. C.

Open-air Stadium.—Plans have been completed for a \$200,000 open-air stadium and auditorium in Stanley Park, to be larger than the one at Tacoma, Wash., by Heath, Grove & Nease, architects, Metropolitan Building, Vancouver, and it is expected that contracts will be called for shortly.

Concrete Waterworks Reservoir.—The Gray Construction Co., 515 Cary Building, Seattle, Wash., has been awarded a contract for a \$32,729 water system supply reservoir for the city of Kamboos, B. C.

Wharf.—The Canadian Pacific Railway Co. has let to O'Brien, McCaughey & Lemcke, Edsmount Hotel, Vancouver, the contract for its \$10,000 dock at New Westminster, B. C.

New Hotels.—(1) The Dominion Construction Co., 35 Canada-Life Building, Vancouver, has contracted with Dr. T. H. Wilson, 407 East Hastings street, Vancouver, for a six-story brick and wood 75122 foot store and hotel building, after plans drawn by Architect L. E. Gordon of this city, and is also getting ready for minor contracts. (2) J. C. M. Keith, of Victoria, B. C., is preparing plans for two frame hotel buildings at Kelowna, B. C.

Plans describing news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco.—Apartment house, 3 story and base, frame, \$10,000. Architect, none. Owner, O. Monson, 1907 Bryant St., S. F. The building will be 23,700 feet. The interior has been arranged in six suites of two and three rooms each with bath. The interior finish will be of pine and redwood. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

San Francisco.—Apartment house, 5 story and base, reinforced concrete, \$35,000. Architects, MacDonald & Applewhite, 401 Bldg., S. F. Owners, Sierra Investment Co. The building will contain in the neighborhood of 45 apartments arranged in suites of two and three rooms each with connecting baths. There will be steam heat and elevator service. The interior will be finished in pine. There will be wall beds. The exterior of the building will be faced with cement plaster. The plans are complete and the architects are taking figures on the work.

San Francisco.—Apartment house, 3 story and base, frame, \$15,000. Architects Hladik & Thayer, Monadnock Bldg., S. F. Owner, William R. Edwards. The building will contain in the neighborhood of 12 apartments of two and three rooms each with private baths. The interior will be handsomely finished in pine and redwood with some hardwood floors. There will be wall beds and steam heat. The exterior of the building will be covered with brick veneer and shiplap. The plans are complete and figures are being taken.

San Francisco.—Apartment house, 1 story and base, frame, \$20,000. Architect, Milton Lichtenstein, 111 Ellis St., S. F. Owner, Joseph Levin. The building will be arranged for 16 apartments of two and three rooms each with baths. The interior will be finished in pine and redwood with some hardwood floors. There will be wall beds and steam heat. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

San Francisco.—Apartment house, 3 story and bath, frame, \$10,000. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, John Demopack. The building will contain six apartments of two and three rooms each with private baths. The interior trim will be of pine throughout. There will be open air places with tile mazzels. The exterior of the building will be covered with brick veneer and cement plaster on metal lath. The plans are complete and in the hands of the owner who will do the work by Day Labor.

Berkeley, Alameda Co., Cal.—Apartment house, 3 story and base, frame, \$10,000. Architect, C. J. Chasins, Flatiron Bldg., S. F. Owner, B. E. Whitton. The building has been designed to contain six apartments of three rooms and bath each with a sleeping porch. The interior will be finished in pine

with hardwood floors. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and the architect is now taking figures.

Oakland, Cal.—Apartment house, 2 story and base, frame, \$15,000. Architect, L. W. Euton, 5918 Telegraph Ave., Oakland. Owner, Mr. O'Connell. The building will contain a number of two and three room apartments with connecting baths. The interior will be finished in pine and redwood with some hardwood floors. There will be wall beds, coal grates and steam heat. The exterior of the building will be covered with shingles. The plans are complete and the architect is taking figures on the work.

Fresno, Fresno Co., Cal.—Apartment house, 3 story and base, brick and steel, \$75,000. Architect, Edward F. Foulkes, Crocker Bldg., S. F. Owner, H. H. Erik. The building has been mentioned in these columns before when the architect was first preparing the plans. The working drawings have been completed and figures are now being taken. The building will contain in the neighborhood of 54 apartments of two and three rooms each with private bath and wall beds. There will be steam heat. The exterior of the building will be faced with pressed brick.

San Jose, Santa Clara Co., Cal.—Apartment house, 3 story and base, reinforced concrete, \$75,000. Architect, William Binder, Rea Bldg., San Jose. Owner, John Twoby. The building has been mentioned here before when the plans were first put out for figures. The architect will award a contract for the construction within the next few days. The building will be strictly modern and up-to-date in all its appointments. The exterior will be faced with cement plaster.

Los Angeles, Cal.—Apartment house, 4 story and base, brick and steel, cost not stated. Architects, Elsen & Son, Wilcox Bldg., L. A. Owner, C. S. Hamberg. This work has been mentioned here before when the plans were first put out for figures. Several slight changes have been made in the drawings and the architects are now taking new figures for the general construction. Bids will be opened the latter part of this week.

Long Beach, Los Angeles Co., Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architects, Schuch & Lockridge, First National Bank Bldg., Long Beach. Owners, Long Beach Improvement Co. The building will be 51,115 feet, and will contain 50 rooms and 25 baths. There will be steam heat, elevator service, a vacuum cleaning system and wall beds. The exterior of the building will be faced with pressed brick. The architects are now completing the working drawings and will be ready to receive figures next week.

Los Angeles, Cal.—Apartment house, 1 story and base, brick. Cost not stated. Architect, E. J. Borgmeyer, Stanton Bldg., L. A. Owner, Mrs. John Hethersington. The building will be erected on a corner lot and will contain 60 rooms

arranged in suites of two and three rooms each with connecting baths. There will be steam heat, elevator service, wall beds and other modern improvements. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Los Angeles, Cal.—Apartment house, 2 story and base, brick. Cost not stated. Architects, Train & Williams, Exchange Bldg., L. A. Owner, Jeremy Loese. The building will cover an area of 47,110 feet. The interior of the building will be arranged in twenty suites of 2 and 3 rooms each with connecting baths. There will be steam heat and wall beds. The exterior of the building will be faced with pressed brick. The architects are preparing the plans.

Los Angeles, Cal.—Apartment house, 4 story and base, brick. Cost not stated. Architect, C. W. Baker, 2432 8th, Figueroa St., L. A. Owner, A. C. Stillson. The building will be 98,113 feet. There will be 150 rooms arranged in suites of two and three rooms each. There will be wall beds, steam heat, elevator service, refrigerators and a vacuum cleaning system. The interior finish will be of mahogany and oak, with hardwood floors throughout. The exterior of the building will be faced with pressed brick. Bids for the various parts of the work are now being taken.

Portland, Ore.—Apartment house, 6 story and base, reinforced concrete, \$200,000. Architects, Williams & Rasmussen, Portland. Owners, syndicate of Portland capitalists. The building will cover an area of 100,200 feet. The interior has been divided into 300 rooms, not including the baths and kitchens. The suites will be arranged in two and three room apartments with connecting baths. The interior will be handsomely finished in hardwoods and tile. The construction will be fire proof throughout. There will be steam heat, elevator service, wall beds, vacuum cleaning system and built-in refrigerators. The exterior of the building will be faced with pressed brick and terra cotta. Plans for the work will be ready for figures by May 15th.

BANKS.

Pleasanton, Alameda Co., Cal.—Bank, 1 story and base, reinforced concrete, \$10,000. Architect, William Binder, Rea Bldg., San Jose. Owner, H. Arendt, Pleasanton. The building will contain the banking rooms of the owner. There will be a fire proof vault. The interior will be finished in pine and hardwoods. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Santa Barbara, Santa Barbara Co., Cal.—Bank and stores, 2 story and base, steel and brick. Cost not stated. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, First National Bank of Santa Barbara. This building has been mentioned here before when the architects were first selected to prepare the plans. The bids for the construction were opened on May 14th and an award of contract will be made at once. There will be several stores on the first floor besides the bank and modern offices above.

BRIDGES, DAMS AND HARBOR WORK.

Sandpoint, Ida.—Bridge, concrete and steel, \$10,000. Engineer J. H. Carr. Sandpoint. Owners, Bonner County. Plans for a 100-foot trestle bridge have been completed by the engineer and approved by the County Board of Supervisors. Bids for the construction are now being taken.

Seattle, Wash.—Dock repairs, concrete and frame construction, \$10,000. Engineer's name not given. Owners, Colman Dock Co., Colman Bldg., Seattle. The owners have announced that plans are now being prepared for the repairing of the damage done to the Colman Dock by the steamer Alameda recently. Work will be advertised for bids as soon as the plans can be completed.

Contracts Awarded.

Olympia, Wash.—Dredging and Bulkheading, \$60,000. Engineer, City Engineer Van Epps, Olympia. Owners, State of Washington and U. S. Government. Contractors, Pinet Sound Bridge and Dredging Co., Central Bldg., Seattle. Contract price not stated.

CHURCHES.

Oakland, Cal.—Church. Class A construction, \$150,000. Architect, Norman P. Marsh, L. A., associated with Oakland. Owners, First Methodist Church of Oakland. The work has been mentioned here before when the architects were first selected. The working drawings have been completed and placed in the hands of Mr. H. Morton, 11th and Broadway, Oakland, who will let all contracts. The complete details of the work have not as yet been given out, but will be published here as soon as obtainable. Six general contractors have been invited to submit figures on the work, and the number will probably be restricted to these.

Modesto, Stanislaus Co., Cal.—Church, 2 story and base, frame and concrete, \$25,000. Architect, John J. Foley, Modesto Bldg., S. F. Owners, Roman Catholic Church. The building will cover a considerable area. The main auditorium will have a seating capacity of 600 people. The design is being worked out in the Spanish Mission style. The interior will be handsomely finished in cement plaster and oak. The exterior of the building will be covered with cement plaster on metal lath. The roof will be covered with clay tile. The architect is now completing the working drawings.

Los Angeles, Cal.—Church, 2 story and base, reinforced concrete and brick. Cost not stated. Architect, Elmer Grey, Wright and Callender Bldg., L. A. Owners, First Church of Christ Scientist. The building will be 175x141 feet. The seating capacity of the main auditorium will be 100, the balcony 250 and the Sunday school room, 550. The building has been described in these columns before. The plans are complete and bids are being taken by the architect.

Everett, Wash.—Church, 1½ story and base, brick, \$35,000. Architect, Ellsworth Storey, New York Bldg., Seattle. Owners, Trinity Episcopal Church. The building will be 75x129 feet. The architect has opened bids for the construction and a contract will be awarded shortly.

San Diego, Cal.—Church, 1 story and

base, reinforced concrete, \$80,000. Architect, Norman P. Marsh, Broadway Central Bldg., L. A. Owners, First Baptist Church of San Diego. The building will cover an area of 100x150 feet. The design is in the Mission style, with a cement exterior and a clay tile roof. The interior has been arranged for main auditorium, Sunday school rooms, private class rooms, ladies parlors, library and social rooms. The interior finish will be of pine. The architect has just been commissioned to prepare the plans.

Portland, Ore.—Church addition, 2 story and base, reinforced concrete. Cost not stated. Architect, L. A. Pelton, Portland. Owners, Taylor Street Methodist Church. The building will be erected in the rear of the present structure and will be devoted to Sunday school purposes. There will be four class rooms connected to the main portion of the church by arched doorways. The exterior will be faced with cement plaster. The architect has completed the plans and specifications.

Contracts Awarded.

Seattle, Wash.—Church, 1 story and base brick, \$20,000. Architect, Alphons Hudley, Crary Bldg., Seattle. Owners, Norwegian United E. W. Lutheran Church. Contractor, R. M. Spink, 126 62nd Ave., West, Seattle. Contract price, \$28,000.

Walla Walla, Wash.—Church, 2 story and base, stone or brick, \$50,000. Architect's name not given. Owners, Presbyterian Church of Walla Walla. Contractor, W. E. Kier, Colorado Springs, Colo. Contract price—Oregon stone, \$19,212; Henio stone, \$53,825 and for pressed brick, \$45,712.

FACTORIES & WAREHOUSES.

San Jose, Santa Clara Co., Cal.—Machine shop and foundry, 1 story and base, reinforced concrete, \$30,000. Architect, William Binder, Erie Bldg., San Jose. Owners, Bean Spray Pump Co. The building will cover a large area and will be occupied entirely by the owners. The floors will be of concrete. There will be a number of heavy machine foundations. The exterior will be faced with cement plaster. The plans are complete and figures are being taken.

Los Angeles, Cal.—Factory, 2 story and base, reinforced concrete. Cost not stated. Architect, E. J. Borgmeyer, Stinson Bldg., L. A. Owner, Andrew Boyrie. The building will be 50x390 feet and is to be designed to meet the special needs of the owner. There will be a concrete floor on the first story. The exterior of the structure will be faced with cement plaster. The plans are complete and the work will be done by Day Labor.

Los Angeles, Cal.—Stables, 3 story and base, reinforced concrete. Cost not stated. Architect, S. Tilden Norton, Title Insurance Bldg., L. A. Owners, Pioneer Truck Co. The building will cover an area of 100x120 feet. The first and second floors will be given over to the stabling of horses. The third floor will be used for the storage of food. The exterior of the building will be faced with cement plaster. The plans are complete and the work is being done by Day Labor.

Seattle, Wash.—Foundry, 2 story and base, mill construction, \$10,000. Architect, Charles Haynes, Melborn Bldg., Seattle. Owner's name withheld. The

building will be erected in the suburbs of the city and will cover an area of 115x90 feet. The first floor will contain offices and work room and the second floor will be used for the divers and molding rooms. The exterior of the building will be faced with stock brick. Plans are now being prepared.

Portland, Ore.—Warehouse, 5 story and base, reinforced concrete, \$50,000. Architect, Fred A. Legg, Portland. Owners, Portland Cement and Stone Co. The building will be 80x100 feet. The first floor will be given over to the office of the company and the packing rooms. The upper floors will be arranged for the special storage of certain articles, one floor being divided into 36 special compartments with steel doors in the case of private individuals. The construction will be fire proof throughout. There will be two elevators and steam heat. The exterior of the building will be faced with stock brick. Plans will be ready for figures on May 6th.

Contracts Awarded.

Portland, Ore.—Warehouse and shop, 2 story and base, reinforced concrete, \$60,000. Architect, D. C. Lewis, Portland. Owners, Portland Gas and Coke Co., Contractors, Huxley-Mason Co., Portland. Contract price, \$60,000.

FIRE HOUSES AND JAILS.

Contracts Awarded.

Portland, Ore.—Fire houses, 2, 2 story and base, brick. Cost not stated. Architect's name not given. Owners, City of Portland. Contractors, Steele & Berelson, Portland. Contract price, \$23,400 each. There will be three stations erected, one each at Rose City Park, Kenton and Woodlawn.

FLATS.

San Francisco.—Flats, 1 story and base, frame, \$15,000. Architect, Gasper, Pacific Bldg., S. F. Owner, Mrs. Sanbauer, 325 25th St., S. F. The building will contain 36 flats of four and five rooms each with baths. The interior finish will be of pine and redwood throughout. There will probably be a central heating plant. Gas grates will also be used. The mantels will be of tile. The exterior of the building will be covered with shiplap. The architect is now completing the working drawings.

San Francisco.—Flats, 3 story and base, frame, \$2,000. Architect, none. Owner, A. Briss, 525 Vallejo St., S. F. The building will cover a lot 22½x42 feet and will contain three small flats of four and five rooms each. There will be baths and modern plumbing. The interior will be finished in redwood throughout. There will be open air porches. The exterior of the building will be covered with rustic and shiplap. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Flats and store, 3 story and base, frame, \$7,000. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owner, J. J. McKeegan. The building will be arranged for a store on the first floor and two modern flats of five and six rooms on the upper floors. The interior of the flats will be finished in pine throughout. The exterior of the building will be covered with rustic. The plans are complete and figures are being taken by the architect.

Oakland, Cal.—Flats, 2 story and base, frame, \$3,000. Architect, none. Owner, E. Howell, 470 26th St., Oakland. The building will cover an area of 20x45 feet and will contain two flats of five and six rooms each and baths. The interiors will be finished in pine and redwood. There will be open fire places and tile mantels. The exterior of the building will be covered with rustle. The plans are in the hands of the owner and figures on the work are being taken.

Stockton, San Joaquin Co., Cal.—Flats, 2 story and base, frame, \$19,000. Architect, Walter King, Elks' Bldg., Stockton. Owner, J. M. Meeker. The two buildings will each contain four flats of five and six rooms each. The interior will be finished in pine throughout. There will be open fire places and tile or brick mantels. The tile will also be used in the kitchens. The exteriors of the buildings will be covered with rustle and shiplap. The architect is preparing the plans.

GARAGES.

Los Angeles, Cal.—Garage, 2 story and base, reinforced concrete. Cost not stated. Architects, Morgan, Wallis & Morgan, Story Bldg., L. A. Owner, Mrs. S. H. Van Nuy. The building will be 10x15 1/2 feet and has been designed for a commercial garage. The display room will be 5x15 1/2 feet, with the office finished in oak and the floor of tile. The construction will be fire proof throughout with metal sash and doors. The exterior of the building will be faced with cement plaster. The plans provide for two additional stories. The plans are complete and figures will be taken at once.

Contracts Awarded.

Seattle, Wash.—Garage, 2 story and base, brick and steel, \$25,000. Architect, Charles Haynes, Melhorn Bldg., Seattle. Owner, T. A. Davies. Contractors, Finne & Gjarde, Northern Bank Bldg., Seattle. Contract price, \$25,000.

GOVERNMENT WORK AND SUPPLIES.

GOVERNMENT BIDS OPENED. AWARDS FOR CONSTRUCTION MATERIALS.

The following awards have been made by the quartermaster general, U. S. Army, for furnishing building material for delivery at Honolulu, H. T., bids for which were opened:

Plumbing Material, Etc.
Crane Co., Chicago, Ill., delivery on dock at Honolulu, including freight, class A soil pipe, \$6,531.81; class B, water pipe, \$1,492.58, class C, plumbing fixtures, \$26,977.74, class D, 12 garbage burners, \$1,617; class E, 12 hot water tanks, \$873.60, total, \$36,522.73.

Structural Steel, Reinforcing Rods, Etc.
U. S. Steel Products Co., New York City, class E, structural steel, 4,620 lb., 1 ft. 2x2 1/2 in., angle, 400 lb. 1 ft. 3x3 in., flat, 1,620 lb. 1 ft. 3-in. channel, 4-1b; 1-000 lb. 1 ft. 6-in. channel, 8-1b; 43,456 lb. at \$1.00 per 100 lbs., total, \$43,456. 160 pieces 2 1/2 in. channel, 16 ft. long, \$52.00, 60 pieces 2 1/2 in., 20 ft. long, \$24.87; 21 pieces 1 1/2 x 1 1/2 x 1/2 in., angle, 20 ft. long, \$8.98, 20 lbs square nuts for 3/4 in. bolts, \$13.26, 6,260 lbs 3/4 in. machine bolts at 41.2c, total \$281.11; 450 lbs 3/4 in. lag bolts, \$9.95, total class E, \$1,080.21; class F, reinforcing rods,

109,500 lbs 1 in. square, \$1,294.50; 212,200 lbs 3/4 in. square, \$2,331.20, 226,600 lbs 3/4 in. square, \$2,768.50; 217,000 lbs 5/8 in. round, \$2,387; 23,300 lbs 1/2 in. round, \$256.30, 27,700 lbs 1/2 in. round, \$100.57; 116,000 sq. ft. 58 in wide, \$1,257.42; 116,000 sq. ft. 58 in wide, \$1,257.42, delivery as above.

Class II—Metal.

Northwestern Expanded Metal Co., Chicago, Ill., 72,480 sq. yds. D14, 24-gauge, \$8,657.60; delivery f. o. b. cars at factory, material to be shipped B-L to the constructing quartermaster at Honolulu.

Cement and Lime.

All bids rejected.
Steel Plates for Water Pipe for Schofield Barracks.

In view of the fact that the water supply for Schofield Barracks has not yet been definitely settled, it has been decided not to make award at present, but in case the construction of the water system is authorized it is recommended that the bid of the U. S. Steel Products Co. be accepted.

Structural Steel for Officers' Quarters.

Berger Mfg. Co., Canton, Ohio, for six field officers' quarters, \$5,508; for 23 double sets company officers' quarters, \$30,292.68.

ELECTRIC APPARATUS.—Abstract of proposals, electrical apparatus, Truckee-Carson project, reclamation service, bids opened at Los Angeles:

Pittsburgh Transformer Co., Pittsburgh, Pa., item 1, \$525 ea; 2, \$498 ea. Crocker-Wheeler Electric Co., Amherst, N. Y., item 1, \$745 ea; 2, \$136.66 ea. Moloney Electric Co., St. Louis, Mo., item 1, \$605 ea; 2, \$420 ea.

Allis-Chalmers Co., Los Angeles, Cal., item 1, \$636.66 ea; 2, \$476.66 ea; 3, \$945; 4, \$805.

Westinghouse E. & M. Co., Los Angeles, Cal., item 1, \$666.66 ea; 2, \$438.33 ea; 3, \$937; 4, \$772.

Wagner Electric Mfg. Co., St. Louis, Mo., item 1, \$734 ea; 2, \$325 ea.

General Electric Co., Schenectady, N. Y., item 1, \$800 ea; 2, \$412.33 ea; 3, \$1,237; 4, \$915.

H. W. Johns-Manville Co., Los Angeles, Cal., item 3, \$1,700.

PUMPS, Valves, ETC.—Abstract of proposals, centrifugal pumps, check valves, etc., Boise project, reclamation service, bids opened at Los Angeles, Cal.:

Byron Jackson Iron Works, Los Angeles, Cal., \$1,252.

Krogh Mfg. Co., San Francisco, Cal., \$1,342.

BUILDING.—The following bids were received by the commissioner of Indian Affairs, Washington, D. C., for the erection of a brick hospital building at the Mohai Indian School, Ariz.:

Mosser & Rice, Los Angeles, Cal., \$18,250; alternates \$16,000; time, 150 days.

W. D. Lovell, Minneapolis, Minn., \$12,000; time, 240 days.

HALLS & SOCIETY BLDGS.

San Francisco.—Armory, 4 story and base, Class A construction, \$500,000. Architects, State Engineering Dept.,

Sacramento. Owners, State of California. This work has been mentioned here a number of times before. Plans for the foundation work, excavating and grading are now complete and figures for the same are to be opened by the State Engineer on May 23rd. Plans are on file at the State Engineer's office in Sacramento and also at this office, 1325 Mission St., S. F.

Oakland, Cal.—Auditorium, Class A construction, \$500,000. Architect, City Architect, J. J. Donovan, City Hall Annex, Oakland. Owners, City of Oakland. The plans for this building have just been started. The City Attorney has given an opinion clearing the site of all legal obstacles and the work will be rushed to an early completion. The plans have not progressed far enough to give any detailed description of the work, but as soon as the preliminary work is complete a description will be published.

Los Angeles, Cal.—Lodge hall, 1 story and base, brick. Cost not stated. Architect, S. Elden Norton, Title Insurance Bldg., L. A. Owners, Corona Parlor, N. S. G. W. The building will contain a large social hall, banquet room and kitchen. The exterior of the building will be faced with cement plaster. The interior will be finished in pine and hardwood with hardwood floors. The plans are being prepared.

Seattle, Wash.—City hall addition, brick and steel, \$10,000. Architect, Superintendent of Buildings R. H. Ober, Seattle. Owners, City of Seattle. This work has been mentioned here before. The plans are now complete and bids are being taken. The addition will consist of one story to the present building, and the new portion will be used as a dormitory for the nurses. The exterior will be faced with pressed brick and terra cotta.

Redondo, Los Angeles Co., Cal.—Lodge hall and stores, 2 story and base, brick. Cost not stated. Architects, Gentry & Scholtz, Byrne Bldg., L. A. Owner, R. D. Meyers. The building will be 50x80 feet and will contain two stories on the first floor, lodge rooms, banquet hall and social rooms on the second floor. The exterior will be faced with Redondo sand brick. The plans are complete and the work will be done by Day Labor.

HOSPITALS.

Tropic, Los Angeles Co., Cal.—Sanitarium, 1 and 2 story and base, cement block construction. Cost not stated. Architect, Walter Welner, Ferguson Bldg., L. A. Owner, Dr. Dana B. Rockwell. The building will cover an area of approximately 100 square feet. There will be 20 rooms, 8 bath rooms and a completely equipped kitchen. The interior of the building will be finished in pine with maple floors throughout. There will be steam heat. The exterior will be of cement blocks. The plans will be completed at once and the work will be done by Day Labor.

Oxnard, Ventura Co., Cal.—Hospital, 2 story and base, semi-fire proof construction. Cost not stated. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Sisters of Mercy. The building details have not been fully decided upon and the architect is now preparing sketches which are to be submitted to the owners for approval. The same architect has just awarded a contract to Thomas Caroli of Oxnard for the construction of a temporary

bangalow style hospital for the Sisters of Mercy, which is to be put to use until the completion of their permanent structure.

HOTELS.

San Francisco—Hotel addition, 4 story and base, brick and steel, \$350,000. Architects, William Curlett & Son, Phelan Bldg., S. F. Owners, James P. Phelan. This work will be in the nature of an addition to the Argonaut Hotel and when complete will contain about 150 rooms, a large per cent of which will have connecting baths. There will be steam heat and elevator service. The interior will be finished in pine and hardwoods. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

San Francisco—Hotel, 5 story and base, brick and steel, \$25,000. Architects, Cunningham & Follett, First National Bank Bldg., S. F. Owners, Greninger Estate. The building will contain in the neighborhood of 110 rooms, a large number of which will have connecting baths. There will be steam heat and elevator service and a vacuum cleaning system. Running water, both hot and cold, will be provided for all rooms. The exterior of the building will be faced with white Medusa cement plaster. The steel contract and the foundation work have been awarded. The architects are taking figures on the balance of the work.

San Francisco—Hotel addition, 1 story and base. Class A construction. Cost not stated. Architects, Bliss & Paville, Balboa Bldg., S. F. Owners, San Francisco Hotel Co. This building will be erected for the St. Francis Hotel on the property recently transferred from Templeton Crocker to the company, and in the third addition made to the big hotel in the past few years. The foundations and walls will be heavy enough to support a twelve-story building. The upper floors will be arranged for large family apartments, as has been stated here before. The style of architecture will be similar to the present structure. Plans are being completed as rapidly as possible and figures will be called for shortly.

Long Beach, Los Angeles Co., Cal.—Hotel, 10 story and base, reinforced concrete. Cost not stated. Architect, L. S. Munson, Central Bldg., L. A. Owners, M. P. Thyne and associates of L. A. The architect has just been commissioned to prepare the plans and none of the details of the building have been determined upon as yet. It is reported that A. L. Dutro of Long Beach will have charge of the general construction. As soon as more complete details of the work are obtainable they will be published in these columns.

Los Angeles, Cal.—Hotel and stores, 3 story and base, brick. Cost not stated. Architect, S. Tilden Norton, Title Insurance Bldg., L. A. Owner, Mrs. J. Gans. The building will be 79x300 feet. There will be four stores on the first floor and about 70 rooms on the upper two floors. There will be steam heat and running water has been provided for all rooms. The exterior of the building will be faced with pressed brick. The plans are complete and figures will be taken at once.

LIBRARY.

Upland, San Bernardino Co., Cal.—Library, 1 story and base, brick, \$10,000. Architect, Homer W. Glidden, Wright and Callender Bldg., L. A. Owners, City of Upland. The building has been designed in the classic style, and will be 16x30 feet. There will be the general reading room, office, public room and stack rooms. There will be oak floors. The exterior of the building will be faced with pressed brick. The plans are complete and the architect will call for figures at once.

RAILROAD CONSTRUCTION—STATIONS AND EQUIPMENT.

Spokane, Wash.—Station, 2 story and base, Class A construction, \$100,000. Architect's name withheld. Owners, Oregon-Washington Railroad and Navigation Co. and the Chicago, Milwaukee and Puget Sound R. R. Co. The announcement has just been made that these two railroads have acquired property to the value of \$1,350,000 in Spokane on which will be erected a union depot. None of the details of the transaction have been made public except the estimated cost of the new building, which has been placed at \$100,000.

RESIDENCES.

San Francisco—Residence, 5, 2 story and base, frame, \$2,000 each. Architect, none. Owners, Reinhardt, L. & P. Co. No. 1949 17th St., S. F. Each of the dwellings will contain six rooms and bath. The interior finish will be of pine and redwood. There will be open fire places with tile mantels in the living rooms. The exteriors of the houses will be covered with shiplap and rustic. The plans are complete and in the hands of the owners and the work will be done by Day Labor.

San Francisco—Residence, 2 story, attic and base, frame, \$12,000. Architects, McNally & McCaw, Mechanics' Institute Bldg., S. F. Owners, S. A. Horn Building Co. The building will contain 12 rooms and 3 baths. The interior will be handsomely finished in pine, redwood, mahogany and enamel, with imported tapestry walls. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with pressed brick veneer and cement plaster. When the plans are complete the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, J. O'Donnell, 123 Bivard St., S. F. The dwelling has been designed for a six room house with bath. The interior will be finished in pine and redwood. There will be open fire places with tile or brick mantels. The exterior of the dwelling will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 2 story, attic and base, frame, \$10,000. Architects, McNally & McCaw, Mechanics' Institute Bldg., S. F. Owners, E. E. Horn Building Co. The dwelling has been designed for a ten-room house with all modern conveniences. The interior finish will be of oak, pine and white enamel. There will be hardwood floors

throughout. There will be furnace heat and open fire place. The mantels will be of tile or brick. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, J. H. Beshoff, 319 62nd St., Oakland. The dwelling has been designed for a seven-room house with bath. The interior finish will be of pine and redwood with some oak floors. There will be furnace heat and open fire places. The mantels will be of tile or brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$1,500. Architect, none. Owner, A. G. Elford, 1512 Broadway, Oakland. The dwelling has been designed for a seven-room house with bath. The interior finish will be of pine, redwood and hardwood. There will be hardwood floors in the principal rooms. The dwelling will be heated by a furnace. There will be open fire places with tile or brick mantels. Tile will be used in the bath and kitchen. The exterior of the house will be covered with cement plaster on metal lath. The work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect, none. Owners, E. M. Spock, 6565 Shattuck Ave., Berkeley. The dwelling will contain six rooms and bath. The interior trim will be of pine and redwood. There will be some oak floors. There will be a large open fire place in the living room with tile or brick mantel. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, F. M. Sparks, 6565 Shattuck Ave., Oakland. The dwelling has been designed for a six-room bungalow. The interior trim will be of redwood throughout. There will be open fire places and tile mantels. The exterior of the house will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$2,500. Architect, none. Owners, Penko-Munroe Co., 2635 Shattuck Ave., Berkeley. The dwelling has been designed for a six-room house with bath. The interior will be finished in pine throughout. There will be some oak floors. There will be a large open fire place in the living room with brick mantel. The exterior of the dwelling will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalows, 10, 1 story and base, frame, \$1,800 each. Architect, John Anderson, Oakland. Owner, L. W. Jefferson, Oakland Bank of Savings, Oakland. Each of the ten dwellings will contain six rooms and bath. The interior finish will be of pine and redwood. There will be open fire places and tile mantels. The exteriors of the bungalows will be covered with cement plaster. When the plans are com-

photo the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$3,000. Architect, C. B. Eason, 470 12th St., Oakland. Owner, Mrs. A. E. Armstrong. The dwelling has been designed for an eight-room house with baths. The interior will be finished in redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick and tile. The tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$10,000. Architect, Frank Turreman Swain, Mutual Bank Bldg., S. P. Owner, Alpha Lambda Chapter of the Phi Kappa Sigma Fraternity. The dwelling will contain sixteen rooms and two baths. There will be furnace heat and open fire places. The interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be shower baths. The exterior of the dwelling will be covered with shingles. The plans are complete and out for figures.

Oakland, Cal.—Residence, 2 story and base, frame, \$2,000. Architect, E. M. Brown, Bacon Bldg., Oakland. Owner, Hammond Marsh. The dwelling has been designed for a seven-room house with bath. The interior finish will be of pine throughout. The floors of the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the house will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, \$2,500. Architect, none. Owners, Co-operative Building and Investment Co., Oakland. The dwelling will contain six rooms and bath. The interior finish will be of pine and redwood. There will be open fire places and tile mantels. The exterior of the building will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owners, Peake-Munroe Co., 2025 Shattuck Ave., Berkeley. The dwelling has been designed for a seven-room house with bath. The interior finish will be of pine with some hardwood floors. There will be furnace heat and tile or brick mantels. The exterior of the dwelling will be finished in cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,700. Architect, none. Owner, Edward Olsen, 29 Westall Ave., Oakland. The dwelling will contain six rooms and bath. The interior will be finished in redwood. There will be open fire places and tile mantels. The exterior of the bungalow will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect, none. Owners, Co-operative Building and Investment Co., Oakland. The dwelling will contain six rooms and bath. The interior finish will be of pine throughout. There will be open fire places and tile or brick mantels. The

exterior of the house will be covered with rustic. The plans are in the hands of the owners and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, \$2,800. Architect, none. Owner, John Wilf, 2022 Ellis St., Berkeley. The dwelling will contain six rooms and bath. The interior finish will be of pine. There will be open fire places and tile or brick mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalows and residences, 5, 1 and 2 story and base, frame, \$2,800 to \$5,000. Architect, Sidney H. Newsum, Nevada Bank Bldg., S. P. Owner, Fred Peake. These dwellings will be erected on a tract recently purchased by the owner, and are but a small portion of the improvements contemplated. The dwellings will contain from five to eight rooms and baths each. There will be furnace heat in some and all will have open fire places. The exteriors will be covered with cement plaster and shingles. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect, none. Owner, J. R. Christenson, Oakland. The dwelling has been designed for a five-room house with bath. The interior finish will be of pine with some oak floors. There will be open fire places and brick mantels. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

San Mateo, San Mateo Co., Cal.—Bungalow, 1 story and base, frame. Cost not stated. Architect, J. Cooper Corbett, Union Oil Bldg., L. A. Owner, J. W. Edmonson, care Staats & Co., S. F. The dwelling will be 7x5½ feet, and will contain 7 rooms and 3 baths. The interior will be finished in pine with hardwood floors throughout. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with shakes. The plans are complete and figures are being taken.

Stockton, San Joaquin Co., Cal.—Bungalow, 1 story and base, frame, \$2,500. Architect, R. P. Morrill, Yosemite Theatre Bldg., Stockton. Owner, Frank Tucker. The dwelling has been designed for an eight-room house with bath. The interior will be finished in pine with some hardwood floors. There will be furnace heat and open fire places. The mantels will be of brick or tile. The tile will be used in the kitchen. The exterior of the house will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1½ story and base, frame, \$3,000. Architect, none. Owner, W. E. Boyd, Oakland. The dwelling will contain seven rooms and bath. The interior will be finished in pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile or brick. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1½ story and base, frame, \$3,500.

Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, S. B. Mitchell. The dwelling will contain six rooms and bath. There will be furnace heat and open fire places. The mantels will be of brick. The interior trim will be of pine and redwood. There will be some hardwood floors. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the architect is taking figures on the work.

Oakland, Cal.—Residence, 2 story and base, frame, \$6,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, James M. Hunt. The dwelling will contain ten rooms and bath. The interior finish will be of redwood with some hardwood veneer and oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile. The tile will be used in the baths and kitchen. The exterior of the house will be finished in rustic. The architect is now preparing the working drawings.

Berkeley, Alameda Co., Cal.—Residence alterations, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, James M. Hunt. The work will include the complete rearrangement of the interior of the dwelling, new plumbing, heating and electric work. There will also be considerable changes made in the exterior of the house. The plans are being prepared.

Stockton, San Joaquin Co., Cal.—Bungalow, 1½ story and base, frame, \$3,750. Architect, none. Owner, John Moore, 15 So. California St., Stockton. The dwelling has been designed for a seven-room house with bath. The interior finish will be of pine and redwood with some hardwood floors. There will be open fire places and tile or brick mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

◆ SCHOOLS ◆

Riverdale, Fresno Co., Cal.—School, 1 story and base, frame. Cost not stated. Architects, A. C. Swartz & Son, Fresno. Owners, Riverdale School District. The building will contain two class rooms. There will be no heating system. The exterior will be covered with rustic. The plans are complete and bids will be opened on May 9th.

Visalia, Tulare Co., Cal.—School reconstruction, brick and concrete, \$50,000. Architect, Mervin L. Weaver, Holt Bldg., Visalia. Owners, Visalia School District. The building which was recently destroyed by fire is to be reconstructed at once together with an addition. The plans for the work are complete and show a thoroughly modern High School. Bids are now being taken and will be opened by the Board of Education on May 25th. Charles T. Pool is the Clerk. Plans can be secured from either the architect or the Clerk of the Board of Education at Visalia.

Berkeley, Alameda Co., Cal.—Building, partitions, wood and metal furniture for college building. Cost not stated. Architect, John Galen Howard, 601 Mission St., S. F. Owners, Regents of the University of California. Bids for the above mentioned work will be

received by the Board of Regents on May 9th. Plans and specifications can be had from the architect.

Newport Beach, Orange Co., Cal.—School, 1 story and base, brick, \$12,000. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Newport Beach School District. The building will contain four class rooms and auditorium with a seating capacity of 300. The plans have been approved by the School Board and bids are now being called.

Redondo Beach, Los Angeles Co., Cal.—School, 2 story and base. Cost not stated. Architect, L. E. Pemberton, Auditorium Bldg., L. A. Owners, City of Redondo Beach. The building will cover an area of 72x156 feet. There will be 16 standard sized class rooms and an auditorium seating 600 people. The exterior of the school will be faced with pressed brick. The plans are complete and bids for the general construction are now being taken. Separate bids will be considered for the heating and ventilating. Bids will be opened on May 17th. Plans may be secured from the architect.

Los Angeles, Cal.—Schools, 2, 2 story and base, brick and concrete construction, \$10,000 and \$60,000. Architects as follows. Owners, City of Los Angeles. Architect, Frank G. Krueker, Ferguson Bldg., L. A. commissioned to prepare plans for a 16-room school to be erected at McKinley and 52nd Sts., to cost \$60,000, and Architect George F. Costerian, California Bldg., L. A., commissioned to prepare plans for a 12-room school to be erected at Wadsworth and 28th Sts., to cost \$10,000. Plans for both buildings, which are to be of semi-fire proof construction, will be prepared at once.

Contracts Awarded.

Le Grande, Merced Co., Cal.—School, 2 story and base, frame and concrete, \$25,000. Architects, A. C. Swartz & Son, Fresno. Owners, Le Grande School District. Contractor, John Hoffman, Madera. Contract price, \$25,000.

Van Nuys, Los Angeles Co., Cal.—School, 2 story and base, brick and concrete. Cost not stated. Architect, A. C. Smith, 357 So. Broadway, L. A. Owners, Van Nuys School District. Bids for the general construction were opened as follows: Geo. C. Parsons, Van Nuys, bid for the building complete, except plastering of rear wall, \$45,650; Ye Planny, Los Angeles bid for the building complete, providing seventeen changes were made in the specifications, \$45,840; W. S. Dambenspeck bid \$41,500 for the building complete, except the plumbing, heating and painting; if the second floor is left unfinished deduct \$1,500; The Klug Co. bid \$49,877 for the building complete.

SEWERS, STREET WORK AND WATER SYSTEMS

Orange, Orange Co., Cal.—Pumping plant, 1 story and base, reinforced concrete. Cost not stated. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, City of Orange. The building will be 40x50 feet and 20 feet high. The interior will be arranged for the machinery and will be finished in pine and tile. The exterior of the building will be faced with cement plaster. The plans are being prepared.

Seattle, Wash.—Stand pipe, steel and concrete construction, \$30,000. City Engineering Dept., Seattle. Owners,

City of Seattle. The plans are being prepared for a stand pipe containing one million gallons. Work will be undertaken as soon as a site can be obtained for the structure. Supt. Young, of the Seattle Water Dept., is handling the matter.

STORES & OFFICE BUILDINGS.

San Francisco.—Stores and lofts, 2 story and base, steel and reinforced concrete. Cost not stated. Architects, Falkow & Brown, 117 Montgomery St., S. F. Owners, Regents of the University of California. The building will be erected on a lot 68x137 feet. There will be stores on the first floor and lofts above. There will be a complete steel frame, reinforced concrete walls and floors, steam heat, elevator service and a water proof basement. The exterior of the building will be faced with cement plaster. Plans are complete and bids will be opened on May 18th.

Bilbush, Ore.—Stores and offices, 2 story and base, brick. Cost not stated. Architect, Ernest Kroner, Portland. Owners, W. H. Wehring and associates. The building will be 50x76 feet. There will be four stores on the first floor and eight or nine offices on the upper floor. The interior will be finished in pine. There will be steam heat. The exterior of the building will be faced with pressed brick. The plans will be complete and ready for figures on May 15th.

Los Angeles, Cal.—Stores and lofts, 7 story and base, reinforced concrete. Cost not stated. Architects, Eisen & Son, Wilcox Bldg., L. A. Owner, Emil Glevich. The plans thus far prepared have been only tentative. The building is to have a frontage of 25 feet. The upper floors will be arranged for lofts. There will be steam heat and elevator service. A tenant is negotiating for the building, and as soon as final arrangements are perfected the work will proceed.

Contracts Awarded.

San Francisco.—Stores and lofts, 5 story and base, reinforced concrete, \$25,000. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, Fred Hess, Contractors, Williams Bros. & Henderson, Monadnock Bldg., S. F. Contract price, \$25,000.

San Francisco.—Store and lofts, 4 story and base, brick. Cost not stated. Architects, Smith & Stewart, 214 Kearny St., S. F. Owners, Chinese Tong Contractors, Brandt & Stevens, 402 Kearny St., S. F. Contract price not stated.

THEATRES.

San Jose, Santa Clara Co., Cal.—Theatre and store, 1 story and base, reinforced concrete. Cost not stated. Architect, William Binder, Rea Bldg., San Jose. Owners, Jefferson Realty Co. The building will cover a large ground area and is to be fire proof in construction. There will be one store besides the theatre. The theatre proper will have a seating capacity of about 900 people. The interior will be handsomely finished. There will be a modern system of ventilation. The exterior of the building will be faced with cement plaster. The architect is now preparing the working drawings.

GOVERNMENT WORK AND SUPPLIES.

The Secretary of the Interior has authorized the Reclamation Service to arrange for the construction of dams to create two storage reservoirs in connection with the North Platte irrigation project, Nebraska-Wyoming. The general plan for the development of the canal system includes the construction of three supplemental storage reservoirs along the Interstate Canal, about nine miles northeast of Scottsbluff, Neb., known as reservoirs 1, 2 and 3. They are to receive their water from the main canal and are to feed lateral systems covering about 46,000 acres. Work on the project has now advanced to a point where it is necessary to construct the dams for reservoirs 1 and 2. Dam No. 1 will be an earth embankment with a top length of about 3,100 feet and a maximum height of 28 feet, and will contain approximately 175,000 cubic yards of material. The excavation for the spillway channel will amount to about 85,000 cubic yards. All excavation and hauling of material for spillway and embankment is to be let by contract, and the remainder of the work will be done by Government forces. The total cost of this construction is estimated at \$120,000. Reservoir No. 2, known as Lake Minatare, is the largest of the three and will have a capacity sufficient to supply about 30,000 acres of land. Plans and specifications have been prepared for the construction of an earth dam for this reservoir, which will be 3,700 feet long, with a maximum height of 65 feet and containing about 340,000 cubic yards of material. It is proposed to construct this dam under contract, the total cost of the work being estimated at \$610,000.

The Isthmian Canal Commission has received requisitions from the Isthmian requesting the purchase of the following material and supplies:

5,000 ft. stage cable, rubber covered.
500 ft. 3-conductor cable, No. 4.
500 ft. single-conductor cable, No. 6.
100 searchlight carbons, corded.
100 searchlight carbons, solid.
2,500 dry battery cells, No. 6.
1,600 dry battery cells, No. 8.
12 prs. Klein's havens' clamps, No. 36S.
12 prs. splicing clamps.
12,500 ft. galvanized conduit.
100 cored carbons.
23,000 ft. lampcord.
7,000 ft. packing house cord.
18 sheets red vulcanized rubber.
2,025 fuses.
1,500 brass key sockets.
1,000 lbs. solder.
132,000 ft. copper wire.
600 lbs. copper magnet wire.
8 lbs. resistance German silver wire.
400 coal baskets.
600 wall paint brushes.
400 tons coke.
75 boxes window glass.
800 mop handles.
40 fire hose nozzles.
125 prs. white ash cars.
1,200 lbs. asbestos brass wire insertion packing.
325 lbs. square spiral packing.
300 lbs. square flax packing.
1,000 lbs. chrome yellow, in oil.
1,000 gals. black jacket enamel.
A quantity of grades and eye beams of various lengths with a total weight

of 3,443,520 lbs.

A quantity of angles and connecting plates, with a total weight of 98,950 lbs.

A quantity of 5-inch button-head rivets, total weight of 25,065 lbs.

540 ft. vitrified sewer pipe.

35 vitrified elbows.

750 sheets galvanized sheet steel.

15 gate valves.

A number of parts for Stillson wrenches as follows: 436 frames; 250 jaws, 280 nuts; 529 pins; 366 springs.

50 3-inch globe valves.

SEALED PROPOSALS.

NOTICE TO CONTRACTORS.

(Bids close May 21.)

NOTICE is hereby given that sealed proposals will be received by the Department of Engineering of the State of California on May 23d, 1912, for the construction of the grading, excavating and certain foundation work for the San Francisco Almshouse Building, to be erected in the City of San Francisco in accordance with the plans and specifications for the same as prepared by the Department of Engineering at Sacramento, California, and on file at the Office of the Daily Pacific Builder and Building and Industrial News, at 1325 Mission street, San Francisco, or at the office of the State Engineer at Sacramento.

For further information regarding this work address the State Engineer, Sacramento.

PROPOSALS OR SCREENS.

(Bids close May 21.)

WINDOW AND DOOR SCREENS—Office of Quartermaster, Presidio of San Francisco, Cal.—Sealed proposals for window and door screens for certain barracks and quarters at Presidio of San Francisco, Cal., and at Ft. Winfield Scott, Cal., will be received here until 11 a. m., May 21, 1912, and then opened. Information furnished on application. Envelopes containing proposals should be indorsed "Proposals for Window and Door Screens," and addressed to Major K. J. HAMPTON, quartermaster.

PROPOSALS FOR CONCRETE WORK.

(Bids close May 16.)

BRIDGE AND CONCRETE WORK—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service at Provo, Utah, until 2 o'clock p. m., May 16, 1912, for the construction of a reinforced concrete drop chute, and abutments for two bridges on Indian Creek and Trail Hollow diversion canal, located in Wasatch county, Utah, about 35 miles northeast of Thistle, Utah. The work involves the excavation of approximately 4,500 cubic yards of earth and rock and the placing of 875 yards of concrete and 225 square yards of paving. For further particulars address the U. S. Reclamation Service, Provo, Utah, or Washington, D. C. F. H. NEWELL, Director.

PROPOSALS FOR PIPE AND TUNNEL LININGS.

(Bids close May 16.)

PIPE AND TUNNEL LININGS—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at

the office of the United States Reclamation Service, 605 Federal Building, Los Angeles, Cal., until 2 o'clock p. m., May 16, 1912, for furnishing cast-iron pipe and tunnel linings for the North Platte project, Nebraska-Wyoming. For particulars address the U. S. Reclamation Service, 605 Federal Building, Los Angeles, Cal., or Washington, D. C. F. H. NEWELL, Director.

PROPOSALS FOR EARTHWORK.

(Bids close May 21.)

CONCRETE, LUMBER AND EXCAVATION—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Malta, Mont., until 2 o'clock p. m., May 21, 1912, for earthwork and structures on the first eleven miles of Dodson north canal, laterals and waste water ditches. The work involves approximately 277,000 cubic yards of excavation, 1,500 yards of reinforced concrete, and the placing in structures of 86,000 feet, B. M., of lumber. For particulars address the U. S. Reclamation Service, Washington, D. C.; Helena, Mont., or Malta, Mont. F. H. NEWELL, Director.

PROPOSALS FOR EXCAVATING.

(Bids close May 21.)

EXCAVATION, ETC.—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Malta, Mont., until 2 o'clock p. m., May 21, 1912, for the construction of laterals, waste water ditches, and structures on the first unit, Dodson south canal, Milk River project, Montana. The work involves the excavation of approximately 67,000 cubic yards of material and the erection of six small structures. For particulars address the U. S. Reclamation Service, Washington, D. C.; Helena, Mont., or Malta, Mont. F. H. NEWELL, Director.

CONSTRUCTING CONCRETE INTAKE.

(Bids close May 16.)

BRIDGE AND INTAKE STRUCTURES—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service at Provo, Utah, until 2 o'clock p. m., May 16, 1912, for the construction of concrete canal intake structures and concrete bridges on Indian Creek and Trail Hollow diversion canal, located in Wasatch county, Utah, about 35 miles northeast of Thistle, Utah. The work involves the excavation of approximately 2,650 cubic yards of earth and rock, and the placing of 560 cubic yards of concrete, 260 cubic yards of paving and a set of sluice gates and miscellaneous steel. For particulars address the U. S. Reclamation Service, Provo, Utah, or Washington, D. C. F. H. NEWELL, Director.

NOTICE TO CONTRACTORS.

(Bids close May 9.)

THE Trustees of the Summit Lake School District will receive sealed bids for the construction of a school house, out-buildings and fence at the office of A. C. Swartz & Son, architects, Fresno, California, until 11 o'clock a. m., on Thursday, the 9th day of May, 1912. Plans specifications and further in-

formation may be had from the architects, or from C. E. Hoover, Clerk, Riverdale, Cal. The person whose bid is accepted will be required to execute a contract within five days after the awarding of the contract and to give an approved bond as required by law. The Trustees reserve the right to reject any or all bids.

By order of the Board of Trustees.
C. E. HOOVER,
Clerk.

NOTICE TO CONTRACTORS.

(Bids close June 4.)

SEALED proposals will be received at the office of the supervising architect, Washington, D. C., until 3 o'clock p. m. on the 14th day of June, 1912, and then opened, for the construction (including plumbing, gas piping, heating apparatus, electric conduits and wiring, and lighting fixtures) of a two-story and basement building of approximately 6,560 square feet ground area; stucco, faced with stone and terra cotta trimming, for the United States post office at Santa Barbara, Cal., in accordance with drawings and specifications, copies of which may be obtained from the custodian of the site at Santa Barbara, Cal., or at this office, at the discretion of the Supervising Architect. JAMES KNOX TAYLOR, Supervising Architect.

PROPOSALS FOR STAND PIPE.

(Bids close May 8.)

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 8th day of May, 1912, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The furnishing and installing of dry stand pipes in the Lowell High School Building.

Progressive payments will be made.

PROPOSALS FOR STREET WORK.

(Bids close May 13.)

PURSUANT to Statute and to Resolution No. 2313, N. S., of the Council of the City of Oakland, directing this notice, said Council invites sealed proposals or bids for the following street work, to be done according to the plans and specifications for said work posted and on file:

(1) That Harrison street in said city, from the southern line of Fourteenth street to the northern line of Twelfth street (excepting therefrom the crossing of Harrison street with Thirteenth street), and Alice street in said city from the southern line of Fourteenth street to the northern line of Twelfth street (excepting therefrom the crossing of Alice street with Thirteenth street), each be graded, curbed with granite, paved with an asphalt pavement; also that basalt gutters three (3) feet in width be constructed thereon.

Excepting, however, the curb and gutter on the eastern side of Alice street from the northern line of Twelfth street to a line drawn parallel thereto and distant twelve and five-tenths (12.5) feet northerly therefrom. Also excepting the grading of the sidewalks.

Also excepting the curb as follows, to wit: On the eastern side of Harrison street from the southern line of Thirteenth street to a line drawn parallel thereto and distant ninety-five (95) feet southerly therefrom and on the western side of Harrison street from the northern line of Twelfth street to a line drawn parallel thereto and distant ninety-five (95) feet northerly therefrom.

(2) That Champion street from the northern line of Nicol avenue to the southern line of Hopkins street, Palmetto street from the western line of Boston avenue to the eastern line of Champion street and the southern half of Hopkins street, between the lines drawn at right angles to the northern line of Hopkins street at its intersections respectively with the northeastern and southwestern lines of Champion street, each be graded, curbed with redwood, paved with an oil macadam pavement and guttered with concrete gutters three (3) feet in width.

Also that seven (7) culverts of corrugated iron and concrete, each having two (2) branches, be constructed as follows, to wit: One each to the opposite terminations of Palmetto street and Harold street in Champion street, one in the eastern half of the crossing of Montana street with Champion street, and two each in the crossings of Pleasant street and School street with Champion street. Together with other additions and exceptions and in accordance with the official proposals.

Said sealed proposals or bids are to be delivered to the undersigned City Clerk of said City, and Clerk of said City Council, at a meeting of said Council to be held in Council Chamber, City Hall, in said City of Oakland, on May 13th, 1912, between the hours of 11 o'clock a. m. and 12 o'clock m.

PROPOSALS FOR SEWER WORK.

(Bids close May 13.)

PURSUANT to Statute and to Resolution No. 2310, N. S., of the Council of the City of Oakland, directing this notice, said Council invites sealed proposals or bids for the following street work, to be done according to the plans and specifications for said work posted and on file.

(1) That a sewer having an internal diameter of eight (8) inches, be constructed along a line described as follows, to wit: Beginning at a point on the center line of Twenty-fifth avenue distant thirty-seven (37) feet north-easterly from the southwestern line of East Fifteenth street; thence southeasterly, parallel to said southwestern line of East Fifteenth street, to a point distant four hundred twenty-five (425) feet southeasterly from the southeastern line of Twenty-fifth avenue.

Also that a lamphole, having a cast iron top, be constructed at the southeastern terminus of the aforesaid proposed sewer.

Also that "Y" branches, having 5-inch openings, be constructed to the aforesaid sewer so as to provide one such branch for each twenty-five foot lot, and fractional lot remaining, into which the abutting property frontage is capable of being divided.

The aforesaid sewer, "Y" branches and lamphole shall be constructed of first quality, standard sewer pipe.

(2) That Seminary avenue, from a point distant eighteen (18) feet southwesterly from the northeastern line of

East Fourteenth street, to the center line of Walnut avenue, be sewerd along its center line with a sixteen (16) inch sewer.

Also, that Seminary avenue, from the center line of Walnut avenue to the northwestern production of the center line of Camden street, be sewerd along its center line with a twelve (12) inch sewer.

Also that an eight (8) inch sewer be constructed in Seminary avenue along a line described as follows: Commencing at the intersection of the center line of Seminary avenue with the northwestern production of the center line of Camden street; thence north thirty-four degrees forty-three minutes east (N. 34 deg. 13 min. E.) four hundred twelve (112) feet to a point (to be known herein as point one); thence north fifty-seven degrees forty-six minutes east (N. 57 deg. 46 min. E.) five hundred sixty-two (562) feet to a point (to be known herein as point two); thence north forty-five degrees twenty-four minutes east (N. 45 deg. 24 min. E.) two hundred eight (208) feet to a point (to be known as point three); thence north forty-five degrees twenty-four minutes east (N. 45 deg. 24 min. E.) one hundred seventy-two and five-tenths (172.5) feet to a point (to be known herein as point four); thence north forty-five degrees twenty minutes east (N. 45 deg. 20 min. E.) one hundred three and five tenths (103.5) feet to a point (to be known herein as point five); thence north nineteen degrees eleven minutes east (N. 19 deg. 11 min. E.) one hundred twelve (112) feet to a point (to be known herein as point six); thence north twenty-nine degrees thirty-six minutes east (N. 29 deg. 36 min. E.) five hundred three (503) feet to a point (to be known herein as point seven.) Together with other additions and exceptions and in accordance with the official proposal.

(3) That an eight (8) inch sewer be constructed along the center line, and its production where necessary, of each of the following streets or avenues, to wit: East Fifteenth street from the center line of Fifty-seventh avenue to a point distant three hundred ten (310) feet southeasterly from the center line of Fifty-seventh avenue to a point distant three hundred twenty (320) feet southeasterly therefrom; East Sixteenth street from the center line of Fifty-seventh avenue to a point distant two hundred thirty-eight and eighty-six hundredths (238.86) feet northwesterly therefrom; Orion street from the center line of Fifty-seventh avenue to a point distant three hundred twenty (320) feet southeasterly therefrom; East Seventeenth street from the center line of Fifty-seventh avenue to a point distant one hundred ninety (190) feet northwesterly therefrom; Noble street from the center line of Fifty-seventh avenue to a point distant three hundred twenty (320) feet southeasterly therefrom; Vista street from the center line of Fifty-seventh avenue to a point distant three hundred five (305) feet northwesterly therefrom; Edgerly street from the center line of Fifty-seventh avenue to a point distant three hundred twenty (320) feet northwesterly therefrom; Harmon avenue between points distant, respectively, three hundred five (305) feet northwesterly and three hundred twenty (320) feet southeasterly from the center line of Fifty-seventh avenue; Elizabeth street from the center line of Fifty-seventh avenue

to a point distant three hundred twenty (320) feet southeasterly therefrom; Hilton street from the center line of Fifty-seventh avenue to a point distant three hundred five (305) feet northwesterly therefrom; Fifty-fifth avenue from Trask street to a point distant two hundred seventy-nine and seventy-six hundredths (279.76) feet northwesterly from the center line, produced southeasterly, of Lavenue avenue Fifty-seventh avenue from the hereinafter described sewer in Trask street to a point distant two (2) feet southerly from the northern line of Foothill boulevard, Fairview Way from the hereinafter described sewer in Bond street to a point distant two hundred sixty (260) feet northwesterly therefrom.

Also that Fifty-sixth avenue from a point distant eighteen (18) feet measured at right angles southwesterly from the northeastern line of East Fourteenth street to a point distant one hundred fifty (150) feet southwesterly from the southwestern line of East Sixteenth street, be sewerd with an eight (8) inch sewer along a line parallel to and distant twenty-five (25) feet northwesterly from the southeastern line, and its production southwesterly, of said Fifty-sixth avenue. Together with other additions and exceptions and in accordance with the official proposal.

Said sealed proposals or bids are to be delivered to the undersigned City Clerk of said City and Clerk of said City Council, at a meeting of said Council to be held in Council Chamber, City Hall, in said City of Oakland, on May 13th, 1912, between the hours of 11 o'clock a. m. and 12 o'clock m.

NOTICE TO CONTRACTORS.

(Bids close May 16.)

NOTICE is hereby given that the Board of Education of the City of Los Angeles will receive bids for all labor and material for the construction of a ten-room school and auditorium on the Santa Fe Avenue School site, Sixteenth and Santa Fe avenue, in accordance with plans and specifications on file with the secretary of the Board, 726 Security building.

Each bid is to be made out on a form to be obtained at the Secretary's office, must be accompanied by a certified or cashier's check or bidder's bond for 5% of the amount of the bid made payable to the order of the Board of Education of the City of Los Angeles; must be sealed and filed with the Secretary on or before Thursday, May 16, 1912, at 11 o'clock a. m., and will be opened in public during the afternoon of that day.

The board reserves the right to reject any or all bids.

By order of the Board of Education of the City of Los Angeles.

WM. A. SHELTON, Secretary.

NOTICE TO CONTRACTORS.

(Bids close May 14.)

PROPOSALS FOR STONE SCHOOL HOUSE.—Department of the Interior, Office of Indian Affairs, Washington, D. C. Sealed proposals, plainly marked on the outside of the sealed envelope: "Proposals for Stone School House, Western Navajo Indian School, Arizona," and addressed to the Commissioner of Indian Affairs, Washington, D. C., will be received at the Indian office until 2 o'clock p. m. May

14, 1912, for furnishing materials and labor for the erection of a stone school house at Western Navajo Indian School, Arizona, in strict accordance with plans, specifications and instructions to bidders, which may be examined at this office the offices of the Supervisor of Construction, Denver, Colo.; the U. S. Indian Warehouse at San Francisco, Cal., and at the school. For further information apply to the Superintendent of the Western Navajo Indian School, Tuba, Arizona. F. H. ALBERT, Acting Commissioner.

NOTICE TO CONTRACTORS. (Bids close May 18.)

SEALED bids will be received at the Office of the Regents of the University of California, 618 Crocker Building, San Francisco, at or before 10 a. m. Saturday, May 18, 1912, for a building to be built by the Regents of the University of California on First street, near Market street, San Francisco, as per plans and specifications which may be inspected at the office of the architects, Lakewell & Brown, 417 Montgomery street, San Francisco.

Proposals should be made upon proposed blanks obtainable from the above architect. Separate bids will be received for each separate piece of work.

No bid will be received unless accompanied by a certified check or bond in favor of the undersigned equal to 10% of the bid to secure execution of the contract by the successful bidder. The right to reject any or all bids is reserved.

THE REGENTS OF THE UNIVERSITY
OF CALIFORNIA.

NOTICE TO CONTRACTORS. (Bids close May 21.)

SEALED bids will be received at the Office of the Comptroller of the University of California at 10 a. m. on Thursday, the 21st day of May, for the wood furniture and new plumbing, partitions, etc., and for the metal furniture for Agricultural Hall, on the University campus at Berkeley, as per plans and specifications on file in said office.

No bids will be received unless accompanied by a certified check or bond in favor of the undersigned, equal to 10% of the bid to secure execution of the contract by successful bidder. The right is reserved to reject any or all bids.

THE REGENTS OF THE UNIVERSITY
OF CALIFORNIA.

PROPOSALS FOR CONSTRUCTING PIERS.

(Bids close May 27.)

NOTICE is hereby given that sealed proposals will be received up to and including the 27th day of May, 1912, by the City Council of the City of San Diego, California, for the construction of a reinforced concrete pier at the foot of D street in San Diego, in accordance with plans and specifications prepared for the same by City Engineer E. M. Capper. Bids to be received first, for all the work of pier construction including freight sheds and approaches up to Beech street; second, for approaches from Beech to Date street. The pier will be 800 feet long and 120 feet wide, and bonds in the sum of \$1,000,000 have been voted for its construction.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment house—3 story and base, frame, \$19,000. San Francisco. Architect, none. Owner, O. Monson, 1907 Bryant St., S. F. The building will be 53.50 feet. The interior has been arranged in six suites of two and three rooms each with bath. The interior finish will be of pine and redwood. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Apartment House—5 story and base, reinforced concrete, \$65,000. San Francisco. Architects, MacDonald & Applegarth. Cal. Bldg., S. F. Owners, Sierra Investment Co. The building will contain in the neighborhood of 48 apartments arranged in suites of two and three rooms each with connecting bath. There will be steam heat and elevator service. The interior will be finished in pine. There will be wall beds. The exterior of the building will be faced with cement plaster. The plans are complete and the architects are taking figures on the work.

Apartment House—3 story and base, frame, \$15,000. San Francisco. Architects, Hladik and Thayer, Monadnock Bldg., S. F. Owner, William H. Edwards. The building will contain in the neighborhood of 12 apartments of two and three rooms each with private baths. The interior will be handsomely finished in pine and redwood with some hardwood floors. There will be wall beds and steam heat. The exterior of the building will be covered with brick veneer and shiplap. The plans are complete and figures are being taken.

Apartment house—3 story and base, frame, \$20,000. San Francisco. Architect, Milton Litchenstein, 111 Ellis street, S. F. Owner, Joseph Levin. The building will be arranged for 16 apartments of two and three rooms each with baths. The interior will be finished in pine and redwood with some hardwood floors. There will be wall beds and steam heat. The exterior of the building will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Apartment house—3 story and base, frame, \$19,000. San Francisco. Architects, C. M. and A. P. Rousseau, Monadnock Bldg., S. F. Owner, John Dumpnick. The building will contain 6 apartments of two and three rooms each with private baths. The interior trim will be of pine throughout. There will be open fire places tile mantels. The exterior of the building will be covered with brick veneer and cement plaster on metal lath. The plans are complete and in the hands of the owner who will do the work by Day Labor.

Residence—Five 2-story and base, frame, \$2,000 each. San Francisco. Architect, none. Owners, Reinhart 14 and P. M. Co., 1919 15th street, S. F. Each of the dwellings will contain 6 rooms and bath. The interior finish will be of pine and redwood. There will be open fire places with tile mantels in the living rooms. The exteriors of the

houses will be covered with shiplap and rustic. The plans are complete and in the hands of the owner and the work will be done by Day Labor.

Residence—2 story, attic and base, frame, \$12,000. Architects, McNally and McCaw, Mechanics' Institute Bldg., S. F. Owners, S. A. Born Building Co. The building will contain 12 rooms and three baths. The interior will be handsomely finished in pine, redwood, mahogany and enamel with imported tapestry walls. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the baths and kitchens. The exterior of the dwelling will be covered with pressed brick veneer and cement plaster. When the plans are complete the work will be done by Day Labor.

Residence—2 story and base, frame, \$22,000. San Francisco. Architect, none. Owner, J. O'Donnell, 129 Belvedere street, S. F. The dwelling has been designed for a 6 room house with bath. The interior will be finished in pine and redwood. There will be open fire places with tile or brick mantels. The exterior of the dwelling will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Residence—2 story, attic and base, frame, \$16,000. San Francisco. Architects, McNally and McCaw, Mechanics' Institute Bldg., S. F. Owners, S. A. Born Building Co. The dwelling has been designed for a 10-room house with all modern conveniences. The interior finish will be of oak, pine and white enamel. There will be hardwood floors throughout. There will be furnace heat and open fire places. The mantels will be of tile and brick. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Flats—3 story and base, frame, \$25,000. San Francisco. Architect, Gaspard, Pacific Bldg., S. F. Owner, Mrs. Saurbauer, 3225 25th St., S. F. The building will contain 16 flats of four and five rooms each with bath. The interior finish will be of pine and redwood throughout. There will probably be a central heating plant. Gas grates will also be used. The mantels will be of tile. The exterior of the building will be covered with shiplap. The architect is now completing the working drawings.

Flats—3 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, A. Brisa, 525 Vallejo St., S. F. The building will cover a lot 22'x42' feet, and will contain three small flats of four and five rooms each. There will be baths and modern plumbing. The interior will be finished in redwood throughout. There will be open fire places. The exterior of the building will be covered with rustic and shiplap. The plans are complete and the work will be done by Day Labor.

Armory—4 story and base, Class A construction, \$500,000. San Francisco. Architects, State Engineering Dept., Sacramento. Owners, State of California. This work has been mentioned

SCHEME A, PROPOSED CIVIC CENTER
San Francisco

San Francisco Architectural Commission,

SCHEME B, PROPOSED CIVIC CENTER
San Francisco

San Francisco Architectural Commission,

here a number of times before. Plans for the foundation work, excavating and grading are now complete and figures for the same are to be opened by the State Engineer on May 23rd. Plans are on file at the State Engineer's office and also at this office, 125 Mission St., S. F.

Hotel Addition—7 story and base, brick and steel, \$150,000. San Francisco. Architects, William Curlett & Son, Phelan Bldg., S. F. Owner, James L. Phelan. This work has been mentioned here before when the plans were first started. The work will be in the nature of an addition to the Argonaut Hotel, and when complete will contain about 150 rooms, a large per cent of which will have connecting baths. There will be steam heat and elevator service. The interior will be finished in pine and hardwoods. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Hotel—5 story and base, brick and steel, \$35,000. San Francisco. Architects, Cunningham & Pollock, First National Bank Bldg., S. F. Owners, Greninger Estate. The building will contain in the neighborhood of 110 rooms, a number of which will have connecting baths. There will be steam heat, elevator service and a vacuum cleaning system. Running water, both hot and cold, will be provided for all rooms. The exterior of the building will be faced with white Medusa cement plaster. The steel contract and the foundation work have been awarded. The architects are taking figures on the balance of the work.

Hotel Addition—1 story and base, Class A construction. Cost not stated. San Francisco. Architects, Bliss & Paville, Halboa Bldg., S. F. Owners, San Francisco Hotel Co. This building will be erected for the St. Francis Hotel on the property recently transferred from Templeton Crocker to the company, and is the third addition made to the big hotel in the past few years. The foundations and walls will be heavy enough to support a twelve-story building. The upper floors will be arranged for large family apartments as has been stated here before. The style of architecture will be similar to the present structure. Plans are being completed as rapidly as possible and figures will be called for shortly.

Stores and Loft—3 story and base, steel and reinforced concrete. Cost not stated. San Francisco. Architects, Bakewell & Brown, 417 Montgomery St., S. F. Owners, Regents of the University of California. The building will be erected on a lot 68x137 feet. There will be stores on the first floor and lofts above. There will be a complete steel frame, reinforced concrete walls and floors, steam heat, elevator service and a water proof basement. The exterior of the building will be faced with cement plaster. Plans are complete and bids will be opened on May 18th.

Contracts Awarded.

Stores and Loft—5 story and base, reinforced concrete, \$25,000. San Francisco. Architect, C. A. Messendorfer, Humboldt Bank Bldg., S. F. Owner, Fred Hess, Contractors, Williams Bros. & Henderson, Mondrack Bldg., S. F. Contract price not stated.

Stores and Loft—1 story and base, brick. Cost not stated, San Francisco. Architects, Smith & Stewart, 211 Kear-

ny St., S. F. Owners, Chinese Tong. Contractors, Brandt & Stevens, 102 Kearny St., S. F. Contract price not stated.

OAKLAND AND ALAMEDA COUNTY.

Apartment house—1 story and base, frame, \$10,000. Berkeley, Alameda Co., Cal. Architect, C. O. Clausen, Pichen Bldg., S. F. Owner, B. F. Whitton. The building has been designed to contain 6 apartments of 3 rooms and bath each with a sleeping porch. The interior will be finished in pine with hard-wooding will be covered with cement plaster on metal lath. The plans are complete and the architect is now taking figures.

Apartment house—2 story and base, frame, \$15,000. Oakland, Cal. Archi-

tect, I. W. Button, 5918 Telegraph ave., Oakland. Owner, Mr. O'Connell. The building will contain a number of two and three room apartments with connecting baths. The interior will be finished in pine and redwood with some hardwood floors. There will be wall beds, coal grates and steam heat. The exterior of the building will be covered with shingles. The plans are complete and the architect is taking figures on the work.

Church—Class A construction, \$150,000. Oakland, Cal. Architect, Norman F. Marsh, L. A. associated with C. W. Jettall, Central Bank Bldg., Oakland. Owners, First Methodist Church of Oakland. The work has been mentioned here before when the architects were first selected. The working drawings have been completed and placed in the hands of Mr. H. Morton, 14th and Broadway streets, Oakland who will let all contracts. The complete details of the work have not as yet been given out but will be published here as soon as obtainable. Six general contractors have been invited to submit figures on the work and the number will probably be restricted to these.

Residence—1 story and base, frame, \$2,900. Berkeley, Alameda Co., Cal. Architect none. Owner, J. H. Bischoff, 519 62d street, Oakland. The dwelling has been designed for a seven room house with bath. The interior finish will be of pine and redwood with some oak floors. There will be furnace heat and open fire places. The mantels will be of tile or brick. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$1,500. Oakland, Cal. Architect none. Owner, A. G. Elip, 1512 Broadway, Oakland. The dwelling has been designed for a seven room house with bath. The interior finish will be of pine, redwood and some hardwood. There will be hardwood floors in the principal rooms. The dwelling will be heated by a furnace. There will be open fire places with tile or brick mantels. Tile will be used in the bath and kitchen. The exterior of the house will be covered with cement plaster on metal lath. The work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,750. Berkeley, Alameda Co., Cal. Architect none. Owners, Peake-Munroe Co., 2935 Shattuck avenue, Berkeley. The dwelling will contain 6 rooms and bath. The interior trim will be of pine and redwood. There will be some oak floors. There will be a large open fire place in the living room with tile or brick mantel. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,000. Berkeley, Alameda Co., Cal. Architect none. Owner, E. M. Sparks, 6653 Telegraph avenue, Oakland. The dwelling has been designed for a 6-room bungalow with bath. The interior trim will be of redwood throughout. There will be open fire places and tile mantels. The exterior of the house will be covered with brick veneer and shiplap. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,500. Berkeley, Alameda Co., Cal. Architect none. Owners, Peake-Munroe Co., 2935 Shattuck avenue, Berke-

ley. The dwelling has been designed for a 6-room house with bath. The interior will be finished in pine throughout. There will be some oak floors. There will be a large open fire place in the living room with brick mantel. The exterior of the dwelling will be covered with shingles. The plans are complete and the work will be done by Day Labor.

Bungalows—10 1-story and base, frame, \$1,500 each. Oakland, Cal. Architect, John Anderson, Oakland. Owner, L. W. Jefferson, Oakland Bank of Savings, Oakland. Each of the ten dwellings will contain 5 rooms and bath. The interior finish will be of pine and redwood. There will be open fire places and tile mantels. The exteriors of the bungalows will be covered with cement plaster. When the plans are complete the work will be done by Day Labor.

Residence—2 story and base, frame, \$3,500. Oakland, Cal. Architect, E. M. Powell, Bacon Bldg., Oakland. Owner, Hammond Marsh. The dwelling has been designed for a seven-room house with bath. The interior finish will be of pine throughout. The floors of the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the house will be covered with cement plaster. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$2,500. Oakland, Cal. Architect none. Owners, Conservative Building and Investment Co., Oakland. The dwelling will contain six rooms and bath. The interior finish will be of pine and redwood. There will be open fire places and tile mantels. The exterior of the building will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect none. Owners, Peake-Munroe Co., 2935 Shattuck Ave., Berkeley. The dwelling has been designed for a seven-room house with bath. The interior finish will be of pine with some hardwood floors. There will be furnace heat and tile or brick mantels. The exterior of the dwelling will be finished in cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,500. Oakland, Cal. Architect none. Owner, Edward Olsen, 29 Westall Ave., Oakland. The dwelling will contain six rooms and bath. The interior will be finished in redwood. There will be open fire places and tile mantels. The exterior of the bungalow will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,500. Oakland, Cal. Architect none. Owners, Conservative Building and Investment Co., Oakland. The dwelling will contain six rooms and bath. The interior finish will be of pine throughout. There will be open fire places and tile and brick mantels. The exterior of the house will be covered with rustic. The plans are in the hands of the owners and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,800. Berkeley, Alameda Co., Cal. Architect none. Owner, John Wulff, 2932 Ellis St., Berkeley. The dwelling will contain six rooms and bath. The

interior finish will be of pine. There will be open fire places and the brick mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Bungalows and Residences—5, 1 and 2 story and base, frame, \$2,500 to \$5,000. Berkeley, Alameda Co., Cal. Architect Sidney R. Newsom, Nevada Bank Bldg., S. P. Owner, Fred Peake. These dwellings will be erected on a tract recently purchased by the owner, and are but a small portion of the improvements contemplated. The dwellings will contain from five to eight rooms and baths each. There will be furnace heat in some and all will have open fire places. The exteriors will be covered with cement plaster and shingles. The plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, \$2,500. Oakland, Cal. Architect none. Owner, J. R. Christensen, Oakland. The dwelling has been designed for a five-room house with bath. The interior finish will be of pine with some oak floors. There will be open fire places and brick mantels. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, \$6,000. Oakland, Cal. Architect, C. B. Barton, 470 13th St., Oakland. Owner Mrs. A. E. Armstrong. The dwelling has been designed for an eight-room house with bath. The interior will be finished in redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick and tile. The tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, frame, \$10,000. Berkeley, Alameda Co., Cal. Architect, Frank Tuerman Swain, Mutual Bank Bldg., S. P. Owner, Alpha Lambda Chapter of the Phi Kappa Sigma Fraternity. The dwelling will contain 16 rooms and 2 baths. There will be furnace heat and open fire places. The interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be shower baths. The exterior of the dwelling will be covered with shingles. The plans are complete and out for figures.

Bungalow—1½ story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, W. E. Boyd, Oakland. The dwelling will contain seven rooms and bath. The interior will be finished in pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile and brick. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and the work will be done by Day Labor.

Bungalow—1½ story and base, frame, \$3,500. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, S. B. Mitchell. The dwelling will contain six rooms and bath. There will be furnace heat and open fire places. The mantels will be of brick. The interior trim will be of pine and redwood. There will be some hardwood floors. Tile will be used in the bath and

kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The plans are complete and the architect is taking figures on the work.

Residence—2 story and base, frame, \$5,000. Oakland, Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, James A. Hunt. The dwelling will contain 10 rooms and bath. The interior finish will be of redwood with some hardwood veneer and oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile. The tile will be used in the baths and kitchen. The exterior of the house will be finished in rustic. The architect is now preparing the working drawings.

Residence Alterations—2 story and base, frame. Cost not listed. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, James A. Hunt. The work will include the complete rearrangement of the interior of the dwelling, new plumbing, heating and electric work. There will also be considerable changes made in the exterior of the house. The plans are being prepared.

Bank—1 story and base, reinforced concrete, \$10,000. Pleasanton, Alameda Co., Cal. Architect, William Binder, Red Bldg., San Jose. Owner, H. Arndt, Pleasanton. The building will contain the banking rooms of the owner. There will be a fire proof vault. The interior will be finished in pine and hardwoods. The exterior of the building will be faced with cement plaster. The plans are complete and figures are being taken.

Flat and Store—2 story and base, frame, \$3,000. Oakland, Cal. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owner, J. J. McKegan. The building will be arranged for a store on the first floor and two modern flats of five and six rooms on the upper floors. The interior of the flats will be finished in pine throughout. The exterior of the building will be covered with rustic. The plans are complete and figures are being taken by the architect.

Flats—2 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, T. Hoswell, 478 26th St., Oakland. The building will cover an area of 2x48 feet, and will contain two flats of five and six rooms each and bath. The interiors will be finished in pine and redwood. There will be open fire places and tile mantels. The exterior of the building will be covered with rustic. The plans are in the hands of the owner and figures on the work are being taken.

Auditorium—Class A construction, \$50,000. Oakland, Cal. Architect, City Architect J. J. Donovan, City Hall Annex, Oakland. Owners, City of Oakland. The plans for this building have just been started. The City Attorney has given an opinion clearing the site of all legal obstacles and the work will be rushed to an early completion. The plans have not progressed far enough to give any detailed description of the work, but as soon as the preliminary work is complete a description will be published.

Plumbing, Partitions, Wood and Metal Furniture for College Building—Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Gulen Howard, 604 Mission St., S. F. Owners, Regents

San Jose, Santa Clara Co., Cal. Archi-
tect, William Binder, Red Bldg., San
Jose. Owners, Jefferson Realty Co.
The building will cover a large ground
area, and is to be fire proof in con-
struction. There will be one store be-
sides the theatre. The theatre proper
will have a seating capacity of about
500 people. The interior will be hand-
somerly finished. There will be a modern
system of ventilation. The exte-
rior of the building will be faced with
cement plaster. The architect is now
preparing the working drawings.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

Apartment house—2 story and base, brick and steel, \$75,000. Fresno, Fresno Co., Cal. Architect, Edward T

Bunkles, Crocker Bldg., S. F. Owner, H. H. Rix. The building has been mentioned in these columns before when the architect was first preparing the plans. The working drawings have been completed and figures are now being taken. The building will contain in the neighborhood of 54 apartments of two and three rooms each with private bath and wall beds. There will be steam heat. The exterior of the building will be faced with pressed brick.

Church—2 story and base, frame and concrete, \$25,000. Modesto, Stanislaus Co., Cal. Architect, John J. Poley, Annadock Bldg., S. F. Owners, Roman Catholic Church. The building will cover a considerable area. The main auditorium will have a seating capacity of 600 people. The design is being worked out in the Spanish Mission style. The interior will be handsomely finished in cement plaster and oak. The exterior of the building will be covered with cement plaster on metal lath. The roof will be covered with clay tile. The architect is now completing the working drawings.

School—1 story and base, frame. Cost not stated. Riverdale, Fresno Co., Cal. Architects, A. C. Swartz & Son, Fresno. Owners, Riverdale School District. The building will contain two class rooms. There will be no heating system. The exterior will be covered with rustic. The plans are complete and bids will be opened on May 9th.

School Reconstruction—Brick and concrete, \$50,000. Visalia, Tulare Co., Cal. Architect, Morve L. Weaver, Holt Bldg., Visalia. Owners, Visalia School District. The building which was recently destroyed by fire is to be reconstructed at once together with an addition. The plans for the work are complete and show a thoroughly modern High School. Bids are now being taken and will be opened by the Board of Education on May 25th. Charles T. Pool is Clerk of the Board. Plans can be secured from either the architect or the Clerk of the Board of Education at Visalia.

LOS ANGELES AND SOUTH- ERN CALIFORNIA.

Apartment House—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Eisen & Son, Wilcox Bldg., L. A. Owner, C. S. Hamberg. This work has been mentioned here before when the plans were first out for figures. Several slight changes have been made in the drawings and the architects are now taking new figures for the general construction. Bids will be opened the latter part of this week.

Apartment House—3 story and base, brick. Cost not stated. Long Beach, Los Angeles Co., Cal. Architects, Scholes & Lochrudge, First National Bank Bldg., Long Beach. Owners, Long Beach Improvement Co. The building will be 51x115 feet and will contain 70 rooms and 25 baths. There will be steam heat, elevator service, a vacuum cleaning system and wall beds. The exterior of the building will be faced with pressed brick. The architects are now completing the working drawings and will be ready to receive figures next week.

Apartment House—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, E. J. Borgmeyer, Stimson Bldg., L. A. Owner, Mrs. John Hetherington. The building will be erected on a corner lot and will contain 60 rooms arranged in suites of two and three rooms each with connecting baths. There will be steam heat, elevator service, wall beds and other improvements. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Apartment House—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owner, Jeremy Royce. The building will cover an area of 47x110 feet. The interior of the building will be arranged in twenty suites of two and three rooms each with connecting baths. There will be steam heat and wall beds. The exterior of the building will be faced with pressed brick. The architects are preparing the plans.

Apartment House—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, C. W. Baker, 2432 So. Figueroa St., L. A. Owner, A. C. Stillson. The building will be 98x143 feet. There will be 150 rooms arranged in suites of two and three rooms each. There will be wall beds, steam heat, elevator service, refrigerators and a vacuum cleaning system. The interior finish will be of mahogany and oak, with hardwood floors throughout. The exterior of the building will be faced with pressed brick. Bids for the various parts of the work are now being taken.

Bank and Stores—2 story and base, steel and brick. Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, First National Bank of Santa Barbara. This building has been mentioned here before when the architects were first selected to prepare the plans. The bids for the construction were opened on May 6th and an award of contract will be made at once. There will be several stores on the first floor besides the bank and modern offices above.

Church—2 story and base, reinforced concrete and brick. Cost not stated. Los Angeles, Cal. Architect, Elmer Grey, Wright and Callender Bldg., L. A. Owners, First Church of Christ, Scientist. The building will be 178x114 feet. The seating capacity of the main auditorium will be 1050, the balcony 250 and the Sunday school room 350. The building has been described in these columns before. The plans are complete and bids are being taken by the architect.

Church—1 story and base, reinforced concrete, \$80,000, San Diego, Cal. Architect, Norman P. Marsh, Broadway Central Bldg., L. A. Owners, First Baptist Church of San Diego. The building will cover an area of 100x150 feet. The design is in the Mission style, with a cement exterior. The interior has been arranged for a main auditorium, Sunday school rooms, private class rooms, ladies' parlors, library and social rooms. The interior finish will be of pine. The architect has just been commissioned to prepare the plans.

Factory—3 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, J. J. Borgmeyer, Stinson Bldg., L. A. Owner, Andrew Beyle. The building will be 10x300 feet and is to be designed to meet the special needs of the owner. There will be a concrete floor on the first story. The exterior of the structure will be faced with cement plaster. The plans are complete and the work will be done by Day Labor.

Stables—3 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, S. Tilden Norton, Title Insurance Bldg., L. A. Owners, Pioneer Truck Co. The building will cover an area of 100x120 feet. The first and second floors will be given over to the stabling of horses. The third floor will be used for the storage of feed. The exterior of the building will be faced with cement plaster. The plans are complete and the work is being done by Day Labor.

Garage—2 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, Mrs. S. H. Van Nuy. The building will be 150x155 feet and has been designed for a commercial garage. The display room will be 50x150 feet with the office finished of oak and the floor of tile. The construction will be fire proof throughout with metal sash and doors. The exterior of the building will be faced with cement plaster. The plans provide for two additional stories. The plans are complete and figures will be taken at once.

Hotel—10 story and base, reinforced concrete. Cost not stated. Long Beach, Los Angeles Co., Cal. Architect, L. S. Munson, Central Bldg., L. A. Owners, M. P. Tice and associates of L. A. The architect has just been commissioned to prepare the plans and none of the details of the building have been determined upon as yet. It is reported that A. L. Linton of Long Beach will have charge of the general construction. As soon as more complete details are obtainable they will be published in these columns.

Hotel and Stores—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, S. Tilden Norton, Title

Insurance Bldg., L. A. Owner, Mrs. J. Gans. The building will be 70 30x60 feet. There will be four stores on the first floor and about 70 rooms on the upper two floors. There will be steam heat and running water has been provided for all rooms. The exterior of the building will be faced with pressed brick. The plans are complete and figures will be taken at once.

Lodge Hall—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, S. Tilden Norton, Title Insurance Bldg., L. A. Owners, Corona Bldg., N. S. G. W. The building will contain a large social hall, banquet room and kitchen. The exterior of the building will be faced with cement plaster. The interior will be finished in pine and hardwood with hardwood floors. The plans are being prepared.

Lodge Hall and Stores—2 story and base, brick. Cost not stated. Redondo, Los Angeles Co., Cal. Architects, Gentry & Schultz, Byrne Bldg., L. A. Owner, R. H. Meyers. The building will be 60x80 feet, and will contain two stories on the first floor. The exterior will be faced with Redondo sand brick. The plans are complete and the work will be done by Day Labor.
